ARMY CIRCULARS.

No. 265.—The following Clause 166 of Army Circulars, dated the 1st December 1876, is declared

applicable to India, and published for general information :—

Stoppages from Soldiers' pay for the benefit of their Wives and Children.

CLAUSE 166. 1.—Remittances on account of the stoppages made from the pay of soldiers, under the Mutiny Act and Articles of War, for the benefit of their wives and children, will, in all instances, be described in vouchers, pay lists, remittance rolls, &c., as "compulsory remittances."

2.—When a soldier, subject to these stoppages, is sent from the depôt to the Service Companies, or is transferred to another company, regiment, or brigade, care will be taken by his Commanding Officer to communicate to the officer in command of his future company, regiment, or brigade, the order placing the man under stoppage.

CLOTHING.

No. 266.—With advertence to G. G. Os. Nos. 780 and 837 of 1874, and No. 105 of 1877, it is hereby notified that the spurs to be supplied to the British Artillery and Cavalry in India to be worn with their knee boots will be of the swan neck pattern, and will be provided by the Clothing Department, and not by the Ordnance Department, as heretofore.

They will be issued quinquennially in accordance with the scale laid down in G. G. O. No. 837 of 1874, and accounted for as articles of clothing.

H. K. BURNE, *Colonel,*
Secretary to the Govt. of India.

G. W. CLINE, LL.D., *Assistant Commissioner.*

POST OFFICE.

NOTIFICATIONS.

Calcutta, the 5th March 1877.

GOVERNMENT SIMLA PASSENGER DAK.

From the 10th March to the 15th April 1877, arrangements have been made for booking Express Carriage Dâks from Umballa to Kalka at the Calcutta Post Office* under certain rules and conditions, of which a printed copy can be obtained on application to the Post Master, Calcutta.

* Post Master's room, east verandah, between the hours of 10 A.M. and 4 P.M.

2. The charge for an Express Carriage Dâk from Umballa to Kalka will be Rs. 30. Two ordinary vans carrying mails will also leave the Umballa Post Office—one in the morning at or about 6 A.M., and the other in the evening at or about 6 P.M. In each of these vans four seats will be available for passengers (if the weight of the mails admit) at a charge of Rs. 6 per seat.

A. M. MONTEATH,
Director Genl. of the Post Office of India.

The 16th March 1877.

Mails for the Straits and Hong-Kong, for transmission per Steamers *Japan* and *Argyll*, will be closed at the General Post Office on Saturday, the 17th March 1877, at 7 P. M.

Mails for Ceylon, Straits, Hong-Kong, United States of America, and the Colonies of Queensland, New South Wales and Victoria, *viâ* Torres Straits (letters, &c., for the latter Colony must be specially superscribed), for transmission per Steamer from Bombay, will be closed at the General Post Office on Saturday, the 17th March 1877, at 7 P. M.

Mails for Rangoon and Moulmein, for transmission per Steamer *India*, will be closed at the General Post Office on Sunday, the 18th March 1877, at 7 P. M.

Mails for Akyab and Kyouk-Phyoo, for transmission per Steamer *Mahratta*, will be closed at the General Post Office on Sunday, the 18th March 1877, at 7 P. M.

Mail for Madras only, for transmission per P. & O. Steamer *Poonah*, will be closed at the General Post Office on Monday, the 19th March 1877, at 7 P. M.

Mails for Persian Gulf, for transmission per Steamer from Bombay, will be closed at the General Post Office on Tuesday, the 20th March 1877, at 7 P. M.

Mails for Madras, Ceylon and the intermediate ports, for transmission per Steamer *Rajpootana*, will be closed at the General Post Office on Wednesday, the 21st March 1877, at 7 P. M.

Owing to the state of the tides the P. & O. Steamer will leave Calcutta on the 20th instead of the 22nd March 1877, but she will be required to remain at Madras until the contract date for leaving that Port, *viz.*, 27th March 1877. Mail for Galle will close at the General Post Office at 7 P. M. on Wednesday, the 21st March 1877, and be forwarded by Railway to Madras, so as to catch the P. & O. Steamer there.

Mails for Port Blair and Camorta, for transmission per Steamer *Satara*, will be closed at the General Post Office on Thursday, the 22nd March 1877, at 7 P. M.

The next Overland Mail *viâ* Bombay will close at the General Post Office on Friday, the 23rd March 1877.

2. Book-post and pattern packets must be posted on the 22nd March 1877.

N. B.—The Letter Box will close at 7 P. M. precisely, after which hour overland letters, fully prepaid and bearing an extra postage stamp of two (2) annas on each cover, will be received up to 7-30 P. M., or bearing an extra postage stamp of four (4) annas on each cover up to 8 P. M.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The first part of the "Indian Law Reports," published under the authority of the Governor General in Council, will appear as soon after the 1st January 1876 as can be arranged for. The Reports will appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set:

Terms of subscription, payable annually in advance.

	Without Postage.	With Postage.
For the CALCUTTA SERIES ...	Rs. 35	Rs. 40
„ MADRAS SERIES ...	„ 8	„ 9
„ BOMBAY SERIES ...	„ 8	„ 9
„ ALLAHABAD SERIES ...	„ 8	„ 9
Complete set	„ 45	„ 50

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

For a Part of the CALCUTTA SERIES ...	Rs.	3 8
„ „ MADRAS SERIES ...	„	1 0
„ „ BOMBAY SERIES ...	„	1 0
„ „ ALLAHABAD SERIES.	„	1 0
Complete set		4 0

Persons desiring to subscribe for or purchase the Reports, should apply to—

MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER, VINING AND CO., BOMBAY;
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY;
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

The publication of the Bengal Law Reports and the Madras, Bombay, and N. W. P. High Court Reports will cease on the completion of the volumes now in course of publication.

Subscribers to the Bengal Law Reports, who have already paid their subscriptions to the end of June 1876, will be supplied with the complete set of Reports for the first half of 1876 in lieu of the volume of the Bengal Law Reports which they would otherwise have received.

List of Books for sale at the Library of the Asiatic Society of Bengal,

NO. 57, PARK STREET, CALCUTTA,

AND OBTAINABLE FROM THE SOCIETY'S LONDON AGENTS, MESSRS. TRÜBNER & CO., 57 AND 59, LUDGATE HILL, LONDON, E. C.

61. Magistrate issuing warrant may superintend its execution.
62. Arrest in presence of Magistrate.
63. Where warrant may be executed.
64. Execution of warrant outside issuing Magistrate's jurisdiction.
65. Procedure on execution of warrant outside issuer's jurisdiction.
66. Magistrate and Police-officer.
67. Proclamation for person absconding.
Proclamation how published.
Evidence of publication.
68. Attachment of property of person absconding.
69. Restoration of forfeited property.

CHAPTER VII.—OF BAIL.

70. Custody of person arrested.
When bail shall be taken.
71. When bail shall not be taken.
When bail may be taken.
Warrant for intermediate custody.
72. Recognizance of accused and sureties.
73. Discharge on bail.
74. Admission to bail after failure in first instance.
75. Power to order sufficient bail when that first taken is insufficient.
76. Discharge of sureties.
77. Procedure to compel payment of penalty by accused.

SECTIONS.

78. Procedure to compel payment of penalty by sureties.
79. In what cases powers given by sections 77 and 78 may be exercised.
Remission of part of penalty.
80. Deposit instead of bail.

CHAPTER VIII.—OF INQUIRY INTO CASES TRIABLE BY THE HIGH COURT.

81. Procedure in preliminary inquiries.
82. Examination of complainant and witnesses for prosecution.
83. Examination to be in presence of accused.
Procedure in inquiries preliminary to commitment.
Accused may examine, cross-examine and re-examine.
84. Examination of accused how recorded.
85. Power of Magistrate to summon and examine any person.
86. Adjournment of inquiry and remand.
87. When accused person to be discharged.
88. When accused to be committed for trial.
89. Framing of charge on which accused is to be tried before High Court.
Form of commitment.
Charge, &c., to be forwarded to High Court.
Commitment when to be notified.
90. Charge to be explained, and copy furnished, to accused.
91. List of witnesses for defence on trial before High Court.
Further list.
Power to summon supplementary witnesses.
92. Summons to witnesses when accused person is to be committed.
93. Recognizances of complainants and witnesses.
Detention in custody in case of refusal to attend or to execute recognizance.

CHAPTER IX.—OF THE CHARGE.

Form of Charges.

94. Charge to state offence.
Specific name of offence, sufficient description.
How stated where offence has no specific name.
What implied in charges.
Language of charge.
Previous conviction when to be set out.
95. Particulars as to time, place and person.
96. When manner of committing offence must be stated.
97. Forms in schedule.
98. Effect of errors.
99. Prisoner may apply for amendment.
100. Magistrate may alter charge.

SECTIONS.

101. When trial may proceed immediately after alteration.
102. When new trial may be directed or trial suspended.
Adjournment.
103. Recall of witnesses when charge altered.
104. Stay of proceedings if prosecution of offence in altered charge require previous sanction.

Joinder of Charges.

105. Separate charges for distinct offences.
106. More offences than one of same kind may be charged within a year of each other.
107. I.—Trial of more than one offence.
II.—One offence falling within two definitions.
III.—Acts severally constituting more than one offence, but collectively coming within one definition.
108. Where it is doubtful what offence has been committed.
109. When a person is charged with one offence, he can be convicted of another.
110. When offence proved included in offence charged.
111. What persons may be charged jointly.
112. Withdrawal of remaining charges, on conviction on one of several charges.

Previous Acquittals or Convictions.

113. Person once convicted or acquitted not to be tried for same offence.

CHAPTER X.—OF THE TRIAL OF CASES BY PRESIDENCY MAGISTRATES.

114. Cases may be tried summarily.
115. Record of evidence.
116. Charge when dispensed with.
Charge when necessary.
117. Effect on proceedings of defect in complaint or process.
118. Dismissal or adjournment on non-appearance of complainant.
119. Procedure on appearance of parties.
120. Conviction on admission of truth of complaint.
121. Procedure when no such admission is made.
122. Charge when drawn up.
123. Procedure on examining accused.
124. Adjournment.
125. Withdrawal of complaint.
126. Acquittal.
Sentence.
127. Procedure when, after commencement of trial, Magistrate finds case beyond his jurisdiction.
128. Trial of persons previously convicted of offences against coinage, stamp law or property.

General Provisions as to Inquiries and Trials.

SECTIONS.

129. Permission to conduct prosecution.
130. Right of accused to be defended.
131. Procedure where accused does not understand proceedings.
132. Presidency Magistrates' Courts to be open.
133. Compounding offences.

CHAPTER XI.—OF EVIDENCE.

A.—Of securing the Attendance of Witnesses.

134. Power to summon material witness or examine person present.
135. When warrant of arrest may issue in first instance.
136. Arrest of person disobeying summons.
137. Procedure when warrant cannot be served.
138. Attachment, &c., of property ordered to be attached under section 137.
139. Power to order prisoner in jail to be brought up for examination.
140. Power to order complaints, &c., to execute recognizances.
141. Committal of person refusing to answer.

B.—Of Witnesses.

142. In cases triable upon summons.
143. In cases triable upon warrant.

C.—Of securing Documentary Evidence.

144. Summons to produce document required as evidence.
145. Issue of search-warrant in first instance.
146. Procedure as to letters in custody of Postal Department or telegraph officer.
147. Power to impound document produced.

D.—Of the Examination of Accused Persons.

148. Examination of accused.
149. No influence to be used to induce disclosures.
150. Tender of pardon to accomplice.
151. Commitment of person to whom pardon has been tendered.

E.—Special Rules of Evidence.

152. Deposition of medical witness.
Power to summon medical witness.
153. Report of chemical examiner.
Genuineness of signature may be presumed.
Power to summon chemical examiner.
154. Previous conviction or acquittal how proved.
155. Record of evidence in absence of accused.
156. Convictions on evidence partly recorded by one Magistrate and partly by another.
157. When attendance of witness may be dispensed with.

SECTIONS.

158. Issue of commission and procedure thereunder.
Commission in case of witness being within Presidency town.
Complainant and accused may examine witness.
Return of commission.

F.—Of Search-warrants.

159. Search-warrant when grantable.
160. Search of house suspected to contain stolen property or forged documents.
161. Direction, &c., of search-warrants.
162. Persons in charge of closed place to allow search.
163. Place to be searched may be broken open.
164. Search of zanáná.
165. Search to be made in presence of witnesses.
Occupant of place searched may attend.
166. Mode of searching women.

CHAPTER XII.—OF APPEALS.

167. Appeal by person convicted.
168. Appeal by Government from order of acquittal.
169. Copy of order to accompany petition.
170. Copies of proceedings.
171. Procedure when appellant in jail.
172. Procedure on receiving petition of appeal.
Power to reject appeal summarily.
Power to call for record.
Sentence not to be enhanced when appeal rejected under this section.
173. Notice of day for hearing appeal.
Service of notice.
174. High Court may alter or reverse finding and sentence, or enhance sentence.
175. Suspension of sentence pending appeal.
Release of appellant on bail.
176. High Court may make or direct further inquiry.
177. Order when reversible by reason of error or defect in charge or proceedings.
178. Irregularity before trial properly held.
179. Procedure in case of conviction by Magistrate not having jurisdiction.
180. Unless otherwise provided, no appeal to lie from order of Presidency Magistrate.
181. Notice to Public Prosecutor of intention to apply under Act X of 1875, section 147.
182. Magistrate may state grounds of his decision.

CHAPTER XIII.—OF EXECUTION.

183. Court to send accused, with warrant for execution of sentence, to officer in charge of jail.
184. Form and direction of warrant of commitment.

SECTIONS.

185. Levy of fine.
Section to what cases applicable.
Detention of offender until return made to distress-warrant.
Distress not illegal nor distrainer a trespasser for defect of form in proceedings.
Who may issue distress-warrant.
186. Payment of fine in compensation.
187. Whipping, if imposed in addition to imprisonment, in appealable case, when to be inflicted.
188. Mode of inflicting punishment of whipping.
189. Punishment not to be inflicted if offender not in fit state of health.
Stay of execution.
190. Not to be executed by instalments.
191. Procedure if punishment be prevented under section 189.
192. Currency of sentence on escaped convicts.
193. Commencement of sentence on offender already sentenced for other offence.

PART III.

CHAPTER XIV.—OF LUNATICS.

194. Procedure when accused is a lunatic.
195. When accused appears to have been insane.
196. Release of lunatic on bail.
Custody when bail not given.
197. Resumption of inquiry or trial.
198. Procedure on accused appearing before Magistrate.
199. Finding in case of acquittal on ground of being lunatic.
200. Procedure when lunatic committed the act alleged.
201. Visiting of lunatic prisoners.
202. Procedure where lunatic prisoner reported capable of making defence.
203. Procedure where lunatic confined under section 199 is declared capable of being discharged.
204. Delivery of lunatic to care of relative.

CHAPTER XV.—OF CONTEMPTS OF COURT.

205. Procedure in certain cases of contempt.
206. Procedure where Court considers that accused should be imprisoned, or fined more than 200 rupees.
207. Discharge of offender on submission or apology.

CHAPTER XVI.—OF SECURITY FOR KEEPING THE PEACE AND FOR GOOD BEHAVIOUR.

A.—Security for keeping the Peace.

SECTIONS.

208. Personal recognizance to keep the peace in cases of conviction.
209. Sureties for keeping the peace.
210. Commencement of period during which person may be bound to keep the peace.
211. Extension of time for which person is bound.

B.—Security for Good Behaviour.

212. When Magistrate may require security for good behaviour for six months.
213. When Magistrate may require security for good behaviour for one year.
214. Procedure where security required for more than one year.

C.—Provisions as to both kinds of Security.

215. Summons to person to show cause why he should not give bond to keep the peace or for good behaviour.
216. Contents of summons.
217. When warrant of arrest may issue.
218. Magistrate may dispense with personal attendance of person informed against.
219. Discharge of person informed against.
220. Order to give bond and consequence of non-compliance.
221. Proceedings to be laid before High Court.
222. Contents of order for security.
Form of recognizance.
223. Imprisonment in default of security.
Term of imprisonment.
224. Binding of sentenced person.
225. Release of prisoner under requisition of security.
Release of prisoner under requisition of security by order of High Court.
226. Discharge of sureties.
227. Commission, &c., of offence a breach.
228. Recovery of penalty from principal.
229. Recovery of penalty from surety.
230. Proof of previous conviction.
231. Where proceedings under this chapter may be taken.
232. Provisions of chapter not applying to European vagrants.

CHAPTER XVII.—OF RESTORING POSSESSION OF IMMOVEABLE PROPERTY.

233. Power to restore possession of immoveable property.

CHAPTER XVIII.—OF THE MAINTENANCE OF WIVES AND FAMILIES.

SECTIONS.

234. Order for maintenance of wives and children.
Enforcement of order.
Proviso.
235. Alteration in allowance.
236. Enforcement of order.

PART IV.

CHAPTER XIX.—MISCELLANEOUS.

237. Procedure in miscellaneous criminal cases and proceedings.
238. Offences against Railway, Telegraph, Post Office and Arms' Acts.
239. Extent of jurisdiction.
240. Reference to High Court.
241. Disposal of case according to decision of High Court.
Direction as to costs.
242. Compensation to person groundlessly given in charge or complained against.
243. Order for disposal of property regarding which offence committed.
244. Power to order disposal of property connected with charge, in police-custody.
245. Expenses of complainants and witnesses.
246. All persons to give information of certain offences.
247. All persons to assist Magistrate and Police in certain cases.

THE FIRST SCHEDULE—ENACTMENTS REPEALED.

THE SECOND SCHEDULE—TABULAR STATEMENT OF OFFENCES.

THE THIRD SCHEDULE—FORMS.

An Act to regulate the procedure and increase the jurisdiction of the Courts of Magistrates in the Presidency Towns.

Preamble.

WHEREAS it is expedient to consolidate and amend the law regulating the procedure of the Courts of Magistrates in the Presidency towns and to increase the jurisdiction of such Courts; It is hereby enacted as follows:—

PART I.

CHAPTER I.—PRELIMINARY.

Short title.

1. This Act may be called "The Presidency Magistrates' Act, 1877":

Commencement.

And it shall come into force on the first day of April 1877.

Repeal of Acts.

2. On and from that day the Acts mentioned in the first schedule hereto annexed shall be repealed to the extent specified in the third column of the said schedule.

Saving of powers under local laws.

3. Nothing in this Act shall be deemed to restrict any power conferred by any special or local law.

Matters indicated in second schedule.

4. The Court by which an offence is triable under this Act is indicated by the seventh column of the second schedule hereto annexed and by the third explanatory note prefixed to such schedule.

The cases in which the Police may arrest without warrant or not, in the case of each offence under the Indian Penal Code or any law referred to in section 14,

whether a warrant or a summons shall ordinarily issue in the first instance, and

whether the offence is bailable or not,

are indicated respectively by the third, fourth and fifth columns of the same schedule.

The punishment for each offence under the Indian Penal Code is indicated by the sixth column of the same schedule.

Pending cases.

5. Cases pending when this Act comes into force in any of the Courts of Police Magistrates, or in the town of Bombay in the Court of Petty Sessions, shall be dealt with, as far as may be, according to the procedure herein provided.

Definitions.

6. In this Act, unless there be something repugnant in the subject or context:—

"writing."

"writing" includes print, lithography, photography and engraving:

bailable offence or case."

"bailable offence" means an offence for, and "bailable case" means a case in, which bail may be taken under any law in force for the time being:

"non-bailable offence or case."

"non-bailable offence" means an offence for, and "non-bailable case" means a case in, which bail may not be taken under any law in force for the time being:

"chapter." "chapter" means a chapter of this Act:

"place." "place" includes also house, building and vessel: and

Words referring to acts done. words which refer to acts done extend also to illegal omissions.

CHAPTER II.—CONSTITUTION AND POWERS OF THE PRESIDENCY MAGISTRATES' COURTS.

Establishment of Presidency Magistrates' Courts. **7.** The Local Government may, with the sanction of the Governor General in Council,

(*a*) constitute within the towns of Calcutta, Madras and Bombay, respectively, so many divisions as the said Government thinks fit,

(*b*) define the extent thereof respectively,

(*c*) from time to time alter the number of such divisions and their respective extents, and

(*d*) establish a Presidency Magistrate's Court for each of such divisions.

Appointment of Presidency Magistrates. **8.** The Local Government may also from time to time appoint a sufficient number of fit persons to be Magistrates for the said towns, respectively, and may suspend or remove any person so appointed.

Any such person may sit and act as a Magistrate in any of the said Courts, and any two or more of such persons may (subject to rules made under section 9) sit together as a Bench.

All persons appointed under this section shall be called Presidency Magistrates.

Every such person shall, by virtue of his office

Presidency Magistrates to be Justices of the Peace. be a Justice of the Peace for the town of which he is a Magistrate,

and shall exercise jurisdiction in all places within

Local limits of jurisdiction. the local limits of the ordinary original criminal jurisdiction of the High Court, and within the limits of the port of such town and of any navigable river or channel leading thereto as such limits are defined under the law for the time being in force for the regulation of ports and port-dues.

The area comprised within such local limits shall be deemed to be a district within the meaning of the Code of Criminal Procedure and of this Act.

Every Presidency Magistrate in the town of Bombay shall exercise all

Bombay Court of Petty Sessions. powers and jurisdictions which, under any law in force immediately before the passing of this Act, may be exercised by the Court of Petty Sessions, and such Court is hereby abolished.

Appointment and powers of Chief Magistrate. **9.** In each of the said towns the Local Government shall appoint one of the Presidency Magistrates to be Chief Magistrate. Such Magistrate shall exercise in such town all the powers which by any law or rule are required to be exercised by any Senior or Chief Magistrate, and may, with the previous sanction of the Local Government, make rules, consistent with this Act, to regulate

(*a*) the conduct and distribution of business and secure uniformity of practice in the Courts of the Magistrates of the Town:

(*b*) the times and places at which Benches of Magistrates shall sit:

(*c*) the constitution of Benches:

(*d*) the mode of settling differences of opinion which may arise between Magistrates in session.

Notwithstanding the last paragraph of section 8, appeals under the law for the time being regulating the municipality of Bombay shall lie to the Chief Magistrate only.

References in Acts to Magistrates of Police. **10.** All existing Magistrates of Police shall be deemed to be Presidency Magistrates under this Act, and all references in any Act now in force to Magistrates of Police shall be deemed to be made to Presidency Magistrates.

Sentences which Presidency Magistrates may pass. **11.** Any Presidency Magistrate may pass the following sentences:—

Imprisonment not exceeding the term of two years (including such solitary confinement as is authorized by law):

Fine not exceeding one thousand rupees:

Whipping.

A Presidency Magistrate may pass any lawful sentence, combining any of the sentences which he is authorized by law to pass.

EXPLANATION.—A Presidency Magistrate may award imprisonment in default of payment of fine, in addition to the full term of imprisonment which, under this section, he is competent to award. But no punishment inflicted under this section shall exceed the punishment provided for the offence by the Indian Penal Code or any special or local law.

Imprisonment in default of payment of fine. **12.** In every case punishable under any law in force for the time being with imprisonment as well as fine, in which the offender is sentenced to a fine, whether with or without imprisonment, the Presidency Magistrate shall be guided by the provisions of sections 64 and 65 of the Indian Penal Code in fixing the period of imprisonment in default of payment of the fine

Proviso as to cases decided by Magistrate.

Provided that, in no case decided by a Presidency Magistrate, where imprisonment has been inflicted as part of the substantive sentence, shall the period of imprisonment inflicted in default of payment of the fine exceed one-fourth of the period of imprisonment which he is competent to inflict as punishment for the offence otherwise than as imprisonment in default of payment of the fine.

Where a person is sentenced to fine only, the Presidency Magistrate may fix such term of imprisonment in default of payment of fine as is allowed by law, provided the term does not exceed two years.

Sentence in cases of simultaneous conviction of several offences.

13. When a person is convicted, at one trial, of two or more offences punishable under the same section or different sections of any law, the Presidency Magistrate may sentence him, for the offences of which he has been convicted, to the several penalties prescribed by such law which such Magistrate is competent to inflict; such penalties, when consisting of imprisonment, to commence the one after the expiration of the other:

Provided that the punishment shall not in the aggregate exceed twice the amount of punishment which the Magistrate is, by his ordinary jurisdiction competent to inflict.

Offences under enactments not specifying Court authorized to try.

14. Offences punishable under any law, other than the Indian Penal Code, containing no distinct provision as to the Court or officer before which or before whom they are to be tried, may be inquired into and tried, according to the provisions hereinafter contained, by a Presidency Magistrate. But no such Magistrate shall pass any sentence in excess of his powers.

Offence committed in Magistrate's presence.

15. When any offence is committed in the presence of a Presidency Magistrate, he may order any person to arrest the offender, and when the offender is arrested may commit him to custody or, if the offence is bailable, may admit him to bail.

Power to record statements and confessions.

16. A Presidency Magistrate may record any confession or other statement made to him at any place within the local limits of his jurisdiction by any person with reference to any offence.

Such confessions shall be recorded in the manner provided by section 84, and such statements shall be recorded in the manner prescribed in section 115, clauses 3, 4 and 5, and such statements and confessions shall, when recorded, be forwarded to the Magistrate by whom the case is inquired into or tried.

No Presidency Magistrate shall record any such confession unless, upon inquiry, he has reason to believe that it was made voluntarily; and on recording any such confession, he shall make a memorandum at the foot thereof to the following effect:—

"I believe that this confession was voluntarily made. It was read over to the person making it and was admitted by him to be correct."

(Signed) *A. B.*,
Presidency Magistrate.

Power to compel restoration of abducted females.

17. Upon complaint made to a Presidency Magistrate on oath of the abduction or unlawful detention of a woman, or of a female child under the age of fourteen years, for any unlawful purpose, he may make an order for the immediate restoration of such woman to her liberty, or of such female child to her husband, parent, guardian or other person having the lawful charge or government of such child, and may compel compliance with such order, using force if necessary.

PART II.

CHAPTER III.—THE PLACE OF INQUIRY AND TRIAL.

Place for inquiry and trial of offence.

18. Every offence shall ordinarily be inquired into, and, if triable by a Magistrate, shall be tried, in the district in which it was committed. If triable by a High Court, it shall (subject to the provisions of section 64A of the Code of Criminal Procedure) be tried by the High Court to which the Magistrate commits.

EXPLANATION.—Offences created by local and special laws may be inquired into and tried in any place where the inquiry or trial might be held under the provisions of those laws or of this Act.

Accused triable in district where act done, or where consequence ensues.

19. When a person is accused of the commission of any offence by reason of anything which has been done, and of any consequence which has ensued, such offence may be inquired into or tried in any district in which any such thing has been done, or any such consequence has ensued.

Illustrations.

(*a.*) A is wounded in district X and dies in district Z. The offence of the culpable homicide of A may be inquired into and tried either in X or Z.

(*b.*) A is wounded in district X, and is, during twenty days, unable to follow his ordinary pursuits in district Y, where he is being treated. The offence of causing grievous hurt to A may be inquired into and tried either in X or Y.

(*c.*) A is put in fear of injury in district X, and is thereby induced, in district Y, to deliver property to the person who put him in fear. The offence of extortion committed on A may be inquired into and tried either in X or Y.

Place for trial where act is offence by reason of relation to other offence.

20. When an act is an offence by reason of its relation to any other act which is also an offence, a charge of the first-mentioned offence may be inquired into and tried, either in the district in which it was committed, or in the district in which the other act was committed.

Illustrations.

(*a.*) A charge of abetment may be inquired into and tried, either in the district in which the abetment was committed, or in the district in which the offence abetted was committed.

(*b*.) A charge of receiving or retaining stolen goods may be inquired into and tried, either in the district in which the goods were stolen, or in the district in which any of them were at any time dishonestly received or retained.

(*c*.) A charge of wrongfully concealing a person known to have been kidnapped may be inquired into and tried in the district in which the wrongful concealing, or in the district in which the kidnapping, took place.

(*d*.) A, B, C and others combine together to abet the waging of war against the Queen. Any of the conspirators may be tried in any district in which acts were done by any one of the persons with whom he or they conspired, in pursuance of their original concerted plan and with reference to their common object.

Place for inquiry or trial where scene of offence is uncertain;

or offence not committed in one district only;

or offence is continuing;

or consists of several acts in different districts;

21. When it is uncertain in which of several districts an offence was committed; or

where an offence is committed partly in one district and partly in another; or

where an offence is a continuing one and continues to be committed in more districts than one; or

where an offence consists of several acts done in different districts

it may be inquired into and tried in any of such districts.

or offence is committed on journey or voyage.

An offence committed on a journey or voyage may be inquired into and tried in any district through or into which the person by whom the offence was committed, or the person against whom, or the thing in respect of which, the offence was committed, passed in the course of that journey or voyage.

Being a thug or dacoit. Escaping from custody.

22. The offence of being a thug, or of having belonged to a gang of dacoits, or of having escaped from custody, may be inquired into and tried wherever the accused person happens to be when the complaint is made.

Criminal misappropriation and criminal breach of trust.

The offence of criminal misappropriation, or of criminal breach of trust, may be inquired into and tried either in the district in which the property which is the subject of the offence was received by the accused person, or in any other district in which the offence was committed.

Murder as a thug, dacoity or dacoity with murder.

The offence of murder as a thug, dacoity or dacoity with murder, may be inquired into and tried wherever the person accused happens to be when arrested, or in any other district in which he might be tried under any other provision of this Act, or any other law relating to the trial of such offence.

Stealing cattle.

The offence of stealing an animal may be inquired into and tried either in the district in which such animal was stolen, or in any other district through or into which it was conveyed.

High Court to decide, in case of doubt, district where inquiry shall take place.

23. Whenever any doubt arises as to the district in which any offence should be inquired into or tried, the High Court within whose jurisdiction the offender is apprehended may decide in which district the offence shall be inquired into or tried.

Effect, on sentence, of holding investigation, inquiry or trial in wrong district.

24. No sentence or order of any criminal Court shall be liable to be set aside merely on the ground that the inquiry or trial was held in a wrong district, unless it is proved, or appears, that the accused person in his defence, or the prosecutor in his prosecution, was actually prejudiced by such error, in either of which cases a new trial may be ordered.

CHAPTER IV.—OF THE COGNIZANCE OF OFFENCES.

When Presidency Magistrate may take cognizance of offences.

25. A Presidency Magistrate may take cognizance of any offence—

(*a*) upon receiving a complaint by a private person,

(*b*) upon information or report by a Police officer,

(*c*) upon information received under section 246,

(*d*) if committed in his presence,

(*e*) upon application under chapter V.

Who may make complaints.

26. Any person acquainted with the facts of a case may make a complaint.

Process to compel appearance.

27. On receipt of a complaint a Presidency Magistrate may, if the person complained of be not already in custody, proceed by summons or warrant to compel his appearance;

and in the cases mentioned in section 25, clauses (*b*), (*c*), (*d*) and (*e*), the Presidency Magistrate may proceed as if he had received a complaint.

Jurisdiction given by complaint.

28. A complaint gives jurisdiction to a Presidency Magistrate—

(*a*) to inquire into or try (as the case may be) any offence covered by the facts complained of, or disclosed on such inquiry or trial,

(*b*) to try or commit for trial (as the case may be) any person not complained against, but who, at the time when the complaint is made, or subsequently, appears to have committed any offence so disclosed, and

(*c*) to issue process for the arrest or to compel the appearance of such person.

Complaint or sanction required in certain cases.

29. Nothing in section 27 or 28 shall be held to authorize a Presidency Magistrate to take cognizance, without complaint, of any offence falling under chapters XIX, XX or XXI of the Indian Penal Code; nor without sanction to receive a complaint, or to take cognizance without complaint of any offence, where such complaint or offence, by any law in force for the time being, may not be received or taken cognizance of without sanction.

Magistrate to examine complainant.

30. Whenever a complaint is made to a Presidency Magistrate, such Magistrate, if he has jurisdiction in the case, shall examine the complainant; and such examination may be on oath or affirmation, or not, as the Magistrate in each case thinks fit:

Provided that the Magistrate, if he thinks fit, may, before the matter of the complaint is brought before him, require it to be reduced to writing.

31. Where the complaint has been made by petition, and the Magistrate neglects to examine the complainant, the trial of the person accused shall not be set aside on this ground.

Effect of omission to examine petitioner.

32. The Magistrate before whom the complaint is duly made may, if, after examining the complainant, there is in his judgment no sufficient ground for proceeding, dismiss the complaint.

Dismissal of complaint.

The dismissal of a complaint shall not prevent subsequent proceedings against the person complained against.

33. If it appears to such Magistrate that there is sufficient ground for proceeding, he shall issue his summons or his warrant (as the case may be) for causing the accused person to appear before him.

Issue of process.

34. When a complaint is made before a Presidency Magistrate having jurisdiction in the case, that any person has committed, or is suspected of having committed, any offence triable by such Magistrate and punishable with fine only, or with imprisonment for a period not exceeding six months, or with both, the Magistrate may (subject to the provisions of section 4) issue his summons directed to such person, requiring him to appear to answer the complaint, at a certain time and place, before such Magistrate as may then be there.

When summons may issue.

If the Magistrate believes that the accused person is about to abscond, he may, instead of issuing a summons, issue a warrant in the first instance for the arrest of such person.

35. When a complaint is made before a Presidency Magistrate having jurisdiction in the case that any person has committed, or is suspected of having committed—

Where warrant or summons may issue on complaint.

(*a*) any offence triable by such Magistrate and punishable with imprisonment for a period exceeding six months, or

(*b*) any offence triable exclusively by the High Court, or which, in the opinion of such Magistrate, ought to be tried by the High Court,

such Magistrate may (subject to the provisions of section 4) issue his warrant to arrest such person, or, if the thinks fit, his summons directed to such person, requiring him to appear to answer the complaint at a certain time and place before such Magistrate as may then be there.

36. If the person served with a summons does not appear before the Magistrate at the time mentioned in such summons, and the Magistrate is satisfied that such summons was duly served in what he deems a reasonable time before the time therein appointed for appearing pursuant thereto,

Warrant to arrest, if summons not obeyed.

or if it appears to the Magistrate that, after due diligence, the summons could not be served according to the provisions of this Act,

the Magistrate may issue his warrant to apprehend the accused person.

37. Whenever the Magistrate issues a summons, he may, if he sees sufficient cause, dispense with the personal attendance of the accused person, and permit him to appear by his advocate, attorney or pleader.

Magistrate may dispense with personal attendance of accused.

But such Magistrate may in his discretion, at any stage of the proceedings, direct the personal attendance of the accused person, and, if necessary, enforce such attendance by issuing a warrant to arrest him.

CHAPTER V.—OF PROSECUTIONS IN CERTAIN CASES.

38. A complaint of an offence punishable under chapter VI of the Indian Penal Code, except section 127, or punishable under section 294A of the same Code, shall not be received by any Presidency Magistrate, unless it be made by order of, or under authority from, the Governor General in Council or the Local Government, or some officer empowered by the Governor General in Council or the Local Government to order or authorize such complaint, or unless it be made by the Advocate General.

Prosecutions for offences against the State.

39. A complaint of an offence of which any Judge or any public servant not removeable from his office without the sanction of the Government, is accused as such Judge or public servant, shall not be received by any Presidency Magistrate, except with the previous sanction or under the direction,

Prosecution of Judges and public servants.

(*a*) of the Government, or

(*b*) of some officer empowered in this behalf by the Government, or

(*c*) of some Court or other authority to which such Judge or public servant is subordinate, and whose power so to sanction or direct such complaint has not been limited by the Government.

No such Judge or public servant shall, unless with the previous sanction of the Government, be prosecuted for any act purporting to be done by him in the discharge of his duty.

The Government may, in any case or class of cases, prescribe the person by whom, and the manner in which, the prosecution is to be conducted, and may specify the Court before which the trial shall be held.

Power of Government as to prosecution.

In this section, the expression "Government" means either the Local Government or the Governor General in Council, and the expressions "Judge" and "public servant" have the meaning assigned to them respectively by the Indian Penal Code.

Definition of "Government," "Judge" and "public servant."

40. A complaint of any offence described in chapter X of the Indian Penal Code, not falling within section 175, 178, 179, 180 or 228 of that Code, shall not be received by any Presidency Magistrate, except with the sanction or on the complaint of the public servant concerned, or of his official superior.

Prosecution for contempts of the lawful authority of public servants.

41. A complaint of an offence against public justice, described in section 193, 194, 195, 196, 199, 200, 205, 206, 207, 208, 209, 210, 211 or 228 of the Indian Penal Code, when such offence is committed before or against a civil or criminal Court, shall not be received by any Presidency Magistrate, except with the sanction of the Court before or against which the offence was committed, or of some other Court to which such Court is subordinate.

Sanction to prosecution for certain offences against public justice.

Sanction to prosecution for certain offences relating to documents given in evidence.

42. A complaint of an offence relating to documents, described in section 463, 471, 475 or 476 of the Indian Penal Code, when the document has been given in evidence in any proceedings in any civil or criminal Court, shall not be received against any party to or witness in such proceedings, by any Presidency Magistrate, except with the sanction of the Court in which the document was given in evidence, or of some other Court to which such Court is subordinate.

Nature of sanction necessary.

43. The sanction referred to in sections 40, 41 and 42 respectively may be expressed in general terms, and need not name the accused person, and may be given at any time. But it shall, so far as practicable, specify the Court or other place in which, and the occasion on which, the offence is alleged to have been committed.

A sanction under any one of the three last preceding sections shall be deemed sufficient authority for the Presidency Magistrate to alter the charge (if any) to one of an offence coming within either of the two remaining sections, if the facts disclose such offence.

Procedure in cases mentioned in section 40, 41 or 42.

44. When any civil, criminal or other Court inferior to a High Court is of opinion that there is sufficient ground for inquiring into any complaint mentioned in section 40, 41 or 42, such Court may either itself inquire into and commit the case for trial before the High Court, or may send the case for disposal to any Presidency Magistrate having jurisdiction.

The Court may send the accused person in custody, or take sufficient bail for his appearance, before such Magistrate; and may bind over any person to appear and give evidence in the case.

Nothing in this section shall prevent a Presidency Magistrate from disposing of cases under sections 172, 173, 174 and 175 of the Indian Penal Code where he himself is the public servant concerned.

Prosecution for adultery.

45. A complaint of an offence under section 497 of the Indian Penal Code shall be made only by the husband of the woman concerned, or by the other person (if any) under whose care she was living at the time when the adultery was committed.

Prosecution for enticing away married woman.

A complaint of an offence under section 498 of the Indian Penal Code shall be made only by the husband of the woman concerned, or by the person (if any) having the care of her on behalf of her husband at the time when the offence was committed.

Application to be deemed a complaint.

46. The application of the public servant or Court to a Presidency Magistrate to inquire into or try any case under this chapter shall be deemed a sufficient complaint.

CHAPTER VI.—OF THE SUMMONS AND WARRANT.

Form of summons.

47. Every summons issued by a Presidency Magistrate to an accused person shall be in writing signed by such Magistrate, and shall be in the form (A) given in the third schedule to this Act, or to the like effect.

Summons how served.

48. If the accused person can be found, the summons shall be served on him personally, wherever he may be, by delivering or tendering the summons to him.

Every person to whom a summons is delivered or tendered under this section shall, if required by the person delivering or tendering the same, sign a receipt therefor, or countersign a copy thereof.

Service when accused cannot be found.

49. If the accused person cannot be found, the summons may be served by leaving it for him with some adult male member or servant of his family residing with him; and the person with whom the summons is so left shall, if so required by the serving officer, sign a receipt therefor, or countersign a copy thereof. If there is no such member or servant with whom the summons can be left, the serving officer shall fix it on some conspicuous part of the house in which the accused person ordinarily resides, and thereupon the summons shall be deemed to have been duly served.

Service on servants of Government and Railway Companies.

When the person summoned is in the service of Government or of any Railway Company, the Magistrate issuing the summons may send it to the head of the office in which the person summoned is employed; and such head shall thereupon cause the summons to be served in manner hereinbefore provided.

Service of summons outside Presidency Towns.

50. When a summons issued by a Presidency Magistrate is to be served at any place outside the local limits of his jurisdiction, he may send the summons in duplicate to the Magistrate of the place where the accused resides or is, to be there served.

Proof of service in such cases and when server not present.

51. When a summons issued by a Presidency Magistrate is served outside such local limits as aforesaid, and also in cases where the person who has served the same is not present at the hearing of the complaint, the service may be proved—

(*a*) by a solemn declaration, purporting to be made before a Magistrate, that such summons has been served, and such declaration may be endorsed on the duplicate summons and returned to the Magistrate who issued the summons, or

(*b*) by a copy of the summons purporting to be countersigned by the person to whom it is addressed, or

(*c*) by a receipt under section 48.

Provisions applicable to all summonses under Act.

52. The provisions relating to a summons, its issue and service, contained in sections 47 to 51 (both inclusive), shall be applicable to every summons issued under this Act.

Issue of warrant in addition to summons.

53. A Presidency Magistrate may, notwithstanding the issue of a summons under this chapter, either before the appearance of the accused person as required by such summons, or after he fails so to appear, issue a warrant of arrest against him.

54. A Presidency Magistrate may issue a summons for the attendance, or a warrant for the apprehension, of any person within the local limits of his jurisdiction, in respect of any offence alleged or suspected to have been committed by such person in a different district, or on the high seas, or in a foreign country: provided that if the offence were committed within such local limits, the Magistrate might issue a summons or warrant.

Summons or warrant for apprehension of person within jurisdiction for offence committed beyond.

55. On the attendance or apprehension of such person, if the Presidency Magistrate has not jurisdiction in the case, he shall either send such person to the Magistrate within the local limits of whose jurisdiction the offence is alleged to have been committed, or if the offence is bailable, take bail for his appearance before such Magistrate.

Magistrate's procedure on arrest, under his own warrant, for offence committed out of his jurisdiction.

When the Presidency Magistrate cannot satisfy himself as to the Magistrate to whom the person so attending or arrested should be sent, he shall report the case for the orders of the High Court.

56. Every warrant issued by a Presidency Magistrate shall be in writing under his hand, shall be directed to one or more Police-officers, and shall be in the form (B) given in the third schedule to this Act, or to the like effect.

Form, and direction of warrant.

A warrant issued under this Act remains in force until it is cancelled by the Magistrate who issued it, or until it is executed.

Continuance of warrant.

57. A fee of eight annas shall be paid for every summons or warrant issued by a Presidency Magistrate, except in the case of a summons to attend and give evidence or to produce documents, in which case there shall be paid a fee of four annas:

Fees for summonses id warrants.

Provided that such Magistrate may in any case remit any such fee, if he is satisfied that the complainant is unable to pay the same, and shall remit it when the complaint is made by a public servant in the execution of his duty.

Power to remit fees.

58. A Presidency Magistrate, in issuing a warrant for the arrest of any person, may in his discretion direct by endorsement on the warrant, that if such person give sufficient bail as therein mentioned for his appearance before the Magistrate on a specified day to answer the complaint, the officer to whom the warrant is directed shall take such bail, and shall release such person from custody.

When Magistrate may direct bail to be taken.

The endorsement shall state (*a*) the number of sureties, (*b*) the amount in which they and the accused person are to be respectively bound, and (*c*) the day on which he is to appear before the Magistrate.

If bail be taken, the officer to whom the warrant is directed shall forward the recognizance to the Presidency Magistrate.

Recognizance to be forwarded.

59. When a warrant is directed to more Police-officers than one, it may be executed by all, or by any one or more, of such officer.

Warrant to several persons.

60. A warrant directed to any Police-officer may also be executed by any other Police-officer whose name is endorsed upon the warrant by the officer to whom it is directed or endorsed.

Execution of warrant by Police-officer other than the one addressed.

61. Any Presidency Magistrate who issues a warrant of arrest may attend personally for the purpose of seeing that the warrant is duly executed.

Magistrate issuing warrant may superintend its execution.

62. Any such Magistrate may also at any time direct the arrest, in his presence, of any person for whose arrest he may issue a warrant.

Arrest in presence of agistrate.

63. A warrant issued by a Presidency Magistrate shall ordinarily be executed within the local limits of his jurisdiction.

Where warrant may be executed.

But if the person against whom the warrant is issued goes into, or is in, any place outside such limits, the warrant may be executed in such place.

64. A Presidency Magistrate may direct a warrant to be executed outside the local limits of his jurisdiction, either with or without endorsement by a Magistrate within the local limits of whose jurisdiction it is to be executed.

Execution of warrant outside issuing Magistrate's jurisdiction.

Such warrant shall ordinarily be endorsed by the Magistrate within the local limits of whose jurisdiction it is to be executed.

The warrant may be forwarded to such Magistrate for endorsement, either by post or by any Police-officer to whom it is directed.

The Magistrate to whom such warrant is forwarded by post shall endorse his name thereon and cause it to be executed within the local limits of his jurisdiction.

If the warrant is forwarded by a Police-officer to whom it is directed, he may take it either to a Magistrate, or to a Police-officer not below the rank of an officer in charge of a station, within the local limits of whose jurisdiction the warrant is to be executed.

Such Magistrate or Police-officer shall endorse his name thereon, and such endorsement shall be sufficient authority to the Police-officer to whom the warrant is directed to execute the same within such limits, and the local police shall be bound to assist such officer in executing the warrant.

Whenever there is reason to believe that the delay occasioned by obtaining the endorsement of the Magistrate or Police-officer within the local limits of whose jurisdiction the warrant is to be executed will prevent such execution, the Police-officer to whom it is directed may execute the same without such endorsement in any place beyond the local limits of the jurisdiction of the Magistrate who issued it.

65. If a warrant is executed, whether with or without endorsement, outside the district in which it was issued, the person arrested shall, unless the Presidency Magistrate who issued the warrant be within twenty miles, or be nearer than the Magistrate in whose local jurisdiction the arrest was made, or unless bail be taken under section 58, be brought before the Magistrate within the local limits of whose jurisdiction the arrest was made.

Procedure on execution of warrant outside issuer's jurisdiction.

Such Magistrate shall, if the person arrested appears to be the person intended by the Presidency Magistrate, direct his removal in custody to such Magistrate, unless such person is then ready and willing to give the bail (if any) required under section 58, in which case the Magistrate before whom he is so brought shall accept such bail and forward the recognizance to the Presidency Magistrate.

Magistrate and Police-officer.

66. Every Magistrate or Police-officer to whom a warrant under this Act is directed for execution shall execute the same, or cause it to be executed.

Proclamation for person absconding.

67. If a Presidency Magistrate having jurisdiction in the case has reason to believe that any person accused of an offence not coming within section 34 is absconding or concealing himself, so that a warrant issued against him under this Act cannot be executed, such Magistrate may issue a written proclamation, requiring him to appear to answer the complaint within a fixed period not less than thirty days from the date of publishing the proclamation.

Proclamation how published.

Such proclamation shall be published as follows—

(*a*) it shall be publicly read in some conspicuous place of the town or village in which the accused person usually resides;

(*b*) it shall be affixed to some conspicuous part of his ordinary place of abode, or some conspicuous place of such town or village; and

(*c*) a copy thereof shall be affixed to some conspicuous part of such Magistrate's Court-house.

Evidence of publication.

A statement by the Magistrate to the effect that the proclamation was duly published shall be conclusive evidence of compliance with the requirements of this section.

Attachment of property of person absconding.

68. A Presidency Magistrate may order the attachment of any property, moveable or immoveable, belonging to any person believed to be absconding or concealing himself.

Such order shall authorize the attachment of any property within the local limits of the jurisdiction of the Magistrate making the order; and it shall authorize the attachment of any property without such local limits when endorsed by the Magistrate of the district in which such property is situate.

If the property ordered to be attached be immoveable, the attachment under this section shall, in the case of land paying revenue to Government, be made through the Collector of the district in which the land is situate, and, in all other cases, (*a*) by seizure under the order of the Magistrate having jurisdiction; or (*b*) by the appointment of a manager and receiver; or (*c*) by an order prohibiting the payment of rent to the absent person; or by all or any two of such processes as such Magistrate deems proper.

If the person so believed to be absconding or concealing himself does not appear within the time specified in the proclamation, the property under attachment shall be at the disposal of Government, but shall not be sold until the expiration of six months from the date of the attachment, unless it is of a perishable nature, or such Magistrate considers that the sale would be for the benefit of the owner, in either of which cases the Magistrate may cause it to be sold whenever he thinks fit.

Restoration of forfeited property.

69. When any person whose property is or has been at the disposal of Government under the last paragraph of section 68 appears or is found within two years from the date of the attachment, and proves to the satisfaction of the Magistrate by whose order the property was attached that he did not abscond or conceal himself for the purpose of evading justice, such property, or, if the same has been sold, the nett proceeds of the sale, or if part only thereof has been sold, the nett proceeds of the sale and the residue of the property, shall, after satisfying thereout all costs incurred in consequence of the attachment, be delivered to him.

CHAPTER VII.—OF BAIL.

Custody of person arrested.

70. Every person arrested under this Act shall be kept in custody until he is discharged by the order of a competent Court, or until he is admitted to bail.

When bail shall be taken.

When any person appears or is brought before a Presidency Magistrate accused of any bailable offence, such person shall be admitted to bail: Provided that, in cases punishable with fine only, or with imprisonment for a term not exceeding six months, or with both, the Magistrate may discharge him on his binding himself by a personal recognizance in such sum of money as the Magistrate thinks sufficient, to appear and attend at the time and place therein mentioned, and to continue so to attend until otherwise directed by the Magistrate.

When bail shall not be taken.

71. When any person accused of any non-bailable offence appears or is brought before a Presidency Magistrate, such person shall not be admitted to bail, if there appear reasonable grounds for believing that he has been guilty of the offence of which he is accused.

When bail may be taken.

If the evidence given in support of the complaint is, in the opinion of the Magistrate, not such as to afford such grounds,

or if such evidence is adduced on behalf of the accused person as, in the opinion of the Magistrate, weakens the presumption of his guilt,

but there appears to the Magistrate, in either of such cases, to be sufficient ground for further inquiry into his guilt,

the accused person shall be admitted to bail pending such inquiry.

Warrant for intermediate custody.

But if the Magistrate decide not to admit the accused person to bail, he shall commit him to custody by a warrant in the form (C) given in the third schedule hereto annexed, or to the like effect.

Any Presidency Magistrate may, at any subsequent stage of any proceeding under this Act, cancel the admission under this section of any accused person to bail, and may commit him to custody, or may admit to bail any person who has been committed to custody under this section.

Recognizance of accused and sureties.

72. When any person accused before a Presidency Magistrate of any offence is admitted to bail, a recognizance, in such sum

of money as the Magistrate thinks sufficient, shall be entered into by the person so accused and one or more sufficient sureties, conditioned that such person shall attend at the time and place mentioned in the recognizance, and shall continue so to attend until otherwise directed by the Magistrate, and, if required, shall appear when called upon at the High Court, to answer the charge.

It is the duty of the Presidency Magistrate or other officer accepting bail to satisfy himself that every surety entering into such recognizance is a person of whom it may reasonably be presumed that he can, if necessary, satisfy its terms.

Every such recognizance shall be in the form (D) given in the third schedule hereto annexed, or to the like effect.

Discharge on bail.

73. After the recognizance has been entered into, the Presidency Magistrate, in case the accused person has appeared voluntarily or is in the custody of some officer, shall thereupon release him; and in case he is in some jail, shall issue a warrant of release to the officer in charge of the jail, and such officer shall thereupon release him.

Admission to bail after failure in first instance.

74. If the accused person cannot find sufficient bail when permitted so to do, he may, if the Presidency Magistrate thinks fit, be admitted to bail upon finding the same at any time afterwards before conviction.

Power to order sufficient bail when that first taken is insufficient.

75. If, through mistake or fraud, insufficient bail have been taken, or if the bail become afterwards insufficient, the Presidency Magistrate may issue his warrant of arrest directing that the accused person be brought before him and may order such person to find sufficient bail, and on his failing so to do may commit him to prison.

Discharge of sureties.

76. The sureties for the attendance and appearance of an accused person admitted to bail may, at any time, apply to a Presidency Magistrate to discharge their recognizance.

On such application being made, the Magistrate shall issue his warrant of arrest, directing that the accused person be brought before him.

On the appearance of such person pursuant to the warrant, or on his voluntary surrender, the Magistrate shall direct the recognizance of the sureties to be discharged, and shall call upon the accused person to find other sufficient sureties, and if he fail to do so, may commit him to prison.

Procedure to compel payment of penalty by accused.

77. Whenever, by reason of default of attendance or appearance of the person bailed, a Presidency Magistrate is of opinion that proceedings should be had to recover the penalty mentioned in the recognizance into which such person has entered, he shall proceed to recover the same, by issuing a warrant for the attachment and sale of the moveable property belonging to such person, which may be found within the local limits of the jurisdiction of such Magistrate.

Such warrant may be executed within such limits, and it shall authorize the distress and sale of any moveable property belonging to the accused person without such limits, when endorsed by the Magistrate within the local limits of whose jurisdiction such property is found.

Procedure to compel payment of penalty by sureties.

78. Whenever, by reason of default of attendance or appearance of the person bailed, the Presidency Magistrate is of opinion that proceedings should be had to recover from the sureties the penalty mentioned in the recognizance, he shall give them notice to pay the same, or to show cause why it should not be paid.

If such penalty be not paid, and if no sufficient cause for its non-payment be shown, the Presidency Magistrate shall proceed to recover the penalty from such sureties, by issuing a warrant for the attachment and sale of any moveable property belonging to them, or either of them, which may be found within the local limits of the jurisdiction of such Magistrate. Such warrant may be executed within such limits; and it shall authorize the attachment and sale of any moveable property belonging to the sureties, or either of them, without such limits, when endorsed by the Magistrate within the local limits of whose jurisdiction such property is found.

If such penalty be not paid and cannot be recovered by such attachment and sale, such sureties shall be liable to confinement, by order of the Presidency Magistrate, in the civil jail, during a period not exceeding six months.

In what cases powers given by sections 77 and 78 may be exercised.

79. The powers given by sections 77 and 78 may be exercised by every Presidency Magistrate in every case in which a recognizance has been given for the appearance of any person, if default is made by the non-appearance of such person before such Magistrate, according to the conditions of the recognizance:

Remission of part of penalty.

Provided that the Magistrate may, at his discretion, remit any portion of the penalty mentioned in any such recognizance and enforce payment in part only.

Deposit instead of bail.

80. When any person is required by a Presidency Magistrate to give bail, such Magistrate may permit him to deposit a sum of money or Government promissory notes to such amount as the Magistrate may fix in lieu of such bail.

CHAPTER VIII.—OF INQUIRY INTO CASES TRIABLE BY THE HIGH COURT.

Procedure in preliminary inquiries.

81. Cases, triable by a High Court in the exercise of its ordinary original criminal jurisdiction, or which, in the opinion of the Presidency Magistrate before whom the accused person is brought, ought to be tried by such Court, shall be inquired into by a Presidency Magistrate; and in such inquiry he shall adopt the following procedure.

Examination of complainant and witnesses for prosecution.

82. When the accused person appears or is brought before the Magistrate, or if his personal attendance is dispensed with, after reasonable notice to his advocate, attorney or pleader, the Magistrate shall, at such time as he thinks fit, take the evidence of the complainant and of such persons as are stated by the complainant to have any knowledge of the facts which form the subject-matter of the accusation and the attendant circumstances.

Such evidence shall be recorded in the manner described in clauses 3, 4 and 5 of section 115.

Examination to be in presence of accused.

83. The complainant and the witnesses for the prosecution shall be examined in the presence of the accused person, or, when his personal attendance is dispensed with, of his advocate, attorney or pleader (if any).

Procedure in inquiries preliminary to commitment.

The Magistrate may, in his discretion, summon or examine any witness offered on behalf of the accused person to answer or disprove the evidence against him.

Examination of accused how recorded.

84. Whenever an accused person is examined in the course of a preliminary inquiry into a case triable by the High Court, the whole of such examination, including every question put to him and every answer given by him, shall be recorded in full, and shall be shown or read to him, and he shall be at liberty to explain or add to his answers.

When the whole is made conformable to what he declares is the truth, the examination shall be attested by the signature of the Magistrate, who shall certify under his own hand that it was taken in his presence and in his hearing, and contains accurately the whole of the statement made by the accused person.

Power of Magistrate to summon and examine any person.

85. The Magistrate may, at any stage of the proceedings, summon and examine any person whose evidence he considers essential to the inquiry, and recall and re-examine any person already examined.

Adjournment of inquiry and remand.

86. If, from the absence of a witness or from any other reasonable cause, it becomes necessary or advisable to adjourn the inquiry, the Magistrate may, by a written order, from time to time adjourn the inquiry on such terms as he thinks fit and remand the accused person for a reasonable time, not exceeding fifteen days.

EXPLANATION.—After commencing the inquiry, if sufficient evidence has been obtained to raise a suspicion that the person accused may have committed an offence, and it appears likely that further evidence may be obtained by a remand, this is a reasonable cause for a remand.

When accused person to be discharged.

87. When a Presidency Magistrate finds that there are not sufficient grounds for committing the accused person for trial before the High Court, or for remanding him, he shall discharge him, unless it appears to the Magistrate that such person should be tried before himself, in which case he shall proceed accordingly.

EXPLANATION I.—The absence of the complainant, except when the offence may lawfully be compounded, shall not be deemed sufficient ground for a discharge, if there appear other evidence of a nature rendering a trial desirable.

EXPLANATION II.—A discharge is not equivalent to an acquittal, and does not bar the revival of a prosecution for the same offence.

EXPLANATION III.—An order of discharge shall not ordinarily be made until the evidence of the witnesses named for the prosecution has been taken.

When accused to be committed for trial.

88. When evidence has been given before a Presidency Magistrate, which appears to justify him in committing the accused person for trial for an offence triable exclusively by the High Court, or which, in the opinion of the Magistrate, ought to be tried by such Court, the accused person shall be committed for trial accordingly.

Framing of charge on which accused is to be tried before High Court.

89. When the Magistrate determines to commit the accused person for trial before the High Court, he shall, after the evidence has been recorded, frame a charge under his hand, declaring with what offence the accused person is charged, and (subject to the provisions of the High Courts' Criminal Procedure Act, 1875) committing him for trial by such Court on such charge.

All such charges shall be drawn up in accordance with the provisions of chapter IX.

Form of commitment.

Pending such trial, the Magistrate may commit the accused person to custody by warrant in the form (E) given in the third schedule hereto annexed, or to the like effect, or may in case of a bailable offence release him on bail; and the charge, the record of the enquiry, and any weapon or other article necessary to produce in evidence shall be sent to the Clerk of the Crown or other officer appointed in this behalf by the High Court.

Charge, &c., to be forwarded to High Court.

Commitment when to be notified.

When the accused person is committed for trial before the High Court, the Magistrate shall issue an order to such person as may be appointed by the Local Government in this behalf, notifying the commitment, and stating the offence in the same form as the charge, unless the Magistrate is satisfied that such person is already aware of the commitment and the form of the charge.

Charge to be explained, and copy furnished, to accused.

90. As soon as the charge on which the accused person is to be tried has been prepared, it shall be read and explained to him; and a copy thereof shall be furnished to him, if he so require.

List of witnesses for defence on trial before High Court.

91. The accused person shall be required at once to give in, orally or in writing, a list of the persons whom he wishes to be summoned to give evidence on his trial before the High Court.

The Magistrate may, if he thinks proper, summon all or any such persons to attend and give evidence at the enquiry; and if he does so, the commitment shall not be considered to have been made until such evidence has been taken.

Further list.

The Magistrate may in his discretion allow the accused person to give in any further list of witnesses at a subsequent time.

Power to summon supplementary witnesses.

The Magistrate may summon and examine supplementary witnesses after commitment and before the commencement of the trial. Such examination shall, if possible, be taken in the presence of the accused person.

Nothing in this section shall be deemed to preclude the accused person from giving at any time before his trial before the High Court to the

Clerk of the Crown a further list of the persons whom he wishes to be summoned to give evidence on such trial.

Summons to witnesses when accused person is to be committed.

92. When the person accused has been committed for trial, and has given in any list of the persons referred to in section 91, the Magistrate may either summon such persons to appear before the High Court, or leave them to be summoned by the Clerk of the Crown.

Recognizances of complainants and witnesses.

93. Complainants and witnesses for the prosecution and defence, whose attendance before the High Court is necessary, and who appear before the Presidency Magistrate, shall execute before him recognizances, in the form (F) given in the third schedule to this Act, or to the like effect, to be in attendance when called upon at the High Court, to prosecute or to give evidence, as the case may be.

Detention in custody in case of refusal to attend or to execute recognizance.

If any complainant or witness refuses to attend before the High Court, or to execute the recognizance above directed, the Presidency Magistrate may detain him in custody until he executes such recognizance, or until his attendance at the High Court is required, when the Magistrate shall send him in custody to the High Court.

CHAPTER IX.—OF THE CHARGE.

Form of Charges.

Charge to state offence.

94. Every charge under this Act shall state the offence with which the accused person is charged.

Specific name of offence sufficient description.

If the law which creates the offence gives it any specific name, the offence may be described in the charge by that name only.

How stated where offence has no specific name.

If the law which creates the offence does not give it any specific name, so much of the definition of the offence must be stated as to give the accused person notice of the matter with which he is charged.

The law and section of the law against which the offence is said to have been committed shall be mentioned in the charge.

What implied in charges.

The fact that the charge is made shall be equivalent to a statement that every legal condition, necessary by law to constitute the offence charged, was fulfilled in the particular case.

Language of charge.

The charge shall be written in English. If English is not understood by the accused person, the charge shall be interpreted to him in a language which he understands.

Previous conviction when to be set out.

If the accused person has been previously convicted of any offence punishable under chapter XII or chapter XVII of the Indian Penal Code with imprisonment for a term of three years or upwards, or of any other offence mentioned in section 3 or section 4 of Act No. VI of 1864 (*to authorize the punishment of whipping in certain cases*), and if it is intended to prove such previous conviction for the purpose of affecting the punishment which is to be awarded, the fact of the previous conviction must be stated in the charge. If such statement is omitted, it may be added at any time before sentence is passed, but not afterwards.

Illustrations.

(*a.*) A is charged with the murder of B.

This is equivalent to a statement that A's act fell within the definition of murder given in sections 299 and 300 of the Indian Penal Code; that it did not fall within any of the general exceptions of the Penal Code; and that it did not fall within any of the five exceptions to section 300, or that, if it did fall within exception 1, one or other of the three provisos to that exception applied to it.

(*b.*) A is charged, under section 326 of the Indian Penal Code, with voluntarily causing grievous hurt to B, by means of an instrument for shooting. This is equivalent to a statement that the case was not provided for by section 335 of the Indian Penal Code, and that the general exceptions did not apply to it.

(*c.*) A is accused of murder, cheating, theft, extortion, adultery or criminal intimidation, or using a false property-mark. The charge may state that A committed murder, or cheating, or theft, or extortion, or adultery, or criminal intimidation, or that he used a false property-mark, without reference to the definitions of those crimes contained in the Indian Penal Code; but the sections under which the offence is punishable must, in each instance, be referred to in the charge.

(*d.*) A is charged, under section 184 of the Indian Penal Code, with intentionally obstructing a sale of property offered for sale by the lawful authority of a public servant. The charge should be in those words.

Particulars as to time, place and person.

95. The charge shall contain such particulars as to the time and place of the alleged offence and the person against whom, or the thing in respect of which, it was committed, as are reasonably sufficient to give notice to the accused person of the matter with which he is charged.

When manner of committing offence must be stated.

96. When the nature of the case is such that the particulars mentioned in sections 94 and 95 do not give sufficient notice to the accused person of the matter with which he is charged, the charge shall also contain such particulars of the manner in which the alleged offence was committed as will be sufficient for that purpose.

Illustrations.

(*a.*) A is accused of the theft of a certain article at a certain time and place. The charge need not set out the manner in which the theft was effected.

(*b.*) A is accused of cheating B at a given time and place. The charge must set out the manner in which A cheated B.

(*c.*) A is accused of giving false evidence at a given time and place. The charge must set out that portion of the evidence given by A which is alleged to be false.

(*d.*) A is accused of obstructing B, a public servant, in discharge of his public functions at a given time and place. The charge must set out the manner in which A obstructed B in the discharge of his functions.

(*e.*) A is accused of the murder of B at a given time and place. The charge need not state the manner in which A murdered B.

(*f.*) A is accused of disobeying a direction of the law with intent to save B from punishment. The charge must set out the disobedience charged and the law infringed.

Forms in schedule.

97. The charge may be in the form given in the third schedule to this Act or to the like effect.

Effect of errors.

98. No error, either in the way in which the offence is stated, or in the particulars required to be stated in section 96, and no omission to state the offence, or to state those particulars, shall be regarded at any stage of the case as material, unless the person accused was in fact misled by such error or omission.

Illustrations.

(*a.*) A is charged, under section 242 of the Indian Penal Code, with "having been in possession of counterfeit coin, having known at the time when he became possessed

thereof that such coin was counterfeit;" the word "fraudulently" being omitted in the charge. Unless it appears that A was in fact misled by this omission, the error shall not be regarded as material.

(*b.*) A is charged with cheating B, and the manner in which he cheated B is not set out in the charge, or is set out incorrectly. A defends himself, calls witnesses, and gives his own account of the transaction. The Court may infer from this that the omission to set out the manner of the cheating is not material.

(*c.*) A is charged with cheating B, and the manner in which he cheated B is not set out in the charge. There were many transactions between A and B, and A had no means of knowing to which of them the charge referred, and offered no defence. The Court may infer from such facts that the omission to set out the manner of the cheating was, in this case, a material error.

(*d.*) A is charged with the murder of Khodá Baksh on the 21st January. In fact, the murdered person's name was Haidar Baksh, and the date of the murder was the 20th January. A was never charged with any murder but one, and had heard the inquiry before the Magistrate, which referred exclusively to the case of Haidar Baksh. The Court may infer from these facts that A was not misled, and that the error in the charge was immaterial.

(*e.*) A was charged with murdering Haidar Baksh on the 20th January and Khodá Baksh (who tried to arrest him for that murder) on the 21st January. When charged for the murder of Haidar Baksh, he was tried for the murder of Khodá Baksh. The witnesses present in his defence were witnesses in the case of Haidar Baksh. The Court may infer from this that A was misled, and that the error was material.

Prisoner may apply for amendment.

99. Any accused person may apply to a Presidency Magistrate for an amendment of the charge made against him; and in considering whether any error in a charge did in fact mislead the accused person, the Magistrate shall take into account the fact that he did or did not make such an application.

Magistrate may alter charge.

100. A Presidency Magistrate may, upon the application of the accused person, or of the complainant, or upon his own motion, alter any charge at any stage of the proceedings before judgment is pronounced.

Every such alteration shall be read and explained to the accused person.

When trial may proceed immediately after alteration.

101. If the alteration is such that proceeding immediately with the trial is not likely, in the opinion of the Presidency Magistrate, to prejudice the accused person in his defence, the Magistrate may in his discretion, after making such alteration, proceed with the trial as if the altered charge had been the original charge.

When new trial may be directed or trial suspended.

102. If the alteration is such that proceeding immediately with the trial is likely, in the opinion of the Presidency Magistrate, to prejudice the accused person in his defence, the Magistrate may either direct a new trial, or suspend the trial for such period as may be necessary to enable the accused person to make his defence to the altered charge; and, after hearing his defence, the Magistrate may further adjourn the trial, to admit of the appearance of any witness whose evidence the Magistrate may consider to be material to the case, or whom the accused person may wish to be summoned in his defence.

Adjournment.

Recall of witnesses when charge altered.

103. In all cases of alteration of a charge, the complainant and accused person shall be allowed to recall and examine with reference to such alteration any witness who may have been examined.

Stay of proceedings if prosecution of offence in altered charge require previous sanction.

104. If the offence stated in the altered charge be one for the prosecution of which previous sanction is necessary, the case shall not be proceeded with until such sanction is obtained, unless sanction has been already obtained for a prosecution on the same facts as those on which the altered charge is founded.

Joinder of Charges.

Separate charges for distinct offences.

105. There must be a separate charge for every distinct offence of which any person is accused, and every such charge must be tried separately, except in the cases hereinafter excepted.

Illustration.

A is accused of a theft on one occasion, and of causing grievous hurt on another occasion. A must be separately charged and separately tried for the theft and the causing grievous hurt.

More offences than one of same kind may be charged within a year of each other.

106. When a person is accused of more offences than one of the same kind, committed within one year of each other, he may be charged with, and tried at the same time for, any number of them not exceeding three.

I.—Trial of more than one offence.

107. I.—If in one series of acts, so connected together as to form the same transaction, more offences than one are committed by the same person, he may be charged with and tried for every such offence at the same time.

II.—One offence falling within two definitions.

II.—If the acts alleged constitute an offence falling within two or more separate definitions of any law in force for the time being, by which offences are defined or punished, the person accused of them may be charged with each of the offences so committed; but he must not receive a more severe punishment than could be inflicted for any of such offences.

III.—Acts severally constituting more than one offence, but collectively coming within one definition.

III.—If several acts, of which one or more than one would by itself constitute an offence, form, when combined, a different offence, the person accused of them may be charged with every offence or any of the different offences, which he may have committed; but he must not receive for such offences, collectively, a punishment more severe than that which might have been inflicted for any one of such offences.

Illustrations

to paragraph I—

(*a*) A rescues B, a person in lawful custody, and in so doing causes grevious hurt to C, a constable in whose custody B was. A may be separately charged with, convicted of, and punished for, offences under sections 225 and 333 of the Indian Penal Code

(*b*) A has in his possession several seals knowing them to be counterfeit and intending to use them for the purpose of committing several forgeries punishable under section 466 of the Indian Penal Code. A may be separately charged with, convicted of, and punished for, the possession of each seal, under section 473 of the Indian Penal Code.

(*c*) A, with intent to cause injury to B, institutes a criminal proceeding against him, knowing that there is no just or lawful ground for such proceeding. A also falsely accuses B of having committed an offence, knowing that there is no just or lawful ground for such charge. A may be separately charged with, convicted of, and punished for, two offences under section 211 of the Indian Penal Code.

(*d*) A, with intent to cause injury to B, falsely accuses him of having committed an offence, knowing that there is no just or lawful ground for such charge. On the trial A gives false evidence against B, intending thereby to cause B to be convicted of a capital offence. A may be separately charged with, convicted of, and punished for, offences under sections 211 and 194 of the Indian Penal Code.

(*e*) A, knowing that B, a female minor, has been kidnapped in order that she may be subjected to grievous hurt, wrongfully confines her and detains her against her will as a slave. A may be separately charged with, convicted of, and punished for, offences under sections 368 (read with 367) and 370 of the Indian Penal Code.

(*f*) A, with six others, commits the offences of rioting, grievous hurt, and of assaulting a public servant endeavouring, in the discharge of his duty as such, to suppress the riot. A may be separately charged with, convicted of, and punished for, offences under sections 147 and 325 and 152 of the Indian Penal Code.

(*g*) A threatens B, C and D at the same time with injury to their persons with intent to cause alarm to them. A may be separately charged with, convicted of, and punished for, each of the three offences under section 506 of the Indian Penal Code.

(*h*) A intentionally causes the death of three persons by upsetting a boat. A may be separately charged with, convicted of, and punished for, each of the three offences under section 302 of the Indian Penal Code.

The separate charges referred to in illustrations (*a*) to (*h*) respectively may be tried at the same time.

to paragraph II—

(*i*) A wrongfully strikes B with a cane. A may be separately charged with, and convicted of, offences under sections 352 and 323 of the Indian Penal Code; but the Presidency Magistrate who tries him may not inflict a more severe punishment than if he had convicted him under section 323 only.

(*j*) A wrongfully kills a buffalo worth sixty rupees belonging to B, and then moves the carcase in order to take it dishonestly out of B's possession without B's consent. A may be separately charged with, and convicted of, offences under sections 429 and 379 of the Indian Penal Code; but the Presidency Magistrate who tries him may not inflict a more severe punishment than if he had convicted him under section 429 only.

(*k*) Several stolen sacks of corn are made over to A and B who know they are stolen property. A and B thereupon voluntarily assist each other to conceal the sacks at the bottom of a grain-pit. A and B may be separately charged with, and convicted of, offences under sections 411 and 414 of the Indian Penal Code; but the Presidency Magistrate who tries them may not inflict a severer punishment than if he had convicted them under one of those sections only.

(*l*) A dishonestly uses a forged document as genuine evidence, in order to convict B, a public servant, of an offence under section 167 of the Indian Penal Code. A may be separately charged with, and convicted of, offences under sections 471 (read with 466) and 196 of the same Code; but the Presidency Magistrate who tries him may not inflict a severer punishment than if he had convicted him under one of those sections only.

to paragraph III—

(*m*) A commits house-breaking by day with intent to commit adultery, and commits, in the house so entered, adultery with B's wife. A may be separately charged with, and convicted of, offences under sections 454 and 497 of the Indian Penal Code; but the Presidency Magistrate who tries him may not inflict a severer punishment than if he had convicted him under section 497 only.

(*n*) A commits robbery on B, and, in doing so, voluntarily causes hurt to him. A may be separately charged with, and convicted of, offences under sections 323, 392 and 394 of the Indian Penal Code; but the Presidency Magistrate who tries him may not inflict a severer punishment than if he had convicted him under section 392 or 394 only.

(*o*) A entices B, the wife of C, away from C, with intent to commit adultery with B, and then commits adultery with her. A may be separately charged with, and convicted of, offences under sections 498 and 497 of the Indian Penal Code; but the Presidency Magistrate who tries him may not inflict a severer punishment than if he had convicted him under section 497 only.

108. If a single act or series of acts is of such a nature that it is doubtful which of several offences the facts which can be proved will constitute, the accused person may be charged with having committed all or any of such offences; and any number of such charges may be tried at once, or he may be charged in the alternative with having committed some one of the said offences.

Where it is doubtful what offence has been committed.

Illustration.

A is accused of an act which may amount to theft, or receiving stolen property, or criminal breach of trust, or cheating. He may be charged with theft, receiving stolen property, criminal breach of trust, and cheating, or he may be charged with having committed theft, or receiving stolen property, or criminal breach of trust, or cheating.

109. If, in the case mentioned in the last preceding section, one charge only is brought against an accused person, and it appears in evidence that he committed a different offence, for which he might have been charged under the provisions of that section, he may be convicted of the offence which he is shown to have committed, although he was not charged with it.

When a person is charged with one offence, he can be convicted of another.

Illustration.

A is charged with theft. It appears that he committed the offence of criminal breach of trust, or that of receiving stolen goods. He may be convicted of criminal breach of trust, or of receiving stolen goods (as the case may be), though he was not charged with such offence.

110. When a person is charged with an offence, and part of the charge is not proved, but the part which is proved amounts to a different offence, he may be convicted of the offence which he is proved to have committed, though he was not charged with it.

When offence proved included in offence charged.

Illustrations.

(*a*). A is charged, under section 407 of the Indian Penal Code, with criminal breach of trust in respect of property entrusted to him as a carrier. It appears that he did commit criminal breach of trust under section 406 in respect of the property, but that it was not entrusted to him as a carrier. He may be convicted of criminal breach of trust under section 406.

(*b*). A is charged with murder. He may be convicted of culpable homicide, or of causing death by negligence.

111. When more persons than one are accused of the same offence, or of different offences committed in the same transaction, or when one person is accused of committing any offence, and another of abetment of, or attempt to commit, such offence, they may be charged and tried together, or separately, as the Presidency Magistrate thinks fit, and the provisions contained in the former part of this chapter shall apply to all such charges.

What persons may be charged jointly.

Illustrations.

(*a*). A and B are accused of the same murder. A and B may be charged and tried together for the murder.

(*b*). A and B are accused of a robbery, in the course of which A commits a murder with which B has nothing to do. A and B may be tried together on a charge, charging both of them with the robbery, and A alone with the murder.

(*c*). A and B are both charged with a theft, and B is charged with two other thefts committed by him in the course of the same transaction. A and B may be both tried together on a charge, charging both with the one theft, and B alone with the two other thefts.

112. When more charges than one are made against the same person, and when a conviction has been had on one or more of them, the complainant, or the Government Solicitor or other

Withdrawal of remaining charges on conviction on one of several charges.

officer conducting the prosecution, may, with the consent of the Presidency Magistrate, withdraw, or such Magistrate of his own accord may suspend, the inquiry into, or trial of, the remaining charge or charges.

Previous Acquittals or Convictions.

Person once convicted or acquitted not to be tried for same offence.

113. A person who has once been tried for an offence and convicted or acquitted of such offence, shall, while such conviction or acquittal remains in force, not be liable to be tried again for the same offence, nor on the same facts for any other offence for which a different charge from the one made against him might have been made under section 108, or for which he might have been convicted under section 109.

A person convicted or acquitted of any offence may be afterwards tried for any offence for which a separate charge might have been made against him on the former trial under section 107, paragraph one.

A person acquitted or convicted of any offence constituted by any act causing consequences which, together with such act, constituted a different offence from that for which he was acquitted or convicted, may be afterwards tried for such last-mentioned offence, if the consequences had not happened, or were not known to the Court to have happened, at the time when he was acquitted or convicted.

A person acquitted or convicted of any offence constituted by any acts may, notwithstanding such acquittal or conviction, be subsequently charged with, and tried for, any other offence constituted by the same acts, which he may have committed if the Court by which he was first tried was not competent to try the offence with which he is subsequently charged.

Illustrations.

(*a*) A is tried upon a charge of theft as a servant and acquitted. He cannot afterwards be charged with theft as a servant, or, upon the same facts, with theft simply, or with criminal breach of trust.

(*b*) A is tried upon a charge of murder and acquitted. There is no charge of robbery; but it appears from the facts that A committed robbery at the time when the murder was committed: he may afterwards be charged with, and tried for, robbery.

(*c*) A is tried for an assault and convicted. The person assaulted afterwards dies. A may be tried again for culpable homicide.

(*d*) A is tried, under section 270 of the Indian Penal Code, for malignantly doing an act likely to spread the infection of a disease dangerous to life, and is acquitted. The act so done afterwards causes a person permanently to lose his eyesight. A may be charged, under section 325 of the same Code, with voluntarily causing grievous hurt to that person.

(*e*) A is charged by a Presidency Magistrate with, and convicted by him of, voluntarily causing hurt to B. A may not afterwards be tried for voluntarily causing grievous hurt to B, on the same facts, unless the case comes within paragraph three of this section.

(*f*) A is charged by a Presidency Magistrate with, and convicted by him of, theft of property from the person of B. A may be subsequently charged with, and tried for, robbery on the same facts.

(*g*) A, B and C are charged by a Presidency Magistrate with, and convicted by him of, robbing D. A, B and C may afterwards be charged with, and tried for, dacoity on the same facts.

CHAPTER X.—OF THE TRIAL OF CASES BY PRESIDENCY MAGISTRATES.

Cases may be tried summarily.

114. The following procedure shall be observed in the trial of cases by Presidency Magistrates.

In every such case the Magistrate shall record the following particulars:

(*a*) the serial number,
(*b*) the date of the commission of the offence,
(*c*) the name of the complainant,
(*d*) the name of the accused person,
(*e*) the offence complained of or proved,
(*f*) the prisoner's plea,
(*g*) the final order,
(*h*) the date of such order.

Record of evidence.

115. No Presidency Magistrate shall impose a fine exceeding two hundred rupees or imprisonment for a term exceeding six months, unless he has recorded the evidence of the witnesses.

Sentences passed under section 13 on the same occasion shall for the purposes of this section be considered as one sentence.

Where the Magistrate records such evidence, it shall be sufficient either to take it down with his own hand or to cause it to be taken down in writing from his dictation in open Court. All evidence so taken down shall be signed by the Magistrate and shall be part of the record.

Evidence so taken down shall ordinarily be taken in the form of a narrative, but the Magistrate may in his discretion take down, or cause to be taken down, any particular question or answer.

Every Magistrate recording the evidence of a witness shall record such remarks as he thinks material respecting the demeanour of such witness while under examination.

Charge when dispensed with.

116. In cases punishable with fine only, or with imprisonment for a term not exceeding six months, or with both, no formal charge need be made against the accused person; and the Magistrate may convict him of any offence punishable with fine only or with imprisonment for a term not exceeding six months, or with both, and which, from the facts proved, he appears to have committed.

Charge when necessary.

In cases in which the Magistrate has power to impose imprisonment for a term exceeding six months, there shall be a formal charge against the accused person.

All charges under this section shall be drawn up by the Magistrate in accordance with the provisions of chapter IX.

Effect on proceedings of defect in complaint or process.

117. Neither the complaint nor the process issued thereon shall be regarded otherwise than as notice to the accused person of the facts to be inquired into. No defect in the complaint or process shall invalidate the proceedings, unless it appears that the accused person was actually misled by such defect; and, in considering whether or not he was so misled, the Magistrate shall have regard to the manner in which the accused person conducted his defence.

Dismissal or adjournment on non-appearance of complainant.

118. If upon the day appointed for the appearance of the accused person, or any day subsequent thereto on which the case may be called on, the complainant does not appear, the Magistrate shall dismiss the complaint, unless he thinks fit to adjourn the hearing of the same to some other day. Such adjournment shall be made upon such terms as the Magistrate thinks fit.

119. On the appearance of both parties on the day fixed for the trial, the substance of the complaint shall be stated to the accused person, and he shall be asked if he has any cause to show why he should not be convicted.

Procedure on appearance of parties.

120. If the accused person admit the truth of the complaint, his admission shall be recorded, and if he shows no sufficient cause why he should not be convicted, the Magistrate may convict him accordingly.

Conviction on admission of truth of complaint.

121. If the accused person does not admit the truth of the complaint, the Magistrate shall proceed to hear the complainant and such witnesses as he produces in support of his complaint, and also to hear the accused person and such witnesses as he produces in his defence.

Procedure when no such admission is made.

122. Whenever any charge is drawn up under this Act, it shall be drawn up as soon as the Magistrate is of opinion that a *primâ facie* case has been established against the accused person, and shall be read and explained to the accused person, and he shall be asked whether he is guilty or has any defence to make.

Charge when drawn up.

123. If the accused person be examined, the procedure prescribed in section 84 shall be followed.

Procedure on examining accused.

124. Before or during the hearing of any complaint, the Magistrate may, in order to secure the attendance of witnesses or for any other reason, adjourn the hearing, on such terms as he thinks fit, to a day to be then appointed and stated in the presence of the parties.

Adjournment.

If on the day to which such hearing or such further hearing has been so adjourned, the accused person does not appear, the Magistrate may issue his warrant for the arrest of such person.

If on such day the complainant does not appear, the Magistrate may dismiss the complaint.

125. If a complainant, at any time before a final order is passed in any case punishable with fine only or with imprisonment for a term not exceeding six months, or with both, satisfies the said Magistrate that there are sufficient grounds for permitting him to withdraw his complaint, the Magistrate may permit him to do so.

Withdrawal of complaint.

The withdrawal under this section of a complaint shall operate as an acquittal of the accused person.

126. If the Magistrate, in any case tried under this chapter, finds the accused person not guilty, he shall record an order of acquittal.

Acquittal.

If the accused person is convicted, the Magistrate shall pass sentence upon him; and, in all cases in which the Magistrate inflicts imprisonment, or fine exceeding two hundred rupees, or both, he shall add to the final order mentioned in section 114, clause (*g*), a brief statement of the reasons for the conviction.

Sentence.

When the personal attendance of the accused person during the trial has been dispensed with, the sentence of the Magistrate shall be pronounced in his presence, except where the sentence is for fine only, in which case it may be pronounced in the presence of the accused person's advocate, attorney or pleader.

127. If in the course of any trial before a Presidency Magistrate, it appears that the case is one which he has not jurisdiction to try, or one which, in his opinion, ought to be tried by the High Court, he shall stop further proceedings under this chapter, and shall either forward the case to the Magistrate having jurisdiction, or commit the accused person, in accordance with the provisions of chapter VIII, to the High Court for trial.

Procedure when, after commencement of trial, Magistrate finds case beyond his jurisdiction.

128. Whoever, having been convicted of an offence punishable under chapter XII or chapter XVII of the Indian Penal Code with imprisonment for a term of three years or upwards, is again accused of any offence punishable under either of those chapters with imprisonment for a term of three years or upwards, shall ordinarily, if the Presidency Magistrate considers him an habitual offender, be committed to the High Court.

Trial of persons previously convicted of offences against coinage, stamp law or property.

General Provisions as to Inquiries and Trials.

129. A Presidency Magistrate inquiring into or trying any case may permit any person to conduct the case as prosecutor; but no person other than the Advocate-General, Standing Counsel, Government Solicitor or other officer generally or specially empowered by the Local Government in this behalf shall be entitled to do so without such permission.

Permission to conduct prosecution.

Any person conducting the case may do so personally or by an advocate, attorney or pleader.

130. Every person accused before a Presidency Magistrate of an offence, may of right be defended by any advocate, attorney or pleader.

Right of accused to be defended.

131. If an accused person, though not insane, cannot be made to understand the proceedings, the Magistrate may proceed with the inquiry or trial; and if such inquiry results in a committal, or if such trial results in a conviction, the proceedings shall be forwarded to the High Court, with a report of the circumstances of the case, and the High Court shall pass thereon such order as it thinks fit.

Procedure where accused does not understand proceedings.

132. The place in which the Court of a Presidency Magistrate is held for the purpose of inquiring into or trying any offence, shall be deemed an open Court, to which the public generally may have access, so far as the same can conveniently contain them:

Presidency Magistrates' Courts to be open.

Provided that the Magistrate may, if he thinks fit, order at any stage of any inquiry into or trial of any particular case, that the public generally, or any particular person, shall not have access to, or be, or remain in, the room or building used by the Magistrate.

133. In the case of offences which may lawfully be compounded, the injured person may compound the

Compounding offences.

offence out of Court, or in Court with the permission of the Presidency Magistrate. Such composition shall have the effect of an acquittal of the accused.

CHAPTER XI.—OF EVIDENCE.

A.—Of securing the attendance of Witnesses.

134. Any Presidency Magistrate may, at any stage of any proceeding, inquiry or trial under this Act, summon, in manner provided by chapter VI, any witness, or examine any person in attendance though not summoned as a witness; and the Magistrate shall summon and examine such person if his evidence appears essential to the just decision of the case.

Power to summon material witness or examine person present.

135. If a Presidency Magistrate has reason to believe that any witness, whose attendance is required will not attend to give evidence without being compelled to do so, he may, instead of issuing a summons, issue a warrant of arrest in the first instance.

When warrant of arrest may issue in first instance.

136. If any person summoned under this Act to give evidence neglects or refuses to appear at the time and place appointed by the summons, and no reasonable excuse is offered for such neglect or refusal, the Presidency Magistrate, upon proof of the summons having been duly served, may issue a warrant under his hand to bring such person before him to testify as aforesaid.

Arrest of person disobeying summons.

137. If such warrant cannot be executed, and the Magistrate has reason to believe that the witness absconds or conceals himself for the purpose of preventing the execution thereof, he may issue a notice, requiring the attendance of such witness to give evidence at a time and place to be named therein, and such notice shall be affixed to some conspicuous part of such witness' ordinary place of abode, or, if he has no such abode, of the Magistrate's Court.

Procedure when warrant cannot be served.

If the witness does not attend at the time and place so named, the Magistrate may order the attachment of any moveable property belonging to such witness, equal in value, as nearly as may be, to the amount of the costs of attachment and of any fine to which the witness may be liable under the provisions of section 172 of the Indian Penal Code.

138. The provisions of section 68 and section 69 as to the attachment, sale and restoration of moveable property shall apply to all property ordered to be attached under section 137.

Attachment, &c., of property ordered to be attached under section 137.

139. Notwithstanding anything contained in the Prisoners' Testimony Act, 1869, any Presidency Magistrate desirous of examining, as a witness or accused person, in any case pending before him, any person confined in any jail within the local limits of his jurisdiction, may issue an order to the officer in charge of the said jail requiring him to bring such prisoner in proper custody, at a time to be therein named, to the Magistrate for examination.

Power to order prisoner in jail to be brought up for examination.

The officer so in charge, on receipt of such order, shall act in accordance therewith, and shall provide for the safe custody of the prisoner during his absence from the jail for the purpose aforesaid.

140. The Presidency Magistrate may require complainants and witnesses for the prosecution and defence whose attendance before him is necessary, to execute recognizances, in the form (F) given in the third schedule to this Act, or to the like effect, to be in attendance when called upon to prosecute or give evidence, as the case may be.

Power to require complainants, &c., to execute recognizances.

141. If any witness summoned or brought before a Presidency Magistrate refuses to answer such questions as are put to him, without offering any reasonable excuse for such refusal, such Magistrate may sentence him to simple imprisonment, or commit him to the custody of an officer of the Court, for any term not exceeding seven days, unless in the meantime such person consents to be examined and to answer; after which, in the event of his persisting in his refusal, he may be dealt with according to the provisions of section 205 or 206.

Committal of person refusing to answer.

B.—Of Witnesses.

142. In the case of offences punishable with fine only or with imprisonment for a term not exceeding six months, or with both, it shall ordinarily be the duty of the complainant and accused to produce their own witnesses. But the Presidency Magistrate may in his discretion—

In cases triable upon summons.

(*a*) summon any person who appears to him likely to give material evidence on behalf of the complainant or the accused;

(*b*) summon any witness named by the complainant or the accused:

Provided that the Magistrate may, before summoning a witness, require that his reasonable expenses incurred in attending for the purposes of the trial be deposited in Court.

143. In the case of all other offences, the Magistrate shall ascertain from the complainant, or otherwise, the names of any persons likely to be acquainted with the facts of the case and to be able to give evidence for the prosecution, and shall summon to give evidence before him such of them as he thinks necessary.

In cases triable upon warrant.

The Magistrate shall also summon any witness, and take any evidence that may be offered, in behalf of the accused person, to answer or disprove the evidence against him.

C.—Of Securing Documentary Evidence.

144. Whenever a Presidency Magistrate considers that the production of any document or other thing is necessary or desirable for the purposes of any inquiry trial, or other proceeding under this Act, he may issue a summons to the person in whose possession or power such document or thing is believed to be, requiring him to attend and produce it at the time and place stated in the summons.

Summons to produce document required as evidence.

145. Where there is reason to believe that the person to whom the summons is addressed will not produce the document or

Issue of search-warrant in first instance.

other thing as directed in the summons, the Magistrate may issue a warrant to search for such document or thing in the first instance.

Procedure as to letters in custody of Postal Department or telegraph officer.

146. If any letter in the custody of the Postal Department is wanted for the purpose of any inquiry or trial by a Presidency Magistrate, the Magistrate may, if he is the Chief Magistrate, direct the postal authorities to deliver such letter to such person as the Magistrate directs, and if he is not the Chief Magistrate, may apply to the Chief Magistrate, who may, if he thinks fit, give such direction.

The letter referred to in any direction given under this section shall be delivered accordingly.

Power to impound document produced.

147. Any Presidency Magistrate may, if he thinks fit, impound any document or other thing produced before him, or may, at the conclusion of the proceedings, order it to be returned to the person who produced it.

D.—Of the Examination of Accused Persons.

Examination of accused.

148. At any stage of any inquiry or trial under this Act, the Magistrate may, without previously warning the accused person, put such questions to him as he considers necessary.

The accused person shall not render himself liable to punishment for refusal to answer such questions, or for giving false answers to them, but the Magistrate shall draw such inference as may to him seem just from such refusal or false answers.

EXPLANATION.—The answer given by an accused person may be put in evidence against him, not only in such inquiry or trial, but also in any other inquiry into, or trial for, any other offence which such answer may tend to show he has committed.

No influence to be used to induce disclosures.

149. Except as is provided in section 150, no influence, by means of any promise or threat or otherwise, shall be used to an accused person to induce him to disclose or withhold any matter within his knowledge.

Tender of pardon to accomplice.

150. A Presidency Magistrate may, with the view of obtaining the evidence of any persons supposed to have been directly or indirectly concerned in, or privy to, any offence specified in column seven of the second schedule hereto annexed as triable exclusively by the High Court, tender a pardon to such person on condition of his making a full and true disclosure of the whole of the circumstances, within his knowledge, relative to such offence and to every other person concerned in the perpetration thereof.

Every person accepting a tender under this section shall be examined as a witness in the case.

Such person, if not on bail, shall be detained in custody until the termination of the trial.

Commitment of person to whom pardon has been tendered.

151. When a pardon has been tendered under section 150, if before the trial it appears to the Presidency Magistrate that any person who has accepted such tender has either by wilfully concealing anything essential, or by giving false evidence, not complied with the conditions under which the tender was made, such Magistrate may commit him for trial for the offence in respect of which the pardon was so tendered, or for any other offence of which he may appear to have been guilty in connection with the same matter.

The statement made by a person under pardon which pardon has been withdrawn under this section, may be put in evidence against him.

E.—Special Rules of Evidence.

Deposition of medical witness.

152. The deposition of a civil surgeon or other medical witness, taken and duly attested by a Magistrate, may be given in evidence in any inquiry or trial under this Act, although the deponent is not called as a witness.

Power to summon medical witness.

The Presidency Magistrate may, if he thinks fit, summon and examine such deponent as to the subject-matter of his deposition.

Report of Chemical Examiner.

153. Any document purporting to be a report from the Chemical Examiner, or Assistant Chemical Examiner to Government, upon any matter or thing duly submitted to him for examination or analysis and report, in the course of any inquiry or trial under this Act, or in any preliminary inquiry relating thereto, may, if it bears his signature, be used as evidence in any inquiry or trial under this Act.

Genuineness of signature may be presumed.

The Presidency Magistrate may presume that the signature to any such document is genuine, and that the person signing it held the office which he professed to hold at the time when he signed it.

Power to summon Chemical Examiner.

The Presidency Magistrate may, if he thinks fit, summon and examine such Chemical Examiner or Assistant Chemical Examiner as to the subject-matter of his said report.

Previous conviction or acquittal how proved.

154. A previous conviction or acquittal may be proved (*a*) by an extract certified, under the hand of the officer having the custody of the records of the Court in which such conviction or acquittal was had, to be a copy of the sentence or order, or (*b*), in case of a conviction either by a certificate signed by the officer in charge of the jail in which the punishment or any part thereof was inflicted or by production of the warrant of commitment under which the punishment was suffered.

Record of evidence in absence of accused.

155. If an accused person abscond, and after due pursuit cannot be arrested, the Presidency Magistrate may, in his absence, examine the witnesses (if any) produced on behalf of the prosecution, and record their depositions; and any such deposition may, on the arrest of such person, be put in on his trial for the offence with which he is charged, if the attendance of the deponent cannot be procured.

Convictions on evidence partly recorded by one Magistrate and partly by another.

156. Whenever any Presidency Magistrate, after having heard the whole or any part of the evidence in an inquiry or trial, ceases to exercise jurisdiction therein, and is succeeded by another Magistrate who has and who exercises such jurisdiction, the Magistrate so succeeding may act

on the evidence so recorded by his predecessor, or partly recorded by his predecessor and partly recorded by himself, or he may re-summon the witnesses and re-commence the inquiry or trial:

Provided that the accused person may, when the second Magistrate commences his proceedings, demand that the witnesses be re-summoned and re-heard, in which case the inquiry or trial shall be re-commenced:

Provided also that the High Court may set aside any conviction passed on evidence not wholly recorded by the Magistrate before whom the conviction was had, if such Court is of opinion that the accused person has been materially prejudiced thereby; and may order a new inquiry or trial.

When attendance of witness may be dispensed with.

157. Whenever in the course of a trial or inquiry under this Act it appears that the attendance of a witness cannot be procured without an amount of delay, expense or inconvenience which, under the circumstances of the case, would be unreasonable, the Presidency Magistrate may dispense with such attendance.

Issue of commission and procedure thereunder.

158. Such Magistrate may direct a commission to any Magistrate of the District, or Magistrate of the first class, within the local limits of whose jurisdiction such witness may be.

The Magistrate to whom the commission is directed, or, if he be the Magistrate of the District, such Magistrate of the first class as he appoints in this behalf, shall proceed to the place where such witness is, or shall summon such witness before himself, and shall take his evidence in the same manner, and may for this purpose exercise the same powers, as in trials of warrant-cases under the Code of Criminal Procedure.

Commission in case of witness being within Presidency town.

If the witness is within the local limits of the jurisdiction of any Presidency Magistrate, other than the Magistrate dispensing with his attendance, the latter Magistrate may direct a commission to the former Magistrate, who thereupon shall have the like power to compel the attendance of, and to examine, such witness as he possesses for that purpose in cases pending before himself.

Complainant and accused may examine witness.

The complainant and the accused person may respectively forward interrogatories, in writing, upon which the Magistrate to whom the commission is directed shall examine the witness,

or the complainant and the accused person (if on bail) may appear before such Magistrate,

or the complainant and the accused person may so appear respectively by advocate, attorney or pleader,

and may examine, cross-examine and re-examine (as the case may be) the said witness.

Return of commission.

After any commission issued under this section has been duly executed, it shall be returned, together with the deposition of the witness examined thereunder, to the Magistrate by whom it was issued; and the commission, the return thereto, and the deposition of such witness, may be used as evidence in the case and shall form part of the record.

F.—Of Search-Warrants.

Search-warrant when grantable.

159. When a Presidency Magistrate considers that the production of any thing is essential to the conduct of an inquiry into an offence known or suspected to have been committed or to the discovery of the offender,

or when he considers that such inquiry or discovery will be furthered by a general search or inspection,

he may grant his search-warrant; and the officer charged with the execution of such warant may search or inspect any place within the local limits of the jurisdiction of such Magistrate.

The Magistrate may, if he thinks fit, specify in the warrant the particular place, building or part thereof to which only the search or inspection shall extend; and the officer charged with the execution of such warrant shall then search or inspect only the place, building or part so specified.

Nothing in this section or in section 145 shall authorize a Magistrate to grant a warrant to search for a letter or telegram in the custody of the Postal Department or of a telegraph officer.

Search of house suspected to contain stolen property or forged documents.

160. If a Presidency Magistrate, upon information and after such inquiry as he thinks necessary, has reason to believe that any place is used for the deposit or sale of stolen property, or of property which has been fraudulently obtained,

or for the deposit or sale or manufacture of forged documents, or counterfeit Government stamps, or counterfeit coin, or instruments or materials for counterfeiting coin, or for forging,

or that any forged documents, or counterfeit stamps, or false seals, or counterfeit coin, or instruments or materials used for counterfeiting coin, or for forging, are kept or deposited in any place,

he may by his warrant authorize any Police-officer above the rank of a constable—

(*a*) to enter, with such assistance as may be required, and by force if necessary, such place, and

(*b*) to search the same as specified in the warrant, and

(*c*) to take possession of any property, documents, stamps, seals or coins therein found, which he reasonably suspects to be stolen, unlawfully obtained, forged, false or counterfeit, and also any such instruments and materials as aforesaid, and

(*d*) to convey such property, documents, stamps, seals, coins, instruments or materials before a Presidency Magistrate, or to guard the same on the spot until the offender is taken before a Presidency Magistrate, or otherwise to dispose thereof in some place of safety, and

(*e*) to take into custody and carry before the said Magistrate every person found in such place, who appears to have been privy to the deposit, sale or manufacture or keeping of any such property, documents, stamps, seals, coins, instruments or materials knowing or having reasonable cause to suspect the said property to have been stolen or otherwise unlawfully obtained, or the said documents, stamps, seals, coins, instruments or materials to have been forged, falsified or counterfeited, or the said instruments or materials to have been or to be intended to be used for counterfeiting coin or for forging.

Direction, &c., of search-warrants.

161. The provisions of sections 59, 60 and 61 shall apply to all search-warrants issued under this chapter.

162. Whenever any place liable to search or inspection under this chapter is closed, any person residing in, or being in charge of, such place shall, on demand of the officer or other person executing the warrant, allow such officer or other person free ingress thereto, and afford all reasonable facilities for a search therein.

Persons in charge of closed place to allow search.

163. A Police-officer or other person, authorized by a warrant to search any place, may break open any outer or inner door or window of such place, in order to execute the warrant, if, after notification of his authority and purpose and demand of admittance duly made, he cannot otherwise obtain admittance.

Place to be searched may be broken open.

164. If the place ordered to be searched is an apartment in the actual occupancy of a woman who, according to the customs of the country, does not appear in public, the officer or other person charged with the execution of the warrant shall, unless a warrant of arrest has been issued against her, give her notice that she is at liberty to withdraw.

Search of zanána.

After giving such notice and allowing a reasonable time for such woman to withdraw, and affording her every reasonable facility for withdrawing, such officer or person may enter such apartment for the purpose of making the search, using at the same time every precaution consistent with this section for preventing the clandestine removal of the thing mentioned in the warrant.

165. Before making a search under this chapter the officer or other person about to make it shall call upon two or more respectable inhabitants of the locality in which the place to be searched is situate to attend and witness the search.

Search to be made in presence of witnesses.

The search shall be made in their presence, but they shall not be required to attend the Court of the Magistrate as witnesses, unless especially summoned by him.

The occupant of the place searched, or some person in his behalf, shall, in every instance, be permitted to attend during the search.

Occupant of place searched may attend.

166. Whenever it is necessary to cause a woman to be searched, the search shall be made with strict regard to the customs of the country.

Mode of searching women.

CHAPTER XII.—OF APPEALS.

167. Any person convicted on a trial held by a Presidency Magistrate, may appeal to the High Court if the Magistrate has sentenced him to imprisonment for a term exceeding six months, or to fine exceeding two hundred rupees:

Appeal by person convicted.

Provided that, where an accused person has been convicted on his own plea, no such appeal shall lie except as to the extent or legality of the sentence.

Sentences passed under section 13 on the same occasion shall, for the purposes of this section, be considered as one sentence.

For the purposes of the Indian Limitation Act, 1871, all appeals under this section and all applications to the High Court for the exercise of the powers given by Act No. X of 1875, section 147, shall be deemed to be appeals under the Code of Criminal Procedure.

168. The Local Government may direct the Public Prosecutor or other officer specially or generally appointed in this behalf to present an appeal to the High Court from a Presidency Magistrate's order of acquittal or of dismissal, or of discharge; but in no other case shall there be an appeal by the prosecution from any order under this Act.

Appeal by Government from order of acquittal.

No appeal shall be presented under this section after two months from the date of the order complained of.

When an appeal is presented under this section, the High Court may order the accused person to be arrested and brought before it, and may commit him to prison pending the disposal of the appeal, or (if the offence of which he is accused be bailable) admit him to bail.

The High Court may, in any case so appealed, direct a new trial by any Presidency Magistrate, or may pass such order as may be warranted by law.

169. Every petition of appeal under this Act shall be accompanied by a copy of the order appealed against.

Copy of order to accompany petition.

170. If any person affected by an order passed under this Act desires to have a copy of such order or of any deposition or other part of the record, he shall, on applying for such copy, be furnished therewith; provided that he pay for the same, unless the Magistrate, for some special reason, thinks fit to furnish it free of cost.

Copies of proceedings.

171. If the appellant be in jail, he shall be at liberty to present his petition of appeal, and the copy of the order appealed against, to the officer in charge of the jail, who shall thereupon forward such petition and copy to the High Court.

Procedure when appellant in jail.

172. On receiving the petition of appeal and the copy of the order appealed against, the High Court shall peruse the same, and may fix a reasonable time for hearing the appellant or his advocate or pleader, or if he be present may hear him at once.

Procedure on receiving petition of appeal.

The High Court may, if it considers that there is no sufficient ground for altering or revising the order appealed against, reject the appeal summarily.

Power to reject appeal summarily.

Before rejecting an appeal under this section, the High Court may call for the record of the case, but shall not be bound to do so.

Power to call for record.

In rejecting under this section an appeal by a person convicted, the High Court shall not enhance the sentence.

Sentence not to be enhanced when appeal rejected under this section.

173. If the High Court does not reject the appeal summarily, it shall cause notice to be given to the appellant and the Public Prosecutor, Government Solicitor, or other officer

Notice of day for hearing appeal.

empowered by Government in that behalf, of the day on which such appeal will be heard,

and in case of appeals under section 168, the High Court shall also cause a like notice to be given to the respondent.

Service of notice.

All such notices shall be served in manner provided by this Act for serving a summons unless in the case of persons present in Court, to whom they may be given orally.

High Court may alter or reverse finding and sentence, or enhance sentence.

174. The High Court shall send for the record of the case, and after perusing the same, and hearing the appellant or his advocate or pleader, if he appears, and the Government Solicitor or other officer empowered by Government in this behalf, if he appears, may—

(*a*) alter or reverse the order of such Court, or

(*b*) enhance any punishment which has been awarded, but not so as to inflict a greater punishment for the offence which, in the opinion of the High Court, he has committed, than the Presidency Magistrate could have inflicted for such offence, or

(*c*) order the appellant to be re-tried before any Presidency Magistrate or before the High Court, or

(*d*) if it considers that there is no sufficient ground for interfering with the sentence or order appealed against, reject the appeal.

Suspension of sentence pending appeal.

Release of appellant on bail.

175. Pending any appeal under section 167, the High Court may direct that the execution of the order appealed against be suspended, and, if the appellant be in confinement for a bailable offence, may order that he be released on bail.

Where the appellant is ultimately sentenced to imprisonment, the time during which he is so released shall be excluded in calculating the term of his imprisonment.

High Court may make or direct further inquiry.

176. In dealing with any appeal under this chapter, the High Court, if it thinks additional evidence upon any point bearing upon the guilt or innocence of the accused person to be necessary, may either take such evidence itself, or may direct it to be taken by a Presidency Magistrate.

When the additional evidence is taken by the Presidency Magistrate, he shall certify such evidence to the High Court, and the High Court shall thereupon proceed to dispose of the appeal.

Unless the High Court otherwise directs, the accused person or his advocate, attorney or pleader, shall be present when the additional evidence is taken.

The provisions of this Act relating to summoning and enforcing the attendance of witnesses and their examination shall, so far as may be, apply to witnesses examined before a Magistrate under this section.

Order when reversible by reason of error or defect in charge or proceedings.

177. No order passed by a Presidency Magistrate shall be reversed or altered on appeal on account of any error or defect, either in the charge or in the proceedings, or on account of the improper admission or rejection of any evidence, unless such error or defect has occasioned a failure of justice, either by affecting the due conduct of the prosecution, or by prejudicing the accused person in his defence.

Irregularity before trial properly held.

178. No irregularity in the proceedings prior to the commencement of the trial is a sufficient ground for reversing or altering any order passed in a trial properly held.

Procedure in case of conviction by Magistrate not having jurisdiction.

179. When a Presidency Magistrate has passed an order inflicting punishment on any person for an offence not triable by such Magistrate, the High Court shall cancel the order, and either try the case itself or direct it to be tried by a Court of competent jurisdiction.

Unless otherwise provided, no appeal to lie from order of Presidency Magistrate.

180. No appeal shall lie from any order of a Presidency Magistrate, except in the cases provided for by this Act or by any other law for the time being in force.

Illustrations.

(*a.*) There is no appeal against an order refusing to grant compensation, in case of a groundless complaint.

(*b.*) There is no appeal against an order requiring a person to furnish security to keep the peace.

(*c.*) There is no appeal against an order requiring person to furnish security to be of good behaviour.

(*d.*) There is no appeal against an order of maintenance.

Notice to Public Prosecutor of intention to apply under Act X of 1875, s. 147.

181. Whenever an application is made to the High Court for the exercise of the powers conferred by the High Courts' Criminal-Procedure Act, 1875, section 147, the applicant shall give to the Public Prosecutor, Government Solicitor, or such other officer as the Local Government appoints in this behalf, notice in writing of the application, together with a copy of the grounds on which it is to be made; and no order shall be made on the merits of the application unless at least twenty-four hours have elapsed between the giving of such notice and the hearing of the application.

Statement by Magistrate of grounds of his decision, to be considered by High Court.

182. When the decision of any Presidency Magistrate is called in question in the High Court, the Magistrate may submit with the record of the case a statement setting forth the grounds of his decision and any facts which he thinks material to the issue; and the Court shall consider such statement before overruling or setting aside the said decision.

CHAPTER XIII.—OF EXECUTION.

Court to send accused with warrant for execution of sentence to officer in charge of jail.

183. In cases tried by a Presidency Magistrate, the Magistrate passing any order inflicting imprisonment or whipping shall forward the accused person with a warrant for the execution of the sentence to the officer in charge of the jail of the Presidency town in which the trial was held,

or where there are more such jails than one, to the officer in charge of such of them as the Local Government from time to time directs in this behalf.

The warrant shall state the offence of which the accused person has been convicted, the nature of the punishment to which he has been sentenced, and if he has been sentenced to imprisonment, the term for which he is to be imprisoned.

184. Every such warrant shall be in writing under the hand of the Magistrate who issues it, and shall be directed to the officer in charge of the jail aforesaid, and shall be in the form (G) given in the third schedule to this Act or to the like effect.

Form and direction of warrant of commitment.

185. Whenever a Presidency Magistrate imposes a fine under this or any other Act for the time being in force, he may issue a warrant for the levy of the amount of the fine by distress and sale of any moveable property belonging to the offender, although the sentence directs that, in default of payment of the fine, the offender shall be imprisoned.

Levy of fine.

Such warrant may be executed within the local limits of such Magistrate's jurisdiction, and it shall authorize the distress and sale of any such property without such limits when endorsed by the Magistrate of the District in which it is found.

This section shall not apply to cases in which any special procedure is laid down, by any special or local law in force for the time being, for the recovery of any fine, but shall apply to cases in which no such procedure is laid down, and to all fines not levied when this Act comes into force, but which might have been levied under this section if it had been in force when they were imposed.

Section to what cases applicable.

When a warrant is issued under this section, the Presidency Magistrate may order the offender to be imprisoned until return can be conveniently made to such warrant, unless the offender enter into a recognizance, with or without sureties, as the Magistrate thinks fit, conditioned for his appearance before the Magistrate on the day appointed for such return, such day not being more than eight days from the time of taking the recognizance. But if, before issuing such warrant of distress, it appears to the Magistrate, by the admission of the offender or otherwise, that no sufficient distress can be had within the local limits of his jurisdiction whereon to levy such fine or penalty, he may, if he think fit, refrain from issuing such warrant.

Detention of offender until return made to distress-warrant.

No distress made under this Act shall be deemed unlawful, nor shall any person making the same be deemed a trespasser, on account of any defect or want of form in the summons, conviction, warrant of distress or other proceeding relating thereto.

Distress not illegal, nor distrainer a trespasser, for defect of form in proceedings.

The said warrant may be issued either by the Magistrate who imposes the fine, or by his successor in office.

Who may issue distress-warrant.

186. Whenever a Presidency Magistrate imposes a fine under any law in force for the time being, he may order the whole or any part of the fine to be paid in compensation—

Payment of fine in compensation.

(*a*) for expenses properly incurred in the prosecution,

(*b*) for the injury complained of, where such injury can, in the opinion of such Magistrate, be compensated by money.

Such payment shall be made, as the Magistrate thinks fit, to or for the benefit of the complainant, or the person injured, or both.

If the fine be imposed in a case which is subject to appeal, no such payment shall be made until the period allowed for presenting the appeal has elapsed, or, if an appeal be presented, until after the decision of the appeal.

At the time of awarding damages in any subsequent civil suit relating to the same matter, the Court shall take into consideration any sum which may have been paid under this section.

187. When the punishment of whipping is imposed, in addition to imprisonment, in a case which is subject to appeal, the whipping shall not be inflicted until fifteen days from the date of such sentence, or, if an appeal be made within that time, until the sentence is confirmed by the High Court: but the whipping shall be inflicted immediately on the expiry of the fifteen days, or, in case of an appeal, immediately on the receipt of the order of the High Court confirming the sentence.

Whipping, if imposed in addition to imprisonment in appealable case, when to be inflicted.

188. In the case of a person of or over sixteen years of age, the punishment of whipping shall be inflicted with such instrument, in such mode, and on such part of the person, as the Local Government directs; and, in the case of a person under sixteen years of age, it shall be inflicted in the way of school-discipline with a light ratan.

Mode of inflicting punishment of whipping.

In no case, if the cat-of-nine-tails be the instrument employed, shall the punishment of whipping exceed one hundred and fifty lashes, or, if the ratan be employed, shall such punishment exceed thirty stripes.

The punishment of whipping shall be inflicted in the presence of the officer in charge of the jail: provided that, in the case of a person under sixteen years of age, the Magistrate may order it to be inflicted in his own presence.

189. The punishment of whipping shall not be inflicted unless a medical officer, if present, certifies, or, if there is not a medical officer present, unless it appears to the officer or Magistrate present, that the offender is in a fit state of health to undergo such punishment.

Punishment not to be inflicted if offender not in fit state of health.

If, during the execution of a sentence of whipping, a medical officer certifies, or it appears to the officer or Magistrate present, that the offender is not in a fit state of health to undergo the remainder of the sentence, the whipping shall be finally stopped.

Stay of execution.

190. No sentence of whipping shall be executed by instalments.

Not to be executed by instalments.

191. In any case in which, under section 189, a sentence of whipping is, wholly or partially, prevented from being executed, the offender shall be kept in custody till the Magistrate who passed the sentence can revise it; and the said Magistrate may, at his descretion, either remit such sentence, or sentence the offender, in lieu of whipping, or in lieu of so much of the sentence of whipping as was not executed, to

Procedure if punishment be prevented under section 189.

imprisonment for any period, which may be in addition to any other punishment to which he may have been sentenced for the same offence:

Provided that the whole period of imprisonment to which such offender is sentenced shall not exceed that to which he is liable by law, or that which the Magistrate is competent to inflict.

Currency of sentence on escaped convicts.

192. When sentence is passed under this Act on an escaped convict, such sentence, if of fine or whipping, shall take effect immediately, and, if of imprisonment, shall take effect after he has undergone the portion of his former sentence which remained unexpired at the time of his escape.

Commencement of sentence on offender already sentenced for other offence.

193. When a person already under sentence of imprisonment or transportation is sentenced under this Act to imprisonment, such imprisonment shall commence at the expiration of the imprisonment or transportation to which such person has been previously sentenced.

PART III.

CHAPTER XIV.—OF LUNATICS.

Procedure when accused is a lunatic.

194. When any person accused before a Presidency Magistrate of an offence appears to such Magistrate to be of unsound mind and incapable of making his defence, the Magistrate shall enquire into the fact of such unsoundness, and shall cause the accused person to be examined by such medical officer as the Local Government directs, and thereupon shall examine such officer as a witness, and shall reduce the examination into writing.

If such Magistrate is of opinion that the accused person is of unsound mind, he shall stay further proceedings in the case.

When accused appears to have been insane.

195. When, from the evidence given before a Presidency Magistrate, there appears to be sufficient ground for believing that an accused person committed an act which, if he had been of sound mind, would have been an offence, and that he was at the time when the act was committed, by reason of unsoundness of mind, incapable of knowing the nature of such act or that he was doing what was contrary to law, the Presidency Magistrate shall, if such accused person appears to be of sound mind at the time of the inquiry or trial, proceed with the case.

Release of lunatic on bail.

196. Whenever an accused person is found to be of unsound mind and incapable of making his defence, the Presidency Magistrate, if the offence of which such person is accused be bailable, may release him on sufficient bail being given that he shall be properly taken care of, and shall be prevented from doing injury to himself or to any other person, and for his appearance when required before the Magistrate or such officer as the Magistrate appoints in this behalf.

Custody when bail not given.

If the offence be non-bailable, or if sufficient bail be not given, the Magistrate shall report the case for the order of the Local Government, and the accused person shall be kept in safe custody in such place as the Local Government directs.

Resumption of inquiry or trial.

197. Whenever proceedings are stayed under section 194, the Presidency Magistrate may at any time resume the inquiry or trial, and require the accused person to appear or to be brought before him.

When the accused person has been released under section 196, and the sureties for his appearance produce him to the officer whom the Magistrate appoints in this behalf, the certificate of such officer that the accused person is capable of making his defence shall be receivable as evidence.

Procedure on accused appearing before Magistrate.

198. If, when the accused person appears or is again brought before the Magistrate, such Magistrate considers him capable of making his defence, the inquiry or trial shall proceed.

If the Magistrate considers the accused person to be still incapable of making his defence, the Magistrate shall again act according to section 194.

Finding in case of acquittal on ground of being lunatic.

199. Whenever any person is acquitted by a Presidency Magistrate upon the ground that, at the time at which such person is alleged to have committed an offence, he was, by reason of unsoundness of mind, incapable of knowing the nature of the act alleged as constituting the offence complained of, or that he was doing what was contrary to law, the order of acquittal shall state specially whether he committed the act or not.

Procedure when lunatic committed the act alleged.

200. Whenever such order states that the accused person committed the act alleged, the Presidency Magistrate before whom the trial was held shall, if such act would, but for the incapacity found, have constituted an offence, order such person to be kept in safe custody, in such place and manner as the Magistrate thinks fit, and shall report the case for the order of the Local Government.

The Local Government may order such person to be kept in safe custody in a lunatic asylum or other suitable place of safe custody.

Visiting of lunatic prisoners.

201. When any person is confined under the provisions of section 196 or 200, the Inspector General of Prisons, if such person is confined in a jail, or the visitors of the lunatic asylums, or any two of them, if he is confined in a lunatic asylum, may visit him in order to ascertain his state of mind; and he shall be visited once at least in every six months by such Inspector General or by two of such visitors as aforesaid; and such Inspector General or visitors shall make a special report to the Local Government as to the state of mind of such person.

Procedure where lunatic prisoner reported capable of making defence.

202. If such person is confined under section 196, and such Inspector General or visitors as aforesaid shall certify that, in his or their opinion, such person is capable of making his defence, he shall be taken before the Presidency Magistrate at such time as such Magistrate appoints, and such Magistrate shall deal with such person under the provisions of section 198; and the certificate of such Inspector General or visitors as aforesaid shall be receivable as evidence.

203. If such person is confined under the provisions of section 200, and such Inspector General or visitors as aforesaid certify that, in his or their judgment, he may be discharged without danger of his doing injury to himself or to any other person, the Local Government may thereupon either order him to be discharged, or to be detained in custody, or to be transferred to a public lunatic asylum, if he has not been already sent to such an asylum; and may appoint a commission, consisting of a judicial officer and two medical officers, whereof the chief medical officer attached to the lunatic asylum shall be one.

Procedure where lunatic confined under section 200 is declared capable of being discharged.

The said commission shall make formal inquiry into the state of mind of such person, taking such evidence as is necessary, and shall report to the Local Government, who may order his discharge or detention as it thinks fit.

204. Whenever any relative or friend of any person detained under the provisions of section 200 is desirous that he shall be delivered over to his care and custody, the Local Government, upon the application of such relative or friend, and on his giving security to the satisfaction of such Government that the person so detained shall be properly taken care of and shall be prevented from doing injury to himself or another, may order such person to be delivered to such relative or friend.

Delivery of lunatic to care of relative.

Whenever such person is so delivered over, it shall be upon condition that he shall be produced for the inspection of such officer as the Local Government appoints, and at such times as such Government directs.

The provisions of sections 201 and 203 shall, *mutatis mutandis*, apply to persons detained under the provisions of this section; and the certificate of the inspecting officer appointed under this section shall be dealt with as a certificate of the Inspector General of Prisons, or the visitors of lunatic asylums, under the said sections.

CHAPTER XV.—OF CONTEMPTS OF COURT.

205. When any such offence as is described in sections 175, 178, 179, 180 or 228 of the Indian Penal Code is committed in the view or presence of a Presidency Magistrate, he may cause the offender to be detained in custody; and, at any time before the Magistrate leaves his Court on the same day, he may take cognizance of the offence, and sentence the offender to punishment by fine not exceeding two hundred rupees, and, in default of payment, by imprisonment in the civil jail for a period not exceeding one month, unless such fine be sooner paid.

Procedure in certain cases of contempt.

In every such case, the Magistrate shall record the acts constituting the offence, with the statement (if any) made by the offender as well as the finding and sentence.

If the offence is under section 228 of the Indian Penal Code, the record must show the nature and stage of the judicial proceeding in which the Magistrate interrupted or insulted was sitting, and the nature of the insult or interruption.

206. If the Presidency Magistrate considers that a person accused of any of the offences referred to in section 205 should be imprisoned otherwise than in default of payment of fine, or that a fine exceeding two hundred rupees should be imposed upon him, such Magistrate, after recording the facts constituting the offence and the statement of the accused person shall forward the case to another Presidency Magistrate, and shall require bail to be given for the appearance of such accused person before such other Magistrate, or, if sufficient bail be not given, shall forward such person under custody to such Magistrate.

Procedure where Court considers that accused should be imprisoned, or fined more than 200 rupees.

Such other Magistrate shall proceed to try the accused person in the manner provided by this Act for trials before a Presidency Magistrate; and may sentence the offender to punishment, as provided in the section under which he is charged.

207. When any Presidency Magistrate has sentenced an offender to punishment, or forwarded him to another Magistrate for trial, for refusing or omitting to do anything which he was lawfully required to do, or for any intentional insult or interruption, the former Magistrate may discharge the offender, or remit the punishment, on his submission to the order or requisition of such Magistrate, or on apology being made to his satisfaction.

Discharge of offender on submission or apology.

CHAPTER XVI.—OF SECURITY FOR KEEPING THE PEACE AND FOR GOOD BEHAVIOUR.

A.—Security for keeping the Peace.

208. Whenever a person accused of rioting, assault, or other breach of the peace, or with abetting the same, or with assembling armed men or taking other unlawful measures with the evident intention of committing the same, is convicted of such offence before a Presidency Magistrate,

Personal recognizance to keep the peace in cases of conviction.

and such Magistrate is of opinion that it is necessary to require such person to execute a personal recognizance for keeping the peace,

he may, in addition to any other order passed in the case, order the person so convicted to execute a personal recognizance for keeping the peace during such period as the Magistrate thinks fit to fix, not exceeding one year.

209. Whenever a Presidency Magistrate is of opinion that it is necessary to require sureties for keeping the peace, in addition to the personal recognizance of the person so convicted, such Magistrate may require him to give such sureties, and may fix the penalties which the sureties shall be respectively bound to discharge, and may direct that, if such bail be not given, he shall be imprisoned for such term not exceeding one year as the Magistrate thinks fit.

Sureties for keeping the peace.

210. If the person so convicted be sentenced to imprisonment, the period so fixed, and the term of imprisonment in default of executing the recognizance, shall commence on the expiration of his sentence.

Commencement of period during which person may be bound to keep peace.

Where the order to execute such recognizance is not made at the time of signing, or by the Magistrate who signs the judgment, the person so convicted must be produced before the Magistrate making such order.

211. Whenever it appears to a Presidency Magistrate that it is necessary for the preservation of the peace that the term for

Extension of time for which person is bound.

which any person is so bound should be extended, he may, before the expiration of the first year, record his opinion to that effect and the grounds thereof, and may refer the case for the orders of the High Court.

Such Court, after examining the proceedings of the Magistrate, and making such further inquiry as it thinks necessary, may, if it see cause, authorize him to extend such term for a further period not exceeding one year from the expiration of the first year.

EXPLANATION.—When the subject of dispute, or ground for apprehension, is the same as that on which the first order was passed, the Magistrate must proceed under this section if the first bond is still in force, and not under section 215.

B.—Security for Good Behaviour.

When Magistrate may require security for good behaviour for six months.

212. Whenever it is proved before a Presidency Magistrate that any person is lurking within the local limits of his jurisdiction, or that there is within such limits a person who has no ostensible means of subsistence, or who cannot give a satisfactory account of himself, the Magistrate may require such person to enter into such recognizance, with sureties, for his good behaviour for a period not exceeding six months, as the Magistrate thinks sufficient.

When Magistrate may require security for good behaviour for one year.

213. Whenever it is proved before a Presidency Magistrate that any person is by repute

a robber, house-breaker or thief,

or a receiver of stolen property, knowing the same to have been stolen,

or of notoriously bad livelihood,

or of a dangerous character,

such Magistrate may require similar security for the good behaviour of such person for a period not exceeding one year.

Procedure where security required for more than one year.

214. Whenever it is proved before a Presidency Magistrate that any person is an habitual robber, house-breaker or thief,

or an habitual receiver of stolen property, knowing the same to have been stolen,

or of a dangerous character,

and that his release without security, at the expiration of the limited period of one year, would be hazardous to the community,

the Magistrate shall record his opinion to that effect, and make an order requiring similar security for the good behaviour of such person for a period not exceeding three years.

If such person does not comply with the order, the Magistrate shall issue a warrant directing his detention pending the orders of the High Court.

C.—Provisions as to both Kinds of Security.

Summons to person to show cause why he should not give bond to keep peace or for good behaviour.

215. Whenever a Presidency Magistrate receives information that any person is likely to commit a breach of the peace, or to do any act that may probably occasion a breach of the peace, or that he is one of the persons referred to in sections 212, 213 and 214, he may summon such person to attend at a time and place mentioned in the summons, to show cause why he should not be required to execute a recognizance to keep the peace or for good behaviour, as the case may be.

EXPLANATION I.—A summons calling on a person to show cause why he should not execute such recognizance, may be issued on any report or other information which the Magistrate believes; but the Magistrate shall not require any person to execute such recognizance until the Magistrate has adjudicated on evidence before him.

EXPLANATION II.—A Magistrate may, if he thinks fit, recall any summons issued under this section.

Contents of summons.

216. Such summons shall set forth the substance of the report or information on which it is issued, the penalty to be specified in the recognizance, and the term for which it is to be in force, and, if bail are to be taken, their number, the penalties which they shall be respectively bound to discharge, and the time and place at which the person summoned is required to attend.

When the person believed to be likely to commit a breach of the peace or to be one of the persons referred to in sections 212, 213 and 214, is present in Court, no summons is necessary, but the Magistrate may at once require him to show cause why he should not be required to execute the recognizance.

When warrant of arrest may issue.

217. If the person summoned does not attend on the day appointed at the hour and place named in the summons, the Presidency Magistrate, if satisfied that the summons has been duly served, may issue a warrant for his arrest:

Provided that, whenever it appears to such Magistrate, upon the report of a Police-officer or upon other credible information (the substance of which report or information shall be recorded by the Magistrate on the warrant), that there is reason to fear the commission of a breach of the peace, which may probably be prevented by the immediate arrest of any person, or that there is reason to think that any person is one of the persons so referred to, the Magistrate may at any time issue a warrant for his arrest.

Magistrate may dispense with personal attendance of person informed against.

218. The Magistrate may, if he sees sufficient cause, dispense with the personal attendance of the person informed against under section 215, and may permit him to appear and execute the required recognizance, or show cause against such requisition, by an advocate, attorney or pleader.

Discharge of person informed against.

219. If on the appearance of the person so informed against or, if his attendance is dispensed with, of his advocate, attorney or pleader, the Magistrate is not satisfied that there is occasion to bind over such person to keep the peace, or to be of good behaviour, the Magistrate shall direct his discharge.

Order to give bond and consequence of non-compliance.

220. If the Magistrate is satisfied that it is necessary for the preservation of the peace or the maintenance of good behaviour that such person shall execute a recognizance, the Magistrate shall make an order accordingly.

The penalty specified in every recognizance executed under this chapter shall be fixed with due regard to the circumstances of the case and the means of the person bound.

The penalty which the sureties shall be jointly and severally bound to discharge shall not exceed the penalty which the principal debtor is bound to discharge.

Proceedings to be laid before High Court.

221. If a person required to furnish security under section 214 does not furnish the same, or offers sureties whom the Magistrate rejects, the proceedings shall be laid, as soon as conveniently may be, before the High Court.

Such Court, after examining such proceedings and requiring any further information or evidence which it thinks necessary, may pass such orders on the case as it thinks fit, provided that the period (if any) for which it may direct the security to be taken shall not exceed three years.

Contents of order for security.

222. Whenever security is required under this chapter, the amount of the security, the number and description of sureties, and the period of time for which the recognizance is to remain in force, shall be stated in the order, and the recognizance shall be in the form (H) or (I), as the case may be, given in the third schedule hereto annexed or to the like effect.

Form of recognizance.

Imprisonment in default of security.

223. In the event of any person required to give security under the provisions of this chapter failing to furnish the security so required, he shall be committed to prison until he furnish the same:

Provided that no such person shall be kept in prison for a longer period than that for which the security has been required from him.

Term of imprisonment.

Imprisonment under this section may be rigorous or simple, as the High Court or Magistrate in each case directs.

Binding of sentenced person.

224. If any person required under this chapter to enter into a recognizance is under sentence of imprisonment, he shall, on or after the expiration of his sentence, be brought up before the Magistrate for the purpose of entering into such recognizance.

Release of prisoners under requisition of security.

225. A Presidency Magistrate may at any time release any person imprisoned for failing to furnish security for good behaviour, whether by his own order or that of his predecessor in office, provided that the Magistrate is of opinion that such person may be released without hazard to the community.

Release of prisoner under requisition of security by order of High Court.

Whenever a Presidency Magistrate is of opinion that any person imprisoned for failing to furnish security for good behaviour, as ordered by the High Court, may be safely released without such security, such Magistrate shall make an immediate report of the case for the orders of the High Court.

Discharge of sureties.

226. A surety for the peaceable conduct or good behaviour of another person may at any time apply to a Presidency Magistrate to discharge his recognizance.

On such application being made, the Magistrate shall issue his summons or warrant requiring the person for whom such surety is bound to appear or be brought before him.

When such person appears or is brought before the Magistrate, such Magistrate shall discharge the recognizance of the surety, and shall order such person to give a fresh surety.

Commission, &c., of offence, a breach.

227. The commission, or attempt to commit, or the abetment of, any offence whatever, and wherever it may be committed, is a breach of the recognizance.

Recovery of penalty from principal.

228. Whenever it is proved before a Presidency Magistrate that any recognizance entered into under this chapter has been forfeited, he shall record the grounds of such proof, and call upon the person bound by such recognizance to pay the penalty thereof, or to show cause why it should not be paid.

If sufficient cause be not shown and the penalty be not paid, the Magistrate shall proceed to recover the same by issuing a warrant for the attachment and sale of any moveable property belonging to the person bound.

Such warrant may be executed within the local limits of the jurisdiction of the Magistrate who issued it; and it shall authorize the distress and sale of any moveable property belonging to the person so bound without such limits, when endorsed by the Magistrate of the District in which such property is found.

If such penalty be not paid and cannot be recovered by such attachment and sale, the person so bound shall be liable to imprisonment by order of the Presidency Magistrate in the civil jail for a period not exceeding six months.

The penalty shall not be enforced until the person so bound has had an opportunity of showing cause against the enforcement, and until the breach of the condition of the recognizance has been proved.

Recovery of penalty from surety.

229. Whenever it is proved before a Presidency Magistrate that any recognizance entered into under this chapter by a surety has been forfeited, the Magistrate may give notice to the surety to pay the penalty to which he has thereby become liable, or to show cause why it should not be paid.

If no sufficient cause is shown, and such penalty is not paid, the Magistrate may proceed to recover the penalty from such surety in manner provided by the last preceding section.

And in case such penalty cannot be so recovered, the Magistrate may sentence the surety to imprisonment in the civil jail for a period not exceeding six months.

Proof of previous conviction.

230. Any previous conviction of the person to be bound may, in proceedings under this chapter, be proved in the manner prescribed in section 154.

Where proceedings under this chapter may be taken.

231. Proceedings under this chapter may be taken in any district in which the breach of the peace is apprehended, or in which an offence has been committed in breach of the bond, or in which the person whom it is desired to bind may be.

Provisions of chapter not applying to European vagrants.

232. The provisions of this chapter relating to security for good behaviour do not apply to European British subjects in cases where they may be dealt with under the European Vagrancy Act, 1874.

CHAPTER XVII.—Of restoring Possession of Immoveable Property.

Power to restore possession of immoveable property.

233. Whenever any person is convicted by a Presidency Magistrate of an offence attended with criminal force, and it appears to such Magistrate that, by such criminal force, any person has been dispossessed of any immoveable property, the Magistrate may order such person to be restored to possession.

No such order shall prejudice any right over such immoveable property which any person may be able to show in a civil suit.

CHAPTER XVIII.—Of the Maintenance of Wives and Families.

Order for maintenance of wives and children.

234. If any person, having sufficient means, neglects or refuses to maintain his wife, or his legitimate or illegitimate child unable to maintain itself, a Presidency Magistrate may, upon due proof thereof by evidence, order such person to make a monthly allowance for the maintenance of his said wife, or child, or both, at such monthly rate not exceeding fifty rupees in the whole, as such Magistrate thinks fit, and to pay the same to such person as the Magistrate from time to time directs.

Such allowance shall be payable from the date of the order.

Enforcement of order.

If any person so ordered wilfully neglects to comply with the order, a Presidency Magistrate may, for every breach of the order, issue a warrant for levying the amount due in manner hereinbefore provided for levying fines; and may sentence such person, for each month's allowance remaining unpaid, to imprisonment for any term not exceeding one month:

Proviso.

Provided that, if such person offers to maintain his wife on condition of her living with him, and his wife refuses to live with him, such Magistrate may consider any grounds of refusal stated by such wife; and may make the order allowed by this section notwithstanding such offer, if he is satisfied that such person is living in adultery, or that he has habitually treated his wife with cruelty.

No wife shall be entitled to receive an allowance from her husband under this section, if she is living in adultery, or if, without any sufficient reason, she refuses to live with her husband, or if they are living separately by mutual consent.

Alteration in allowance.

235. On the application of any person receiving, or ordered to pay, a monthly allowance under the provisions of section 234, and on proof of a change in the circumstances of such person, his wife or child, the Magistrate may make such alteration in the allowance ordered as he thinks fit, provided the monthly rate of fifty rupees be not exceeded.

Enforcement of order.

236. A copy of the order of maintenance shall be given without fee to the person in whose favour it is made, or to his guardian (if any); and such order shall be enforceable by any Magistrate in any place where the person against whom it is made may be, on such Magistrate being satisfied as to the identity of the parties and the non-payment of the allowance due.

PART IV.

CHAPTER XIX.—MISCELLANEOUS.

Procedure in miscellaneous criminal cases and proceedings.

237. The procedure prescribed by this Act shall be followed, so far as it can be, in all miscellaneous criminal cases and proceedings which are instituted in any Presidency Magistrate's Court.

Offences against Railway, Telegraph, Post Office and Arms' Acts.

238. All offences against the provisions of any law for the time being in force relating to Railways, Telegraphs, the Post Office, and Arms and Ammunition may be enquired into by a Presidency Magistrate, and may be tried according to the provisions of this Act.

Extent of jurisdiction.

239. The powers conferred on a Presidency Magistrate by section 238 may be exercised whether the offence is stated to have been committed within the local limits of his jurisdiction or not; but such powers shall only be exercised if the witnesses necessary for the prosecution of the offender are to be found within such limits.

Reference to High Court.

240. A Presidency Magistrate may, if he thinks fit, refer for the opinion of the High Court any question of law which may arise in the hearing of any case in which he has jurisdiction; or may give judgment in any such matter, subject to the decision of the High Court on such reference; and, pending such decision by the High Court, may either commit the accused person to jail or release him on bail to appear for judgment

Disposal of case according to decision of High Court.

241. When a question has been so referred, the High Court shall pass such order thereon as it thinks fit, and shall cause a copy of such order to be sent to the Magistrate by whom the reference was made, who shall proceed to dispose of the case conformably to the said order.

Direction as to costs.

The High Court may direct by whom the costs of the reference shall be paid.

Compensation to person groundlessly given in charge or complained against.

242. Whenever any person causes a Police-officer to arrest another person, and whenever a complaint of any offence is made before any Presidency Magistrate, if it appears to the Magistrate by whom the case is heard that there was no sufficient ground for causing such arrest or for making such complaint, the Magistrate may award such compensation, not exceeding fifty rupees, to be paid by the person so causing the arrest or making the complaint, to the person so arrested or complained against, for his loss of time and expenses in the matter, as the Magistrate thinks fit.

In such cases, if more persons than one are arrested or complained against, the Magistrate may, in like manner, award to each of them such compensation, not exceeding fifty rupees, as such Magistrate thinks fit.

All compensation awarded under this section may be recovered as if it were a fine.

Order for disposal of property regarding which offence committed.

243. When the inquiry or trial before any Presidency Magistrate is concluded, he may make such order as he thinks fit for the disposal of any moveable property produced before him regarding which any offence appears to have been committed.

EXPLANATION.—In this section the term 'property' includes not only such property as has been originally in the possession or under the control of any party, but also any property into or for which the same may have been converted or exchanged, and anything acquired by such conversion or exchange, whether immediately or otherwise.

Power to order disposal of property connected with charge, in Police-custody.

244. If any property alleged to be stolen or fraudulently obtained, is in the custody of any Police-officer by virtue of any warrant of a Presidency Magistrate, or in prosecution of any complaint of an offence in regard to the obtaining thereof, and the person accused of such offence is not found, or has been summarily dealt with and discharged, or has been tried and acquitted,

or if such person has been tried and found guilty, but the property so in custody has not been included in the charge upon which he has been found guilty,

or if any property has been seized by a Police-officer under section 160,

any Presidency Magistrate may make an order for the delivery of such property to the person appearing to be the rightful owner thereof; or, in case the owner cannot be ascertained, may make such order with respect to the property as the Magistrate thinks fit:

Provided that no such order shall bar the right of any person to sue the person to whom the property is delivered, and to recover such property from him, so that the suit be instituted within six months next after such order has been made.

Expenses of complainants and witnesses.

245. Subject to any rules that may be made by the Local Government, with the previous sanction of the Governor General

payment, on the part of Government, of the reasonable expenses of any complainant or witness attending for the purpose of any trial under this Act.

All persons to give information of certain offences.

246. Every person aware of the commission within the local limits of the jurisdiction of a Presidency Magistrate of any offence made punishable under sections 121, 121A, 122, 123, 124, 124A, 125, 126, 130, 302, 303, 304, 382, 392, 393, 394, 395, 396, 397, 398, 399, 402, 435, 436, 449, 450, 456, 457, 458, 459 or 460 of the Indian Penal Code, shall, in the absence of reasonable excuse, the burthen of proving which shall lie upon such person, give information of the same to the nearest Police-officer or Presidency Magistrate.

All persons to assist Magistrate and Police in certain cases.

247. Within such local limits every person is bound to assist a Presidency Magistrate or Police-officer demanding his aid

in the prevention of a breach of the peace,

or in the suppression of a riot or an affray,

or in the taking of any other person whom such Magistrate or Police-officer is authorized to arrest.

SCHEDULE I.

ACTS REPEALED.

(SEE SECTION 2.)

No. and year.	Title or subject.	Extent of repeal.
XIII of 1856 ...	Presidency Towns Police	In the preamble, the words "and the administration of justice in the Police Courts." In section one, the words and figures "sections II and IV of Act XXII of 1837 and." Sections twenty-two, twenty-three, twenty-six to thirty-one (both inclusive), thirty-six, thirty-seven, forty-one, forty-two, forty-four, forty-five, eighty-three, eighty-four, eighty-seven, ninety-five to ninety-eight (both inclusive), one-hundred to one-hundred-and-four (both inclusive), one-hundred-and-six, one-hundred-and-eight to one-hundred-and-eleven (both inclusive). In section twenty-four, the words "or by any Magistrate of Police." In section thirty-five, clause two, the words "on oath." In section ninety-three, the words "or to a Magistrate," "or the Magistrate," and "or Magistrate."
XLVIII of 1860	Amending Act XIII of 1856.	Sections four, five, six, eight, ten, twenty-four, twenty-five and twenty-six.
LII of 1860 ...	Trials for breach of Railway Police Regulations	The whole.
XXI of 1864 ...	An Act for the extension of the jurisdiction of the Magistrates of Police in Calcutta.	The whole.
Madras Act VIII of 1867.	Madras Town Police and Police Magistrates.	In the preamble, the words "and to extend the jurisdiction of the Town Police Magistrates." Sections ten, twelve to sixteen (both inclusive), nineteen, twenty-one, twenty-two, fifty-two, fifty-three, sixty to seventy (both inclusive), seventy-two to seventy-four (both inclusive). In section fifty-eight, the words "or to a Magistrate," "or the Magistrate," and "or Magistrate."
Bengal Act IV of 1866.	The Calcutta Police Act, 1866.	Sections twenty-two, twenty-three, twenty-four, twenty-six, twenty-seven, twenty-eight, thirty, thirty-one, sixty-nine, seventy-three, eighty-two to ninety-four (both inclusive), ninety-six to ninety-eight (both inclusive). In section seventy-nine, the words "or to a Magistrate," "or the Magistrate," and "or Magistrate."
Bengal Act VIII of 1866.	Amending Bengal Act IV of 1866.	The whole.
Bombay Act IV of 1866.	Court of Petty Sessions, Bombay.	The whole.

SCHEDULE II.

TABULAR STATEMENT OF OFFENCES.

(SEE SECTION 4.)

EXPLANATORY NOTES.—1*st*.—The entries in the second and sixth columns of the schedule, headed respectively "Offence" and "Punishment under the Indian Penal Code," are not intended as definitions of the offences and punishments described in the several corresponding sections of the Indian Penal Code, or even as abstracts of those sections, but merely as references to the subject of the section, the number of which is given in the first column.

2*nd*.—The term "Whether bailable or not," in column 5, is to be taken in connection with the provisions of sections 70 and 71 of this Act.

3*rd*.—The High Court may try an offence entered in column 7 as triable by a Magistrate.

4*th*.—The last part of the schedule, headed "Offences against other Laws," shall not be taken to alter or affect any special provision contained in such laws regarding the procedure to be followed in the case of offences made punishable thereby.

5*th*.—The direction in column 4 is meant to indicate to Presidency Magistrates the manner in which the discretion vested in them by sections 34 and 35 is commonly to be used.

CHAPTER V.—OF ABETMENT.

1	2	3	4	5	6	7
Section.	OFFENCE.	Whether the Police may arrest without warrant or not.	Whether a warrant or a summons shall ordinarily issue in the first instance.	Whether bailable or not.	Punishment under the Indian Penal Code.	By what Court triable.
109	Abetment of any offence, if the act abetted is committed in consequence, and where no express provision is made for its punishment.	May arrest without warrant, if arrest for the offence abetted may be made without warrant, but not otherwise.	According as a warrant or summons may issue for the offence abetted.	According as the offence abetted is bailable or not.	The same punishment as for the offence abetted.	By the Court by which the offence abetted is triable.
110	Abetment of any offence, if the person abetted does the act with a different intention from that of the abettor.	Ditto -	Ditto -	Ditto -	Ditto - -	Ditto

29. Effect of such dependent's unfitness from ill-health to return to Straits.
30. Compensation to emigrant or dependent for ill-treatment on journey to depôt.
31. Failure of Emigration Agent, &c., to pay such expenses.
32. Suits against Emigration Agent for breach of contract.

VIII.—EMIGRANT VESSELS.

33. Emigrants not to be received on board vessels other than those licensed under Native Passengers Act,
    or without certificate from Protector.
    Protector not to grant certificate unless satisfied that vessel has been licensed and has provisions on board.
34. Emigrant to give his pass to Master.
35. Emigration Agent to be present at embarkation.
36. Master to deliver list of emigrants.

IX.—SUPPLEMENTARY POWERS.

37. Power to prohibit emigration to the Straits Settlements.
38. Revocation of prohibition.

X.—OFFENCES.

39. Making unlawful contract of labour.
    Recruiting without being licensed.
    Recruiter omitting to take engaged labourers before Magistrate or Protector.
40. Use of force, fraud, &c., to cause a Native to emigrate.
41. False representation of Government authority.
42. Receiving emigrants on board without license or certificate.
43. Failure to comply with requirements of sections 34 and 36.
44. Penalty for landing emigrant or dependent at other than specified port.
45. Taking on board, after clearance, emigrants not entered in list.
46. Prosecutions under this Act by whom to be instituted.
47. Customs officers may search and detain for purposes of this Act.

XI.—MISCELLANEOUS.

48. Act not to apply to certain vessels,
49. or to contracts with Native seamen and menial servants.
50. Emigration Agent and his subordinates and Protector of Emigrants to be deemed public servants.
51. Indian Emigration Act, 1871, not to apply to Straits Settlement.
52. Repeal of Act XIV of 1872.

THE FIRST SCHEDULE.

THE SECOND SCHEDULE.

An Act to regulate the Emigration of Native Labourers from the Presidency of Fort Saint George to the Straits Settlements.

WHEREAS it is expedient to regulate emigration under engagements to labour from the Presidency of Fort Saint George to the Straits Settlements; It is hereby enacted as follows :—

Preamble.

I.—PRELIMINARY.

Short title.

I. This Act may be called "The Straits Settlements Emigration Act, 1877:"

Local extent.

It extends only to the territories under the government of the Governor of Fort Saint George in Council;

Commencement.

And it shall come into force on such date as the Governor of Fort St. George in Council, with the previous sanction of the Governor General in Council, may, by notification in the *Fort St. George Gazette*, direct.

Interpretation-clause.

2. In this Act, unless there be something repugnant in the subject or context—

"Emigrate" denotes the departure of any Native of India out of the said territories, under an engagement to labour in the said Settlements :

"Emigrate."

"Emigrant" means a person who "emigrates" within the meaning of the above definition

'Emigrant."

"Magistrate" means a Magistrate of a District a Magistrate of a division of a district, or any other person appointed by the Governor of Fort St. George in Council to perform the functions of a Magistrate under this Act :

'Magistrate."

"Vessel" includes anything made for the conveyance by water of human beings or property.

'Vessel."

From what port emigration lawful.

3. It shall not be lawful to emigrate except from such ports as may from time to time be declared by the Governor of Fort St. George in Council, by a notification in the *Fort Saint George Gazette*, to be ports from which emigration under this Act shall be lawful.

The Local Government may, at any time, by a like notification, revoke any such notification.

II.—EMIGRATION AGENTS.

Appointment of Emigration Agents.

4. The Government of the Straits Settlements may, from time to time, appoint such persons as the Governor of Fort St. George in Council approves, to act as Emigration Agents at such ports as aforesaid.

Any Emigration Agent so appointed may be suspended or removed by the Government of the Straits Settlements.

III.—PROTECTORS OF EMIGRANTS.

Appointment of Protector of Emigrants.

5. The Governor of Fort St. George in Council shall direct such persons as he thinks fit to act as Protectors of Emigrants under this Act at such ports and for such local areas as may be assigned to them respectively, and may, with the sanction of the Governor General in Council, assign to such persons such establishment as the Governor of Fort St. George in Council thinks fit.

General duties of Protector.

6. Every Protector of Emigrants, in addition to any special duties assigned to him by this Act, shall, so far as is in his power, protect and aid all emigrants with his advice or otherwise, and cause all the provisions of this Act to be duly complied with.

Inspection of vessels with return emigrants.

He may also inspect on arrival all vessels bringing return emigrants to the port at which he is Protector, and inquire into the treatment received by such emigrants both during the period of their service in the Straits Settlements and also during the voyage, and shall make a report thereon to the Governor of Fort St. George in Council.

Such Protector shall also aid and advise such return emigrants, so far as he reasonably can, when called upon by them to do so.

IV.—EMIGRATION DEPÔT.

Establishment and licensing of depôt.

7. Every Emigration Agent shall establish a suitable depôt for emigrants at the port at which he is Agent. Such depôt may be licensed by the local Protector of Emigrants after being inspected and approved of by him.

Fee for license

For every such license the Emigration Agent shall pay to the Protector of Emigrants a fee of fifteen rupees.

Inspection by Protector.

8. The Protector of Emigrants may, at any time, examine into the state of the depôt and the manner in which the emigrants are therein lodged, fed, clothed and otherwise provided for and attended to, and shall do so at least once a year.

And he may at any time cancel the license, if he considers that the depôt for which it was granted is unhealthy, or has in any respect become unsuitable for the purpose for which it was established, or if the local Emigration Agent fails to comply with any of the requirements of this Act.

Agent and his subordinates to afford facilities for inspection.

The Emigration Agent and all persons in charge of, or employed in, the depôt, shall give the Protector every facility for making such inspections as he may deem necessary or proper, and shall afford him all such information respecting the depôt and the emigrants as he may require.

Supply of medical aid and comforts.

9. The Emigration Agent shall provide at the depôt such medical aid and comforts as the Protector may from time to time direct.

V.—RECRUITERS OF LABOURERS.

Protector to license recruiters.

10. Each Protector of Emigrants shall license so many fit persons as he deems necessary, to be recruiters of labourers for the Straits Settlements; and no person shall engage or attempt to engage any Native of India to emigrate, or shall otherwise act or be employed as a recruiter of labourers, except under a license from a Protector of Emigrants.

11. No such license shall be in force for a longer period than one year; and in case of misconduct on the part of any recruiter, the Protector of Emigrants who granted it may cancel his license before the expiration of the period for which it was granted.

Duration and cancelment of license.

12. Every such license shall specify the local limits within which the person licensed may recruit labourers, and shall be in the form set forth in the first schedule hereto annexed.

Form of license.

For every such license the recruiter shall pay to the Protector a fee of five rupees.

Fee for license.

13. No recruiter shall engage, or attempt to engage, labourers in any district without having first exhibited his license to a Magistrate in such district, and obtained the countersignature of such Magistrate thereupon.

Recruiter to obtain Magistrate's countersignature to license.

No Magistrate shall countersign a recruiter's license unless and until he has satisfied himself, by such enquiry as he thinks fit, that the licensee is not by character or from any other cause unfitted to be a recruiter under this Act.

If any Magistrate who has countersigned a license afterwards finds reason to think that the licensee is by character or other cause unfitted to be a recruiter under this Act, he may require the licensee to produce the license and may cancel his signature; or he may, if he thinks fit, impound the license and send it to the Emigration Agent for cancellation.

Every Magistrate refusing to countersign a recruiter's license or cancelling his signature as aforesaid, shall, without delay, report his refusal or cancellation and the grounds of it to the Protector of Emigrants who has authority to cancel the recruiter's license.

VI.—CONTRACTS WITH EMIGRANTS.

14. No contract made by a recruiter with a Native of India to emigrate shall be enforceable by the recruiter or his principal unless it—

Conditions of validity of emigration contracts.

(*a*) is expressed in writing;

(*b*) is executed by the recruiter on behalf of some principal in the Straits Settlements;

(*c*) states the terms, if any, agreed on as to the redemption of the recruit's engagement for employment, or of the unexpired term of such engagement;

(*d*) the term of the recruit's employment, the nature of the services to be performed by him, and the rate of wages to be paid in respect of the same are registered in the manner provided in section eighteen.

But nothing contained in this section shall be deemed to prevent such Native from insisting, if he thinks fit, that such contract shall be performed.

15. Every such contract shall—

Contents of such contracts.

(*a*) contain an engagement for employment to be provided by such principal for a definite term not exceeding three years; and

(*b*) specify the nature of the services to be performed by such recruit and the rates of wages (not less than twelve cents a day for an able-bodied male adult) payable in respect of the same.

16. Save as provided by section fourteen, clause (*c*), every agreement entered into by a Native of India in the territories subject to the Governor of Fort Saint George in Council, to pay money to any person in the Straits Settlements, in consideration of pecuniary or other assistance given to such Native to emigrate, shall be illegal and void.

Certain agreements declared void.

Every contract not containing the particulars required by section fifteen shall be illegal and void.

17. Every recruit who has entered into such a contract as aforesaid shall be brought by the recruiter before the Civil Surgeon of the district or such other medical officer as the Local Government appoints in this behalf or, in default of such appointment, before such medical officer as the Magistrate directs.

Medical examination of intending emigrants.

The medical officer shall thereupon examine the recruit, and shall either reject him or shall certify that he is in a fit state of health and able in point of physical condition to proceed to the Straits Settlements and to work there.

If it is intended that any persons shall accompany the recruit as his dependents, the recruiter shall also bring them before the medical officer for the purpose of obtaining certificates that they are in a fit state of health and able in point of physical condition to perform the journey to the Straits Settlements; and the medical officer shall examine such persons and shall give or refuse certificates according to his opinion as to their fitness and ability.

Dependents.

Certificates shall be in the form set forth in the second schedule hereto annexed; and the recruiter shall pay to the medical officer such fee for each person so examined as the Local Government may from time to time prescribe.

Form of certificates.

18. Every certified recruit and every accompanying dependent shall appear with the recruiter before a Magistrate in the district within which the contract with the recruit was entered into.

Emigrant to appear before Magistrate,

The Magistrate shall thereupon inspect the instrument of contract and the medical certificate of the recruit, and shall, apart from the recruiter, examine the recruit with reference to his contract.

and be examined.

If it appears on such examination that the recruit understands the nature of the contract he has entered into, and that he is willing to fulfil the same, the Magistrate shall register

(*a*) the name, the father's name and the age of such recruit:

(*b*) the name of the village or place in which he resides:

(*c*) the port of embarkation to which it is intended he shall proceed:

(*d*) the name of his employer:

(*e*) the term of his employment, the nature of the services to be performed by him and the rate of wages to be paid in respect of the same.

The recruit shall thereupon be deemed an emigrant under this Act.

Registration when to be refused.

If the Magistrate thinks that the recruit does not understand the nature of the contract into which he has entered, or has been induced to enter into it by fraud or misrepresentation, or finds that the contract is not in accordance with section fifteen, he shall refuse to register the particulars specified as aforesaid, and record his reasons for such refusal.

Examination of dependents.

19. On the appearance of any person claiming to be dependent on an emigrant, the Magistrate, after inspecting the medical certificate, shall, apart from the recruiter, examine such person if able to give intelligent answers to questions as to his dependence upon the emigrant whom he is about to accompany, and as to his willingness to accompany such emigrant.

If the Magistrate is satisfied that such dependence and willingness exist, he shall register the dependent as a dependent on such emigrant.

But if the Magistrate sees reason to doubt the existence of such dependence or willingness, he may refuse to register the alleged dependent, and, if so, shall record his reasons for such refusal.

Copies of registered matters.

20. The Magistrate shall furnish to every emigrant an authenticated copy on substantial paper of the matters registered under sections 18 and 19.

Copy of entry in register to be sent to Emigration Agent and Protector.

21. A copy of every entry made in the registry book by a Magistrate, shall be forthwith forwarded by such Magistrate to the Emigration Agent and to the Protector of Emigrants.

Registration.

22. The registration required by sections 18 and 19 shall, in the case of emigrants recruited in any local area for which a Protector of Emigrants has been appointed, be effected before him instead of a Magistrate; and such Protector shall furnish to the emigrant one copy of the matters so registered, and another copy of the same matters to the Emigration Agent.

Fee for registration.

23. For the registration of every recruit under section 18, the recruiter shall pay to the Magistrate or to the Protector of Emigrants, as the case may be, such fee not exceeding one rupee, as may be from time to time directed by the Local Government.

VII.—ARRIVAL AT DEPÔT AND PROCEDURE THEREON.

Arrival at depôt to be reported.

24. The arrival of each emigrant at the depôt shall immediately be reported by the person in charge of the depôt to the Emigration Agent, and by such Agent to the Protector of Emigrants.

The Emigration Agent may institute such examination of the emigrants as he thinks fit in order to satisfy himself of their fitness to emigrate.

Duty of Emigration Agent on arrival of emigrants.

25. The Protector of Emigrants shall, within forty-eight hours after the arrival at the depôt of each emigrant not registered by himself, question such emigrant as to the mode in which he has been treated on his journey to the depôt, and shall at the same time examine the emigrant's contract and the copy of the register furnished to him under section 20.

If, for any reason, further inquiry is necessary, he shall make such enquiry forthwith.

Countersignature of register.

26. If in the opinion of the Protector of Emigrants the examination and enquiry made under section 25 disclose no valid reason against the fulfilment of the contract, and the emigrant has not become physically unfit for emigration, the Protector and the Emigration Agent shall countersign the emigrant's copy of the register and the Emigration Agent shall make out and deliver to the emigrant an embarkation-pass signed by the Emigration Agent, and countersigned by the Protector, stating the name and the age of the emigrant and the name of his father, certifying that he has been duly registered for emigration to the Straits Settlements and mentioning the port of debarkation.

Grant of embarkation pass.

When the emigrant to be sent back to the place of registration.

27. If the Protector of Emigrants considers that any emigrant is physically unfit to emigrate, and that he has not dishonestly represented himself as physically fit;

or that any such irregularity has occurred in the recruitment of any such emigrant, as makes it just to vacate the contract;

or if the Emigration Agent refuses without the consent of the Protector to countersign the emigrant's copy of the register as required by section 26, or to be bound by the contract;

Payment of expenses of sending him back.

the Protector of Emigrants may order the Emigration Agent, or the recruiter with whom the contract was made, forthwith to pay to him such reasonable sum as is necessary to enable such emigrant to return to the place where his name was registered under section 18; and may take any steps he thinks necessary for the conveyance of such emigrant to such place

and any emigrant who from his state of health is in the opinion of the Protector of Emigrants physically unfit to undertake such return, shall be entitled to be fed, lodged and attended to at the port of embarkation at the expense of the Emigration Agent until he is reported by the Protector of Emigrants fit to undertake such return to such place.

Payment of expenses of dependent accompanying emigrant

28. If a dependent has accompanied such emigrant, the Protector of Emigrants may order the Emigration Agent or recruiter to pay such sum as is necessary to enable him to return to the place at which his name was registered under section 19, as well as to feed or lodge him during the detention (if any) of the emigrant at the depôt.

Effect of such dependent's unfitness from ill-health to return to Straits.

29. If the Protector of Emigrants has reason to think that any dependent is in such a state of health that his journey to the Straits Settlements, or his detention in the depôt, would be dangerous to himself or others, he shall so certify to the Emigration Agent, and thereupon

the emigrant to whom such dependent is attached shall be entitled, if he so wishes, to return as if he himself had been found under section 27 to be physically unfit to emigrate.

If the emigrant still desires to emigrate, then the dependent shall be kept and returned to the place at which he was registered as if he were an emigrant falling under section 27.

Compensation to emigrant or dependent for ill-treatment on journey to depôt.

30. If upon the arrival of any emigrant or dependent at the depôt, it appear that, during the journey thither, he has suffered any ill-treatment, or the recruiter has failed to provide him with proper and sufficient food and lodging, the Protector of Emigrants may order the Emigration Agent to pay him a reasonable sum by way of compensation.

Failure of Emigration Agent, &c., to pay such expenses.

31. On failure of the Emigration Agent or of such recruiter for twenty-four hours to comply with an order of the Protector for the payment of any sum, ordered to be paid under any of the four last preceding sections, the Protector may pay the same to, or on behalf of, the emigrant.

Every sum so paid shall be recoverable by the Protector, with six per cent. per annum interest from the date of payment, from the Emigration Agent, or from such recruiter.

No further proof shall be required by any Court in any such case than that the Protector gave such Emigration Agent or recruiter an order to pay such money, and that the Emigration Agent or recruiter for a space of twenty-four hours made default in complying therewith.

Suits against Emigration Agent for breach of contract.

32. Whenever the Emigration Agent refuses, without the consent of the Protector, to counter-sign an emigrant's copy of the register as required by section 26, or is chargeable with a breach of any duty which any contract with an emigrant expressly or by implication imposes upon him, the Protector may, if he thinks fit, institute a suit on behalf of the emigrant against the Emigration Agent for the recovery of damages for the breach of such contract.

In every such suit the contract entered into by the recruiter shall be deemed to have been entered into by, and to be binding on, the Emigration Agent.

VIII.—EMIGRANT VESSELS.

Emigrants not to be received on board vessels other than those licensed under Native Passengers Act.

33. No Master or other person in charge of a vessel shall receive on board any emigrant unless such vessel has been licensed, under the law for the time being in force relating to the carriage by sea of Native passengers, to carry passengers for the intended voyage and unless the Master of such vessel has obtained a certificate from the Protector of Emigrants authorizing him to receive on board the number of emigrants specified therein.

or without certificate from Protector.

Protector not to grant certificate unless satisfied that vessel has been licensed and has provisions on board.

No such certificate shall be granted by the Protector of Emigrants unless he has satisfied himself that the vessel has been licensed as aforesaid, and that provisions and water for the number of emigrants to be specified in the certificate according to the scale prescribed under such law have been actually put on board such vessel.

Emigrant to give his pass to Master.

34. On embarkation every emigrant shall deliver to the Master of the vessel the embarkation pass granted to him under section 26, and the Master shall not receive any emigrant on board unless he delivers up such pass.

Emigration Agent to be present at embarkation.

35. The Emigration Agent shall be personally present at the embarkation of all emigrants, and shall see that the Master duly examines the passes of the emigrants, and shall himself also examine such passes.

The Emigration Agent shall not permit any emigrant to remain on board who has not a pass.

Master to deliver list of emigrants.

36. The Master of every vessel carrying emigrants shall, after the embarkation of the emigrants, and before the departure of the vessel, give to the Emigration Agent a list of all emigrants on board, signed by himself and mentioning the port of debarkation, and shall retain a counterpart of such list signed by the Emigration Agent.

A copy of such list signed by the Emigration Agent and Master shall be sent to the Protector of Emigrants before the vessel sails.

IX.—SUPPLEMENTARY POWERS.

Power to prohibit emigration to the Straits Settlements.

37. Whenever the Governor General in Council has reason to believe that proper measures have not been taken for the protection of emigrants and the enforcement of the engagements entered into with them immediately upon their arrival at the Straits Settlements, or during their residence therein, the Governor General in Council may, by a notification published in the *Gazette of India*, declare that emigration under this Act to the said Settlements shall cease from a day to be specified in such notification.

When any notification has been published under this section, emigration under this Act and the making of contracts to emigrate to the Straits Settlements shall be unlawful from the day specified in such notification.

Revocation of prohibition.

38. Such notification may be revoked in like manner by the Governor General in Council, and thereupon emigration to the said Settlements shall again be allowed from a day to be specified in the revocation.

From the day so specified all the provisions of this Act authorizing emigration to the said Settlements shall be revived and have the same effect as if such emigration had not been suspended, except as to acts done, offences committed, and proceedings commenced, during the time of such suspension.

X.—OFFENCES.

Making unlawful contract of labour.

39. Whoever, except under and in conformity with the provisions of this Act, engages or attempts to engage any Native of India to emigrate,

or whoever engages, or attempts to engage, any Native of India to enter into any such contract as is hereby declared illegal,

or, not being a recruiter duly licensed under this Act, acts or is employed as a recruiter of labourers for the Straits Settlements,

Recruiting without being licensed.

or being a recruiter duly licensed under this Act, removes or attempts to remove any person whom he engages in any district from such district until the particulars required by section 18 have been duly registered,

Recruiter omitting to take engaged labourers before Magistrate or Protector.

shall be punished with imprisonment, which may extend to six months, or with fine not exceeding five hundred rupees, or with both.

40. Whoever, by means of intoxication, violence, fraud, or false pretences, causes or induces or attempts to cause or induce any Native of India to emigrate or to enter into any contract to emigrate, or into any such contract as is hereby declared illegal, or to proceed to the said Settlements without having entered into any contract, shall be punished with imprisonment for a term which may extend to three years, or with fine, or with both; and any police-officer may for such offence arrest him without warrant.

Use of force, fraud, &c., to cause a Native to emigrate.

41. Whoever, without lawful authority, issues any written order to the police to assist himself or any other person to procure labourers to proceed to the said Settlements, or falsely represents that such labourers are required by the Government, or are to be engaged on behalf of the Government, shall be liable to imprisonment for a term not exceeding six months, or to fine not exceeding five hundred rupees, or to both.

False representation of Government authority.

42. Any Master of a vessel not licensed as provided in section thirty-three who knowingly receives on board, for conveyance to the said Settlements, any emigrant or person who has entered into a contract hereby declared illegal,

Receiving emigrants on board without license or certificate.

and any Master of a vessel licensed as aforesaid, who knowingly receives any emigrant as aforesaid without having previously obtained a certificate under the said section, or in excess of the number specified in such certificate,

shall be liable for each emigrant or person so received to imprisonment for a term which may extend to three months, or to fine not exceeding two hundred rupees, or to both, and the vessel shall be liable to be forfeited.

43. Any Master of a vessel who receives on board such vessel any emigrant for the said Settlements and fails to comply with the requirements of sections 34 and 36, shall be liable to a fine not exceeding two hundred rupees.

Failure to comply with requirements of sections 34 and 36.

44. Any Master of a vessel landing any emigrant or dependent at any port other than the port of debarkation specified in embarkation-pass and list, unless in case of stress of weather or other unavoidable accident, shall be liable for every emigrant or dependent so landed to a fine not exceeding two hundred rupees, or to imprisonment for a term which may extend to one month, or to both.

Penalty for landing emigrant or dependent at other than specified port.

45. Any Master of a vessel who having cleared such vessel for the said Settlements, takes on board any emigrant not entered in the list mentioned in section 36, shall be liable to a fine not exceeding two hundred rupees for every emigrant so taken on board.

Taking on board, after clearance, emigrants not entered in list.

46. All prosecutions under sections 42, 43, 44 and 45 shall be instituted by the Emigration Agent, or by the Protector of Emigrants, or by an officer appointed for the purpose by the Local Government.

Prosecutions under this Act by whom to be instituted.

47. All the powers vested by law in the officers of Customs in regard to the searching and detention of vessels, or otherwise, for the prevention of smuggling on board thereof, may be exercised by such officers for the prevention and detection of the illegal embarkation of emigrants on board vessels bound for the said Settlements and of other offences against this Act.

Customs officers may search and detain for purposes of this Act.

XI.—MISCELLANEOUS.

48. Nothing in this Act shall apply to any vessels in the service of the Lords Commissioners of the Admiralty, or to any of Her Majesty's vessels.

Act not to apply to certain vessels,

49. Nothing in this Act shall apply to any contract with, or the emigration of, any Native seaman, or other person who of his own free will contracts to navigate or serve on board of any vessel, or who embarks on board such vessel in pursuance of such contract, or any person who contracts to serve as a menial servant only and who embarks as such menial servant.

or to contracts with Native seamen and menial servants.

50. The Emigration Agent and all persons employed by him and the Protector of Emigrants shall be deemed to be public servants within the meaning of the Indian Penal Code.

Emigration Agent and his subordinates and Protector of Emigrants to be deemed public servants.

51. The Indian Emigration Act, 1871, shall not apply to the Straits Settlements, unless and until the Governor General in Council, by notification in the *Gazette of India*, declares it so to apply.

Indian Emigration Act, 1871, not to apply to Straits Settlements.

52. Act No. XIV of 1872 (*to exempt the Straits Settlements from the Indian Emigration Act, 1871*) is hereby repealed.

Repeal of Act XIV of 1872.

THE FIRST SCHEDULE.

(*See section* 12.)

Office of the Protector of Emigrants at the Port of .

A. B. described in the Roll annexed is hereby licensed under the Straits Settlements Emigration Act, 1877, to be a recruiter of labourers.

[*Here set out the local limits within which the recruiter is licensed to act.*]

This license will be in force until the day of , unless previously cancelled.

(Sd.) *C. D.*,
Protector of Emigrants.

Dated the day of

Descriptive Roll.

Name.	Father's name.	Age.		Caste.	Colour.	Height.		Distinguishing marks.	Name of village and district to which he belongs.
		Years.	Months.			Feet.	Inches.		

THE SECOND SCHEDULE.

(*See section* 17.)

I hereby certify that I have this day examined *A. B.*, and that he is, to the best of my belief and judgment, in a fit state of health, and able, in point of physical condition, to proceed to the Straits Settlements [and to work there*].

(Sd.) *C. D.*,

(*Here add designation of examining officer.*)

* These words to be omitted in case of women and children not engaging for labour.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 14th March 1877, and is hereby promulgated for general information :—

ACT NO. VI OF 1877.

An Act for postponing the day on which the Opium Act, 1876, is to come into force.

Preamble.

WHEREAS the Opium Act, No. XXIII of 1876, section one, enacts that the said Act shall come into force on the first day of April 1877 : And whereas it is expedient to postpone the day on which such Act shall come into force ; It is hereby enacted as follows :—

Opium Act when to take effect.

1. The said Act No. XXIII of 1876 shall come into force, not on the first day of April 1877, but on such day as the Governor General in Council may, by notification in the *Gazette of India*, direct in this behalf.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 15th March 1877 :—

No. 6 OF 1877.

A Bill to amend the law relating to assignments from the general Provincial Fund established under the North-Western Provinces Local Rates Act, 1871.

Preamble.

WHEREAS it is expedient to authorise the Local Government of the North-Western Provinces to provide out of the general Provincial Fund established under the North-Western Provinces Local Rates Act, 1871, for payment of certain charges incurred or to be incurred on account of canals and railways in the North-Western Provinces; It is hereby enacted as follows :—

Substitution of new section for section 10 of Act XVIII, 1871.

1. Section 10 of the said Act shall be repealed, and in lieu thereof the following shall be substituted :—

Assignments from general fund.

"**10.** The Lieutenant-Governor may from time to time assign from such Fund such amount as he thinks fit, to be applied in payment of charges incurred or to be incurred on account of such canals and railways as he, with the previous sanction of the Governor General in Council, may declare to be works of general provincial utility, and he shall from time to time allot from such Fund an amount to be applied in each district for expenditure on all or any of the following purposes :—

(*a*) the construction, repair and maintenance of roads and communications;

(*b*) the maintenance of the rural police and district post;

(*c*) the construction and repair of schoolhouses, the maintenance and inspection of schools, the training of teachers, and the establishment of scholarships;

(*d*) the construction and repair of hospitals, dispensaries, lunatic asylums, markets, wells and tanks; the payment of all charges connected with the purposes for which such buildings or works have been constructed, and any other local works likely to promote the public health, comfort or convenience :

Proviso.

Provided that the amount assigned in respect of such canals and railways shall not exceed ten per cent. of the total sum levied under this Act in the year in which the assignment was made, and that the amount allotted to be applied in each district for expenditure on all or any of the purposes mentioned in clauses (*a*), (*b*), (*c* and (*d* of this section shall be at least ninety per cent. of the total sum levied under this Act in such district in the year in which the allotment was made."

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to make a small amendment of Act No. XVIII of 1871, which provides for the levy in the North-Western Provinces, of rates on land for local purposes. These rates are in the first instance credited to a general Provincial Fund, from which the Lieutenant-Governor is bound to assign amounts to be applied in each district for certain specified purposes.

These are the construction and maintenance of Roads and Communications; Rural Police; District-post; Education; Hospitals; Lunatic Asylums; Markets; Wells and Tanks; and other local works likely to promote the public health, comfort, or convenience: the annual assignment made to each district must not be less than the total amount of local rates levied in it; but any portion of such assignment which remains unexpended at the end of the year may be spent in any way which the Lieutenant-Governor thinks beneficial to the North-Western Provinces generally.

The principle is thus recognized, that these rates may, in part at least, be expended on objects of provincial utility; and, as a matter of fact, a large portion of them has been so expended. As it is not now wished to increase the burdens on the land, the present Bill proposes to authorize the Local Government to make assignments from the local rates for the purpose of meeting charges on account of Irrigation-works and Railways of provincial utility: the maximum amount of such assignments is fixed at ten per cent. of the total sum levied under the proposed Act, leaving 90 per cent. to be spent as at present; but there is no reason for anticipating that the actual proportion of the rates so assigned will amount to this maximum. The total amount of the local rates levied annually in the North-Western Provinces is about £430,000, and the proposed amendment of the law will not seriously diminish the existing grants for local purposes.

CALCUTTA;
The 16th March 1877.

J. STRACHEY.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 15th March 1877:—

No. 7 OF 1877.

Bill for the licensing of certain trades and dealings in the North-Western Provinces.

Preamble.

WHEREAS it is expedient that persons carrying on certain trades and dealings in the North-Western Provinces should take out licenses and pay for the same; It is hereby enacted as follows:—

Short title.

1. This Act shall be called "The North-Western Provinces License Act, 1877:"

Local extent.

It extends only to the provinces under the government of the Lieutenant-Governor of the North-Western Provinces;

Commencement.

And it shall come into force at once.

Annual licenses to be taken out.

2. Every person who, on and after the first day of April 1877, falls under any of the heads specified in the schedule hereto annexed and carries on (whether on behalf of himself or any other person) his trade or dealing, shall take out a license under this Act and shall pay for the same the annual fee mentioned in the same schedule as payable by persons of the class and grade to which he belongs: provided that, for any such license granted between the first day of November in each year, and the thirtieth day of April next ensuing, there shall be paid only one-half of such fee.

Officer to grant license.

3. Every license under this Act shall be granted by the Collector of Land Revenue of the district or place in which the person requiring such license carries on his trade or dealing: provided that, if such person carries on his trade or dealing in more than one district or place in the North-Western Provinces, the license shall be granted by the Collector of the district or place in which his principal place of business is situate.

Every such license shall be signed by the Collector granting it, or by any Assistant or Deputy Collector under the Collector's orders, and the Courts shall take judicial notice of such signature.

Particulars to be specified in the license.

4. Every such license shall specify—

(*a*) the date of the grant thereof:

(*b*) the name, father's name, caste, and trade or dealing of the licensee:

(*c*) the fee paid for the license:

(*d*) the place or places where the licensee intends to carry on trade or dealing for the ensuing year; and

(*e*) the term for which the license shall remain in force,

and shall be received in evidence as *primâ facie* proof of all matters contained therein.

Commencement and expiration of license.

5. Every such license shall have effect and continue in force from the day of the date thereof till the first day of April next after the day of the granting thereof.

Renewal of license.

6. Every person to whom any such license has been granted and who desires to continue to carry on his trade or dealing after the expiration thereof, shall take out a fresh license for that purpose for the following year, to expire on the day appointed in the last preceding section, and shall renew the same so long as he desires to continue to carry on such trade or dealing.

Collector to determine class and grade under which licensee is to be charged.

7. The Collector shall from time to time determine under which of the classes and grades mentioned in the said schedule every person to whom a license may be granted by him as aforesaid shall be charged.

List of Licensees.

Collector to prepare annual list of licensees.

8. As soon as may be after the first day of April 1877 and the first day of January in every subsequent year, the Collector shall prepare a list of the persons licensed under this Act in the district or place aforesaid. Such list shall state—

(*a*) the trade or calling of each of the persons therein named;

(*b*) the class and grade under which he is charged; and

(*c*) the fee paid for his license.

Such list shall be filed in the office of the Collector, and the list, or such part or parts thereof as he shall think fit, shall be filed in such other places as the Collector directs, and shall be open to public inspection at all reasonable times, without any payment.

Collector to issue notification showing classes and grades chargeable, &c.

9. The Collector shall, at or about the same time, issue a notification, in such form as the Local Government directs, showing the classes and grades chargeable under this Act, and the fees which members of each class and grade are charged, with such other information as the Local Government may direct.

The notification shall be published in the principal muhallas or ganjes of all towns, and in the chaupál, or other public place, in all villages concerned.

Notice to person charged.

10. So soon as may be practicable after the issue of such notification, notice shall be served on each person charged: provided that in any year it shall not be necessary that such notice shall be served on any person charged under this Act in the year immediately preceding.

Such notice shall contain—

the name, father's name, caste, and trade or dealing of the person charged;

the class and grade under which he falls;

the fee payable by him under this Act;

the date on which such payment is to be made;

the mode and place of payment and the person to whom the fee may be paid;

the penalty incurred by failure to make payment of the fee on the given date;

and shall notify that if the person so served continues his trade or dealing, payment of the amount specified in the notice must be made in the year 1877, within thirty days of receiving the notice, and within thirty days next after the first day of January of each subsequent year.

Petition of objector.

11. Any person served with such notice and objecting to the class or grade under which he is charged may, within thirty days after such service, apply by petition to the Collector in order to establish his right to have his name transferred to another class or grade or altogether removed from the list.

Verification.

The statements contained in the petition shall be verified by the petitioner or some other competent person in manner required by law for the verification of plaints.

Hearing of petition.

Appeal from order on petition.

12. The Collector shall fix a day for the hearing of the petition, and on the day so fixed shall hear the same and pass such order thereupon as to him shall seem fit:

Provided that if in his judgment the fee which the petitioner has been charged exceeds two per cent. upon his annual nett earnings, such excess shall, for the purpose of section eleven, be deemed a valid objection:

Provided also that if in the judgment of the Collector the nett annual earnings of the petitioner are less than two hundred rupees, the petitioner's name shall be removed from the list.

Any person dissatisfied with such order may, within fifteen days from the date thereof, present a petition of appeal to the Commissioner of Revenue of the Division, whose decision upon such appeal shall be final.

Every petition presented under this section shall be accompanied by a copy of the petition to the Collector, the Collector's order thereon, and all other documents (if any) connected with the case.

Penalties.

Penalty for carrying on business without a license.

13. If after expiry of the period mentioned in the notice served on him under section ten, for payment of the amount specified therein, any person carries on his trade or calling without having taken out a license as required by this Act, he shall be liable, by order of the Collector, to pay twice the fee with which he would otherwise have been chargeable under this Act, and on receipt of such payment, the Collector shall grant him a license.

All sums due under this section shall be recoverable as if they were arrears of land-revenue.

License to be produced on demand.

14. Every person required by this Act to take out a license, who without reasonable excuse neglects or refuses to produce and show his license when required so to do by an officer generally or specially empowered in writing by the Collector to make such requisition, shall, on conviction before a Magistrate, be liable to a fine not exceeding one hundred rupees.

Prosecution to be at instance of Collector.

No person shall be proceeded against for any such offence except at the instance of the Collector, and there shall be no appeal from any sentence under this section.

Receivers, Courts of Wards and Trustees.

Receivers and managers chargeable.

15. Receivers or managers appointed by any Court in India, and the Courts of Wards, shall be chargeable under this Act in respect of any trade or dealing of which the income is officially in their possession or under their control.

Power to retain assessment paid by trustee, &c.

16. When any trustee, guardian, curator, committee or agent is charged

ity, or when any receiver appointed by any Court or Court of Wards is charged under this Act, every person and Court so charged may, from time to time, out of the money coming to his or its possession as such trustee, guardian, curator, committee or agent, or as such receiver or Court of Wards, retain so much as is sufficient to pay the fee charged.

Every such person or Court is hereby indemnified for every retention and payment made in pursuance of this Act.

Municipalities.

Power to require returns from Municipalities

17. The Collector of the District may require any Municipal Committee constituted under Act No. XV of 1873 to furnish, within a period to be specified under the orders of the Local Government, returns showing the names and numbers of persons chargeable under this Act resident within the limits of such Municipality, together with the class and grade under which they respectively fall and the fees payable by them respectively.

If the Municipal Committee fails within the period prescribed to make such returns, or if it make such returns, but the Collector of the District has reason to doubt their accuracy, he may at any time cause a return showing the names, numbers, classes and grades aforesaid to be prepared in such manner as may be prescribed by the Local Government.

Notice to Municipalities.

18. When the return mentioned in section 17 has been furnished or prepared, notice shall be served on the Municipality, calling

on it to pay to the Collector of the District, within a period to be specified in the notice, a sum calculated on such return in accordance with the provisions of this Act.

Any Municipality may appropriate any part of its revenues to the payment of the sum leviable from it under this section, or raise such further sums in addition to its existing revenue as may be needful for such payment: provided that such further sums be raised in accordance with the said Act No. XV of 1873.

Miscellaneous.

Payment of taxes raised and penalties recovered under Act.

19. All taxes raised and penalties recovered under this Act shall be paid to the credit of the Local Government, or as such Government shall from time to time direct.

Powers of Collector and Commissioner under Act may be exercised by other officers.

20. All or any of the powers and duties conferred and imposed by this Act on a Collector, an Assistant or Deputy Collector, and a Commissioner of Revenue, may be exercised and performed by such other officers or persons as the Local Government shall from time to time appoint in this behalf.

Every person shall be legally bound to furnish information to any officer or person so appointed when required by him to do so.

Exemptions from Act.

21. Nothing in this Act applies to (*a*) persons being itinerant vendors only, or (*b*) persons earning their livelihood solely by agriculture.

Power to exempt and make rules.

22. The Local Government may, from time to time, with the previous sanction of the Governor General in Council,

(*a*) exempt from the operation of this Act any portion of the territories subject to such Government or any class of trade or dealings falling under the said schedule;

(*b*) make rules consistent with this Act, (1) for regulating the time and manner of collecting the fees charged under this Act, (2) for allowing to the persons employed in the collection fees not exceeding three per centum on the fees so collected charged to the licensees, and (3) generally for the guidance of officers in matters connected with the enforcement of this Act.

THE SCHEDULE ABOVE REFERRED TO.

CLASS I.

		Fee payable by licensee.
Bankers	First grade ...	Rs. 64
Wholesale-dealers in country-produce	Second grade	,, 32
	Third grade ...	,, 16

CLASS II.

		Fee payable by licensee.
Cloth-sellers Dealers in iron Metal-vessel-sellers... Fuel-sellers (talwálas) Chaudhrís Agents ... ... Letters-out of conveyances and cattle ... Contractors (thíkadárs) ... ... Printers and publishers	First grade ...	Rs. 32
	Second grade	,, 16
	Third grade ...	,, 8

CLASS III.

Persons carrying on any trades or dealings not above specified.	First grade ...	Rs. 16
	Second grade	,, 8
	Third grade ...	,, 4
	Fourth grade	,, 2

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to impose a light License-tax on Traders and Dealers in the North-Western Provinces. Similar measures are in force in many large Indian towns and (under Act XIV of 1867) in the Central Provinces. The principal trades have been classified and graded, and a specific sum is put down against each class and grade: the highest license fees proposed are those on Bankers and wholesale dealers in country-produce, and they vary from Rs. 16 to Rs. 64 a year: other traders will have to pay smaller sums, which are in some cases as low as Rs. 2, and in no case exceed Rs. 32.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REPORTS BY DOCTORS LEWIS AND CUNNINGHAM ON LEPROSY, AND THE "ORIENTAL OR DELHI SORE" IN INDIA.

Extract from the Proceedings of the Government of India in the Home Department (Medical),—under date Fort William, the 10th March 1877,—No. 174.

Read—

Reports dated November 1876, by Drs. Lewis and Cunningham on Leprosy and the "Oriental or Delhi Sore" in India.

RESOLUTION.—Leprosy in India has of late years attracted more than ordinary attention. The report of the Royal College of Physicians of London, the suggestions made by Drs. Tilbury Fox and Farquhar for obtaining a better knowledge of the endemic skin diseases of India, Dr. Gavin Milroy's report on leprosy in the West Indies, Dr. H. Vandyke Carter's report of his enquiries into the disease in Norway and other countries which were made under the orders of the Secretary of State for India, and the interest taken in the gurjun oil and other supposed cures for the disease, have all contributed to this result. In 1875 the Government of India directed that a special enquiry should be made into leprosy in India, partly by the local Sanitary Commissioners and partly by Drs. Lewis and Cunningham, the special Assistants to the Sanitary Commissioner with the Government of India. At the suggestion of the Lieutenant-Governor of the North-Western Provinces, Kumaon was selected for Drs. Lewis and Cunningham's enquiries, and the report of these enquiries, so far as they have yet gone, has now been submitted.

2. The Oriental or Delhi Sore, as it is more commonly called, was very prevalent among European soldiers for years after 1857 when they re-occupied the city, and continued to prevail among them more or less until 1867. Of 1,998 European soldiers with their families, of whom statistics are given by the Special Committee of 1865, 1,072 had been affected with Delhi Sore during a residence varying from one to fifteen months, and many of these were permanently disfigured. Now the disease is rarely seen among the European garrison. It was suggested by the Sanitary Commissioner to the Government of India that Drs. Lewis and Cunningham might be employed in inquiring into the history of this disease. The investigation made by these gentlemen

shews not only the true character of the disease which has not hitherto been fully ascertained, but also indicates that its disappearance is to be attributed to sanitary improvements, and more especially to the improvement of the water-supply.

3. The thanks of the Government of India are accorded to Drs. Lewis and Cunningham for their valuable reports.

ORDER.—Ordered that this Resolution be forwarded to Local Governments and Administrations for information, and that it be printed along with the summaries of Drs. Lewis and Cunningham's reports in the *Gazette of India*.

Ordered also, that a copy be sent to the Sanitary Commissioner with the Government of India for communication to Drs. Lewis and Cunningham.

Summary of Report by Drs. T. R. Lewis and D. D. Cunningham on Leprosy in India.

A brief recapitulation of the principal points to which reference has been made in this our first report regarding leprosy may be of use to such readers as have not sufficient time to study the question in detail. It must, however, be premised that any digest relating to such an obscure subject is necessarily attended with more risk of misinterpretation than a detailed report where all the qualifying circumstances of any set of deductions can be produced.

Leprosy statistics of British India.

It will have been seen that although leprosy was known to prevail in Hindostan many centuries before the Christian era, comparatively little was known regarding its precise localisation in the different provinces until the general census of 1872 was taken. Not only was the comparative prevalence of the disease in various districts all over British India ascertained at that period, but the possibility of attaining to something approaching to a fair estimate of the aggregate leprous population of the country also became practicable. According to these census returns, there are some 99,000 lepers in the territories under British rule, yielding a proportion of 54 lepers to every 100,000 of the entire population, or (taking the actual figures in the first Table) 1 leper to every 8,145 persons. Of the aggregate number about one-eighth is contributed by certain districts, each of not less than 100,000 in population, furnishing a ratio nearly five times higher than the average ratio for the whole of India. In these districts there is a leper to every 384 persons instead of to 1,845. Should these latter data be verified on more close observation, an important step will have been made towards solving the difficulty of dealing with the question in a practical manner, as such a phenomenon must depend either on peculiar local or hereditary conditions.

The leprosy statistics of specially affected Districts.

The leprosy statistics of Kumaon.

One of these abnormally affected localities forms the subject of a special report on this occasion, *viz.*, the District of Kumaon. Roughly speaking, it contains 1,000 lepers. This yields a proportion equivalent to something over 250 per 100,000 of the population, or, calculating on the actual figures of the estimate, 1 leper to about every 388 individuals (*vide* Table 5, page 13). With the object of mitigating the sufferings of at least a portion of this unfortunate class, the Commissioner, Sir Henry Ramsay, has founded an asylum at Almora with accommodation for over a hundred lepers.

Observations made at the Almora Leper Asylum.

The inmates of this Aslyum formed the subject of a series of clinical observations, the details of which are recorded in the foregoing pages.

The forms of leprosy encountered.

Eighty lepers were subjected to the closest scrutiny; 49 proved to be cases in which anæsthesia presented the most prominent feature; 12 in which the presence of tubercles in the skin was the most marked peculiarity; in 15 cases the two former conditions were so equally evident that they were classified as "mixed;" and in 4 cases an eruption formed the most pronounced symptom. The ratios which these yield agree generally with the proportion in which the different varieties of the disease have been observed to occur in other countries.

The age of attack and the duration of the disease.

The average age at which the onset of the disease was observed was found to be between 23 and 24 years; even the decimals obtained by calculating averages in the case of male and female lepers were found to be almost identical. There was, however, a range of from 3 years to 60. The average duration of the disease was nearly 14 years. The form in which anæsthesia was the prevailing feature was the most chronic, the average duration of the "tuberculated" cases being shorter by nearly six years.

The question of contagion.

The history of the Asylum gives no support to the doctrine that leprosy is a contagious disease, but strong evidence to the contrary. The reverse has been stated with regard to the history of the Asylum, but it will have been seen, from the information elicited, that not the slightest foundation existed for such a statement.

The influence of heredity.

But with reference to the probable influence of heredity in the propagation of leprosy, the facts elicited, and which may, we believe, be accepted as trustworthy, give forth no uncertain sound. There can, we think, be no very substantial argument adduced in the face of the figures which have been collected in connection with this Asylum alone to contra-indicate the inference that hereditary taint exercises a most important influence in the transmission of the pest.

Compulsory segregation of Lepers impracticable.

Taking into consideration, therefore, the prominent part undoubtedly played by heredity, and the fact that the disease but seldom manifests itself until after puberty, it is evident that any attempt at "stamping it out" by the compulsory segregation of leprous persons would prove wholly impracticable; for, as mentioned in the last chapter, it would not only be necessary to segregate those suffering from developed disease, but also those hereditarily disposed to it. How, and by whom, could the predisposition be determined? It would, indeed, be even more important to secure the latter class and such persons as are only manifestly affected to a slight extent, for it would appear that persons of this description furnish by far the greater portion of the children who are, so to speak, potentially leprous,—time and circumstance alone being required for the development of the disease.

Regarding the factors in the maintenance of leprosy in parts of Kumaon.

In intimate relation with this question is that of the probability or otherwise of an increase in the prevalence of the disease amongst such a leprous community as exists in Kumaon. Fortunately it would appear that, *pari passu* with the active manifestation of the disease, a tendency to sterility is also induced; moreover, the mortality among the children of lepers (even among such of them as are born before leprosy has manifested itself in the parents) appears to be abnormally high, so that the probable aggregate of the number of the offspring of lepers is to a very appreciable degree less than that furnished by non-leprous individuals. It is therefore evident that, unless there be influences other than heredity at work in the locality tending towards the production of the leprous condition, no serious increment need be apprehended. It will be our endeavour to ascertain on a future occasion whether any such leprosy-inducing conditions can be detected in the specially affected localities.

With regard to the latter, we have drawn attention to the fact that the malady is far more prevalent along the Nepal frontier, a country in which a very large proportion of lepers are found, and it is believed that no organised attempt of any kind exists in it to relieve their sufferings. Indeed, the reverse is not uncommonly stated. Under these circumstances it is, perhaps, not strange that these districts should be exceptionally afflicted, especially when it is considered that the records of the Almora Leper Asylum show that one-fifth of the total number of the inmates who have received shelter since the institution was established have come from Nepal.

We may find that personal examination into the facts along these specially affected border parganas will dispel the plausibility of such an inference, but at present we are inclined strongly to attribute the exceptional prevalence of cases of leprosy in this part of Kumaon in a great measure to its having to give shelter to more than its own share of lepers; to support more, in fact, than is contributed to the population by its own quota of leprous stock.

We have abstained from making any observations regarding the pathology of leprosy on the present occasion. It will be more convenient to describe this portion of the inquiry when our microscopical investigations of the diseased tissue have been completed. These, for the greater part, we propose to carry out in Calcutta, where the Leper Asylum and the hospitals offer peculiar facilities for prosecuting researches of this character.

Summary of Report by Drs. T. R. Lewis and D. D. Cunningham on the "Oriental or Delhi Sore" as observed in India.

The report which we now bring to a conclusion may be thus briefly summarised:—

1. Assuming that the cutaneous affection which we have studied at Delhi is, practically, of the same nature as the sore which is prevalent in Mooltan, Lucknow, Lahore, Scinde and other parts of India, as also, the chronic sore known in Aleppo, Biskra, Bagdad, &c., as 'Bouton,' it comes under the general designation suggested by Dr. Tilbury Fox of 'Oriental sore':
2. Our information of the distribution of the sore in India is taken from the statistics regarding 'abscess and ulcer' collected from all parts of the country, but our pathological observations are, for the most part, based on typical examples of the affection witnessed at Delhi:
3. Whereas of late years the statistical returns indicate considerable diminution in the number of hospital admissions among European troops from 'abscess and ulcer;' and among native troops also in such stations as are garrisoned by the two classes of soldiers, there is no such manifest decrease in the stations occupied solely by sepoys:
4. This discrepancy may be due to more attention having been paid to the sanitary requirements of those stations at which European troops are located.
5. That, although at Delhi this inference does not constantly hold strictly correct, nevertheless, it appears to do so at those seasons when the European and native soldiers are placed under equally advantageous conditions as to water:
6. In those years, when sores were notoriously prevalent among both the European and native troops stationed in Delhi, their water-supply was derived from wells. Latterly, the European troops in the Fort have been supplied with water from the river Jumna, whereas the native troops still resort to the wells. The wells, however, are flooded with water from the canal, which is derived from the Jumna, some miles distant. The canal supply occasionally fails, the well-water assumes the character normal to the locality, and cutaneous disorders are a not uncommon sequence:
7. So far as our own observations go, there is no evidence of any parasitic agency in the production of the disease, and it appears probable that the deleterious effects are due to the chemical constituents of the water. In Delhi, the quantity of salts with which the water is impregnated and its extreme hardness in so many of the wells, is the most noteworthy feature. The unoxidised organic contents of the water would not appear to be of material influence, seeing that the water is not worse, or even so bad, as in many of the stations in Lower Bengal where this cutaneous affection is, practically, unknown:
8. Although we are not in a position to speak definitely regarding the character of the wells in other military stations where the Oriental sore prevails owing to the lack of analyses of assured accuracy, it appears highly probable, judging from the geographical position of the stations and from the statements of residents of several of them, that the well-waters manifest properties similar to those which they possess in Delhi. The well-waters in many of the places where the sore prevails, in Egypt, Asia Minor, Syria and other countries are also notoriously more or less brackish:

9. It seems, therefore, probable that, although the salts which cause the hardness of a water, may of themselves not be the actually deleterious ingredients, nevertheless, this quality may serve as an index of properties in it which tend to favour the production of cutaneous disorders. Several salts exert a peculiar action on the skin—those of Iodine and Bromine, for example, produce very characteristic eruptions:

10. With regard to the special skin affection in question, we have no hesitation in suggesting that the disease, as commonly observed at Delhi, setting aside all cases which are manifestly due to syphilis, scrofula and the like, is in no way distinguishable from one or other of the various forms of Lupus; its clinical history is similar, as is also its morbid anatomy; and the treatment which has proved the most satisfactory is that which is generally recommended for Lupus:

11. It is probable, however, that, owing to climatic and other influences, it may be somewhat modified from its European prototype as suggested by the fact of its prevalence being limited to particular districts—a feature which, so far as we are aware, does not characterise it in Europe in any special manner; and

12. Finally, we have suggested that the tendency which this form manifests to become endemic may be taken advantage of for purposes of nomenclature, and have therefore proposed that this form of Oriental sore should receive the designation *Lupus endemicus*.

CALCUTTA,
November 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

RELIEF REPORTS FOR THE WEEK ENDING 24th FEBRUARY 1877.

Extract from the Proceedings of the Board of Revenue, Madras, dated 2nd March 1877.

THE Board submit to Government the relief reports for the week ending 24th February, with abstracts and maps as noted in the margin. The reports from Kurnool and Kistna are, as usual, telegraphic only.

1. District average prices.
2. Relief outlay and numbers by districts.
3. Ditto ditto by taluks.
4. Classification of works.
5. Number, &c., of works.

Maps—Salem, North Arcot, Coimbatore, Cuddapah, Nellore, Bellary and Chingleput.

2. *Prices* are generally little changed. Rice has risen slightly in Kistna and Nellore and in North Arcot and Salem, but has fallen a little in the Ceded Districts and in the south. Cholum has fallen in the Ceded Districts, owing probably to importations from Central India, but is nearly stationary elsewhere, except in Trichinopoly and Madura, where there is a rise, owing apparently (in the latter district) to the approaching exhaustion, which was anticipated, of the stocks of ivungu or black cholum. Ragi and cumbu have risen in Kistna and fallen in the three Ceded Districts, but the price is little changed elsewhere. Prices of all grains are, as before, generally cheapest in Chingleput and Kistna, and in Nellore, where proximity of these centres of supply is shown in the extreme south and north of the district and along the coast. Jubbulpore cholum is quoted separately in two taluks of Bellary (*viz.*, Bellary itself and Hospett) at rates (seers 9·1 and 11·8 and 9·1 and 10·2 respectively) considerably lower than the indigenous grain; but it is sold also, and influences prices in other parts of the district. In Cuddapah prices are highest in Jammalamadagu and in the subdivision plateau, and in North Arcot in the adjoining high-lying tracts in the north-west of the district. The marginal table shows the highest and lowest prices ruling in each district for common rice and for cholum, or other staple food-grain most generally quoted. The differences are considerable, and seem, in some cases, anomalous.

	Rice, 2nd sort.		Cholum, &c.	
	Highest Seers.	Lowest Seers.	Highest Seers.	Lowest Seers.
Nellore	7·00	9·18	7·87	10·50
Cuddapah	6·12	7·88	7·07	9·48
Bellary	5·94	9·18	7·73	10·30
Chingleput	8·46	9·81	10·26†	12·32†
North Arcot	6·00	9·00	7·1 †	10·9 †
Trichinopoly	6·53	7·98	9·17†	10·48†
Madura	6·13	8·45	9·55‡	11·76‡
Tinnevelly	7·24	8·30	7·20†	9·50†
Coimbatore	6·58	9·50	8·50†	12·42†
Salem	6·56	9·40	8·25†	10·68†

* Distressed taluks only. † Ragi. ‡ Cumbu.

The Madanapelli taluk report from Cuddapah is again wanting.

3. *Grants and outlay on relief works.*—The grants for works, &c., made up to the date of the report amounted to Rs. 84,69,763. The outlay against these grants was, including gratuitous relief, Rs. 79,57,452. The grants have been exceeded in Kurnool and Coimbatore, but further sums have since been assigned to these districts. The Board have endeavoured to separate in the present report the outlay on new works and repairs of roads in progress, which the Collectors were requested to distinguish in the detailed reports, but which they have not done with accuracy, and which in one district (Chingleput) has not been attempted. The following figures showing distribution of outlay are, however, approximately correct for works still in progress; Kurnool, for which details are not now available, being omitted:

	In the week. Rs.	Up to the week. Rs.
Roads—		
New works	1,88,840	29,87,699
Repairs	81,934	8,87,530
	2,70,774	38,75,229
Chingleput	2,964	17,851
Total Roads	2,73,738	39,23,180
Irrigation works	21,602	3,18,981
Miscellaneous	32,840	3,90,827
TOTAL	3,28,180	46,32,988

The irrigation works are almost all repairs, and the miscellaneous works connected with water-supply. The outlay on roads is chiefly in the Bellary and Cuddapah Districts; in the others, works of irrigation and water-supply are receiving attention. Of the outlay in the two districts named, 89 per cent. is on road works, but the proportion in the remaining districts is 67 per cent. Some outlay on irrigation works is in progress under Public Works officers, who have received credits amounting to Rs. 1,71,000, but of these works the Board have no knowledge. The entries in Abstract 5 are summed up for eight districts as follows:

	In progress.		Completed.	
	No.	Miles.	No.	Miles.
Roads, new works	325	2,445	68	207
„ repairs	128	1,510	15	119
Irrigation, new works	34	...	15	...
„ repairs	474	...	117	...
Miscellaneous	1,553	...	847	...
TOTAL ...	2,514	3,955	1,063	326

4. *Numbers on relief works.*—The comparison with the last reported numbers is as follows by districts:

	17th February.	24th February.		
Kistna	3,014	3,078	+	64
Nellore	54,949	42,389	—	12,560
Cuddapah	80,389	67,728	—	12,661
Bellary	3,07,509	2,74,169	—	33,340
Kurnool	2,14,299	2,03,453	—	10,846
Chingleput	12,595	10,556	—	2,039
North Arcot	18,519	18,572	+	53
Trichinopoly	556	489	—	67
Madura	7,749	6,794	—	955
Tinnevelly	1,114	640	—	474
Coimbatore	22,152	22,900	+	748
Salem	36,430	41,966	+	5,536
TOTAL	7,59,275	6,92,734	—	66,541

5. There has thus again been a large decrease, amounting to 8·6 per cent. There is no increase of importance in any district, except Salem. Besides the coolies above entered for the *Nellore* District, there were 23,889 employed on the East Coast Canal, against 19,102 in last week. This increase on the canal works accounts for part of the decrease in the rest of the district, which occurs chiefly in the Atmakur, Kavali and Udayagiri taluks. The Board have received reports showing that coolies were being drafted to the canal from these taluks. The whole decrease, however, cannot be thus accounted for; but the new scale of wages appears to have been introduced in all the taluks named. The results are satisfactory, and there will doubtless be a larger increase shown in next return from the canal.

	17th Feb.	24th Feb.	
Atmakur	12,530	5,689	6,841
Udayagiri	14,848	7,621	7,227
Kavali	5,880	4,959	921
TOTAL ...	33,258	18,269	— 14,989

6. The *Cuddapah* numbers are contrasted by taluks below:

	17th February.	24th February.			Per cent. of population.
Jammalamadagu	9,630	2,778	—	6,852	2·52
Pulivendla	10,232	9,974	—	258	9·03
Proddatur	1,253	1,288	+	35	1·26
Cuddapah	7,120	7,339	+	219	4·50
Budwail	8,857	7,478	—	1,379	8·04
Sidhout	5,409	4,468	—	941	5·83
Pullampett	8,555	8,866	+	311	6·10
Kadari	4,592	2,333	—	2,259	1·65
Royachoti	2,569	1,536	—	1,033	1·20
Madanapalli	18,753	16,444	—	2,309	11·87
Voilpad	3,419	5,224	+	1,805	3·59
TOTAL	80,389	67,728	—	12,661	5·01

Reduction has evidently been carried to great lengths, and the Board fear too far in some parts of the district. The sub-division has now 25,537 coolies against 110,000 a few weeks ago.

7. The taluk figures for the Bellary District are as follow:

	17th February.	24th February.			Per cent. of population.
Adoni	87,985	67,984	—	20,001	37·
Alur ..	46,593	47,830	+	1,237	48·7
Gooty	23,330	22,593		737	15·6
Tadpatri	11,175	10,562		613	9·01
Anantapur	8,997	6,782		2,215	6·6
Dharmaveram	5,251	4,297		954	3·6
Penkonda ...	3,529	2,145		1,384	2·4
Hindupur	1,733	4,553	+	2,820	5·2
Madaksira	13,697	12,867	—	830	16·2
Raidrug	7,336	7,785	+	449	8·9
Bellary	49,266	42,396	—	6,870	23·3
Hospett ...	17,181	12,261	—	4,920	16·5
Sundur	3,075	3,353	+	278	22·4
Kudligi	15,439	13,026	—	2,413	11·0
Harpanhalli	5,600	6,166	+	566	7·
Hadgalli	,322	9,269	+	1,947	11·7
TOTAL ...	307,509	274,169	—	23,340	16·4

The large decrease in Adoni is satisfactory, and is due to strenuous efforts to prevent abuse of relief and to detection of some fraudulent returns. The native subordinate staff is greatly complained of. The decrease in Bellary coincides with the partial introduction of the new money wages in lieu of grain hitherto given. The works in Sundur territory are certain ghât roads, and the coolies are not drawn solely from that State, but come also from the

8. The decrease of 10,846 in *Kurnool* cannot be explained at present. The fall in Chingleput is chiefly owing to decrease in the Madurantakam taluk. The decrease in *North Arcot* occurs chiefly in the southern taluks, and works have ceased in Chendragiri, as to the cause of which the Collector will be called upon to report. In *Madura*, no works are in progress in Dindigul, and numbers have declined in Ramnad and Palni. There are no fluctuations of importance in Coimbatore. The increase in *Salem* is general throughout the district, except in the taluks of Oossoor and Kistnagiri.

9. *Rates of wages.*—The new scale, as prescribed in G. O., 31st January 1877, No. 529, and 12th February 1877, No. 681, has been introduced in many places; but the Board are unable to check the rates with the price statements, as they are not aware what grains have been selected by the district officers as the standards in each taluk. The new rates were in force in three taluks of North Arcot, two of Madura,* several of Nellore and of Bellary. In Salem the works were being carried on chiefly at low piece-work rates, and under G. O., 12th February, these are not to be disturbed. In all other places the wages in force appear to be those prescribed by the orders of the 2nd January 1877. The Collector of Tinnevelly continues to pay grain wages in Sattur, notwithstanding repeated orders. He will be separately addressed on the subject. The only other places in which grain wages are now paid are parts of Proddatur in Cuddapah, parts of Bellary taluk, and in Palni in the Madura District. The Board hope that next reports will show the new scale fully introduced. The scattered nature and remoteness of the works are doubtless the causes of the delay in enforcing it.

* In Palni the new scale for full tasks is paid with grain in kind.

Gratuitous relief.—The following are the totals compared by districts with those in last report:

Districts.	17th February.	24th February.		
Kistna	430	191	—	239
Nellore	9,025	5,953	—	3,072
Cuddapah	1,723	1,705	—	18
Bellary ...	10,011	14,829	+	4,815
Kurnool	4,026	3,538	—	488
Chingleput	4,095	4,843	+	748
North Arcot	619	557	—	62
Madura	197	230	+	33
Tinnevelly	93	138	+	45
Coimbatore	1,573	1,297	—	276
Salem	3,496	3,056	—	437
Total ...	35,288	36,337	+	1,049

The increase in Bellary is nominal, and results from the returns of two taluks—Adoni (3,191) and Tadpatri (1,591)—having been wanting last week. The numbers gratuitously fed are large in these two taluks, in Hospett, and in Madaksira, but in Hindupur they have dwindled to 401. In Nellore the fall in numbers is general, but the decrease is chiefly to be ascribed to there being no return from the Nellore taluk, which had 1,560 on the 17th February. The new camps in North Arcot are not filling rapidly, and the numbers in Salem are still diminishing under the camp system. The high number in Coimbatore is due to the inclusion of 1,100 persons fed at a relief-house in Udumalpetta, maintained by private subscriptions, aided by a grant from Government.

10. The outlay in and up to the week is as follows, according to the report:—

	In the week.	Up to the week.
	Rs.	Rs.
Relief works	4,51,161	77,16,025
Gratuitous relief	13,325	2,41,427
	4,64,486	79,57,452

A memorandum of the grants sanctioned by the Board up to date accompanies. The total is Rs. 91,09,763.

11. The following particulars of advances under the Land Improvement Act for the construction of wells are reported:

	In the week.		Up to the week.	
	Cases.	Amount.	Cases.	Amount.
		Rs.		Rs.
Cuddapah	122	10,180	170	15,250
Bellary	.	635	...	1,270
Nellore	...		...	4,105

12. The special establishment returns are still wanting from some districts. The following particulars are known :—

	Relief works.		Payment of wages.		Accounts.		Total.		Remarks.
	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.	
		Rs.		Rs.		Rs.		Rs.

There have been hail storms in Khandesh, and rain has fallen in Nasik, Ahmednagar, Poona, Sholapur, and Satara. Grain has slightly declined in price, jowari now averaging 23¼ lbs. the rupee throughout the nine affected districts.

The number of people upon Relief Works in the nine affected districts is 221,772 against 258,855 last week, and there are also 2,093 hill-men and immigrants upon Relief Works in Ratnagiri and Kanara.

The decrease is remarkable, and is due to the fact—the figures given being averages of the weekly musters—that large numbers of people absented themselves from the works for one or two days of the Holi holidays. The fact that the labourers are able to sacrifice their pay in order to enjoy a holiday, shows that they either have some small resources of their own, or are able to make some slight savings from their wages.

2. The Sanitary Commissioner has visited the Islampur Tank Relief Work, and reports—"I made a careful inspection of the physical condition of the labourers, and failed to discover the slightest indication of starvation amongst them. They did not appear to be pinched, and I feel satisfied that they obtain sufficient food to keep them in sufficiently good health to enable them to perform the not very arduous tasks demanded from them. There are only two sick persons, one with a broken arm, and the other was said to be suffering from opthalmia. Altogether, the sanitary arrangements at Islampur are satisfactory, and the people appear to be well looked after and contented. They made no complaints." Similar reports have been received from other works, and there is every reason to believe that the people are working satisfactorily under the Public Works Department system of tasks and wages.

3. Tables (A) and (B) are appended as before. A mistake in the week ending 3rd February has been corrected. It will be noticed that, on the latest date for which information is furnished, the number of people upon works under Civil Agency was 39,680, and that upon works under Public Works Department Agency was 184,318. Considerably less than a fifth of the labourers are now, therefore, upon Civil Works, and Government hope very soon to have reduced the number to a minimum. It must be borne in mind that the wives, children, and near relatives of able-bodied labourers are received upon works under Public Works Department supervision, unless they are infirm, or incapable, when they are either considered fit objects for charity, or transferred, should they desire it, to petty works in the neighbourhood of their own villages.

On the large schemes now in progress, sanitary precautions are taken in laying out and arranging the camps, and are enforced among the work-people. The results have hitherto been extremely satisfactory, as the people upon those works have, in a great measure, escaped from cholera, small-pox, and other diseases prevalent in the neighbourhood.

4. In the worst districts, and especially in Sholapur, there is a very complete organization for watching the people in their villages and homes. Many of those who left the works in the early part of last month have not yet again sought the employment which is open to them whenever they like to avail themselves of it, but there is no uneasiness or distress apparent among these people, nor any unusual sickness. There is very little cholera in Sholapur, and only one death attributed to want has yet been authentically ascertained in this district. This occurred in the early part of February. The individual was a man of 65 years of age, one of a family, the other members of which did not appear to have suffered any great privations, and he died in the town of Sholapur at a time when aid was being freely bestowed on all who sought it.

5. It has not been found practicable as yet to induce the Sholapur people, who were thought to be in distress, to go to the Dhond and Manmad Railway for work, though a free Railway passage to Dhond and batta is offered to those who will go. A very few of these people have been induced to go to the Nira Canal work, and large public works in the Collectorate itself are still without a full complement of labourers, and it seems that a great many of them will not take any employment, except light nominal work close to their own doors. As far as can be ascertained, it is not the rates of wages that seem to deter these people, but the necessity for going away from home, and of performing some labour. They would probably accept even lower wages than those given on Civil Agency works, if they could obtain them on their own terms. In the meantime, they seem to be subsisting on their means, and their behaviour is very much that of ordinary labourers in ordinary seasons, *i. e.*, they seem to be able to pick and to choose, and to be present or absent on works as suits their convenience. There has been further agitation to restore the former state of things; this has probably been brought about through ignorance of the real condition of the people, or by other considerations, and there is no indication of the existence of general extreme want.

6. Maps are not attached to this summary, as no change has occurred which needs exhibition.

7. The following table gives the expenditure by Government, during the week ending 24th February, upon charity in the relief of the aged and infirm poor, and in payments made to the young children of labourers employed upon Relief Works:—

District.	Collectors' Discretionary Grant.			Expenditure incurred on account of children under 7 years of age whose parents are upon Relief Works.		
	Average number of persons relieved during the week ending 24th February.	Expenditure during the week.	Total Expenditure up to date.	Average number of Children, and of Women taking care of them.	Expenditure during the week.	Total Expenditure up to date.

* No expenditure has been incurred. † Collector's return not received.
‡ Return from the Executive Engineer not received.

8. A table is appended, showing the condition of the affected Native States.

9. With regard to the movements of food-grains, 3,258 tons were exported from Bombay to the Southern Mahratta Ports during the week ending 28th February, and during the fortnight ending 3rd March 5,212 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhosawul lines. The table below shows the quantities of grain sent by sea and rail from October till the end of February to the Southern Mahratta Ports and the railway stations in the distressed districts. It will be seen that the total amount delivered up to the end of February was 185,906 tons:—

Food-grains sent to	In October 1876.	In November 1876.	In December 1876.	In January 1877.	In February 1877.	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Southern Mahratta Country ...	7,675	19,228	17,312	13,459	16,075	73,749
South-Eastern line, from Poona to Sholapur ...	11,683	30,014	25,498	15,471	12,437	95,103
North-Eastern line, from Nasik to Bhosawul ...	4,447	4,776	3,606	1,615	2,610	17,054
Total ...	23,805	54,018	46,416	30,545	31,122	185,906

10. On the whole, the grain supply continues satisfactory, and the decrease in the number of people upon the Relief Works is also satisfactory, but, to some extent, more nominal than real.

M. K. KENNEDY, Major-General, R. E.,
Secretary to Government.

NOTE.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered.
These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

N. B.—1. The nett collections for years previous to 1875-76 cannot be separately given for Imports and Exports, as in the Returns furnished by Local Governments, refunds and drawbacks on Imports and Exports are not distinguished.

2. The figures for British Burma for 1876-77 include the collections at Tavoy and Mergui for the months of April to January only.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE,
STATISTICAL BRANCH;
Calcutta, 9th March 1877.

G. H. M. BATTEN,
Offg. Secretary to the Govt. of India.

GOVERNMENT

DEPARTMENT OF REVENUE,

STATEMENT REGARDING THE CONDITION OF THE PROVINCE

DISTRICTS.	Area in square miles.	Affected area in square miles.	Population.	Population of the affected area.	Condition of Districts as reported.	Description of works in progress.	Daily average number of persons employed	
							During the week last reported upon.	During the present week.
1	2	3	4	5	6	7	8	9
Bangalore ...	2,914	1,914	828,354	384,968	Markets sufficiently supplied. Prices generally a little lower than last week, except in Magadi and Closepet taluks. Irrigated ragi and potatoes are in tolerable condition. Sugarcane, Bengal-gram and javari drying. Rabi paddy in good condition in Devanhalli taluk. No rain, and the prospects of season are very gloomy. Cholera prevails; 14,253 fed at public kitchens on an average daily.	Roads, tanks, and wells. Village improvements. Miscellaneous.	5,886	6,922
Kolar ...	2,577	2,577	618,954	618,954	Markets well supplied by importation. Bengal-gram and javari crops in beds of tanks are thriving. Sugarcane mills are worked. Prospects of season totally unfavourable. Cholera, fever, diarrhœa, dysentery, rheumatism and small-pox prevail. Daily average number of persons relieved by public kitchens 2,129. In Betmangala coolies did not assemble owing to prevalence of cholera.	Ditto ...	4,326	6,874
Tûmkûr ...	3,606	3,606	632,239	632,239	Markets fairly supplied. Javari and Bengal-gram crops promising. Sugarcane harvested in some places. Cholera and small-pox prevail. Murrain among the cattle still continues; 2,029 were fed at kitchens on an average daily.	Ditto ...	14,656	14,219
Mysore ...	4,127	1,470	943,187	118,032	Prospects unchanged. Prices slightly fallen. Cholera prevails; 324 daily relieved on the average at relief kitchens.	Ditto ..	1,904	4,678
Hassan ...	3,291	2,154	668,417	190,873	Markets sufficiently supplied, except in Manjarabad, Channaraypatna and Harnhalli taluks. Prices rose in Channaraypatna, Harnhalli and Narsipur taluks; they fell in Belur and Attikuppa. Castor-oil seeds and Avare reaped in Hassan and Attikuppa taluks. Bengal-gram withering in Channaraypatna. Paddy called Kode bhatta transplanted in Manjarabad. Cholera and small-pox throughout the district, except in Belur taluk. Slight drizzling rain fell at Harnhalli. Average daily number of persons relieved by public kitchens 342, except in Hassan, Arkalgud and Narsipur taluks.	Ditto ..	2,978	2,630
Shimoga ..	3,797	388	498,976	47,431	Markets moderately supplied. Prices in Maidan taluks slightly increased. One-half of the sugarcane and supari crops harvested. Public health at head-quarters fair. Cholera in Shikarpur and Sorab taluks. Average daily number of persons at public kitchens in Chunnagiri and Shimoga 177.	Ditto ..	676	639
Kadur ...	2,294	691	333,925	100,444	Markets fairly supplied, except in Lakvalli and Koppa taluks. Dry crops withered in Chikmagalur. In Banavar Bengal-gram and javari raised under large tanks and nullas harvested. In Lakvalli and Koppa picking of coffee and supari finished. Sugarcane cut. Cholera, fever and dysentery prevail, the first very severe in Banavar taluk. Average number of persons relieved daily by kitchens 258.	Ditto ...	602	1,301
Chitaldroog	4,471	1,238	561,360	511,204	No change in the condition of the district	Ditto ...	3,542	3,941
Total ...	27,077	17,038	5,055,412	2,604,145			34,569[b]	41,110

Note.—The figures in columns 8 and 9 do not include the number on works carried out by the Professional Department, which

a.—Explanation regarding the expenditure shown in this column has been called for.

b.—This does not include 28,789 persons who were employed during the last week on works carried out by the Public

OF INDIA.

AGRICULTURE, AND COMMERCE.

OF MYSORE FOR THE WEEK ENDING 24th FEBRUARY 1877.

Sums appropriated for works of all kinds under revenue officers	Reported Expenditure up to date.	Prices of staple grain in lbs. per rupee. Ordinary prices of Rice and Ragi.	Prices during the week last reported upon.	During the present week.	Average rainfall for five years in Inches calculated up to 31st March 1876.	Total rainfall from 1st April 1876 to date.	General Remarks.
10	11a	12	13	14	15	16	17
78,623	41,413	Rice ... 24 Ragi ... 60	11 to 15 14 to 20	15 16 to 18	35	16	The condition of the Province remains practically unchanged. Only the largest tanks and very few of these hold any water-supply, and no rain has fallen to replenish them. Although the crops, unless under exceptional cultivation, have generally failed, grain, imported chiefly by railway, is abundant, and its movement brisk through the agency of private trade. For the week ending this date 1,911 tons were received at the terminal station at Bangalore and 213 at Kolar-Road, or altogether 2,124 tons.
88,405	10,775	Rice ... 32 Ragi ... 80	12 to 16 14 to 20	14 14 to 19	25·4	14·9	
1,29,605	57,006	Rice ... 28 Ragi ... 106	10 to 13 11 to 18	12 15 to 16	27·4	15·9	
22,181	1,770	Rice ... 24 Ragi ... 70	11 to 13 16 to 22	12 to 14 18 to 24	24·3	20·8	
44,320	22,219	Rice ... 32 Ragi ... 76	10 to 13 16 to 18	13 16 to 18	34·4	15·8	
46,804	18,324	Rice ... 30 Ragi ... 76	13 18	14 18	38·4	18·3	
37,406	21,168	Rice ... 30 Ragi 64	12 to 15 16 to 20	14 16 to 18	35·7	19·6

5,84,230	2,41,459						

	Tons.
In November 1876 the imports were	9,943
December	11,562
January 1877	11,259
February, 1st to 24th	11,149
Total ...	43,913

There is hardly a blade of grass to be seen, but forage is still procurable. Major Chrystie, R. E., a careful observer, after marching 350 miles from Bangalore to Bellary along high roads, District roads, and across country, inspecting works put in hand under professional supervision, reports that although cholera in a severe form had broken up the larger gangs, there were a considerable number of men, women and children so rendered capable of earning a livelihood, and that those relieved at kitchens and camps that have been judiciously located, were not generally so emaciated as he expected to see them, although in some instances they were pitiable objects. His "Notes" conclude with the cheering intelligence that in the northern taluks, there is much ripening cultivation in the beds of tanks and under wells, and that wherever water can be anyhow made available, the ryots with most praiseworthy diligence, are cheerfully doing their utmost to look the difficulty in the face. In an interesting report of the condition of the Nundydroog Division from the 16th to end of February, Colonel Pearse corroborates this strongly, and as the area thus under consideration is, with the Chitaldroog District perhaps, the most stricken portion of the Province, the situation may be considered as fairly hopeful as under the circumstances could well be expected; and should heavy rain providentially fall towards the end of the month, after the crops so being raised are reaped, it will be more so. Colonel Pearse reports the death of more than 10,000 poor cattle during the fortnight in his Division, but as a set off to this he brings to notice the great care that is being taken after the better kinds, and the large prices paid for forage for them. He reports also cholera of a very virulent type from which during the fortnight nearly 3,500 had succumbed.

The report for the Nundydroog Division does not embrace Municipal limits where relief operations are carefully carried on by the President of the Commission under a General Committee that meets weekly in Bangalore. The President reports that all the quasi potable waters were analysed by Dr. Nicholson in 1871, and that while those pronounced to be good are strictly conserved, and the draught on them authoritatively regulated, those that were condemned as unfit for drinking purposes have been filled in, and others in selected sites established—and that every effort is being made to relieve distress, by providing suitable employment according to the physical state of those requiring it, and feeding with judgment those who are from any real cause not able to work.

Besides the importation of grain to the extent of nearly 380 tons per day from the 1st November from Madras, the result of a conference with the grain merchants in the Darbar Hall on the 1st March, when Captain Bissel, R. E., explained an alternative route from Negapatam, was, that the merchants were convinced of the practicability of increasing the supplies they had already to some extent drawn from that port, under existing rates up to 200 tons a day; where the Notification of the equalization of the rates should be authoritatively made public.

The totals and averages under the heads of expenditure, of deaths from sickness, of persons employed on relief works by the Revenue authorities, and of those provided otherwise than on Public Works under professional supervision, of which returns are kept separately—such mode of relief being preferred where possible—will be again thoroughly scrutinized and corrected where necessary, from the 1st January to the week ending 24th February, and thereafter the weekly returns under the special arrangements will be available for proper comparison. These figures may be accepted by Government in supersession of other reports previously submitted.

have been so apportioned as to enable those able and willing to work a fair day's wage for a fair day's labor.

Works Department Officers and who were wrongly included in Col. 9 of last week's return.

J. PUCKLE,

On Special Duty

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

FAMINE IN THE MADRAS AND BOMBAY PRESIDENCIES.

No. 15, dated 16th March 1877.

From—The Government of India,

To—Her Majesty's Secretary of State for India.

WE enclose copies of Minutes and Memoranda which we have received from Sir Richard Temple during the past week, regarding various matters connected with the famine in the Madras and Bombay Presidencies.

2. Among these papers will be found an interesting report on the district of Nellore, together with a separate Minute proposing the early commencement, as a famine work, of an irrigation work in that district known as the Sangam project. Nellore is a large district on the east coast, of which the southern boundary is about fifty miles to the north of Madras. Its area is 7,150 square miles, and its population, according to the last census, 1,374,012. During the ten months ending with the 31st January last, the rainfall was only 11 inches 35 cents. In the previous year, 1875-76, the rainfall had been scanty, amounting to 26 inches 49 cents., against 37 inches 40 cents., the average rainfall of the preceding four years. In 1874-75 there had been heavy floods, and many important tanks and channels had been breached. Two years of drought following a year of floods had greatly tried the resources of the district. The tetal yield of the crops of the district for the present year is estimated at less than one-fourth of the average outturn, although the people with commendable industry have in some parts of it dug temporary wells and deepened old wells, and thus raised a spring crop. The drought was worst in the western taluks, at the base of the Eastern Ghâts, and adjoining the district of Cuddapah. The number of persons on the relief works at the time of Sir Richard Temple's visit was 85,000, or about 6 per cent. of the population of the district. Sir Richard Temple inspected about 17,000 labourers, and found very few who appeared to be in a condition to sustain themselves. He considered that much more discrimination had been exercised by the Nellore authorities in admitting persons to the relief works, than had been the case in the Ceded Districts; but that the depressed condition of some of the persons he had seen on the works, indicated the necessity of a house-to-house visitation more systematic than had been as yet introduced. Some of the relief works were useful, but many were of doubtful value, and task-work had often been little better than nominal. The small local works, in fact, had been made too easy and too attractive, and, as we noticed in our last despatch, great difficulty was in consequence experienced in inducing the people to go to the one large relief work, the East Coast Canal, which runs through the district, and which Sir Richard Temple describes as the very best relief work in all Southern India. The markets are well supplied with grain, coming both by inland and by water routes.

3. Of the Sangam project, Sir Richard Temple writes that the plans and estimates are ready, and the work could be put in hand at once. Its estimated cost is twenty-seven lakhs, the irrigable area 94,000 acres, and the estimated return from water tax two and a half lakhs. Sir Richard Temple considers, from the information supplied to him by the District Engineer that, of the entire project, works estimated to cost nineteen lakhs, and to yield an annual revenue of one and three-quarter lakhs, might be executed, in a great part at all events, by relief labour. He has suggested the work to the Madras Government as one which is deserving of consideration, at a time when so much stress is laid upon the expediency of employing relief labour upon really good and reproductive works. The suggestion is doubtless receiving the consideration of the Government of Madras, with whom we shall communicate upon the subject.

4. Sir Richard Temple has paid a third visit to the district of North Arcot, having received conflicting accounts regarding the degree of distress in certain parts of it, and having had reason to fear that in other parts, and especially in the zemindari tracts, chiefly in the north-east of the district, the distress might become serious. The results of his inspection appear to have been more satisfactory than he had anticipated. In a great part of the Chandragiri taluk the spring crops were good. The Kárvetnagar zemindari, with the exception of the eastern portion of it, had not suffered from drought. The autumnal showers had given it a fair winter crop. Irrigation from wells and from watercourses was giving it a good spring crop. In Kálahasti, on the other hand, which is the other great zemindari in North Arcot, the drought had been exceptionally severe. Sir Richard Temple made suggestions for improving the system of gratuitous relief, and extending that of house-to-house visitation, and also for arranging some light textile work on which the distressed weavers (a numerous class in the North Arcot district) might be employed.

5. The results of Sir Richard Temple's visits to North Arcot are summarized in the following terms:—

"I find that distress does not threaten the mass of the people; that the numbers on relief works will probably not much exceed the comparatively small number now employed, if only the usual showers of April shall last; that the numbers on charitable relief will probably increase considerably as the season advances; that in the old towns, scattered over the district, in the sacred haunts so much frequented by pilgrims and beggars from distant places, and in the jungle tracts fringing the edges of the district, there are classes among whom many cases of individual distress are to be expected; that on the whole the relief measures taken in hand are sufficient to meet that degree of distress which is to be anticipated; that the relief works are of a small description, the number of able-bodied relief labourers not being large enough to justify their congregation upon large works, but if such large works should be wanted, there are many tanks to be repaired; that in some particular places the delay which at one time occurred was owing to technical and other reasons beyond the control of the local authorities; that the arrangement for house-to-house visitation in every village (save the zemindaris, which are being separately arranged for) are very systematic and satisfactory. I have discussed with the Collector every measure of relief which I can think of. My impression is, that he is now doing everything which ought to be done in this respect."

6. Among the enclosed papers will be found a review by Sir Richard Temple of the objections advanced by the Sanitary Commissioner at Madras to the reduced scale of wages lately prescribed for the relief works in that Presidency. The gist of Sir Richard Temple's remarks is, that the present rate of wages appears, so far as experience goes, to be sufficient to maintain in health people employed on the very light work which is enforced on most of the relief works in the Madras Presidency, and provides as much food as the labouring poor in rural localities get in ordinary times; that it is not possible to determine *à priori* on scientific data what amount of food is necessary to sustain the particular classes who come to the relief works; that the effect of the present rates should be tested by careful practical examination of the people themselves; and that, if it should appear that there is a change for the worse in their physical condition, the rates should be raised, but not otherwise, and that wherever really hard labour is exacted, a higher rate of wages should be given. This is practically what is now being done in the Bombay Presidency. Sir Richard Temple has, within the last few days, had a personal conference on this subject with the Government of Madras; and from a telegram from His Grace the Governor which reached us on the 14th instant, we learn that "the Governor in Council having considered various reports" (from district officers) "has decided to defer the consideration of the general adequacy of the scale for further report; the special attention of officers being directed to securing that labourers receive full benefit of allowances, and to scrutinizing all cases of apparent weakness; children under ten being relieved from test work, and weakly persons being formed into special gangs with special nourishment where necessary."

7. In our despatch of the 9th instant, we adverted to the insufficiency of the means at present available for transporting grain from Madras into the interior, the Madras Railway not being able to carry more than 700 tons a day. The subject has been engaging the careful attention of our Public

Works Department, and arrangements have been made, which, it is hoped, will have enabled, or will speedily enable, the Madras Railway Company to carry 1,400 tons a day. Satisfactory arrangements have been made for sheltering and housing the grain, both public and private, on the Madras beach.

8. In his Minute of the 6th instant, No. LIV, and the Memorandum annexed to it, Sir Richard Temple has furnished a revised estimate of the expenditure on, and loss of revenue from, the famine. The result is a total estimated loss of five crores and two hundred and eighty one thousand rupees. In the Financial Statement made yesterday in the Legislative Council by our colleague Sir John Strachey, the net cost of the famine is set down at five and a quarter crores of rupees, or five millions and a quarter, according to the old calculation of two shillings for the rupee, of which sum £3,100,000 will fall on this year, and £2,150,000 on 1877-78. This estimate does not take into account future recoveries of land revenue suspended for the present, which Sir Richard Temple estimates at the considerable sum of Rs. 1,29,50,000 out of Rs. 1,87,96,000, which must for the time be left uncollected. The question whether these balances should be held in suspense or entirely remitted, is one which, as stated in our despatch of the 16th ultimo, we have deemed it proper to leave to the unfettered discretion of the local Governments. Sir Richard Temple states in his present Minute (paragraph 19) that many of the most experienced Collectors in both the Madras and Bombay Presidencies are in favour of the plan of suspending only, and not entirely remitting, the land revenue on the dry or unirrigated lands. These opinions and the grounds upon which they are based, will doubtless receive due consideration from both the Governments concerned. For the present, however, we have deemed it safer to exclude from our calculations any reduction of the cost of the famine from this source.

9. We have this day received the following telegrams from Sir Richard Temple:—

Telegram, dated 15th March.

"I proceed for few days to Bombay Presidency. Throughout Madras Presidency the relief works are now fully controlled and carefully restricted to dimensions of actual distress. Much credit due to local officers in districts. The organization of charitable relief not equally successful, but further efforts being put forth. Destitute people often unwilling to resort to relief camps. Some casual deaths near Madras itself still happen, chiefly owing to insufficiency of measures in three large Zemindaries. Remedy being applied. Reduced wages still being tried. Spring crops good in many parts of distressed districts; prices somewhat stiffening. Condition of people good generally, but cholera breaks out temporarily in many places. Large accumulation of grain at Madras well housed. Anxiety about railway arrangement on Madras and Bombay lines. Still hope that these two lines will supply the large and active demands of inland grain trade. Markets continue well supplied."

Telegram, dated 16th March.

"In continuation of yesterday's telegram for mail. It was ordered a month ago throughout Madras Presidency, that if any children below seven years of age, belonging to persons employed on relief works, cannot be supported, they shall receive special relief. This is being carried out with my full concurrence. Children above seven have from beginning received relief wages. It has also been ordered, with my full concurrence, that if any relief labourer shall be found to suffer physically from reduced wages, he shall receive special allowance, or else be put to light work. Have complete evidence that most of the large gangs are standing the reduced wage without suffering. Whether they can bear it, as the season advances, remains to be seen. Having inspected in the presence of many officers about one hundred and thirty thousand relief labourers in scattered gangs throughout Madras Presidency, I have reason to believe the physical condition of these people to be generally good. I picked out in every gang every person who seemed below par, and suggested special measures regarding each individual."

10. There has been a further decrease in the number of persons on the relief works both in Madras and Bombay. In the former Presidency the number, according to the latest return, was 657,365 against 667,443, the number for the previous week. In Bombay the number was 223,865, against 263,053, the total reduction in the two Presidencies being thus 49,266. In Bombay, however, there were also children under seven years of age, and women in charge of them, to the number of 44,150.

In the number charitably relieved there was an increase of 10,226 in Madras, and a decrease of 999 in Bombay, the totals for the two Presidencies being 58,317 and 5,566, respectively.

The Mysore returns give 38,808 persons as employed on the relief works under Civil Officers, in addition to 30,794 employed by Public Works agency, and 30,097 in the receipt of charitable relief, making a total of 99,699.

No. 101, dated Arconum, 3rd March 1877.

From—The Private Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honour to submit, for the information of the Government of India, copy of a minute recorded by him on the advisability of commencing the earth-work of the "Sungum" project in the Nellore District.

Minute by Sir Richard Temple, *dated Arconum, 3rd March 1877.*

During my recent visit to the Nellore District, I was much struck by the possible advantages of what is known as the "Sungum" project for the employment of relief labour.

2. This project has, as I learnt, been professionally framed; the plans and estimates are ready, and the work could be put in hand at once, whereby many relief labourers now employed on village works could be at once employed under regular professional supervision.

3. The project is an excellent one for using the flood-waters of the Pennair river to fill channels which carry the waters to tanks and other reservoirs for irrigation. The head-works are situated at a point called "Sungum," near Atmakoor, on the Pennair river, about 30 miles above Aloor. The total cost is estimated at 27 lakhs of rupees (say £270,000); 94,000 acres would be irrigated, and the net returns in water tax are computed at 2½ lakhs (say £25,000) annually. The financial prospect is therefore fair enough.

4. Out of the total cost above set down—27 lakhs of rupees—the greater portion consists of earth-work and excavation, namely, 16 lakhs, as will be seen thus,—

	Lakhs.
Tanks and channels	16
Masonry distributaries	5
Anicut in Pennair	6
Total ...	27

5. Now, subject to correction, I understand from the District Engineer (with whom I had the advantage of travelling while in the Nellore District) that the earth-work, that is, the channels and tanks, might at once be undertaken by relief labour within the cost of 16 lakhs, which work would be useful so far as it goes, *without* the *whole* of the remaining expenditure, namely, 6 lakhs for anicuts and 5 lakhs for masonry distributaries, being necessarily undertaken. These works will, of course, be wanted for the complete project; but the project might be executed without them, and though in some degree incomplete, it might be useful without them. In this limited sense I learn that only three lakhs worth of masonry channels would be absolutely necessary. If executed in this manner, that is,—

with	16 lakhs,	earth-work.
,, ...	3 ,,	masonry distributaries.
Total ...	19	

The project might yield net 1¾ lakhs annually in revenue returns. It would employ 200,000 persons for four months.

6. Considering the large numbers that are being employed on comparatively unproductive district and village works, I think it is a pity that relief labour cannot be employed on the earth-work of this really useful and well-considered project.

7. I bear in mind that all available labour is wanted for the East Coast Canal, which is also in the Nellore District, as is shewn in my minute of the 28th ultimo on the subject. But there is much difficulty in inducing the relief labourers to go there. And it is

possible that thousands of persons who would not go to the East Coast Canal would be willing enough to work on this Sungum project, which is favourably situated as regards their homes. And some thousands of relief labourers might be sent from the Ceded Districts and Kurnool.

8. It is true that the earth-work for the channels and tanks will not produce a result without the addition at least of three lakhs of expenditure for the masonry distributaries, but for this also relief labour would be to some extent available. And something might be contributed from the ordinary irrigation grant of the Presidency; of this point, however, the Madras Government would be the judge.

9. At all events, when so much stress is justly laid upon the employment of relief labour upon really good and reproductive projects, it seems proper to ask the notice of the Government of Madras to the merits, in this respect, which the Sungum project in Nellore possesses. If anything is to be attempted, then rapidity in commencing would be essential.

RICHARD TEMPLE.

No. 103, dated Coimbatore, 6th March 1877.

From—The Private Secretary to Sir Richard Temple,
To—The Additional Secretary to the Government of India.

BY direction of Sir Richard Temple, I have the honour to submit, for the information of the Government of India, copy of a Minute recorded by him respecting the Nellore District, together with a Memorandum of the facts ascertained by him during his visit from 27th ultimo to the 1st current.

Minute by SIR RICHARD TEMPLE, *dated Coimbatore, 6th March 1877.*

IN forwarding the Memorandum of facts ascertained by me during my recent visit to the Nellore District, it will suffice to make only a few general remarks.

2. The failure of the rains during 1876 in this district appears to have been more utter than I had previously supposed. Hardly one-third of the average rainfall was vouchsafed. At no period of the year did any sufficing rain fall: even the Pennair river failed to come down in flood; and the dam across that river opposite the town of Nellore and the irrigation works dependent thereon have this year proved almost useless. Along the East Coast line,—that is, in the villages immediately adjoining the margin of the sea,—some rain fell: but it dwindled away to the westwards, till almost nothing fell in the western parts of the district at the base of the Ghât range of hills. I found very serious drought prevailing and considerable distress, especially in the vicinity of the well-known hill fort of Udaigarh. The total outturn of the district is still estimated by the local authorities to be under four annas, or less than one-fourth of the average outturn. On the other hand, in some parts of the district, especially the eastern, the people, finding water to be near the surface, have, with commendable industry, made the most of this slender opportunity and have dug temporary wells or deepened old wells, and thus raised a certain amount of spring crops. Between Nellore and the East Coast Canal I saw cultivation of this kind stretching for several miles. In a short time the result of the accession of new grain supply will be felt throughout the district.

3. Meanwhile, the markets are well supplied with grain, coming both by inland and by water routes.

4. Out of the large number of relief labourers whom I inspected carefully (about seventeen thousand in all), very few were found to be apparently in a condition to sustain themselves; the vast majority seemed to be persons of the right sort for these works, that is, persons who really needed this form of relief. Their physical condition was generally fair. But among them were found sprinkled here and there persons whose physical state was low and unsatisfactory. Every one of these I brought to the notice of the Collector. The total number at the time of my visit, 55,000 persons on district works and 30,000 on the East Coast Canal (of which latter most belong to the Nellore District), in all 85,000, amounts to 6 per cent. on the population of the district—a proportion which, though liberal and sufficient to meet the existing distress, is not excessive, considering the failure of harvests.

5. But I think that this number ought not, without careful consideration, to be permitted to materially increase, because the condition of the ryots generally is reported to be good and free from indebtedness, and because the spring crops shortly to be harvested will bring in a fresh supply. To this favourable description the peasantry of the western parts form the only exception.

6. On the whole, I think that much more discrimination in regard to admission of people must in the first instance have been exercised in the Nellore District than in the Ceded Districts. The difference in the condition of the gangs in Nellore presented in this respect a marked difference as compared to the Ceded Districts, which is, so far, very creditable to the Nellore authorities. We may venture to believe that no undue expenditure on relief (to any appreciable amount) has been incurred in Nellore, which redounds to the credit of the Acting Collector, Mr. Sharp.

7. On the other hand, the occasional appearance, even among the ranks of the relief gangs, of persons in a reduced or depressed condition indicates clearly the need of a house-to-

house visitation, more systematic than heretofore, in the villages throughout the district. This inference I pressed on the consideration of the Collector, who seemed quite alive to it.

8. No relief camps in the improved style established near Madras have been opened in this district, though charitable relief is being administered at several places. Proper camps ought, I think, to be opened without the least avoidable delay.

9. The relief works have been sometimes useful, consisting of excavation of irrigation channels and reservoirs, but have often been of doubtful value, such as opening out roads which the local funds will hardly be able to keep in repairs in future. The task-work, though perhaps in some places fairly well exacted, has, I fear, often been little better than nominal; the relief labourers have been employed too near to their homes, and the matter has been allowed to become too easy and attractive. Doubtless the Collector will try to remedy this: and some remedy has already been applied in the western portion of the district through the praiseworthy exertions of Mr. Underwood, Assistant Collector.

10. In proof of the objectionable attractiveness of the petty district works, I may adduce the extreme difficulty of transferring relief labourers from these works to the East Coast Canal —an excellent work in a salubrious position, remarkably suited for purposes of relief, and distant only 30 miles on the average. Able-bodied relief labourers on the district works are being ordered to proceed to the East Coast Canal, but they refuse to obey and go on "strike," remaining for days and days out of work sooner than proceed. It is to be hoped that these difficulties will be overcome by the firmness and patience of the local officers and by the people themselves being awakened to a sense of the necessity.

11. I have in a separate Minute recorded my views regarding the East Coast Canal. Rumours unfavourable to the salubrity of the operations on this important project have from time to time been spread. I found, however, the position of the works very salubrious, and the arrangements, sanitary, engineering and others, excellent, and very creditable to the District Engineer, Mr. O'Shaughnessy, of whose practical ability I am disposed to form a high estimate.

12. If the commencement of the Sungum irrigation project (from the river Pennair, 30 miles above the town of Nellore) can be sanctioned, as recommended in my separate Minute, that will afford a further field for the profitable employment of relief labour.

13. Though the state of affairs regarding the relief of distress in this district may be generally pronounced to be favourable, yet there is this cardinal defect, that although the district has the very best relief work in all Southern India (the East Coast Canal) running through it, still the relief labour of the district is not brought to that work to any thing like a sufficient extent. The management of this particular matter is the primary point to which the attention of the Collector should be given.

RICHARD TEMPLE.

Memorandum on the Nellore District, visited by Sir RICHARD TEMPLE *from the 27th February to the 1st March* 1877.

FROM North Arcot Sir Richard Temple entered the Nellore District, proceeding thither from Triputty *viâ* Kalustri and Goodoor. At the lastnamed place he was met by the Collector, Mr. Sharp, C.S., and after inspecting the relief labourers there, drove into Nellore on Tuesday, the 27th February. The next day Sir Richard visited the East Coast Canal works at Maipad, Korutoor and near the Pennair river, with the Collector and Mr. O'Shaughnessy, the District Engineer: there he also met Mr. Stevens, who is employed on the canal works. About eight thousand relief labourers on the canal, and in the evening some hundreds more on works near the Pennair anicut at Nellore, were inspected. On Wednesday night Sir Richard left Nellore, with the Collector and District Engineer, reaching Nellarpalem the next morning. Here he saw the Tahsildar of the Atmakur Taluk and inspected about 4,500 relief labourers who had been collected there by previous arrangement. Continuing his journey to Nandeveram, he met there Mr. Underwood, C.S., Head Assistant, who was on tour in the western taluks. Mr. Underwood accompanied Sir Richard, after seeing the labourers at Nandeveram, to Murripad, where more gangs were drawn up. From Murripad Mr. Underwood returned; Sir Richard and staff proceeded in palanquins by the Dornel Ghât, Budvail and Sinhout to the Wontimetta railway station in the Cuddapah District. At Nellore Sir Richard also met Mr. Goldingham, C.S., District Judge, and Mr. Christie, District Superintendent of Police.

2. The following facts were ascertained by enquiry, chiefly from the Collector, Mr. Sharp, C.S.—

The district of Nellore has an area of 7,150* square miles, including zemindary tracts, and contains a population of 1,374,012 persons, according to the census of 1871. It is divided into nine Government taluks and four zemindary divisions, the extent and population of which are shown in the margin. Many zemindary villages, however, are scattered in all the Government taluks, except in Nellore and Rapur.

	Sq. miles.	Population
Government taluks	4,626	897,845
Venkutgiri zemindary	1,853	348,370
Kalustri „	526	100,866
Chundy „	124	21,990
Mutyalpad „	21	4,941
	7,150	1,374,012

* In the Nellore District Manual it is stated to be 8,751 square miles.

3. The area of land in the Government taluks cultivated with the several food-grains, according to the returns sent to the Board of Revenue for Fusli 1285, was 884,852 acres, and the statistics of the important grains sown are as under:

	Area of crops sown in Fusli 1285.
	Acres.
Rice	200,910
Jouna or cholum	360,063
Ragi (small millet)	41,327
Luzza	63,381
Aruga	74,361
Varigalu	115,316
Pulses, &c.	29,494
Total	884,852

The current year's details of *crops sown* are not to hand as yet, but, speaking generally of the whole district with respect to the cultivated yield, there is an almost general failure of wet crops, with the exception of isolated patches here and there, under wells, under some of the Pennair river channels and spring-fed ponds. A great part of the wet area was not cultivated this year owing to the drought, and the sowings in many places were fruitless. As regards dry crops, those cultivated under wells have grown fairly, while the yield on those depending entirely on rain varies from nothing in some parts of the upland taluks to 4 annas or one-third of the average standard estimate. It must be, however, stated that a fair outturn is expected in a few villages of Ongole in the north of the district. The average yield of purely "dry crops" for the whole district may not be more than 3 annas. The rain-fed tanks in the district are almost entirely dry, while those under the Pennair anicut received but a scanty supply, so that cultivation under them was unsuccessful.

4. Of the total holdings of nearly 766,960 acres under the head of "dry" lands, only an area of 2,24,433 or 29 per cent. have been actually cultivated, and the Government demand on this area is only Rs. 2,98,265: besides the poor state of the crops in general, the many important and valuable "kanchas" or pasture farms are devoid of fodder.

5. The rainfall of this district from the month of April up to the end of January was very light, as will be seen from the following details:

	In.	Cts.
Average of four years to Fusli 1285	37	40
Average rainfall for Fusli 1285 from 1st April 1875 to 31st March 1876	27	29
Average rainfall for Fusli 1286, or from 1st April 1876 to 31st January 1877	11	35

Portions of the district feel the effects of the different monsoons which sweep in from the south-west and north-east, Udaigiri and Kanigiri receiving less than any other part of the district.

6. Nellore suffered from famine in the years 1832, 1854 and 1866, but the scarcity was not so severe as in the present year. The harvest of the year 1875-76 was on the whole poor and much below an average yield for nearly the whole district, especially as regards wet crops. The rainfall of that year was only 26 inches 49 cents against 44 inches 32 cents of the previous year. The year Fusli 1284 was marked by floods, when many important large tanks and river channels were breached, chiefly in Atmakur and in the principal rice-growing taluk, Nellore, on account of the Pennair floods. The two bad years succeeding the year of the floods have evidently tried the resources of the district generally. In ordinary good years the produce of the country not only supports Nellore itself, but much grain is generally exported both by land and sea to other districts.

7. The condition of the ryots and labouring classes is good in ordinary years. Many of them formerly acquired a good deal of wealth from the sale of indigo, rice, &c., but in Kanigiri and Udaigiri taluks the soil is very poor and the ryots proportionately so. The ryots of the Coast taluks are far better off than those of the western upland ranges. The number of pattadars registered as paying direct revenue to Government is 95,710; of these, 8,627 own pattas of Rs. 50 and upwards, and 87,083 below that amount. The actual cultivators and inamdars with their families amount to nearly five-eighths of the entire population of the district. The majority of the population of the district is agricultural, and the *bonâ fide* labouring classes who depend solely upon labour may be estimated at about a sixth of the population.

8. The markets of Nellore, Ongole, and most of the towns of the district are now well supplied with rice. The extraordinary demands of the western districts have much reduced the district stock. The unusually high prices have induced merchants and others to purchase and import grain both by sea from Cocanada and other places from the north, also by the East Coast Canal, and by land from Madras and from Guntoor, &c. Competition among

the merchants has now resulted in a slight fall in the price of grain. The present prices of grain as compared with ordinary prices, in seers per rupee, are given below:

	1st week, February.	2nd week, February.	Average for the last six years up to January.
Rice	8·	8·36	16·67
Cholum	9·18	9·24	24·42
Ragi	9·57	9·82	27·39
Cumbu	9·58	9·12	19·53
Wheat	6·87	7·	10·17
Gram	8·33	8·65	18·79

It should be remarked that cholum, cumbu and ragi are not easily obtainable in the local markets. In the upland taluks of the district the prices range one seer dearer than in Nellore itself; but owing to the public competition noticed above, and partly, the Collector thinks, owing to the example set by Government in importing grain by sea, prices fell. The country ryots send in their carts to Nellore and make purchases both for their own consumption and for purposes of trade. There is little fear that the supply will fail. Recently it appeared necessary to make special arrangements to purchase for the western taluks, but trade generally, the Collector thought, was in no way interfered with by this undertaking. The merchants of Nellore were ready enough to supply rice in Nellore itself, but were unwilling to cart it to the western taluks. This was the reason assigned for buying and transporting the grain already purchased, in anticipation of further want in the western taluks.

9. Owing to the scantiness of produce in Fusli years 1285 and 1286 and exportation, it is feared that the local stocks in hand are small, and no great quantity can be available for sale, as seed-grain is wanted for the next Fusli.

10. The affected tracts of this district are now relieved to a great measure by the many relief works already opened. The relief works consist chiefly of making new roads, river embankments, and repairing Government irrigation courses. Wells are either being newly sunk or repaired wherever water may be scarce, and the East Coast Canal already employs about 30,000 coolies, a few of whom are from the Ceded Districts as well as Nellore.

11. The following return shows the numbers employed on the 10th February in the several taluks:—

Taluks.	No. employed.	Percentage to the population.
Gudur	3,827	3
Rapur	2,783	4
Nellore	4,039	2
Atmakur	5,662	5
Kavali	5,610	7
Udaigiri	13,111	13
Kandukur	8,250	6
Kanirgiri	6,299	5
Ongole	1,526	1
Zemindary	5,899	2
	57,006	
East Coast Canal ...	18,045	

If it be remarked that as the percentages of population employed on relief works is very low, the district on the whole must be in a fair condition, it is answered that the idea of supporting himself as a cooly is held to be demeaning to a Nellore ryot. Malas and Madigas, who are in general exceedingly poor and have no such pride, form the majority of the present labourers. As there is no prospect of rain for the present, the numbers are expected to gradually increase. Task-work is now exacted on the East Coast Canal range only, but in the remaining parts of the district the ordinary wage system is in force, or was up to a recent date. The names of all the labourers are duly registered by the subordinate officers, some of whom come from the Survey Department, others from the Settlement, and some have been temporarily appointed. All the tahsildars and some of the taluk subordinates are now supervising the relief works, and the divisional officers, moving about frequently, exercise supervision over them all.

12. The following are the rates of wages now paid or about to be paid in the district:—

	*1st. As. P.	2nd. As. P.
For adult males	1 6	2 0
„ females	1 4	1 6
Children above seven years of age	0 9	0 10

* For lower standard of task-work, which is being gradually introduced.

The total expenditure up to the 17th February on relief works is stated to be Rs. 3,84,363 and on gratuitous relief Rs. 26,406. The number fed gratuitously on that date was 11,025. Relief labourers were in the beginning employed solely on road works from want of professional assistance, but with increased facilities for supervision, efforts are now being made to carry out irrigation works in communication with the District Engineer, who has sent in his proposals for repairing many tanks; and as each work now under progress may be completed, irrigation works will be gradually undertaken. But it is hoped that by far the larger part of the able-bodied labourers will be gradually drafted to the East Coast Canal.

13. At first relief was afforded in Nellore at the poor-house. Objections were found to this plan. Three different relief houses were then opened in the outskirts of the town. These by their proximity to the town attracted undeserving recipients. To lessen the risk of disease and to prevent imposition, two large relief camps have now been opened—one on the north, the other on the south of the town. Superintendents on Rs. 40 and 30 respectively a month have been appointed to supervise the cooking and distribution of food, and separate sheds have been erected for accommodating the helpless, sick, cholera and small-pox stricken paupers. There are in all 18 relief houses throughout the district. No attempt has yet been made to secure the people being detained in the camps, but the plan of compelling them to eat their food in the camps is being introduced. The taluk relief houses are under the direct superintendence of either a tahsildar or deputy tahsildar. The pauper recipients get their food only once a day, at the following rates:—

Each adult	One pound of uncooked food.	
Children under 14 years ...	Half ditto,	with salt.

14. The condition of the cattle is very poor. Very little fodder is now available as pasture. The harvest of ragi and cholum may relieve the sufferings of the cattle to a certain extent. The tahsildars and many ryots state that one-fourth of the number have already died from starvation, and that as many more are likely to die. Every effort is now being made to feed the most valuable cattle, and attempts are being made to use prickly-pear as fodder. Many ryots have sent their cattle to the Kistna district, Viligondas and Nanamalla hills, but the absence of water in these hills is a drawback. Locally, efforts are being made to keep the cattle alive by giving palmyra and date leaves and green leaves of trees, specially in the western taluks.

15. Except in the beds of rivers, where water can be obtained by sinking shallow wells, and in villages on the seaboard, drinking water is procurable only with difficulty every where, and more especially in the western taluks, Kanigiri, Udaigiri, Rapur, Darsi, Todeli and Venkutgiri. If no rain falls for the next two or three months, the distress for water is expected to be very great. On both sides of the road between Goodoor and Nellore many large pools of water were to be seen. Efforts are now being made to improve and add to all sources of supply from funds placed at the disposal of the Collector by the Board of Revenue, and the digging of ponds and wells is to be undertaken from the jungle conservancy funds wherever emergent. Special consideration is also given to the wants of Malas, &c., who are generally prohibited from drawing water from the ordinary supply wells. The Board's orders regarding the advances to be made for wells have also been published, and many advances have already been granted by the tahsildars.

16. The Rajah of Venkutgiri has promised to spend two lakhs on relief works. Up to this date he is said to have spent Rs. 13,000 nearly. The Rajah of Kolustri has done nothing for the Pamur range, which is south of Kanigiri, in a poor and distressed part.

17. Under the above circumstances it is feared that the average revenue will fall short in the Government taluks, and that even the realisation of arrears must be postponed to relieve the present distress of the poorer ryots. It is proposed to give liberal remissions under the head of "wet" lands, and some partial remissions in "dry," wherever the case is thought really emergent. Though the abkari contractors have suffered to a certain extent by low rates, the maximum guaranteed to Government is now being levied from them without the least difficulty. There is, it is said, a slight fall in their profits only, and that the Government demand should not therefore be foregone. In consequence of the loss of fodder and pasture, combined with the wants of the Jail and East Coast Canal authorities for palmyra leaves, trees, &c., the number of the palmyra and date trees is stated to have been much diminished, and it is proposed to reduce the demand on the toddy revenue. This will be considered in due course after obtaining the divisional officers' reports.

18. In the Collector's opinion the number of local applicants for relief work may reach 100,000 at the worst time. It is at present probably 70,000, *viz.*, 55,000 on local relief works + 15,000 relief labourers out of the 30,000 on canal. The Collector calculates the remissions on last year's figures thus:—

	Acres.	Assessment.	Probable remission or suspension.
		Rs.	Rs.
Dry	766,960	8,97,790	5,98,500
Wet	193,255	10,24,514	8,19,600

19. Sir Richard Temple has separately recorded his views on the East Coast Canal and the "Sungum" irrigation project.

No. 105, dated Coimbatore, 6th March 1877.

From—The Private Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honour to submit, for the information of the Government of India, copy of a minute recorded by him, reviewing his former estimate of famine expenditure in the Madras and Bombay Presidencies, together with a memorandum showing how the figures therein given have been arrived at.

Minute by SIR RICHARD TEMPLE, *dated Coimbatore, 6th March 1877.*

I HAVE been invited by the Government of India to submit a revised estimate of the cost to Government of the famine in the Presidencies of Madras and Bombay, so far as known facts and the inferences therefrom deducible may enable me to do so, with an intimation that any figures of mine must be submitted immediately, if they are to be of any use; inasmuch as the financial statement by the Government of India may be coming forward by a very early date. I, therefore, on receipt of this instruction, despatched immediately a telegram on the 3rd March, to the effect that, owing to the actual accounts of the month of February and the beginning of March being so much more favourable than had been anticipated, to the expectation of the spring harvest and other favourable circumstances, the estimates given by me on the 5th and 13th February must be reduced for the total of the Madras and Bombay Presidencies as follows:—

Estimates of 5th and 13th February.		£	Estimate of 3rd March.		£
Expenditure	...	4,180,000	Expenditure	...	3,336,000
Loss of revenue	...	2,115,000	Loss of revenue	...	2,115,000
Total	...	6,295,000	Total	...	5,451,000
Difference, less on the 3rd March	...	...	...	£	844,000

To this total must be added £ 180,000, under the heading of Military, as shewn by the telegram from the Government of India, making up the grand total to £ 5,631,000. From this, however, must be deducted £ 350,000 on account of extra traffic earnings on guaranteed railways as shown by telegram from the Government of India, making the net grand total £ 5,281,000. But from this sum, it is still my opinion that it is proper to deduct the amount of probable recoveries of land revenue in future years, *viz.*, £ 1,295,000, which would make the net cost of the famine £ 3,986,000; and this I submit as my revised estimate.

2. It was also stated by telegram that, whereas the estimate of the 5th February showed the maximum number of persons expected to come on relief as 1,840,000, the present estimate showed a maximum of only 1,196,000 persons.

3. To-day a memorandum is being despatched showing in detail the data on which the above statements by telegraph were founded.

4. In the estimate of the 5th February, it was stated that the main factor was the number of persons expected to come to the relief works. The maximum in April, 1,840,000 persons, was obtained from figures given me, district by district, by the Collector mostly after full conversations on the subject, which took place on various dates immediately following the 14th January. In these conversations, much allowance was made for the reduction of the then existing numbers and the restriction of fresh admissions to the works in accordance with the principle which I knew the Government of India to have in mind and intention, and which I explained to the local officers. These principles, when thus explained to these officers, verbally, certainly seemed to commend themselves very much to the judgment of every Collector I met. And all the Collectors, almost without exception, seemed anxious to give effect thereto. I carefully avoided giving them authoritative advice or instructions, for which they were to look to the Madras Government alone. I confined myself to conferring with them and explaining to them for their own consideration principles and policy and the results of experience. I believe that in most cases they themselves, from their own observation, were prepared for these views, more or less, and proceeded to give effect thereto under the responsibility vested in them by their own Government. At the same time, I submitted the same views officially to the Government of Madras on the 19th January, together with practical recommendations for system and economy.

5. On the 25th January, the instructions of the Government of India (bearing date the 16th January) were received in the Madras Presidency, in which the above-mentioned principles were authoritatively laid down. The publication of these instructions doubtless stimulated all the local officers to further efforts in the direction of economy.

6. About the same time it appeared that the Madras Government had themselves formed the conclusion that the first outbreak of famine having been successfully met some systematic restrictions must be introduced. On the 28th January, they intimated to me their intention of adopting the substance of the recommendations which had been made to them by me officially. On the 31st January, their orders were officially issued to the district officers. And again the efforts of these officers were stimulated in the direction of a just and reasonable economy.

7. I have since travelled about from place to place in the distressed districts, seeing how far the orders of the Government of Madras were or were not being carried out, avoiding, as before, the giving of any instructions or even of advice, but showing the local officers how they could best give effect to the orders of their own Government.

8. It seems necessary to state the course of the procedure in order to show the reasons why I venture upon an estimate lower than that given a month ago.

9. The effect of all this upon the numbers upon the relief works may be thus seen. On the 9th January, the total number stood at 1,061,000. The number had been increasing weekly ever since the beginning of December. The beginning of January was thought by every one to be only the beginning of the trouble. No limit of relief had been in the first

instance indicated, and no principle of restriction had been prescribed, except the labour test, upon which reliance was placed. The people were availing themselves of the privilege to such an extent that ere long half, or more than half, the population of the Ceded District, and Kurnool seemed likely to come on relief. That alone would give two millions of persons, and the districts below the Ghauts seemed likely to yield another million. The necessity of making some fresh rules was forcing itself on the attention of the authorities. In the first instance, that is, in November and December, it was deemed best to let all have work who might ask for it, and to watch the result. But by January, the result showed that a rule must be promulgated to the effect that employment should not be given to those who seemed able to support themselves.

10. After making much allowance for the introduction of economy the sum of the calculations by the various Collectors showed a gradual increase, week by week, till the maximum of 1,840,000 was reached. Without such allowance for economy the total would undoubtedly (according to the practice which was obtaining in the beginning of January) have reached two millions before April, and would have exceeded it after that date.

11. But, instead of increasing, the January number of 1,061,000 has been falling week by week, until the latest returns of February show only 713,000. The Madras Government and its officers may be congratulated on this result, considering the good condition of the people generally, the absence of mortality (subsequent to the mortality which occurred in some places at the outset before the introduction of the new rules) and the effective manner in which the distress has been met. In the face of this, however, it is impossible to maintain the estimates, which I had been before obliged to present for March, namely, 1,480,600 ; especially as there is a spring harvest ripening in several of the distressed districts, to an extent greater than the original anticipation. By parity of reasoning, it has become necessary to reduce the estimate for April and the subsequent months in the manner described in the memorandum, which will speak for itself. As time did not admit of a further reference to each Collector, it was thought best to make the alteration rateably all round. But although there is no present reason to apprehend that any district will show actually more than what is shown in this revised estimate, there is reason to expect that some districts will show even less, such as Cuddapah, North Arcot, Coimbatore, and Tinnevelly. On the whole, however, I have deemed it better to submit the revised estimates in its present form, believing that it has within itself a margin to cover unforeseen contingencies.

12. The same remarks apply, *mutatis mutandis*, to the heading of charitable or gratuitous relief.

13. While system and economy have been considered, every precaution has been taken to prevent those considerations causing relief to be withheld from those who really need it.

14. From the very day of entering the Madras Presidency, I have been constant and urgent in pressing on all concerned the duty of saving human life from starvation ; of preserving people from such emaciation as might be dangerous to health ; of not only admitting all deserving and needy persons who might apply for relief, but also of searching for and relieving all those who, being in such need, might from any cause fail to apply for relief, and further of making this search in the most comprehensive manner, village to village, and house to house. This is the practice of humanity in relief operations in the highest and strictest sense of the term. This is the discriminating charity which, while rejecting those who are not in real need, succours those who are in such need, and takes care that none of them shall escape observation or fail to receive assistance. This most important subject was officially brought forward on the 16th January (two days after my arrival), again on the 19th January, on the 4th February, on the 5th February, on the 8th February, on the 9th February, on the 11th February, on the 14th February, on the 26th February, on the 5th March, on the 6th March. This subject has formed the topic of more official representation on my part than any other subject whatever. And several of these representations are couched in the most forcible terms which I am able to employ. In every place which I have visited, and to every relief officer, European or Native, whom I have met, the matter has been explained by me in practical detail, and all those concerned have been shown exactly how they can most effectually compass this paramount object. In short, everything that can be thought of has been and is being done in this respect.

15. I can bear witness that this matter has always been thoroughly understood by the Madras Government and its officers, whose humane intentions can hardly be surpassed.

16. As regards the Madras Presidency, I must here reiterate what has been stated on previous occasions, that the revised estimate assumes that the usual spring showers of April be vouchsafed in Southern India, and that the checks and restrictions ordered by the Madras Government on the 31st January be steadily and faithfully maintained. If there be failure in any of these respects then the estimate may become exceeded, more or less seriously.

17. As regards the Bombay Presidency : I represented officially the expediency of economy in several respects on the 12th January and on various subsequent dates. The reduced estimate recently framed by the Government of Bombay has been embodied in my general estimates.

18. In respect to the searching out and relieving of all cases of serious distress, I addressed the Government of Bombay officially on the 12th January, and have repeated these representations on several subsequent dates. The Government have, I believe, been from the beginning fully alive to this consideration.

19. In the revised estimates I have adhered to the recommendation submitted with my minute No. XXX of the 13th February, regarding the suspension, and not the remission, of

only the land-revenue from the dry or unirrigated lands in Southern India, because I find that so many of the most experienced Collectors in both the Madras and Bombay Presidencies are in favour of this plan. Here again the revised estimate assumes that the coming rains will be propitious and the harvests of the next season will be abundant. If there shall be failure in these respects then the estimate will be greatly disturbed.

RICHARD TEMPLE.

Memorandum of the revised estimate of the probable cost of the famine in the Bombay and Madras Presidencies with respect both to relief expenditure and loss of revenue.

It has now become possible to prepare from the figures available for the month of February, a revised estimate showing both the anticipated loss of revenue and the expenditure on relief in the Bombay and Madras Presidencies.

2. *Relief Works.*—In paragraph 5 of Mr. Bernard's memorandum attached to Sir Richard Temple's minute No. XXVIII of the 5th February, the estimated numbers on relief works for the six months from February to July inclusive were thus given:

Total number of labourers in	February		...	...	1,228,000
Do.	do.	March	...	...	1,480,000
Do.	do.	April	...	...	1,840,000
Do.	do.	May	...	...	1,530,000
Do.	do.	June	...	...	795,000
Do.	do.	July	...	...	310,000
					7,183,000

Now the actual numbers on relief works in Madras were, according to the returns I have seen—

On the 10th	February	...	...	...	868,423
On the 17th	do.	...	...	...	759,275
On the 27th	do.	...	...	...	713,821

which give an average of 780,500, and to make allowance for the higher number at the beginning of the month, the average for the whole of February may be taken at 800,000. The Board of Revenue, in their report for the week ending the 17th ultimo, stated that the scale of wages ordered in Government order of 31st January 1877, No. 329, had not yet begun to take effect, and that the time for the introduction of the new scale must be counted from the receipt by Collectors of Government order of 12th February 1877. It will be safer for the purposes of this estimate not to assume that the orders of economy had taken effect to any great extent during the month of February. If this be granted, the 800,000 labourers of February must be considered to have cost an average of Rs. 3 for that month (see paragraph 6 of Mr. Bernard's memorandum, to which allusion was made above). The difference between the estimated number for February, *viz.*, 1,228,000 and the actual number, *viz.*, 800,000, is 428,000, *i. e.*, about 35 per cent. on the estimated number, 1,228,000.

3. It is not expected that the number on the relief works will rise in March above the average number given for February, 800,000; it is evident that even to attain that number a rise of over 80,000 must take place: but the settled tendency of late has been downwards. Instead, therefore, of the estimated number for March, *viz.*, 1,480,000, it will be fair to take the number 800,000 as not likely to be exceeded.

4. For the remaining months, April to July inclusive, it will be safest to calculate upon the same percentage of reduction in the estimated numbers that has actually taken place in February in the number for that month, *viz.*, 35 per cent. on the estimated numbers. While, on the one hand, due allowance has been made in the previous estimates for the more trying circumstances of the months, April-July; on the other hand, the scrutinizing of the gangs will be more strictly carried out, as experience is gained, as tests are enforced and supervision improved: add to this that the district of Tinnevelly, which was thought likely to have 100,000 labourers in April and 50,000 in March, had on the 27th February only 1,295 persons on relief works; moreover, the improved prospects of the ragi crop in parts of the districts of Cuddapah and North Arcot have to be considered; and on the whole it may be permissible to take the same percentage of reduction of numbers of labourers for the months April-July that has actually taken place in February, *viz.*, 35 per cent. on the estimated number of labourers for the month. The result of this calculation will be found from the appended statement to give a total of 3,708,750 labourers from March-July inclusive: and as it may be assumed that the Government orders for the reduction of wages will have generally come into force from the beginning of March, this number of 3,708,750 labourers may be estimated to cost Rs. 8,653,750 (at the average rate of Rs. 2⅓ a person for each month, according to paragraph 5 of Mr. Bernard's memorandum).

5. The cost of the labourers' wages for February being 800 000 × Rs. 3=24,00,000, and for March to July Rs. 86,53,750, the total cost of the relief work wages in Madras for the six months from February to July amounts to Rs. 1,10,53,750, say Rs. 1,10,53,000. These figures compared with the same item in the previous estimate, *viz.*, Rs. 1,79,00,000 show a reduction of Rs. 68,47,000, *i. e.*, £684,000.

6. In the Bombay Presidency, according to the Bombay Government's letter No. 109A-460, dated 24th February, to the Government of India, the revised estimate of expenditure upon relief works, charity, &c., amounts to 116 lakhs; which sum, being compared with the former estimate of 126 lakhs, shows a saving of 10 lakhs in the Bombay expenditure.

7. *Gratuitous relief.*—The number of recipients of gratuitous relief amounted at the beginning of February to about 60,000 persons—see paragraph 9 of Mr. Bernard's memorandum. Whereas in that same paragraph 100,000 has been taken as the number of persons to receive such relief in February, the real number was on the 27th ultimo slightly over 40,000. If 50,000 then may be considered as the mean number of recipients of gratuitous relief in February, when 100,000 was the number estimated, a large margin for the increase in the recipients of charitable relief (which must occur as the supervision on relief works is more strictly enforced) will be left, if instead of a half, two-thirds (*i. e.*, Rs. 12,00,000) of the former estimate of the cost of gratuitous relief (*i. e.*, Rs. 18,00,000) are reckoned as the probable cost under the same heading. Thus the reduction in Madras will be six lakhs under this heading; and the aggregate of the probable saving under both headings is £744,000. In Bombay the aggregate reduction under both headings of relief works and gratuitous relief has been given at 10 lakhs.

8. The figures will then stand thus:—

	£
The total relief expenditure for the Bombay Presidency was, according to the former estimate	1,260,000
Deduct	100,000
Revised estimate	1,160,000
The total relief expenditure for the Madras Presidency was according to the former estimate...	2,920,000
Deduct	744,000
Revised estimate	2,176,000
The total relief expenditure in both presidencies according to the revised estimate will be—	
In Bombay	1,160,000
In Madras	2,176,000
TOTAL ...	3,336,000

9. From the telegram received, it appears that the Government of India have taken the probable loss of revenue as £2,000,000, and have also debited to famine a charge of 18 lakhs (£180,000) in the Military Department, an item which had not been previously included in Sir Richard Temple's calculations. These two items, added to the £3,336,000 previously ascertained, give a total of £5,516,000. On the other hand, the Government of India take credit for railway revenue amounting to £350,000; thus the net result would be reduced to a cost of £5,166,000.

10. Sir Richard Temple's former estimate of the probable loss of revenue, which would occur if the local Governments shall promise remissions of the land revenue, amounted to £2,115,000, thus exceeding the estimate of the loss of revenue framed by the Government of India by £115,000: that is the cost of the famine would be £5,166,000+£115,000, *i. e.*, £5,281,000.

11. Sir Richard Temple's views on the important point of land revenue remissions were fully stated in the Minute No. XXX of the 13th February and Mr. Bernard's memorandum which accompanied it. If those views meet with acceptance, it is not too much to hope that the sum of £1,295,000 (see paragraph 15 of Mr. Bernard's memorandum) will represent the probable recoveries of land revenue in future years: and if this sum be deducted from the cost of the famine above given, *viz.*, £5,281,000, the net cost will be £3,986,000.

12. This estimate, like the others, which have been framed and submitted by Sir Richard Temple, postulates that the checks which have been recently ordained for the reduction of expenditure will be maintained in full force, and that the usual showers in April and May will fall. It has not been overlooked that in such a district as Tinnevelly, where severe distress was expected, it is a matter for consideration with the Board of Revenue whether the relief works should not be closed immediately, nor has the fact been disregarded that in some districts early spring crops are approaching maturity, which will before long afford work to the agriculturists, and a supply of food for a month or two to the population.

13. With respect to the distribution of the revised estimate of famine expenditure in Madras, *viz.*, £2,176,000 between the years 1876-77 and 1877-78, the following statement

may be offered in the order adopted in paragraph 11 of Mr. Bernard's memorandum appended to Sir Richard Temple's Minute No. XXVIII of the 5th February, thus:—

For the year ending March 31st 1877.

	Rs.
Relief works and other expenditure according to the Accountant General's statement up to end of December	37,25,000
Estimated expenditure on relief work wages during January	31,17,000
Estimated expenditure on relief work wages during February	24,00,000
Estimated expenditure on relief work wages during March	18,67,000
Estimated cost of additional establishments and miscellaneous charges to 31st March 1877	6,00,000
Estimated cost of gratuitous relief to 31st March 1877	4,00,000
Cost of grain purchased by Government	30,24,000
	1,51,33,000
Deduct cost of Government grain to be expended up to 31st March ...	7,22,000
	1,44,11,000
Say ...	£1,441,000

For the year 1877-78.

	Rs.
Estimated expenditure on relief work wages, April to July 1877	67,86,000
Estimated cost of additional establishments and miscellaneous charges, April to July 1877	12,00,000
Estimated cost of gratuitous relief, April to July 1877...	8,00,000
	87,86,000
Deduct cost of Government grain to be expended, April to July 1877 ...	14,44,000
	73,42,000
Say ...	£735,000

£
1,441,000
735,000
Total estimated expenditure ... £2,176,000

14. Some of the above figures require explanatory notice. The cost of the wages of relief labourers for February has been shown to be Rs. 24,00,000. For March the number of labourers given in the revised estimate is 800,000, who, at the average rate of Rs. 2½ a month for each person, will cost Rs. 18,67,000:

	Rs.
i. e., for February...	24,00,000
for March	18,67,000
	42,67,000

The revised estimate of expenditure on relief works from February to July was given as Rs. 1,10,53,000: from this, deducting Rs. 42,67,000, the result is obtained of Rs. 67,86,000 as the revised estimate of cost of relief works from April to July.

15. For additional establishments and miscellaneous charges in the original estimate the sum of Rs. 18,00,000 was taken, as 10 per cent. on the original estimate of relief wages for the six months February to July (see paragraph 8 of Mr. Bernard's memorandum). These additional establishments and charges will not be materially affected by the variations in the numbers of relief labourers. Therefore one-third of the Rs. 18,00,000 may be estimated as the cost for the two months February and March; and two-thirds of the Rs. 18,00,000 as the cost for the four months April to July.

16. With regard to the gratuitous relief, in the revised estimate the sum of Rs. 12,00,000 has been taken as the cost. As in the preceding paragraph, this may be debited, one-third to February and March and two-thirds to the four months April to July.

17. Similarly, in deducting as a set-off three-quarters of the cost of Government grain (as that grain will be used to pay labourers or relief paupers), it appears correct to credit one-third and two-thirds of the Rs. 21,66,000 to the years 1876-77 and 1877-78 respectively.

18. In the Bombay Government's letter, referred to in paragraph 6 above, the revised estimate of expenditure of 116 lakhs is distributed thus, *viz.*, 47 lakhs to 31st March and 69 lakhs subsequent to 31st March.

C. E. BUCKLAND,
Private Secretary to Sir Richard Temple.

Statement referred to in paragraph 4 of the memorandum dated 6th March 1877.

	Estimated number of people on the works during the month of						Total.
	February.	March.	April.	May.	June.	July.	
According to minute of 5th February ...	1,228,000	1,480,000	1,840,000	1,530,000	795,000	310,000	7,183,000
Revised estimate ...	800,000	800,000	1,196,000	994,500	516,750	201,500	4,508,750
Difference ...	428,000	680,000	644,000	535,500	278,250	108,500	2,674,250

C. E. BUCKLAND,
Private Secretary to Sir Richard Temple.

COIMBATORE,
6th March 1877.

No. 107, dated Coimbatore, 7th March 1877.

From—The Private Secretary to Sir Richard Temple,
To—The Secretary to the Government of India.

BY direction of Sir Richard Temple, I have the honour to submit, for the information of the Government of India, copy of a Minute recorded by him, reviewing the objections raised by Dr. Cornish, Sanitary Commissioner, Madras, to the reduced scale of wages.

Minute by SIR RICHARD TEMPLE, *reviewing the objections of the Sanitary Commissioner, Madras, to the reduced scale of wages, dated Coimbatore, 7th March* 1877.

I HAVE examined and considered, with the attention due to the opinions of an officer so highly qualified and accomplished, the letter from Surgeon-Major Cornish, Sanitary Commissioner of Madras (addressed to the Chief Secretary to the Madras Government), in which he records various professional objections to the reduced scale of ration directed to be adopted by that Government in its Resolution of 31st January last. The particular point to which he objects is the allowance of one pound avoirdupois per diem to an adult labourer (not performing severe task-work), plus ½ anna in cash. Inasmuch as his views, if these were to be adopted without adequate deliberation, might involve a large and unnecessary expenditure of public money, I would submit, for the consideration of the Governments of India and Madras, a few remarks on these objections.

2. Into the purely professional part of his arguments I cannot enter, further than to note that, while no doubt abstract scientific theories of great value on the subject of public health are of modern growth, the Indian population with which we are now dealing have lived for centuries in disregard of them, and practically at the present date the poorer classes, even in countries much more civilised than India, do not actually obtain either in food, lodging or ventilation the amount declared by scientific men to be necessary. I would further note particularly that most of Dr. Cornish's observations refer to Europeans, living in a cold climate, where waste is greater, and largely exceeding the natives of India in average weight, requiring therefore more food. The Edinburgh enquiries which he cites, however applicable to European cases, and however valuable in the abstract, are not strictly and exactly applicable to the poorer classes of the Madras Presidency.

3. The practical question however is this. Can, and does, the new scale of wages suffice to keep the people, with whom we are now dealing, in fair health under present conditions and circumstances? More than this Government has declared itself unable to undertake.

4. Dr. Cornish seems to object, on the ground that a diet sufficient to sustain a man's life when at rest may be "*wholly inadequate* to his needs when employed on tasks necessitating severe physical exertions," and again that "a man engaged on task labour and paid at the rate of 1 lb. of grain and half an anna in cash" cannot "procure a sufficiency to eke out the defects of his grain ration." I do not know whether Dr. Cornish would admit that 1 lb. of grain is sufficient to maintain a Native of India; in a state of rest, perhaps he would. The evidence of relief camps in the Madras Presidency, however, shows that a Native at rest can gain flesh on a pound a day.

NOTE.—I was informed at Vellore that indigent adults admitted to the relief camps in consequence of their inability to work have improved considerably on a ration of a pound a day. Dr. Fox, Civil Surgeon, and Captain Harris, the Relief Officer, were agreed on this point.

5. But in paragraph 5 he says that, the "combined testimony" of numerous observers showed that "the maximum grain allowance of a man *in health and in work* was not less than 24 ozs." or 1½ lbs.

6. He apparently assumes that by the new scale, a man cannot obtain 1½ lbs. But in the first place it is to be observed that at present prices throughout the greater part of the distressed district, a man can, with the half anna which he receives in cash, buy an extra half pound of grain a day and still have a small margin over for condiments, that is, he earns sufficient to allow him the minimum quantity requisite to keep him in health while at work. More than this, I submit, it is not in the power of Government to do.

7. Let it be assumed, however, that a man receives the one lb. plus the half anna, which will give him something over in grain, together with something for condiments. Then there is one defect in Dr. Cornish's line of argument which appears to me to invalidate his conclusions. I consider that the particular misapprehension to which I am about to advert, renders his remarks inapplicable to the state of things as at present existing in the distressed districts. His argument is, that the present rate of wages (equal to 1 lb. in grain with ½ anna in cash), "will not permit of severe labour or task work,"—is insufficient for men "employed on tasks necessitating severe physical exertion;" thereby implying that the bulk of the relief labourers in the Madras Presidency are employed on such tasks. This, however, is so far from being the case that the general condition of the people on the works approaches much more nearly to one of rest than to one of severe physical exertion. There are probably very few out of the thousands employed by Government, who do nearly as much work as they do in ordinary seasons for their own support. In short, the reduced scale (one pound and half-anna) is not applied to persons undergoing severe physical exertions, but to persons who are on light work or are comparatively at rest. In many places task work has not yet been introduced; in many others it is only nominally enforced; and where it is in actual operation, the amount of labour exacted is extremely light.

8. It must be remembered that in the Madras Government Orders of 31st January, two rates of working pay are laid down, and that all persons who do work amounting to 75 per cent. of the Public Works rates receive one pound of grain and one anna in cash; while those who receive a pound of grain plus half an anna (who alone are referred to by Dr. Cornish) are only required to render task-work at half the Public Works rates. Now the Public Works labourers are paid by piece-work and no definite task is asked for; they do as much or as little as they like and are paid accordingly.

9. The result is that those who really undergo the severe physical exertions described by Dr. Cornish do actually receive wages equal to 1½, perhaps even 2 lbs. a day, which is tantamount to what he recommends. It is only for those who do not undergo such exertion that the lower scale recommended by me and ordered by the Government of Madras is intended. Practically, at this time, by Public Works rate is meant the amount of work done per rupee, and relief labourers on the first standard are expected to do three-quarters as much for a rupee as common labourers; that is, supposing the Public Works Department rate for earth-work to be 8 cubic yards per rupee, the relief labourers of the 1st class have to do 6 cubic yards for the same money; and two annas being taken as the minimum wage on which they can be maintained in health, ¾ of a cubic yard is the task assigned to enable men in this class to earn their two annas. It is considered (and this is in accordance with Dr. Cornish's views) that persons doing less work than this can live on less, so while the 2nd class labourer does only ½ a cubic yard of earth-work daily he receives in return 1½ anna. But, as observed, the Public Works rate is not a task but a scale, and ordinary labourers are not content to earn two annas daily by excavating 1 cubic yard, but, as a matter of fact, earn much more than this. I was informed by Mr. O'Shaughnessy, the District Engineer of Nellore, that some of the gangs at work on the East Coast Canal were earning 5 and even 6 annas a head daily, that is, were doing five or six times as much work as is demanded from the relief labourers on the lower scale.

10. The work of such relief labourers could, therefore, scarcely be described as "severe physical exertion" even if it were fairly rendered; and in many, if not in most, districts it is still little more than nominal. As more efficient supervision is introduced and task-work really exacted, all those willing to do the very moderate task asked for will gradually be admitted to the higher standard and receive full wages, while it is submitted that the lower rate is sufficient to maintain those employed on nominal tasks of extreme lightness.

11. The objection to the new scale, which Dr. Cornish states in detail, is popularly formulated by the phrase "a full day's wage (that is, something more than the 1 lb. and the ½ anna) for a fair day's work." But the phrase postulates that there is a fair day's work, which is just what the vast majority of the relief labourers do *not* render. Therefore, they are not entitled to, and do not physically need, the full day's wage. Where they render a really fair day's work, there they do receive under the new rules more than the reduced scale.

12. The rates were avowedly recommended by me as experimental, and if they shall be found insufficient, they may be increased; but it appears to me that they have not yet been found so, and that Dr. Cornish argues from a mistaken premise, which undermines his conclusions. If the poor people were found to be falling off in condition, then I would at once recommend an alteration in the rate. But at present we have no such experience.

13. As a matter of fact, I must repeat that payments are not made in grain, but in cash. A pound of grain has been estimated as costing one anna, and in no cases have the wages paid been less than an anna and a half, the anna being the supposed equivalent of a pound of

grain, and the half-anna being available to eke out the ration. An anna, however, represents in most parts of the worst districts more than one pound of grain. At Adoni, for instance, where nearly 50 per cent. of the population were recently on work, one anna will purchase about 1½ lbs. of cholum, which is the staple food of the people, leaving each labourer half an anna to buy pulse, condiments, &c.

14. It is impossible over such a large tract of country as is now affected with scarcity, where prices vary to some extent in almost every district, to lay down any rule which may not be open to local criticism and inapplicable to certain localities, but the scale laid down appears to me to be on the whole sufficient to yield the people that subsistence which alone Government can afford. We would gladly give more if it were in our power; but we must content ourselves with saving life and cannot pretend to prevent all forms of distress.

15. There is one point which I must concede to Dr. Cornish's argument. In laying down the minimum scale, it was of course intended that each labourer should be able to consume his own wages, and not have to share them with other persons of his family. These members of the family should either work for themselves or, if unable to do so, should be admitted to gratuitous relief. The case of young children who accompany their parents to the works, but are too young to work—that is, children from one year to seven years of age—has already attracted my attention, and I have recommended in a separate minute that subsistence allowance be granted to them.

16. Further, I would urge as the one motive common to the Governments of India and Madras, and to all connected with the famine relief works, is the preservation of life and the mitigation of extreme suffering at the smallest cost to the State, consistent with the attainment of the object in view, that the enquiry as to whether the reduced scale of wages is sufficient to enable the people to tide over the next few months without serious danger to themselves, should be decided not by pre-conceived physiological theories, but by patient practical examination of the people themselves, with a view to ascertain whether there is in fact any, or any serious change for the worse in their physical condition, under the new scale, as compared with their average condition in ordinary times. Having carefully inspected during my tour in this Presidency thousands of relief labourers, I give it as my opinion that, with very few exceptions, which are not as a rule traceable to insufficient relief wages, the general physical condition of the labourers is as good now as in ordinary years. If, as already stated, I find after a little more experience that the new scale of wages does seem insufficient to maintain the people in health, I will be the first to say so; but so far this has not seemed to me to be the case.

17. In conclusion, it is not possible, I submit, to determine *a priori* on scientific data what amount of food is necessary to sustain the particular classes who come to our relief. The real point to be considered is, whether in ordinary times they get more than one pound a day for a male adult. This is an economic question, which can be determined by calculating the rates of wages in the rural districts—not the wages of trained professional labourers employed by public bodies—not the wages of stalwart men of the professional class of workmen, but the men of lesser physique and lighter frame, such as that of the village poor—but the wages received by the labouring poor in the villages of the interior, and then by taking the prices of common grains in ordinary years. Now, from enquiries made in various districts of the Madras Presidency, I apprehend that the labouring poor in rural localities can hardly get more than one pound a day for a male adult in ordinary times. If this be so, then the reduced scale must be sufficient for these same people on the Government relief works and need not be increased.

No. 109, dated Coimbatore, 7th March 1877.

From—The Private Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honour to submit, for the information of the Government of India, copy of a minute recorded by him on the subject of granting a subsistence allowance to the children of relief labourers.

Minute by Sir Richard Temple, *on the subject of giving subsistence allowance to the younger children of relief labourers.*

Since the introduction of the new scale of wages, complaints appear to be made that relief labourers are sometimes accompanied to the works by children too young to work, *i. e.*, below seven years of age, who have to be supported out of the earnings of their parents; and suggestions have been offered that a subsistence allowance should be made on account of such children.

2. The new scale is avowedly a minimum allowance sufficient for one person, and it is evident that if a labourer has to divide his wages with other persons, they will not suffice either for himself or for them, and suffering must result. All persons who are able to do light work can earn subsistence on the works for themselves, all who are unable to work are entitled to gratuitous relief, so that it is only the young children who have to be considered. These can-

not be separated from their parents even if it were desirable to send them to the relief camps, which, in my opinion, it is not. They accompany their parents to the works and have to depend for food on some small share of the family earnings. When several members of a family (father, mother and elder children) are employed, it is probable that one or two small children could be sustained out of the joint wages; but in cases where there may be only one or two bread-winners, and perhaps three or four children, a supplementary allowance will be necessary.

3. I believe that in some way or other the local officers have the power to afford additional aid to persons burdened with young children, and that such children do in many places get something extra, but I think it is now time that relief officers should be formally vested with a discretionary power for the relief of all children between one and seven years of age. Up to a year the child is at the breast; at seven he is admitted to the works.

4. A child of six requires much more food than a child just weaned, and it might be expedient to have different rates for children of different ages, say one rate for babies from one to three years, and another for children from three to seven, but I think that any fixed rate would be so open to abuse that it would probably be better to leave the amount of aid to be granted to the discretion of the local officers, subject to a maximum limit not exceeding half the rates paid to working children.

5. I would also suggest that this aid should not be indiscriminately given to all children who may be brought to the works, as this would probably lead to large numbers of children being sent to the works by parents not on relief at all, and thus an abuse might spring up. It would be preferable that enquiry should be made into individual cases, and the aid extended to such cases only as seem to need it.

RICHARD TEMPLE.

No. 112, dated Salem, 8th March 1877.

From—The Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honour to submit, for the information of the Government of India, copy of a Minute recorded by him on his third visit to the North Arcot District.

Minute by Sir Richard Temple, *dated Vellore, 5th March 1877.*

In continuation of the Minutes and memoranda regarding my first and second visits to the district of North Arcot, I have to record the result of a further visit to that district. I was induced to pay this third visit because my information about the degree of distress in some parts of the district was conflicting, and because in other parts, especially zemindaris, there was reason to fear that distress might become serious.

2. On this occasion I visited the town of Tripathy, accompanied by the native officials of the place, where the arrangements made by Veeraswamee Chetty, a native gentleman, for charitable relief were inspected. Upwards of one thousand persons were being fed gratuitously, of whom about one-fourth were certainly able to work and were unworthy of this form of relief, one-fourth were perhaps able to work, and the remainder were either destitute and depressed, or else were poor and weakly. The native donor stated that this charitable work had been going on for many weeks, that the daily number often exceeded 1,200, and had been as high as 2,000, even sometimes 2,500.

3. I then proceeded to Chendragiri, 15 miles distant, to meet the Collector. All the way thither excellent spring crops were met with, watered by irrigation channels from the river Surnamukhi. At Chendragiri, ascending the hill, we saw that these ripening crops extended for miles, also along the other valley through which runs the road to Chittoor. At the town of Chendragiri I saw some gangs of relief labourers and some few persons being fed gratuitously—some also who when offered a reception at the relief camp at Arcot refused to go. Here were learnt the particulars of the distress undoubtedly prevailing in some thirty villages in that portion of the taluk in the neighbourhood Rungumpet and of the relief works provided there, which appeared to me to be sufficient. Otherwise in the rest of the Chendragiri taluk there is a fine crop on the ground, sufficing for the maintenance of the resident population.

4. Returning to Tripathy, we met the Agent of the Mahant of that well-known and wealthy shrine and the principal person of the place: he affirmed that all the destitute poor of that locality were being cared for. At Ranugunta, near the Tripathy railway station, there is a small relief work open under a European subordinate.

5. I then visited, in company with the Collector, the town of Trittany; saw some gangs of relief labourers and some recipients of charitable relief; heard the statement of the Police Inspector, who thought that there was severe and unrelieved distress in some of the neighbouring villages, and the counter-opinion of the native Sub-Magistrate, who thought that there could not be such distress, as the relief works which he had opened were not well attended. This latter view was to some extent borne out by the sight of excellent crops on the ground at intervals for many miles round. The Police Inspector did not appear to have regularly reported to the Sub-Magistrate the result of the observations made. It was understood, however, that in future this want of intercommunication would be rectified.

6. I then proceeded to Puthoor, the railway station for Narayana-venum (apparently the same place as that called Nurnaverum in the police reports). There was not any charitable relief being administered, but one thousand persons of the poorest classes were paraded by the Magistrate for my inspection, on the report of the Native Sub-Magistrate that these persons fairly represented those classes in the town. I picked out 24 persons who, from physical depression or emaciation, seemed fit subjects for inquiry; the Collector expressed his intention of dealing with these cases and of instituting a house-to-house inquiry to see whether any more similar cases could be found. The remainder—that is, the vast majority—were in fair condition, and did not at all complain of distress. Thereabouts also there was a considerable area under good crops. Though there was no relief work at the place, still the works open at or near Tripathy and Trittany would suffice to afford employment to those who might need it.

7. The towns of Narayana-venum and Trittany are the principal places in the Karwetnagar zemindary. The eastern portion in the direction of Madoo Pauk is reported to have suffered much from drought. Otherwise this zemindary has been favoured by the seasons which elsewhere proved so disastrous. Autumnal showers gave it a fair winter crop. Irrigation from wells and from water-courses will give it a good spring crop. So far, then, this tract has not suffered from drought, and therefore there ought not to be distress among the cultivating peasantry. Still high prices may have caused employment in the fields to be narrowed and restricted (ryots working themselves instead of employing labour), and will have reduced the scanty means of such tribes as Yenadas, Irulas, Korchas, and others who wander about that part of the country. I carefully read the report by Mr. Austin, Sub-Collector, made after his visit. He is an officer of much humane zeal. On enquiry he stated that he could not discover any proof of famine, though there might be some partial distress and some individual misery.

8. I examined the returns of crime presented by the Magistrate. It appeared that towards the end of 1876 crime had been extraordinarily rife, but had since subsided. There do not seem to be any bad symptoms at the present time in this respect.

9. In the local reports previously made to Government I failed to find notice of the fact that for some time past extensive private charity had been dispensed daily at the town of Tripathy.

10. I then visited Kalustri, the head-quarters of the zemindar, who met me there, together with the Sub-Magistrate. The zemindar reported having employed a considerable number of persons on relief works which were just being closed on completion. But the Sub-Magistrate stated that he had received authority from the Collector to open some relief works, which had been opened. Out of 1,200 persons being fed daily by the zemindar, I carefully inspected 600. Many belonged to the Yenade tribe and seemed physically depressed. The worst of them were about to be despatched to the relief camp at Ranipet, near Arcot, by the Collector's direction, in order that they might be better cared for. The zemindar complained much of the drought, which complaint was confirmed by the Sub-Magistrate. My impression is, that the drought has been exceptionally severe in this zemindary.

11. After a few days' interval (for my visit to Nellore) I returned to the North Arcot District, and proceeded to Ranipet, near Arcot, and inspected the relief camp there, which really was nearly all that could be desired, and was fairly well filled with persons deserving charitable relief. Some gangs of relief labourers were also inspected. Then, passing through the town of Arcot and seeing some relief gangs there, I drove to Arni, where a large number of poor are being fed by the jagirdar, most of whom are deserving, but some are not. A ten-anna crop (that is, a crop somewhat, but not much, below the average) is expected in the jagir. No relief works are open at present: if any are required, the jagirdar is prepared to open them. The spring harvest all round Arni is coming on. I had all the lower classes of the town of Arni, some 2,000 persons, paraded for inspection. They were found to be in good condition. I there met the Deputy Collector (a Muhamadan gentleman) and the Tahsildars of the Wandewash and the Poloor taluks. The crop in Wandewash appears by the best evidence to be little below the average, and no relief works are at present proposed there. The crop in Poloor is not quite so good, and relief works are ready to be opened there if need should be apparent.

12. I then proceeded to Vellore by the Kaneimbady pass. I found that the large numbers on the charitable outdoor relief which existed at the time of my previous visit had melted away on the opening of the relief camp. Without doubt there had been some abuses in connection with this charity. I inspected the relief camp there, which was found to be nearly all that could be desired, and fairly well filled with persons deserving this kind of relief. The arrangements in this camp, as in the Ranipet camp, are creditable to Captain Harris, the Superintendent.

13. At Vellore I met the Sub-Magistrate of the zemindary of Kongonda. He reported much distress in that quarter, which would be met by the relief works which were being opened, and was partly being relieved by the private charity of the zemindar.

14. I then left the district for Coimbatore.

15. During this my third visit the following things seemed to me to be required:

1st.—The converting of the ill-regulated private charities at Tripathy, at Kalastri, at Arni, at Punganur, at Kongonda, and other places into well-regulated relief camps. The private contributions should be studiously maintained, it being so great an object to encourage private charity, but the donors might well be induced to consent to let their contributions be managed by Government officers, so that undeserving applicants may be rejected and only the

deserving entertained. Otherwise experience shows that private charity in this country is so apt to mingle the undeserving with the deserving, wherefrom demoralisation ensues. The Collector is arranging to form a relief camp on this principle at a suitable place near Tripathy.

2ndly.—The rendering of the relief camps more attractive or rather less repulsive to the poorer classes than they now seem to be. It is indeed an object to render them unattractive comparatively, as an indirect check upon people unduly availing themselves of the charity. But they do not fill so rapidly as might be expected under existing circumstances, and there must be some sort of prejudice arising against them, despite all the carefulness with which they are managed. I incline to attribute this to defective arrangements in respect to the allocation of the people in their several castes. This subject is being considered by the local authorities.

3rdly.—The inspection by selected Government officials of every village throughout the several zemindaris existing in this district, namely—

Punganur,	Kalustri,
Arni,	
Karvetnagar,	Kongonda,

in order to see whether the house-to-house visitation by the village headmen to search out cases of distress is carried on with the same precision and certainty as in the regular ryotwari villages. I understand that the collector intends to have this done.

4thly.—A special house-to-house visitation in the several towns,—Vellore, Arcot, Tripathy and others,—not only to search for unrelieved distress among the lowest classes, but also to ascertain whether distressed persons of the better, though broken-down, classes who are too proud to come forward may not receive special relief. This, I believe, the Collector has ordered to be arranged by the severa municipalities.

5thly.—The arranging of some light textile work on which the distressed weavers (so numerous in this district) might be employed, the digging and delving on ordinary relief works being unsuited to them. This also the Collector has under consideration.

16. I have now at various times visited the following taluks in this district—

Chittoor,	Gudiathum,
Vellore,	Chendragiri,
Palmanair,	Wallaja,

Arcot,

and the following zemindaris :

Punganur,
Karvetnagar,
Kalustri,
Arni.

The only taluks unvisited are Wandewash and Poloor, and the only zemindary Kongonda; but of all these I have met the native officials.

17. I find that distress does not threaten the mass of the people; that the numbers on relief works will probably not much exceed the comparatively small number now employed, if only the usual showers of April shall last; that the numbers on charitable relief will probably increase considerably as the season advances; that in the old towns, scattered over the district, in the sacred haunts so much frequented by pilgrims and beggars from distant places, and in the jungle tracts fringing the edges of the district, there are classes among whom many cases of individual distress are to be expected; that on the whole the relief measures taken in hand are sufficient to meet that degree of distress which is to be anticipated; that the relief works are of a small description, the number of able-bodied relief labourers not being large enough to justify their congregation upon large works, but if such large works should be wanted, there are many tanks to be repaired; that in some particular places the delay which at one time occurred was owing to technical and other reasons beyond the control of the local authorities; that the arrangements for house-to-house visitation in every village (save the zemindaris, which are being separately arranged for) are very systematic and satisfactory. I have discussed with the Collector every measure of relief which I can think of. My impression is, that he is now doing everything which ought to be done in this respect.

18. The Collector, Mr. Whiteside, appears to me to be a very able and experienced officer—on the one hand very anxious to spare the Government money and to prevent the Government being imposed upon, on the other hand equally anxious to prevent any accident occurring to human life and to relieve every person who really needs relief—specially acquainted with the ways of the people in this district, and alive to all the devices by which some might try to unduly benefit by the State bounty, yet fully aware of all their merits and virtues, and entirely sympathising with all distress which may actually occur. He is zealously and humanely seconded by his Sub-Collector, Mr. Austin, and the Assistant, Mr. Cox.

RICHARD TEMPLE.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 15th MARCH 1877.

GENERAL REMARKS.—In Madras showers are reported from Malabar (above 1·5 inch), Kurnool, Kistna, Cuddapah, Bellary, Coimbatore and Tinnevelly; the numbers on relief works are 657,465; there is a decrease of 19,600 in Bellary, 3,000 in Kurnool, 2,700 in North Arcot, and 1,800 in Chingleput: an increase of 9,500 in Nellore, 4,600 in Salem, and 2,000 in Coimbatore; net decrease 9,805. No rain has fallen in Bombay, and there is no other change. From Mysore no rain is reported: about 69,000 people are employed on relief works and works under public works supervision. A little rain has fallen in six districts of the Central Provinces; the prospects of the harvest are generally good. In Berar the harvest has been reaped, and land is being prepared for the next crop. There have been thunderstorms with hail in Rajputana and Central India: prospects are very good. Showers and hail are reported from several districts of Bengal: no material damage has been done; the yield of the *rabi* crops is fair. Slight rain has fallen in Meerut, Agra and Rohilkhand in the North-Western Provinces; prospects are good. In Oudh also there have been showers. In the Punjab rain is reported from Delhi, Jullundur, Lahore and Ráwalpindi; prospects are favourable. Rain has fallen in Assam, but more is wanted in Sylhet.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—		
Kistna (Mar. 13th)	·35 at Sattanapalli; elsewhere none.	*Sajja* and *raggi* still being sown in places; standing crops under wells fair; where harvested other food-grain gives outturn about ¼. *raggi* ¾, horse-gram about ¼; prices slightly risen in five taluks; cholera seizures 874, deaths 269, in eight taluks; fever, small-pox, and cattle disease continue; no pasture; fodder and water getting scarce in some taluks; markets fairly supplied; seers of 80 rupees weight—rice 9·88, *cholum* 12·19, *raggi* 14·29, *cumboo* 11·58; imports by sea—rice 18¾ tons, *cholum* 2½; by land not reported; number on relief works 2,824; number fed gratuitously by Government 380, by people 920.
Kurnool („ 13th)	·70 in Kurnool on last Tuesday evening; none reported elsewhere.	White *cholum* and paddy crops in good condition under wells and channels; fever, cholera and small-pox prevalent; cholera seizures 138, deaths 117; cattle reported to be dying for want of fodder, some being fed on prickly-pear in Kurnool; second sort rice per rupee in imperial seers 7·35, *cholum* 9·17, *sajja* or *cumboo* 9·91; number on relief works 191,546 gratuitously fed, exclusive of 2,200 fed in Kurnool *lungerkhana*, 1,233, including children under 7 years; import of Government grain 1,174 tons in the district, private import 263 tons; Markapur taluk return not received; number on works there and gratuitously fed estimated; the decrease in the number of coolies is due to improved supervision; the slight fall in the prices is due to import of grain and harvest under canal.
Cuddapah („ 13th)	Showers in 4 taluks.	Average prices, seers per rupee, second sort rice 7·26, *cholum* 9·63, *raggi* 10·53, *cumboo* 9·21; people on relief works 58,282; gratuitously fed 1,287; cholera deaths 854; number of cattle died from want of fodder and disease 1,766.
Bellary („ 13th)	...	Average prices, second sort rice 7·13, *cholum* or great millet 8·3, Jubbulpore *cholum* at Bellary 10·3, *raggi* or lesser millet 8·37 seers of 80 tolas; imports 4,311 tons—accounts from three railway stations only; 214,718 persons on relief works, decrease as compared with revised return for previous week 19,614, this is owing to reduction of rates of wages, removal of coolies supposed to be fairly well-to-do, and prevalence of cholera; 17,287 gratuitously fed, increase as compared with revised return for previous week 823, this is chiefly owing to the admission of children of coolies on relief works in some taluks and to some more infirm persons in need of relief having been fed in other taluks; 4,390 gratuitously fed by private charity aided by Government grant; slight rainfall in Harpanhalli, Kudligi, Adoni, Gooty, and Pennakondah, none in others; cholera in 14 taluks, small-pox and fever also prevalent; cattle still perishing from want of fodder; supply of drinking water diminishing but not exhausted.
Nellore („ 13th)	*Nil*	Average prices in this week—second sort rice 7·96 seers per rupee, *cholum* 9·93, *raggi* 11·92, cumboo 9·79; imports on behalf of Government, rice 161 tons; on behalf of merchants, rice 227 tons, *raggi* 55 tons, *cholum* 7 tons; number on relief works, including canal coolies, 84,425; number fed gratuitously 6,904; 326 deaths from cholera; small-pox, cholera, dysentery, and fever are prevalent throughout the district; cholera and small-pox very severe in Gudur, Atmakur, Nellore, Kanigiri and Udayagiri taluks; most wells dried up almost everywhere in the district; much scarcity exists of water even for drinking purposes; prospects of cattle very bad, large numbers have perished.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—continued.		
Chingleput (Mar. 13th)	*Nil*	Prices in seers of 80 tolas—rice second sort 9·52, *raggi* 10·97, *cumboo* 12·32, *cholum* 10·78; imports of grain [illegible] tons; number on relief works 6,562, number gratuitously fed 5,451; public health, cholera, fever, and small pox prevalent more or less throughout the district; pasturage *nil*; water scarce.
North Arcot („ 13th)	*Nil*	For week ending 9th March average prices in Government seers—second sort rice per rupee 8·1, *cholum* 9·6, *raggi* 9·8, *cumboo* 8·7; relief work coolies 15,110; decrease owing to cholera and introduction of reduced rates; persons gratuitously fed 1,398; cholera still prevalent; fever and small-pox in some parts; pasture scarce; cattle dying of starvation in some parts.
South Arcot („ 13th)	...	Rice second sort 9 seers, *cumboo* 10¼, *raggi* 11⅜, *cholum* 12¼; rice imported *nil*; number employed 577; gratuitously fed 20; tahsildars and deputy tahsildars superintend; cholera deaths reported 203 out of 326 attacks; cattle disease in some villages; pasture and water deficient.
Salem („ 13th)	*Nil*	Prices of grains, seers of 80 tolas, rice 7, *raggi* 8⅛, *cumboo* 8¼, *cholum* 8½; import of all grains 1,006; number on relief works 46,700, number gratuitously fed 2,930; ditto private 620; health, cholera in all taluks; gratuitous relief number rising 14 per cent., due to large number fed in relief camps, and to the opening of an additional camp at Uttengiri.
Coimbatore („ 13th)	...	Prices in most taluks stationary, slightly fallen in Coimbatore, Palladum, Caroor and Dharapuram; average rice second sort 7·98, *cholum* 9·72, *raggi* 10·15, *cumboo* 10·57; imports estimated, rice 380 tons, other grains 256; no rain except a shower at Talavady in Sattiamangalum taluk on the 7th; cholera prevalent in all taluks, attacks 831, deaths 597; cattle poor; fodder and water scarce; no cultivation except to a small extent under wells; on relief works 24,418, more admissions in Oodoomalpet, Caroor and Dharapuram; gratuitously fed 1,093; no further deterioration among the people on works in Oodoomalpet taluk; Sattiamangalum tahsildar reports decrease of strength.
Tanjore („ 13th)	*Nil*	Prices, rice 8¾ seers, *raggi* 12, *cumboo* 10¼, *cholum* 11⅛; imports, rice 2,980 tons; relief works none; 216 deaths from cholera; cattle generally healthy.
Madura („ 13th)	*Nil*	Rice 8 seers per rupee; *cholum*, *raggi*, and *cumboo* almost stationary; import, rice 1,632 tons, other grains 151; number on relief works 8,986; charitable relief 526; cholera and small-pox throughout the district with a little mortality; total deaths 234; wells and tanks dry; people in many parts emigrate to other places; cattle poor for want of fodder and water; cattle disease in Madura, Dindigul, Melur and Tirumangalum.
Trichinopoly („ 13th)	*Nil*	Second sort rice 7 7/16 seers, *cholum* 16½, *raggi* 10¾, *cumboo* 10½; import of grain for week ending Saturday 98 tons; number on relief works on 9th instant 20; all coolies have since left; decrease owing to low wages and task-work; some now employed on Cauvery bridge work under the Public Works Department; gratuitously fed on 10th instant by public subscription 1,406; cholera, 190 seizures, 115 deaths; small-pox, 320 attacks, 41 deaths; cattle disease called *vekkai* among cattle in Udayapalayum taluk; cattle elsewhere healthy; pasture scanty.
Tinnevelly („ 13th)	...	Slight showers in Satur and Tenkasi; no freshes; no improvement in prospects; pasture and water-supply in 3 taluks scanty; food-grains, sufficient supply; prices stationary; cholera still bad; cattle disease called *redoopoo* continues with mortality in 2 taluks, average prices per rupee, second sort rice 7¾ seers of 80 tolas; *cholum* 9, *cumboo* 11, *raggi* 12; import of grain, rice 659, *cholum* 11, and *cumboo* 80 tons; number on relief works 2,509; number gratuitously fed 272; increase in number on relief works owing to return of emigrants to their villages.
Malabar („ 13th)	...	Showers in east and south above 1½ inch; markets well supplied; imports by sea and land, rice 2,741, *raggi* 118, *cholum* 608 tons; exports, rice 665, *raggi* 561, *cholum* 7 tons; prices of rice stationary in five taluks, slightly fallen in others, highest 7⅜ Indian seers in Wynaad, lowest 10⅜ in Calicut, average 9½ Indian seers per rupee; *raggi* 11¼ Indian seers per rupee in Wynaad, average elsewhere 13⅝ Indian seers; cholera and small-pox in 8 taluks, deaths from former 193; cattle healthy except in Walluvanad; pasture failing; 688 coolies on Kolathur road.
		General Remarks.—General prospects unchanged.
Bombay—(Mar. 15th) *Sind (Mar. 14th).*		
Kurrachee ...	...	River at Kotri 6 feet 10 inches on 5th against 5 feet 3 inches on same date last year; hail in Kotri taluka on 12th; 12 fresh cases of small-pox in Kurrachee, 3 deaths; cases of inoculation discovered; cattle disease increasing, 395 deaths at Sehwan, 25 at Ghorabári and 20 in Sákro; rice sowing commenced in Shâhbandar, Taguna taluka.
Hyderabad ...	...	Rust appearing in wheat; small-pox continues; cattle disease in a few talukas.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—continued.		
Sind—continued.		
Upper Sind Frontier ...	...	Rain threatening; no change as regards *rabi* crops; chicken-pox prevailing in Jacobabad; fever reported from Kutch Gundava.
Guzerat (*Mar. 14th*).		
Ahmedabad ...	...	Weather growing warm, no other change.
Kaira ...	...	No change.
Surat ...	...	
Broach ...	...	
Khandesh and Násik. (*Mar. 14th*).		
Khandesh ...	...	Small-pox prevailing.
Násik ...	...	No change.
Konkan (*Mar. 14th*).		
Tanna ...	...	Land being prepared for next monsoon crops; small-pox continues in Bassein, Bhiwandi and Wára talukas; fever in almost all talukas.
Deccan (*Mar. 14th*).		
Poona ...	...	Small-pox and cholera as last reported.
Ahmednagar ...	...	Cholera in 1 taluka, cases 16, deaths 7.
Sholapur ...	...	Slight cholera in the district.
Satara ...	...	Small-pox in Satara and Khatau talukas; 42 deaths from cholera.
Southern Mahratta Country (*Mar. 14th*).		
Belgaum ...	...	Deaths from cholera 233.
Dharwar ...	...	Deaths from cholera 533.
Kanara ...	...	Deaths from cholera 57.
Kaládgi ...	...	Cholera prevails, deaths 88.
Kattywar and Gaekwar's Territory (*Mar. 14th*).		
Rájkot ...	...	Weather hot; health good.
Wadhwán ...	...	Public health good; weather getting warm.
Baroda ...	...	No change.
		General Remarks.—Small-pox continues in Sind and the districts mentioned last week. Cholera prevalent in Southern Mahratta Country, a few cases in Upper Mahratta Country, and a few cases in one or two of the Deccan Collectorates.
Bengal—		
Chittagong ...	*Nil*	Weather moderately cold, cloudy on the 5th and 6th instant, with rains at intervals, accompanied by lightning and hailstones; the hail has slightly injured the cold-weather crops in some places; the rain will assist in sowing the *pania aous*; cholera is reduced to a few sporadic cases in villages scattered over the whole district.
Noakholly ...	·12	Weather—the high winds which began on Monday, the 5th instant, have continued to the end of the week; the slight rain on the 5th has had the effect of lowering the temperature; ploughing for the early rice has begun; cholera has much abated; some stray cases of small-pox have been reported from the Sudhárám station.
Chittagong Hill Tracts...	·8	Weather cool in the morning and hot at noon; the hill people are busily engaged in cutting their *jooms*; the prospects of tobacco are on the whole good.
Hill Tipperah ...	·39	Weather warm; a good deal of wind and a little rain on the 5th and 6th instant; state and prospects of the crops are satisfactory.
Backergunge ...	2·20	Weather seasonable; the crops are good, save in the wave-stricken tracts; there were gales on two days of the week; the health of the district has improved, but cholera in a sporadic form is still present in thanas Backergunge, Mendigunge, Gournadi, Golachipa, and Bowful; the cattle are reported to be in good health everywhere.
Furreedpore ...	·50	Weather cloudy, with occasional rain and wind; mornings foggy; ·34 of rain at Goalundo and 2·20 at Madareepore; the prospects of the crops are generally satisfactory; the spring crops in some places are reported to have been damaged by hail; health of the district is good.
Dacca ...	·23	There have been heavy fogs on three mornings, otherwise the weather has been seasonable; the crops continue to be very favourable.
Mymensingh ...	*Nil*	Weather—slight rain and storm in places on the 6th instant; the state and prospects of the crops are favourable.
Tipperah ...	1·32	Weather stormy, with more rain than usual at this time of the year; the spring rice is doing well.
24-Pergunnahs ...	Return not received.	Weather occasionally cloudy and warm; there are almost no crops on the ground except sugarcane and vegetables; public health is generally good.
Jessore ...	·26	Weather warm and steamy; the crops are generally good; the winter crops in the north are being gathered, and the rain has been favourable for ploughing.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		
Nuddea ...	*Nil*	Weather damp and hot; fogs in the morning; a little rain on the 4th instant; the *rabi* crops on the ground look well and are ripening; sugarcane is being extensively planted; preparations for the early rice sowings are forward.
Moorshedabad ...	*Nil*	Weather hot; the *rabi* crops are doing well, except in thana Mirzapore, where they have suffered from the rains; peas, lentils, and linseed are being reaped in most parts; *boro-dhan*, or spring-rice, is promising, and is still being sown in parts; the prospects generally are favourable; health is good.
Pubna ...	·2	Weather seasonable; state and prospects of the crops are satisfactory.
Rajshahye ...	*Nil*	Weather generally getting hotter, though mornings and evenings are tolerably cool; the prospects of the *rabi* crops are still favourable; the transplanting of spring-rice continues, also the sowing of *til*.
Bogra ...	*Nil*	Weather fair; the mornings from the 9th instant are misty; pulses are being gathered with good outturn.
Dinagepore ...	*Nil*	Weather growing warm; mornings cloudy; strong wind from the west; the *rabi* crops are promising; they are not yet fit for harvest.
Rungpore ...	·70	Weather getting warm; the state and prospects of the *rabi* crops continue to be good and satisfactory; ground is being prepared for the early rice.
Cooch Behar ...	*Nil*	Weather fair; it is becoming warm; the fields are still being prepared for the *bitri* rice and jute, and the sowings have commenced in some places; the tobacco crop continues favourable and will have to be very soon reaped; the general health is reported to be good.
Jalpáiguri ...	·24	Weather getting warmer every day; about twelve annas of sugarcane have been gathered; the tobacco harvest has commenced.
Darjeeling ...	·06	Weather milder; sunshine in the early part of the week; wheat and barley on the ground are progressing favourably; land is being prepared for the next sowings.
Midnapore ...	*Nil*	Weather fair and hot; state and prospects of the crops are good.
Howrah ...	*Nil*	The hot weather has set in; there are no crops on the ground at present.
Hooghly ...	*Nil*	Weather close and warm; generally foggy in the morning; there was a dust-storm on the evening of the 6th instant, followed by a few drops of rain; the ploughing of the rice land is still going on; the harvesting of peas, *musari*, gram, and *teora*, is almost over; vegetables are doing well; the public health is normal; cholera in a sporadic form prevails here and there.
Burdwan ...	1·01	There was a hail-storm on the evening of the 10th instant, but no perceptible rain; the prospects of the crops are good; the public health is fair, only a few cases of cholera reported; the sub-divisional officer of Culna reports that cattle disease is raging in his jurisdiction.
Bankoora ..	*Nil*	Weather dry and hot; the cold weather crops generally are being reaped with good outturns; the sugarcane is only an eight anna crop.
Beerbhoom ...	*Nil*	Weather hot and bright; state and prospects of the crops continue good.
Sonthal Pergunnahs ...	*Nil*	Weather getting warmer; hailstones fell in Doonka on the evening of the 10th instant; heavy clouds and rain in the hills; there is nothing particular to note about the crops this week.
Bhágalpur ...	*Nil*	Weather fine; the crops are good, also the health of the district.
Monghyr ...	*Nil*	Weather fair; the *rabi* harvest is now beginning, and the outturn is expected to be good.
Purneah ...	*Nil*	Weather seasonable; state and prospects of the crops are favourable.
Maldah ...	*Nil*	Weather fair and daily getting warmer; the first three days of the week were occasionally cloudy; the wind was variable; in the latter part of the week, it was from the south-east; its temperature varied from 63° to 81°; the crops are all good; cholera is almost disappearing.
Durbhunga ...	*Nil*	Weather, mornings are still pleasant, days are warm; state and prospects of the *rabi* crops are quite satisfactory.
Mozufferpore ...	*Nil*	Weather seasonably warm; the prospects of the *rabi* crops are everywhere good; a few cases of small-pox are reported in the jurisdiction of Sursund outpost; otherwise the public health is good.
Sarun ...	*Nil*	Weather clear and bright; still cool in the mornings and evenings, and getting warm in the day-time; the thermometer has risen very rapidly in the last 24 hours; the *rabi* crops are ripe, and are being harvested; the outturn is expected to be very good; opium is being gathered; the sowings of indigo have commenced; general health is good.
Chumparun ...	*Nil*	Weather, hot during the day, and cool at night; the prospects of the *rabi* crops are very good.
Patna ...	*Nil*	Weather growing warm; the *rabi* crops are being reaped in some places with a fair outturn; health is good.
Gya ...	*Nil*	Weather warm with light easterly winds; the maximum reading of the thermometer in the shade was 94·4°; state and prospects of the crops continue good; public health is generally good; small-pox is appearing in some villages in the Nowadah sub-division.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Shahabad ...	·29	Weather getting hot; there was a heavy storm on the night of the 13th instant; peas and *musoor* are still being harvested; the *rabi* crops generally promise well; small-pox is reported from thanas Ramgurh and Bhubooah.
Hazáríbágh ...	*Nil*	Weather seasonable; the wind is becoming hot during day time; state and prospects of the crops are satisfactory.
Lohardugga ...	*Nil*	Weather seasonable, but beginning to get very warm; the prospects of the crops are the same as reported last week; general health is good, except in Palamow, where cases of small-pox are still reported.
Manbhoom ...	*Nil*	Weather seasonable; the only crops now on the ground are gram and barley, which are looking well.
Singbhoom ...	*Nil*	Weather seasonable; pulses and wheat are being gathered, and the yield of both is satisfactory; no other crops on the ground; *mowah* and mango are most promising; the district is reported healthy.
Balasore ...	·05	Weather mostly fine; the ploughing continues; sporadic cholera is present, chiefly along the pilgrim route, and a few deaths from small-pox are reported; cattle disease has decreased.
Cuttack ...	*Nil*	Weather hot and dry; the winter crops are reaped; no other crops on the ground at present; cholera is rather prevalent owing to influx of pilgrims.
Pooree ...	*Nil* ·11 at Khoordah.	Weather fair; some of the *dalua* paddy is in ear; ploughing is still going on briskly on the low lands; the shipment of rice still continues, and the prices are stationary; cholera is reported from almost all parts of the district.
		General Remarks.—There was rain in many districts during the week; it was attended with storm and hailstones in some places, and the cold-weather crops are said to have suffered a little; these crops are being harvested, and the yield is a fair one; the spring rice is doing well, and the preparations for the autumn rice and jute are in progress; tobacco promises good results, and will soon be cut.
N. W. Provinces—		
Benares (Mar. 12th)	...	*Rabi* prospects continue favourable.

ACCOUNTS, &c.

The 22nd March 1877.

No. 1709.—The following Resolution is published for general information:—

Read again—

Resolution No. 3334, dated 14th December 1870.

Read—

The Financial Statement made by the Hon'ble Sir John Strachey to the Legislative Council of the Government of India on the 15th March 1877, and the Abstracts of the Accounts and Estimates therewith presented.

RESOLUTION.—Subject to the approval of the Secretary of State in Council, the Governor General in Council has resolved to re-incorporate in the Imperial Estimates and Accounts, in the manner described in this Statement by the Hon'ble Sir John Strachey, the transactions of the Local Governments, which have, since 1871-72, been represented by a single net entry in the Imperial Estimates and Accounts under the Head *Allotments for Provincial Services.*

2. Additional Revenues have been already surrendered to the provincial uses of the Governments of *Bengal*, the *North-Western Provinces* and *Oudh*, and additional Services transferred to their management and responsibility: it is the intention of the Governor General in Council, after consultation with the other Local Governments, to propose similar expansions of the measure of December 1870 in respect to the Revenues and Services of the other Provinces.

3. In consequence of the arrangements thus completed or contemplated, it is necessary to revise the conditions under which the Local Governments administer the Revenues and Services entrusted to their particular use and management.

4. In supersession, therefore, of all existing regulations upon the subject, the Governor General in Council is pleased to decide that, till further orders, the following shall be the

Rules and Conditions which apply to the administration by the Local Governments of all Revenues and Services surrendered to provincial uses and management.

I.—Without the previous sanction of the Government of India—

(1) No additional taxation may be imposed, and no change made in any existing system of Revenue management;

(2) No new general service or duty may be undertaken: whenever a Local Government proposes to undertake any such new service or duty, it must satisfy the Government of India that it can provide the funds for it, temporarily, if the service or duty is temporary, and permanently, if it is permanent;

(3) No appointment may be created with a pay of more than Rs. 250 a month; and no addition may be made to the pay and allowances of any officer if they exceed, or would, after the addition, exceed, Rs. 250 a month;

(4) No appointment of which the pay and allowances are more than Rs. 250 a month may be abolished; and the pay and allowances of no such appointment may be reduced;

(5) No class or grade of officers may be created or abolished; and the pay of no class or grade of officers may be raised or reduced;

(6) The rates of discount upon the retail of stamps and court-fee labels, and the local duty on spirit and drugs, must not be altered: the Governor General in Council reserves the right of forbidding any such alterations as are likely to injure the Revenues of neighbouring Provinces or prove otherwise inconvenient;

(7) No addition may be made to the pay or allowances of any individual officer, or class of officers, that may lead to increase in the emoluments of any public servants doing duty in the same Province, whose pay and allowances are not charged under one of the transferred Heads of Service. The Government of India reserves the right to forbid alterations in rates of pay or allowances, which, in its opinion, would produce inconvenience in other Provinces;

(8) No money may be removed from the Public Treasury for investment, or deposit elsewhere: the Government of India, which is responsible for the provision of ways and means for the public service in all Departments, must, always, retain, as at present, in its own hands, absolute and unconditional control over all money in the Public Treasury: a Local Government may not withdraw such money except for expenditure upon the public service;

(9) No alteration must be made in the form or procedure of the Public Accounts;

(10) No services previously rendered to other Departments at the charge of the Departments made over to the control of the Local Governments may be diminished, and no services previously rendered to these Departments at the charge of other Departments may be increased;

(11) No line of through communication may be abandoned, or allowed to fall out of repair.

II.—Returns are to be made quarterly, through the several Administrative Departments of the Government of India, to the Financial Department, showing every change made in the pay of any officer, every new office created, and every existing office abolished; also any unusual or extraordinary charge incurred, and any expenditure discontinued.

III.—All Standing Orders and Rules of the Supreme Government are to be observed, including, in particular, the Rules in the Codes of the Financial and Public Works Departments, Travelling Allowance Rules and the Rules and Circular Orders of the Comptroller General.

IV.—Returns, Accounts, and Estimates are to be submitted to the Supreme Government in such forms, and at such times, as may be prescribed.

V.—The Local Governments must keep the Governor General in Council, in the several Departments, fully informed of their executive and financial proceedings; the Governor General in Council will not relinquish his general powers of supervision and control in any Department: but His Excellency in Council will, as far as possible, avoid interference with the details of the administration of the transferred revenues and services, and any embarrassment of the provincial finances.

VI.—A Local Government must accept, without remonstrance, any charge which would, under the system in force before 1871-72, have been recorded, under any of the transferred Heads of Account, in the Accounts of its Presidency or Province; and must not raise objections on such grounds as that the charge has originated outside the Presidency or Province, or that the Presidency or Province is not interested in it, or the like: if any doubt arises at any time, whether any charge should or should not be entered under any particular Head in the Accounts of any Presidency or Province, such doubt must be solved by one test only, *viz.*: "How would it have been entered if it had occurred before 1871-72, when the powers and responsibilities of Local Governments were first enlarged?" Thus, for example, the pay or leave allowances of an officer belonging to another Administration on duty or on leave in the North-Western Provinces, and drawn there, must be charged in the Accounts of the North-Western Provinces: the Governor General in Council did not intend by the measure of 1870, and does not, now, intend, to introduce, or authorise, any change of practice in such matters, or any inter-provincial, inter-presidential or inter-departmental adjustments, not theretofore allowed: in regard to all such transactions, the arrangements made with the Local Governments were calculated upon the basis of the system which existed before the year 1871-72.

VII.—The grant made to a Local Government for all the services entrusted to its administration is a consolidated grant: no claim will lie against the Imperial Treasury on the ground that the cost of any service exceeds the amount at which it was estimated in the calculation of the consolidated grant.

VIII.—In the management of its finances, a Local Government must never absolutely exhaust its Balance in the Imperial Treasury: the Government of India will not accept any estimates, or allow any transactions, by a Local Government, which involve the expenditure of more money than is at its credit in the Imperial Treasury: it is the duty of every Accountant General to take care that this condition is never infringed, and promptly to report to the Governor General in Council any transgression of it which is not, upon his representation, immediately rectified by the Local Government addressed.

IX.—A Local Government may not lend money from the Balance at its credit in the Imperial Treasury: the Government of India will always pay every attention to any recommendation for the loan of public money in excess of the powers which are entrusted to a Local Government by law or rule; but all loans alike must be from the Imperial Balances; such operations must not be mixed up with the arrangements between the Imperial and the Local Government for the collection and appropriation of the Public Revenues or the administration of the Public Services.

X.—It is a general condition precedent to the delegation of all authority to disburse public money that it shall be *bonâ fide* for a public object; nothing must be carried out by means of the public funds for the advantage of any individual or body of private persons, unless, in accordance with some declared or established rule or principle, recognised by the Government of India: it is the duty of every Audit Officer, at all times, to challenge any infringement of this principle; and every Local Government must submit, for the orders of the Government of India, any representation made to it by any Audit Officer in accordance with this Rule which it does not promptly accept.

XI.—On or before the 31st January of each year, each Local Government must forward to the Government of India in the Financial and Public Works Departments and publish in the Local Government Gazette, in detail of Major Heads, with such explanations as may be necessary for the due understanding of its financial administration—

(1) An Account showing—

(*a*) The balance of the Local Government in the Imperial Treasury at the beginning of the last complete financial year;

(*b*) The revenues appropriated during that year to provincial uses, and the supplementary assignment from the Imperial Treasury;

(*c*) The expenditure under provincial responsibility during that year;

(*d*) The balance of the Local Government in the Imperial Treasury at the end of that year;

(2) Revised Estimates in the same detail for the current financial year;

(3) Estimates in the same detail for the coming financial year.

XII.—The Governor General in Council reserves power to modify, add to, or repeal these Rules and Conditions at any time.

No. 275.—ORDER OF BRITISH INDIA—

In continuation of G. G. O. No. 164 of 1877, His Excellency the Governor General in Council is pleased to admit the following Native Officers to the 1st and 2nd Classes, respectively, of the Order of British India, with effect from the 1st January 1877:—

MADRAS.

To the 1st Class, with the title of "Sirdar Bahadur."

Subadar Major Mherwan Sing, "Bahadur," 40th Regiment Native Infantry.

To the 2nd Class, with the title of "Bahadur."

Subadar Major Mahomed Ismail, 1st Regiment Light Cavalry.

Subadar Major Appavoo, 36th Regiment Native Infantry.

Subadar Sheik Ibrahim, 10th Regiment Native Infantry.

Subadar Major Ballagoovoo, 7th Regiment Native Infantry.

No. 276.—ERRATUM—

In G. G. O. No. 2 of 1877, admitting certain Native Officers of the Madras Army to the 2nd Class of the Order of British India, for "Subadar Homed Beg, 9th Regiment Native Infantry," read Subadar Major *Furreed* Beg, 9th Regiment Native Infantry.

PENSIONS.

No. 277.—Ressaldar Buldeo Singh, 16th Bengal Cavalry, having served 40 years with unblemished character, is granted a pension of Rs. 40 per mensem, from the date of his discharge, payable in the N. W. P. Circle.

No. 278.—Gowra, widow of the late Sunkur, pensioned Sirdar of Ordnance Drivers, 3-23rd Royal Artillery, is granted the 3rd Class Order of Merit pension, *viz.*, Rs. 1-12 per mensem, for three years, from the 1st September 1876, payable in the N. W. P. Circle.

FURLOUGH AND LEAVE.

No. 279.—The under-mentioned Officers are granted furlough to Europe, with the necessary subsidiary leave:—

Brigadier-General Sir Charles Henry Brownlow, K.C.B, Bengal Staff Corps (Aide-de-Camp to the Queen),—private affairs, for one year five months and twenty-four days, under Rule IX of the Regulations of 1868.

Colonel Henry Drummond, Royal Engineers Chief Engineer, 2nd Class, Deputy Secretary, Railway Branch, Public Works Department, private affairs, for one year, under Rule IX of the Regulations of 1868.

Lieutenant-Colonel Robert Stannus Graves, Bengal Staff Corps, Deputy Assistant Commissary General, 2nd Class,—private affairs, for two years, under Rules IX and XV of the Regulations of 1868.

Surgeon-Major George Barnard, in medical charge, 6th Bengal Cavalry,—private affairs, for eighteen months, under Rule IX of the Regulations of 1868.

Captain William Shepherd, Royal Engineers, Executive Engineer, 1st Grade, Public Works Department, Engineer-in-Chief of Light Railways, and Assistant Secretary, Railway Branch, Government, N. W. P., Allahabad,—private affairs, for one year, under Rule IX of the Regulations of 1868.

Captain Walter Elliot Rutherfurd, Bengal Staff Corps,—for twenty months—one year on private affairs, under Rules IX and XV, and the remaining period on medical certificate, under Rule XIV, Clause II of the Regulations of 1868.

Captain Linley Blathwayt, Bengal Staff Corps, Assistant Commissioner, 1st Grade, Hazaribagh, Bengal,—medical certificate, for one year, under Rule XIV, Clause I of the Regulations of 1868.

Surgeon Geoffrey Craythorne Hall,—urgent private affairs, for six months, under Rule XI of the Regulations of 1868.

Honorary Surgeon-Major John Richard Deane,—private affairs, for one year, under Rule IX of the Regulations of 1868.

Conductor William Adolphus Armstrong, Army Commissariat Department,—medical certificate, for two years, under the Regulations of 1868.

No. 280.—Captain Alfred Allen Stokes, East Indian Railway Volunteer Rifle Corps, is allowed leave of absence to proceed to England for ten months from the 9th April 1877.

No. 281.—Lieutenant-Colonel (Brevet Colonel) C. C. Drury, Bengal Staff Corps, has been permitted by the Secretary of State to reside in England under the terms of G. G. O. No. 797 of 1872

No. 282.—ERRATUM—

In G. G. O. No. 216 of 1877, granting Major W. S. Young, Bengal Staff Corps, furlough to Europe, omit the words "Commandant, Chunar Fortress and European Invalid Battalion."

No. 283.—REPORTS OF ARRIVAL—

Mr. G. W. Kellner, C.S.I., Accountant General, Military Department, reported his arrival at Bombay on return from furlough on the 14th March 1877, and the resumption of his duties as Accountant General on the 19th March 1877.

No. 284.—REPORTS OF DEPARTURE—

Major-General *Sir* H. W. Norman, K.C.B., Bengal Staff Corps, G. G. O. No. 259 of 1877,—*Japan*, 19th March 1877, from Calcutta.

Colonel C. G. Arbuthnot, C.B., R.A., G. G. O. No. 216 of 1877,—*Cathay*, 26th February 1877, from Bombay.

Lieutenant-Colonel (Brevet Colonel) R. A. Napper, Bengal Staff Corps, G. G. O. No. 1288 of 1876,—*Viceroy*, 19th March 1877, from Calcutta.

Major H. McD. DeW. Douglas, Bengal Staff Corps, G. G. O. No. 51 of 1877.—*Viceroy*, 19th March 1877, from Calcutta.

Captain F. F. Cotton, R.E., G. G. O. No. 191 of 1877,—*Pekin*, 12th March 1877, from Bombay.

Captain H. M. Evans, Bengal Staff Corps, G. G. O. No. 22 of 1877,—*Viceroy*, 19th March 1877, from Calcutta.

ORDNANCE.

No. 285.—STORES—

The following clauses in List of Changes in War Matériel are made applicable to India :—

Dated 1st August 1872.

2309. Clasp knife.

Dated 1st December 1875.

2812. Cord, drum, side, brass.

Dated 1st June 1876.

2916. Carriage, iron, wrought, travelling, complete, field, rifled M.L. 9-pounder (mark I strengthened).

2917. Carriage, iron, wrought, travelling, complete, field, rifled M.L. 9-pounder (mark II), addition of tensile stays, &c.

Introduction of wheels with 3-inch tires, phosphor-bronze pipes, and clearance of ·05 inch.

2923. Plate, range, brass, rifled M.L. gun, 9-pounder, 6 cwt., charge 1lb. 12 oz., (mark I).

MEDALS.

No. 286.—It is notified that in future War Medal Ribbons may be obtained on payment from the Army Clothing Department, Alipore, for British and Native Troops, on half-yearly indents to be submitted by Commanding Officers on 1st April and 1st October.

For the present a uniform rate of twelve annas per yard will be charged for the ribbons marginally noted.

Crimean.	Puniar.
Indian Mutiny.	China.
Turkish.	Abyssinia.
Good Conduct.	North-West Frontier, Persia & Burmah.
New Zealand.	I.—Punjab War.
Afghanistan.	II.—Ditto.
Scinde.	Order of Merit.
Maharajpore.	

Nine inches will be the minimum quantity of Medal Ribbon which may be indented for.

This order cancels that portion of G. G. O. No. 1080 of 1864 which refers to Medal Ribbons for British Corps.

PAY AND ALLOWANCES.

No. 287.—PAY CODE—

The following corrections are to be made in the Pay Code for India, Volume I, "British Troops:"—

Article 1074 is re-constructed as follows:—

"1074. A monthly allowance of Rs. 100 is authorized in aid of the maintenance of a band in each regiment of native infantry in which one is established."

G. G. O. No. 4 of 1877.

Article 1039*a*.—Add the following additional Clause:—

"Furlough granted under this article, for a period not exceeding three months, is not to be considered as furlough requiring an interval of three years' service between two furloughs. Such furlough will, however, be excluded from the three years' service required between two furloughs." G. G. O. No. 24 of 1877.

Article 292 is re-constructed as follows:—

"292. An officer of the staff corps or Indian army, who may be permitted to serve on the personal staff out of India, will receive, at the charge of the Indian revenues, the English furlough pay of his rank for a period of three years only, in addition to the allowances that may be assigned to him from other sources; the tenure of such appointment is limited to five years, subject to the liability of recall should his services be required in India. The whole of the time so passed will count towards Indian pension." G. G. O. No. 43 of 1877, paras. 8—9.

Insert the following articles:—

"381*a*. An officer who may be permitted to serve beyond the limits of India, shall, while so serving, receive, at the charge of Indian revenues, the English furlough pay of his rank in addition to the allowances that may be assigned to him from other sources—but see article 292." G. G. O. No. 43 of 1877.

"556*a*. The pay of an officer who may be permitted to serve beyond Indian limits will be regulated by article 381*a*." G. G. O. No. 43 of 1877.

Article 2135 is re-constructed as follows:—

"2135. When an officer of the staff corps or Indian army is called for to serve on the personal staff out of India, the whole of his service under such circumstances, shall count towards Indian pension; but to secure this privilege in the case of an officer whose services are lent for other than imperial purposes, either in England, or in a British colony, or to a foreign State, he must contribute to the Indian exchequer a proportion, not exceeding one-fifth, of the emoluments which he may receive during such transfer of his services." G. G. O. No. 43 of 1877.

Article 1667*a*.—*Add*—After the word "employment" the words "or on leaving his corps or battery to proceed to England as an invalid, or for discharge." G. G. O. No. 78 of 1877.

Article 997, third line, and article 2129, clause (*e*), second line.—Expunge the word "permanent," which was inserted under the authority of G. G. O. No. 560 of 1876, now cancelled. G. G. O. No. 103 of 1877.

Article 892, third line.—Expunge the parenthetical sentence "(reckoning from date of first permanent commission)" which was inserted under the authority of G. G. O. No. 560 of 1876, now cancelled. G. G. O. No. 103 of 1877.

Article 1043*b*, second line.—Expunge the parenthetical sentence "(counting from date of first permanent commission)" which was inserted under the authority of G. G. O. No. 560 of 1876, now cancelled. G. G. O. No. 103 of 1877.

Insert the following articles:—

"373*a*. For all purposes under the staff corps warrant, except for the calculation of service qualifying for admission to the staff corps, and for furlough and pension, an officer's service will be considered as commencing from the date of his first permanent commission." G. G. O. No. 103 of 1877.

"322*a*. An officer of the staff corps or Indian army selected for admission to the staff college, Sandhurst (article 314*a*), who may hold an appointment with a native regiment, will be seconded for the whole period of his absence from regimental duty." G. G. O. No. 104 of 1877.

Article 921*a*.—*Add*—"This article does not apply to a general officer on the divisional or brigade staff." G. G. O. No. 127 of 1877.

Articles 1005 and 1006 are cancelled, and the following substituted:—

"1005. Leave granted under these rules without furlough pay, will not reckon as furlough already taken in calculating the balance at an officer's credit, or as part of the total of eight years allowed, as shewn in article 1022; but all furlough with furlough pay, whether on private affairs or on medical certificate, taken under these rules, will so reckon." G. G. O. No. 197 of 1877.

"1006. Furlough and leave previously taken, under the rules of 1796 or 1854 will count, as respects officers who have elected these rules, as follows: G. G. O. No. 197 of 1877.

Furlough on private affairs, with pay, taken under the rules of 1796 or 1854, counts in all respects as furlough.

Leave on sick certificate under the rules of 1796 does not count in any respect as furlough.

Leave on sick certificate, with pay, under the rules of 1854, counts as part of the maximum of eight years allowed under these rules, but until the maximum thus made up be reached, this leave will not count as furlough already taken in determining the amount of furlough to which an officer is entitled.

Leave without pay under the rules either of 1796 or 1854, does not count in any respect as furlough."

Article 971.—The last sentence commencing "this rule," &c, is cancelled, and the following substituted:—

"This restriction does not apply to short leaves to sea, *i. e.*, three months, nor does it apply to a general officer of the staff corps or of the local service who may be unemployed." G. O. C. C. of 2nd June 1856. G. G. O. No. 1244 of 1869.

Article 1009.—*Add*—"A colonel of the Indian army who may be desirous of proceeding on furlough on the expiration of his term of brigade command, may, if he has furlough at his credit, avail himself of it without reference G. G. O. No. 198 of 1877.

to the restriction of having served three years from the date of his last return to duty."

Article 1595, page 299.—After "Transport Sergeant-Major" *insert* "(Bengal)," and in the columns of *staff pay* and *remarks* enter :—

G. L. 217-18 of 5th March 1877

Rs.	A.	P.	
10	0	0	After three years' approved staff service as transport sergeant.
20	0	0	After seven years' approved staff service as transport sergeant.

Article 344, clause *d*.—The following rates of pay for quarter-masters are to be substituted for the existing rates :—

G. L. No. 933-6 of 19th February 1877.

	"Daily. £	s.	d.	Daily. Rs.	A.	P.
ROYAL HORSE ARTILLERY.						
Quarter-master on first appointment ...	0	12	6	6	2	0
After 10 years' service, &c.	0	13	2	6	7	2
After 15 years' service, &c.	0	13	8	6	11	1
After 32 years' service, &c.	0	15	2	7	6	10
ROYAL ARTILLERY.						
Quarter-master on first appointment ...	0	9	6	4	10	5
After 10 years' service, &c. ...	0	11	0	5	6	2
After 15 years' service, &c. ...	0	11	8	5	11	5
After 32 years' service, &c. ...	0	13	2	6	7	2
CAVALRY.						
Quarter-master on first appointment ...	0	10	2	4	15	8
After 10 years' service, &c. ...	0	12	2	5	15	4
After 15 years' service, &c. ...	0	13	8	6	11	1
After 32 years' service, &c. ...	0	15	2	7	6	10
INFANTRY.						
Quarter-master on first appointment ...	0	8	2	4	0	0
After 10 years' service, &c. ...	0	10	2	4	15	8
After 15 years' service, &c. ...	0	11	8	5	11	5
After 32 years' service, &c. ...	0	13	2	6	7	2"

Page 78.—"In the sixth line, *for* the word 'and" *substitute* "or."

Article 533.—The concluding sentence "nor when on leave" &c., to be expunged, and the following substituted :—

G. L. No. 933-6 of 19th February, 1877.

"but when on leave from regiments on the Indian establishment and not entitled to pay and Indian allowances, they will draw the same rates of English regimental pay as quarter-masters serving at home—Article 344, clause *d*."

Insert the following additional article at page 70 :—

G. L. No. 77-8 of 1st March 1877.

"315 *a*. An officer who may be unavoidably retained in command of a native regiment, after attaining colonel's allowance, will draw pay and allowances as follows, until relieved :—

I.—If a staff corps officer—staff corps pay of lieutenant-colonel, *plus* command allowance, *plus* colonel's allowance.

II.—If not a staff corps officer—regimental pay and allowances of colonel (*minus* horse allowance) *plus* command allowance, *plus* colonel's allowance."

Article 1253.—After the words "court-martial" *insert* "or removal from the service."

G. L. No. 409-12 7th March 1877.

G. L. Nos. 582 of 22nd May 1876 and 101-4 of 8th January 1877.

Article 60, clause *b*, page 19.—Immediately below

"Examiners, Medical Accounts ...		400 0 0" *insert*.
"Ditto additional for the management of Fund Offices ...	Bengal	300 0 0
	Madras	150 0 0
	Bombay	150 0 0"

Article 1636 is re-constructed as follows :—

G. O. No. 310 of 1875. G. L. No. 1242 of 29th January 1877.

"1636. Hospital apprentices are entitled to pay, rations, quarters or compensation in lieu, from the date of passing the entrance examination, but no payment on this account will be made until they have been attested, which will be carried out immediately on their being posted."

Article 1288, clause *f*, page 244.—Expunge the concluding sentence "if in receipt of British pay only during such leave."

G. L. No. 1413-16 of 31st January 1877.

Article 62, clause *b*, page 28.—*Substitute* "Rs. 500" for "Rs. 400" as the staff pay of the 2nd-in-Command, Central India Horse.

G. L. No. 1292-3 of 24th April 1874.

Article 134, clause *h*, page 45.—Expunge the words "Bengal and Punjab" after "Butts and Targets."—Instead of the words "Repairs of arms" in the fourth line *substitute* "ditto."

Bombay G. O. C. No. 436 of 1876.

Article 412.—Expunge the parenthetical sentence, after the words "troop of Cavalry."

G. G. O. No. 1278 of 1876.

Article 441, clause *b*, page 162, is re-constructed as follows :—

G. G. O. No. 1278 of 1876.

"*b* CAVALRY.

		Rs.	A.	P.
Petty stores and repairs, for camp equipage, each regiment.	Drawn by the quarter-master.	1	8	0
Butts and targets, each regiment.		4	0	0
Shoeing, each horse (payable to troop farriers)		0	12	0
Stationery, each troop ...		10	0	0
Repairs of arms and accoutrements, each troop ...		10	0	0
An allowance of 1½ annas per maund for grinding gram, barley or other grain issued to the horses, will be given to cover all petty charges incurred in preparing the food.				
Riding house expenses, each regiment, (drawn by the riding-master) ...		34	4	7"

Article 1733.—After the rates of pay *insert* "These rates of pay will also be issued, to one private per squadron, in British cavalry regiments, while employed as assistant to the farriers."

G. G. O. No. 1278 of 1876.

Insert the following note at foot of page 316 :—

"NOTE.—The following is the establishment of lance ranks to be paid in India :—

G. G. O. No. 78 of 1877.

	Lance Sergeants.	Lance Corporals.	Acting Bombardiers
Cavalry, each regiment including depôt ...	4	12	...
Infantry, each regiment including depôt ...	5	15	
Horse and field artillery, per battery ...			4
Garrison, mountain and heavy artillery, per battery ...	...	...	3"

No. 288.—The following corrections are to be made in the Pay Code for India, Volume II, "Native Troops" :—

Article 191.—In the third line after the words "field service" *insert* the words "including camps of exercise."

G. L. No. 219-20B. of 5th March 1877.

Article 19.—*Add*—"When any portion of the journey can be performed by rail or steamer, free passages for such portions, and tra-

Madras G. G. O. No. 141 of 1877.

velling allowance for the remainder of the journey, will be granted."

Article 343, page 66.—In the foot-note (*) *for* "Bengal regiments" substitute "Bengal and Bombay regiments."

Bombay G. O. C. No. 436 of 1876.

Page 67.—In the foot-note (*) *for* "Bengal cavalry" substitute "Bengal and Bombay cavalry."

Bombay G. O. C. No. 436 of 1876.

Article 559, page 114.—Opposite "Farrier," in the columns of "Pay" under "Madras" *insert* "Rs. 14" and under "Bombay" "Rs. 15."

G. G. O. No. 1278 of 1876.

To the foot-note, *o*, after the words "field artillery" *insert* "and one grass-cutter or syce per troop in each regiment of British Cavalry."

G. G. O. No. 1278 of 1876.

Page 115.—To the foot-note *n* add the words "see note *o*."

To the words "ditto, after 3 years" and "ditto, under ditto" in the second and third lines, affix the letter *o* and enter the following in the proper place at foot of page:—

"*o*. A monthly allowance of Rs. 2 each is granted for two syces per troop of British cavalry employed in the repair of line gear."

G. G. O. No. 1278 of 1876.

Article 78, clause *b*, page 18.—To the word "Naib-Ressaldar" affix a dagger †, and enter the following note at foot of table, under the word "Sowar":—

† The rank of naib-ressaldar is abolished, all men being promoted to the grade of ressaidar but restricted to the pay and pension of the former rank until they would otherwise be promoted; the supernumeraries in the grade of ressaidar being absorbed by the promotion of two jemadars for every three vacancies in the rank of ressaidar, the men thus promoted drawing the present pay of naib-ressaldar until they become a part of the fixed establishment of three ressaidars.

CALCUTTA MINT.
The 19th March 1877.

J. F. TENNANT,
Offg. Mint Master.

POST OFFICE.

NOTIFICATIONS.

Calcutta, the 5th March 1877.

GOVERNMENT SIMLA PASSENGER DAK.

From the 10th March to the 15th April 1877, arrangements have been made for booking Express Carriage Dâks from Umballa to Kalka at the Calcutta Post Office* under certain rules and conditions, of which a printed copy can be obtained on application to the Post Master, Calcutta.

* Post Master's room, east verandah, between the hours of 10 A.M. and 4 P.M.

2. The charge for an Express Carriage Dâk from Umballa to Kalka will be Rs. 30. Two ordinary vans carrying mails will also leave the Umballa Post Office—one in the morning at or about 6 A.M., and the other in the evening at or about 6 P.M. In each of these vans four seats will be available for passengers (if the weight of the mails admit) at a charge of Rs. 6 per seat.

A. M. MONTEATH,
Director Genl. of the Post Office of India.

The 23rd March 1877.

Mails for Rangoon, Moulmein and Straits, for transmission per Steamer *Malda*, will be closed at the General Post Office on Sunday, the 25th March 1877, at 7 P. M.; also mails for Port Blair and Camorta can be sent by this opportunity.

Mails for Chittagong, Akyab, Kyouk-Phyoo and Sandoway, for transmission per Steamer *Commilla*, will be closed at the General Post Office on Sunday, the 25th March 1877, at 7 P. M.

Mails for Persian Gulf, for transmission per Steamer from Bombay, will be closed at the General Post Office on Tuesday, the 27th March 1877, at 7 P. M.

Mails for Ceylon and the Australian Colonies, for transmission per Steamer from Bombay, will be closed at the General Post Office on Wednesday, the 28th March 1877, at 7 P. M.

Mails for Madras, Ceylon and the intermediate Ports, for transmission per Steamer *Goa*, will be closed at the General Post Office on Wednesday, the 28th March 1877, at 7 P. M.

The next Overland Mail *viâ* Bombay will close at the General Post Office on Friday, the 30th March 1877.

2. Book-post and pattern packets must be posted on the 29th March 1877.

N. B.—The Letter Box will close at 7 P. M. precisely, after which hour overland letters, fully prepaid and bearing an extra postage stamp of two (2) annas on each cover, will be received up to 7-30 P. M., or bearing an extra postage stamp of four (4) annas on each cover up to 8 P. M

Mails for Ceylon, Straits, Hong-Kong, and United States of America, for transmission per Steamer from Bombay, will be closed at the General Post Office on Saturday, the 31st March 1877, at 7 P. M.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The first part of the "Indian Law Reports," published under the authority of the Governor General in Council, will appear as soon after the 1st January 1876 as can be arranged for. The Reports will appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and will comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court will be reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court will be reported in the Calcutta Series. The Parts of each Series can be had separately, or all four Parts can be had stitched into one wrapper at the option of subscribers and purchasers. It will be observed from the following statement of the terms of subscription and sale, that a considerable reduction is allowed to persons taking the complete set:

Terms of subscription, payable annually in advance.

	Without Postage.	With Postage.
For the CALCUTTA SERIES ...	Rs. 35	Rs. 40
„ MADRAS SERIES ...	„ 8	„ 9
„ BOMBAY SERIES ...	„ 8	„ 9
„ ALLAHABAD SERIES ...	„ 8	„ 9
Complete set	„ 45	„ 50

The price of each Part purchased separately will vary according to the amount of matter it contains, and will be printed on the wrapper. It will, however, never be below the following:—

For a Part of the CALCUTTA SERIES ...	Rs.	3 8
„ „ MADRAS SERIES ...	„	1 0
„ „ BOMBAY SERIES ...	„	1 0
„ „ ALLAHABAD SERIES.	„	1 0
Complete set	„	4 0

Persons desiring to subscribe for or purchase the Reports, should apply to

MESSRS. THACKER, SPINK AND CO., CALCUTTA;
MESSRS. THACKER, VINING AND CO., BOMBAY;
MESSRS. HIGGINBOTHAM AND CO., MADRAS;
THE GOVERNMENT CENTRAL BOOK DEPOT, BOMBAY;
THE GOVERNMENT BOOK DEPOT, ALLAHABAD.

The publication of the Bengal Law Reports and the Madras, Bombay, and N. W. P. High Court Reports will cease on the completion of the volumes now in course of publication.

Subscribers to the Bengal Law Reports, who have already paid their subscriptions to the end of June 1876, will be supplied with the complete set of Reports for the first half of 1876 in lieu of the volume of the Bengal Law Reports which they would otherwise have received.

The following books may be had from the Office of Superintendent of Government Printing, No. 8, Hastings Street.

No orders can be attended to unless accompanied by a remittance. When postage stamps are forwarded, one anna additional should be sent for every Rupee's worth of stamps, for discount in exchanging them for cash. Service labels are not received.

Books required for the public service cannot be supplied on payment; they are only issued on the authority of the Department to which the indenting officer is subordinate.

New edition—Just published.

51. Indian Emigration Act, 1871, not to apply to Straits Settlement.
52. Repeal of Act XIV of 1872.

THE FIRST SCHEDULE.

THE SECOND SCHEDULE.

An Act to regulate the Emigration of Native Labourers from the Presidency of Fort Saint George to the Straits Settlements.

Preamble.

WHEREAS it is expedient to regulate emigration under engagements to labour from the Presidency of Fort Saint George to the Straits Settlements; It is hereby enacted as follows :—

I.—PRELIMINARY.

Short title.

1. This Act may be called "The Straits Settlements Emigration Act, 1877:"

Local extent.

It extends only to the territories under the government of the Governor of Fort Saint George in Council

Commencement.

And it shall come into force on such date as the Governor of Fort St. George in Council, with the previous sanction of the Governor General in Council, may, by notification in the *Fort St. George Gazette* direct.

Interpretation-clause.

2. In this Act, unless there be something repugnant in the subject or context—

"Emigrate." "Emigrate" denotes the departure of any Native of India out of the said territories, under an engagement to labour in the said Settlements :

"Emigrant." "Emigrant" means a person who 'emigrates' within the meaning of the above definition .

"Magistrate." "Magistrate" means a Magistrate of a District, a Magistrate of a division of a district, or any other person appointed by the Governor of Fort St. George in Council to perform the functions of a Magistrate under this Act :

"Vessel." "Vessel" includes anything made for the conveyance by water of human beings or property.

From what port emigration lawful.

3. It shall not be lawful to emigrate except from such ports as may from time to time be declared by the Governor of Fort St. George in Council, by a notification in the *Fort Saint George Gazette*, to be ports from which emigration under this Act shall be lawful.

The Local Government may, at any time, by a like notification, revoke any such notification.

II.—EMIGRATION AGENTS.

Appointment of Emigration Agents.

4. The Government of the Straits Settlements may, from time to time, appoint such persons as the Governor of Fort St. George in Council approves, to act as Emigration Agents at such ports as aforesaid.

Any Emigration Agent so appointed may be suspended or removed by the Government of the Straits Settlements.

III.—PROTECTORS OF EMIGRANTS.

Appointment of Protector of Emigrants.

5. The Governor of Fort St. George in Council shall direct such persons as he thinks fit to act as Protectors of Emigrants under this Act at such ports and for such local areas as may be assigned to them respectively, and may, with the sanction of the Governor General in Council, assign to such persons such establishment as the Governor of Fort St. George in Council thinks fit.

General duties of Protector.

6. Every Protector of Emigrants, in addition to any special duties assigned to him by this Act, shall, so far as is in his power, protect and aid all emigrants with his advice or otherwise, and cause all the provisions of this Act to be duly complied with.

Inspection of vessels with return emigrants.

He may also inspect on arrival all vessels bringing return emigrants to the port at which he is Protector, and inquire into the treatment received by such emigrants both during the period of their service in the Straits Settlements and also during the voyage, and shall make a report thereon to the Governor of Fort St. George in Council.

Such Protector shall also aid and advise such returning emigrants, so far as he reasonably can, when called upon by them to do so.

IV.—Emigration Depôt.

Establishment and licensing of depôt.

7. Every Emigration Agent shall establish a suitable depôt for emigrants at the port at which he is Agent. Such depôt may be licensed by the local Protector of Emigrants after being inspected and approved of by him.

Fee for license.

For every such license the Emigration Agent shall pay to the Protector of Emigrants a fee of fifteen rupees.

Inspection by Protector.

8. The Protector of Emigrants may, at any time, examine into the state of the depôt and the manner in which the emigrants are therein lodged, fed, clothed and otherwise provided for and attended to, and shall do so at least once a year.

And he may at any time cancel the license, if he considers that the depôt for which it was granted is unhealthy, or has in any respect become unsuitable for the purpose for which it was established, or if the local Emigration Agent fails to comply with any of the requirements of this Act.

Agent and his subordinates to afford facilities for inspection.

The Emigration Agent and all persons in charge of, or employed in, the depôt, shall give the Protector every facility for making such inspections as he may deem necessary or proper, and shall afford him all such information respecting the depôt and the emigrants as he may require.

Supply of medical aid and comforts.

9. The Emigration Agent shall provide at the depôt such medical aid and comforts as the Protector may from time to time direct.

V.—Recruiters of Labourers.

Protector to license recruiters.

10. Each Protector of Emigrants shall license so many fit persons as he deems necessary, to be recruiters of labourers for the Straits Settlements; and no person shall engage or attempt to engage any Native of India to emigrate, or shall otherwise act or be employed as a recruiter of labourers, except under a license from a Protector of Emigrants.

Duration and cancelment of license.

11. No such license shall be in force for a longer period than one year; and in case of misconduct on the part of any recruiter, the Protector of Emigrants who granted it may cancel his license before the expiration of the period for which it was granted.

Form of license.

12. Every such license shall specify the local limits within which the person licensed may recruit labourers, and shall be in the form set forth in the first schedule hereto annexed.

Fee for license.

For every such license the recruiter shall pay to the Protector a fee of five rupees.

Recruiter to obtain Magistrate's countersignature to license.

13. No recruiter shall engage, or attempt to engage, labourers in any district without having first exhibited his license to a Magistrate in such district, and obtained the countersignature of such Magistrate thereupon.

No Magistrate shall countersign a recruiter's license unless and until he has satisfied himself, by such enquiry as he thinks fit, that the licensee is not by character or from any other cause unfitted to be a recruiter under this Act.

If any Magistrate who has countersigned a license afterwards finds reason to think that the licensee is by character or other cause unfitted to be a recruiter under this Act, he may require the licensee to produce the license and may cancel his signature; or he may, if he thinks fit, impound the license and send it to the Emigration Agent for cancellation.

Every Magistrate refusing to countersign a recruiter's license or cancelling his signature as aforesaid, shall, without delay, report his refusal or cancellation and the grounds of it to the Protector of Emigrants who has authority to cancel the recruiter's license.

VI.—Contracts with Emigrants.

Conditions of validity of emigration contracts.

14. No contract made by a recruiter with a Native of India to emigrate shall be enforceable by the recruiter or his principal unless it—

(*a*) is expressed in writing;

(*b*) is executed by the recruiter on behalf of some principal in the Straits Settlements;

(*c*) states the terms, if any, agreed on as to the redemption of the recruit's engagement for employment, or of the unexpired term of such engagement;

(*d*) the term of the recruit's employment, the nature of the services to be performed by him, and the rate of wages to be paid in respect of the same are registered in the manner provided in section eighteen.

But nothing contained in this section shall be deemed to prevent such Native from insisting, if he thinks fit, that such contract shall be performed.

Contents of such contracts.

15. Every such contract shall—

(*a*) contain an engagement for employment to be provided by such principal for a definite term not exceeding three years; and

(*b*) specify the nature of the services to be performed by such recruit and the rates of wages (not less than twelve cents a day for an able-bodied male adult) payable in respect of the same.

Certain agreements declared void.

16. Save as provided by section fourteen, clause (*c*), every agreement entered into by a Native of India in the territories subject to the Governor of Fort Saint George in Council, to pay money to any person in the Straits Settlements, in consideration of pecuniary or other assistance given to such Native to emigrate, shall be illegal and void.

Every contract not containing the particulars required by section fifteen shall be illegal and void.

Medical examination of intending emigrants.

17. Every recruit who has entered into such a contract as aforesaid shall be brought by the recruiter before the Civil Surgeon of the district or such other medical officer as the Local Government appoints in this behalf or, in default of such appointment, before such medical officer as the Magistrate directs.

The medical officer shall thereupon examine the recruit, and shall either reject him or shall certify that he is in a fit state of health and able in point of physical condition to proceed to the Straits Settlements and to work there.

Dependents.

If it is intended that any persons shall accompany the recruit as his dependents, the recruiter shall also bring them before the medical officer for the purpose of obtaining certificates that they are in a fit state of health and able in point of physical condition to perform the journey to the Straits Settlements; and the medical officer shall examine such persons and shall give or refuse certificates according to his opinion as to their fitness and ability.

Form of certificates.

Certificates shall be in the form set forth in the second schedule hereto annexed; and the recruiter shall pay to the medical officer such fee for each person so examined as the Local Government may from time to time prescribe.

Emigrant to appear before Magistrate, and be examined.

18. Every certified recruit and every accompanying dependent shall appear with the recruiter before a Magistrate in the district within which the contract with the recruit was entered into.

The Magistrate shall thereupon inspect the instrument of contract and the medical certificate of the recruit, and shall, apart from the recruiter, examine the recruit with reference to his contract.

If it appears on such examination that the recruit understands the nature of the contract he has entered into, and that he is willing to fulfil the same, the Magistrate shall register

(*a*) the name, the father's name and the age of such recruit:

(*b*) the name of the village or place in which he resides:

(*c*) the port of embarkation to which it is intended he shall proceed:

(*d*) the name of his employer:

(*e*) the term of his employment, the nature of the services to be performed by him and the rate of wages to be paid in respect of the same.

The recruit shall thereupon be deemed an emigrant under this Act.

Registration when to be refused.

If the Magistrate thinks that the recruit does not understand the nature of the contract into which he has entered, or has been induced to enter into it by fraud or misrepresentation, or finds that the contract is not in accordance with section fifteen, he shall refuse to register the particulars specified as aforesaid, and record his reasons for such refusal.

Examination of dependents.

19. On the appearance of any person claiming to be dependent on an emigrant, the Magistrate, after inspecting the medical certificate, shall, apart from the recruiter, examine such person if able to give intelligent answers to questions as to his dependence upon the emigrant whom he is about to accompany, and as to his willingness to accompany such emigrant.

If the Magistrate is satisfied that such dependence and willingness exist, he shall register the dependent as a dependent on such emigrant.

But if the Magistrate sees reason to doubt the existence of such dependence or willingness, he may refuse to register the alleged dependent, and, if so, shall record his reasons for such refusal.

Copies of registered matters.

20. The Magistrate shall furnish to every emigrant an authenticated copy on substantial paper of the matters registered under sections 18 and 19.

Copy of entry in register to be sent to Emigration Agent and Protector.

21. A copy of every entry made in the register book by a Magistrate, shall be forthwith forwarded by such Magistrate to the Emigration Agent and to the Protector of Emigrants.

Registration.

22. The registration required by sections 18 and 19 shall, in the case of emigrants recruited in any local area for which a Protector of Emigrants has been appointed, be effected before him instead of a Magistrate; and such Protector shall furnish to the emigrant one copy of the matters so registered, and another copy of the same matters to the Emigration Agent.

Fee for registration.

23. For the registration of every recruit under section 18, the recruiter shall pay to the Magistrate or to the Protector of Emigrants, as the case may be, such fee not exceeding one rupee, as may be from time to time directed by the Local Government.

VII.—ARRIVAL AT DEPÔT AND PROCEDURE THEREON.

Arrival at depôt to be reported.

24. The arrival of each emigrant at the depôt shall immediately be reported by the person in charge of the depôt to the Emigration Agent, and by such Agent to the Protector of Emigrants.

The Emigration Agent may institute such examination of the emigrants as he thinks fit in order to satisfy himself of their fitness to emigrate.

Duty of Emigration Agent on arrival of emigrants.

25. The Protector of Emigrants shall, within forty-eight hours after the arrival at the depôt of each emigrant not registered by himself, question such emigrant as to the mode in which he has been treated on his journey to the depôt, and shall at the same time examine the emigrant's contract and the copy of the register furnished to him under section 20.

If, for any reason, further inquiry is necessary, he shall make such enquiry forthwith.

Countersignature of register.

26. If in the opinion of the Protector of Emigrants the examination and enquiry made under section 25 disclose no valid reason against the fulfilment of the contract, and the emigrant has not become physically unfit for emigration, the Protector and the Emigration Agent shall countersign the emigrant's copy of the register and the Emigration Agent shall make out and deliver to the emigrant an embarkation-pass signed by the Emigration Agent, and countersigned by the Protector, stating the name and the age of the emigrant and the name of his father, certifying that he has been duly registered for emigration to the Straits Settlements and mentioning the port of debarkation.

Grant of embarkation pass.

When the emigrant to be sent back to the place of registration.

27. If the Protector of Emigrants considers that any emigrant is physically unfit to emigrate, and that he has not dishonestly represented himself as physically fit;

or that any such irregularity has occurred in the recruitment of any such emigrant, as makes it just to vacate the contract;

or if the Emigration Agent refuses without the consent of the Protector to countersign the emigrant's copy of the register as required by section 26, or to be bound by the contract;

Payment of expenses of sending him back.

the Protector of Emigrants may order the Emigration Agent, or the recruiter with whom the contract was made, forthwith to pay to him such reasonable sum as is necessary to enable such emigrant to return to the place where his name was registered under section 18; and may take any steps he thinks necessary for the conveyance of such emigrant to such place;

and any emigrant who from his state of health is in the opinion of the Protector of Emigrants physically unfit to undertake such return, shall be entitled to be fed, lodged and attended to at the port of embarkation at the expense of the Emigration Agent until he is reported by the Protector of Emigrants fit to undertake such return to such place.

Payment of expenses of dependent accompanying emigrant.

28. If a dependent has accompanied such emigrant, the Protector of Emigrants may order the Emigration Agent or recruiter to pay such sum as is necessary to enable him to return to the place at which his name was registered under section 19, as well as to feed or lodge him during the detention (if any) of the emigrant at the depôt.

Effect of such dependent's unfitness from ill-health to return to Straits.

29. If the Protector of Emigrants has reason to think that any dependent is in such a state of health that his journey to the Straits Settlements, or his detention in the depôt, would be dangerous to himself or others, he shall so certify to the Emigration Agent, and thereupon the emigrant to whom such dependent is attached shall be entitled, if he so wishes, to return as if he himself had been found under section 27 to be physically unfit to emigrate.

If the emigrant still desires to emigrate, then the dependent shall be kept and returned to the place at which he was registered as if he were an emigrant falling under section 27.

Compensation to emigrant or dependent for ill-treatment on journey to depôt.

30. If upon the arrival of any emigrant or dependent at the depôt, it appear that, during the journey thither, he has suffered any ill-treatment, or the recruiter has failed to provide him with proper and sufficient food and lodging, the Protector of Emigrants may order the Emigration Agent to pay him a reasonable sum by way of compensation.

Failure of Emigration Agent, &c., to pay such expenses.

31. On failure of the Emigration Agent or of such recruiter for twenty-four hours to comply with an order of the Protector for the payment of any sum, ordered to be paid under any of the four last preceding sections, the Protector may pay the same to, or on behalf of, the emigrant.

Every sum so paid shall be recoverable by the Protector, with six per cent. per annum interest from the date of payment, from the Emigration Agent, or from such recruiter.

No further proof shall be required by any Court in any such case than that the Protector gave such Emigration Agent or recruiter an order to pay such moneys and that the Emigration Agent or recruiter for a space of twenty-four hours made default in complying therewith.

Suits against Emigration Agent for breach of contract.

32. Whenever the Emigration Agent refuses, without the consent of the Protector, to countersign an emigrant's copy of the register as required by section 26, or is chargeable with a breach of any duty which any contract with an emigrant expressly or by implication imposes upon him, the Protector may, if he thinks fit, institute a suit on behalf of the emigrant against the Emigration Agent for the recovery of damages for the breach of such contract.

In every such suit the contract entered into by the recruiter shall be deemed to have been entered into by, and to be binding on, the Emigration Agent.

VIII.—EMIGRANT VESSELS.

Emigrants not to be received on board vessels other than those licensed under Native Passengers Act.

33. No Master or other person in charge of a vessel shall receive on board any emigrant unless such vessel has been licensed, under the law for the time being in force relating to the carriage by sea of Native passengers, to carry passengers for the intended voyage and unless the Master of such vessel has obtained a certificate from the Protector of Emigrants authorizing him to receive on board the number of emigrants specified therein.

or without certificate from Protector.

No such certificate shall be granted by the Protector of Emigrants unless he has satisfied himself that the vessel has been licensed as aforesaid, and that provisions and water for the number of emigrants to be specified in the certificate according to the scale prescribed under such law have been actually put on board such vessel.

Protector not to grant certificate unless satisfied that vessel has been licensed and has provisions on board.

Emigrant to give his pass to Master.

34. On embarkation, every emigrant shall deliver to the Master of the vessel the embarkation pass granted to him under section 26, and the Master shall not receive any emigrant on board unless he delivers up such pass.

Emigration Agent to be present at embarkation.

35. The Emigration Agent shall be personally present at the embarkation of all emigrants, and shall see that the Master duly examines the passes of the emigrants, and shall himself also examine such passes.

The Emigration Agent shall not permit any emigrant to remain on board who has not a pass.

36. The Master of every vessel carrying emigrants shall, after the embarkation of the emigrants, and before the departure of the vessel, give to the Emigration Agent a list of all emigrants on board, signed by himself and mentioning the port of debarkation, and shall retain a counterpart of such list signed by the Emigration Agent.

Master to deliver list of emigrants.

A copy of such list signed by the Emigration Agent and Master shall be sent to the Protector of Emigrants before the vessel sails.

IX.—SUPPLEMENTARY POWERS.

37. Whenever the Governor General in Council has reason to believe that proper measures have not been taken for the protection of emigrants and the enforcement of the engagements entered into with them immediately upon their arrival at the Straits Settlements, or during their residence therein, the Governor General in Council may, by a notification published in the *Gazette of India*, declare that emigration under this Act to the said Settlements shall cease from a day to be specified in such notification.

Power to prohibit emigration to the Straits Settlements.

When any notification has been published under this section, emigration under this Act and the making of contracts to emigrate to the Straits Settlements shall be unlawful from the day specified in such notification.

38. Such notification may be revoked in like manner by the Governor General in Council, and thereupon emigration to the said Settlements shall again be allowed from a day to be specified in the revocation.

Revocation of prohibition.

From the day so specified all the provisions of this Act authorizing emigration to the said Settlements shall be revived and have the same effect as if such emigration had not been suspended, except as to acts done, offences committed, and proceedings commenced, during the time of such suspension.

X.—OFFENCES.

39. Whoever, except under and in conformity with the provisions of this Act, engages or attempts to engage any Native of India to emigrate,

Making unlawful contract of labour.

or whoever engages, or attempts to engage, any Native of India to enter into any such contract as is hereby declared illegal,

or, not being a recruiter duly licensed under this Act, acts or is employed as a recruiter of labourers for the Straits Settlements,

Recruiting without being licensed.

or being a recruiter duly licensed under this Act, removes or attempts to remove any person whom he engages in any district from such district until the particulars required by section 18 have been duly registered,

Recruiter omitting to take engaged labourers before Magistrate or Protector.

shall be punished with imprisonment, which may extend to six months, or with fine not exceeding five hundred rupees, or with both.

40. Whoever, by means of intoxication, violence, fraud, or false pretences, causes or induces or attempts to cause or induce any Native of India to emigrate or to enter into any contract to emigrate, or into any such contract as is hereby declared illegal, or to proceed to the said Settlements without having entered into any contract, shall be punished with imprisonment for a term which may extend to three years, or with fine, or with both; and any police-officer may for such offence arrest him without warrant.

Use of force, fraud, &c., to cause a Native to emigrate.

41. Whoever, without lawful authority, issues any written order to the police to assist himself or any other person to procure labourers to proceed to the said Settlements, or falsely represents that such labourers are required by the Government, or are to be engaged on behalf of the Government, shall be liable to imprisonment for a term not exceeding six months, or to fine not exceeding five hundred rupees, or to both.

False representation of Government authority.

42. Any Master of a vessel not licensed as provided in section thirty-three who knowingly receives on board, for conveyance to the said Settlements, any emigrant or person who has entered into a contract hereby declared illegal,

Receiving emigrants on board without license or certificate.

and any Master of a vessel licensed as aforesaid, who knowingly receives any emigrant as aforesaid without having previously obtained a certificate under the said section, or in excess of the number specified in such certificate,

shall be liable for each emigrant or person so received to imprisonment for a term which may extend to three months, or to fine not exceeding two hundred rupees, or to both, and the vessel shall be liable to be forfeited.

43. Any Master of a vessel who receives on board such vessel any emigrant for the said Settlements and fails to comply with the requirements of sections 34 and 36, shall be liable to a fine not exceeding two hundred rupees.

Failure to comply with requirements of sections 34 and 36.

44. Any Master of a vessel landing any emigrant or dependent at any port other than the port of debarkation specified in embarkation-pass and list, unless in case of stress of weather or other unavoidable accident, shall be liable for every emigrant or dependent so landed to a fine not exceeding two hundred rupees, or to imprisonment for a term which may extend to one month, or to both.

Penalty for landing emigrant or dependent at other than specified port.

45. Any Master of a vessel who having cleared such vessel for the said Settlements, takes on board any emigrant not entered in the list mentioned in section 36, shall be liable to a fine not exceeding two hundred rupees for every emigrant so taken on board.

Taking on board, after clearance, emigrants not entered in list.

46. All prosecutions under sections 42, 43, 44 and 45 shall be instituted by the Emigration Agent, or by the Protector of Emigrants, or by an officer appointed for the purpose by the Local Government.

Prosecutions under this Act by whom to be instituted.

47. All the powers vested by law in the officers of Customs in regard to the searching and detention of vessels, or otherwise, for the prevention of smuggling on board thereof, may be

Customs officers may search and detain for purposes of this Act.

exercised by such officers for the prevention and detection of the illegal embarkation of emigrants on board vessels bound for the said Settlements and of other offences against this Act.

XI.—MISCELLANEOUS.

Act not to apply to certain vessels,

48. Nothing in this Act shall apply to any vessels in the service of the Lords Commissioners of the Admiralty, or to any of Her Majesty's vessels.

or to contracts with Native seamen and menial servants.

49. Nothing in this Act shall apply to any contract with, or the emigration of, any Native seaman, or other person who of his own free will contracts to navigate or serve on board of any vessel, or who embarks on board such vessel in pursuance of such contract, or any person who contracts to serve as a menial servant only and who embarks as such menial servant.

Emigration Agent and his subordinates and Protector of Emigrants to be deemed public servants.

50. The Emigration Agent and all persons employed by him and the Protector of Emigrants shall be deemed to be public servants within the meaning of the Indian Penal Code.

Indian Emigration Act, 1871, not to apply to Straits Settlements.

51. The Indian Emigration Act, 1871, shall not apply to the Straits Settlements, unless and until the Governor General in Council, by notification in the *Gazette of India*, declares it so to apply.

Repeal of Act XIV of 1872.

52. Act No. XIV of 1872 (*to exempt the Straits Settlements from the Indian Emigration Act, 1871*) is hereby repealed.

THE FIRST SCHEDULE.

(*See section* 12.)

Office of the Protector of Emigrants at the Port of .

A. B. described in the Roll annexed is hereby licensed under the Straits Settlements Emigration Act, 1877, to be a recruiter of labourers.

[*Here set out the local limits within which the cruiter is licensed to act.*]

This license will be in force until the day of , unless previously cancelled.

(Sd.) *C. D.*,

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 14th March 1877, and is hereby promulgated for general information:—

ACT NO. VI OF 1877.

An Act for postponing the day on which the Opium Act, 1876, is to come into force.

Preamble.

WHEREAS the Opium Act, No. XXIII of 1876, section one, enacts that the said Act shall come into force on the first day of April 1877: And whereas it is expedient to postpone the day on which such Act shall come into force; It is hereby enacted as follows:—

Opium Act when to take effect.

1. The said Act No. XXIII of 1876 shall come into force, not on the first day of April 1877, but on such day as the Governor General in Council may, by notification in the *Gazette of India*, direct in this behalf.

PART V.

Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

[Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 15th March 1877 :—

No. 6 OF 1877.

A Bill to amend the law relating to assignments from the general Provincial Fund established under the North-Western Provinces Local Rates Act, 1871.

Preamble.

WHEREAS it is expedient to authorise the Local Government of the North-Western Provinces to provide out of the general Provincial Fund established under the North-Western Provinces Local Rates Act, 1871, for payment of certain charges incurred or to be incurred on account of canals and railways in the North-Western Provinces; It is hereby enacted as follows :— .

Substitution of new section for section 10 of Act XVIII, 1871.

1. Section 10 of the said Act shall be repealed, and in lieu thereof the following shall be substituted :—

Assignments from general fund.

"**10.** The Lieutenant-Governor may from time to time assign from such Fund such amount as he thinks fit, to be applied in payment of charges incurred or to be incurred on account of such canals and railways as he, with the previous sanction of the Governor General in Council, may declare to be works of general provincial utility, and he shall from time to time allot from such Fund an amount to be applied in each district for expenditure on all or any of the following purposes :—

(*a*) the construction, repair and maintenance of roads and communications;

(*b*) the maintenance of the rural police and district post;

(*c*) the construction and repair of school-houses, the maintenance and inspection of schools, the training of teachers, and the establishment of scholarships;

(*d*) the construction and repair of hospitals, dispensaries, lunatic asylums, markets, wells and tanks; the payment of all charges connected with the purposes for which such buildings or works have been constructed, and any other local works likely to promote the public health, comfort or convenience :

Proviso.

Provided that the amount assigned in respect of such canals and railways shall not exceed ten per cent. of the total sum levied under this Act in the year in which the assignment was made, and that the amount allotted to be applied in each district for expenditure on all or any of the purposes mentioned in clauses (*a*), (*b*), (*c*) and (*d*) of this section shall be at least ninety per cent. of the total sum levied under this Act in such district in the year in which the allotment was made."

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to make a small amendment of Act No. XVIII of 1871, which provides for the levy, in the North-Western Provinces, of rates on land for local purposes. These rates are in the first instance credited to a general Provincial Fund, from which the Lieutenant-Governor is bound to assign amounts to be applied in each district for certain specified purposes.

These are the construction and maintenance of Roads and Communications; Rural Police; District-post; Education; Hospitals; Lunatic Asylums; Markets; Wells and Tanks; and other local works likely to promote the public health, comfort, or convenience: the annual assignment made to each district must not be less than the total amount of local rates levied in it; but any portion of such assignment which remains unexpended at the end of the year may be spent in any way which the Lieutenant-Governor thinks beneficial to the North-Western Provinces generally.

The principle is thus recognized, that these rates may, in part at least, be expended on objects of provincial utility; and, as a matter of fact, a large portion of them has been so expended. As it is not now wished to increase the burdens on the land, the present Bill proposes to authorize the Local Government to make assignments from the local rates for the purpose of meeting charges on account of Irrigation-works and Railways of provincial utility: the maximum amount of such assignments is fixed at ten per cent. of the total sum levied under the proposed Act, leaving 90 per cent. to be spent as at present; but there is no reason for anticipating that the actual proportion of the rates so assigned will amount to this maximum. The total amount of the local rates levied annually in the North-Western Provinces is about £430,000, and the proposed amendment of the law will not seriously diminish the existing grants for local purposes.

CALCUTTA; *The 16th March 1877.* J. STRACHEY.

WHITLEY STOKES,
Secy. to the Govt. of India.

[Second Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 15th March 1877:—

No. 7 OF 1877.

A Bill for the licensing of certain trades and dealings in the North-Western Provinces.

Preamble.

WHEREAS it is expedient that persons carrying on certain trades and dealings in the North-Western Provinces should take out licenses and pay for the same; It is hereby enacted as follows:—

Short title.

1. This Act shall be called "The North-Western Provinces License Act, 1877:"

Local extent.

It extends only to the provinces under the government of the Lieutenant-Governor of the North-Western Provinces;

Commencement.

And it shall come into force at once.

Annual licenses to be taken out.

2. Every person who, on and after the first day of April 1877, falls under any of the heads specified in the schedule hereto annexed and carries on (whether on behalf of himself or any other person) his trade or dealing, shall take out a license under this Act and shall pay for the same the annual fee mentioned in the same schedule as payable by persons of the class and grade to which he belongs: provided that, for any such license granted between the first day of November in each year, and the thirtieth day of April next ensuing, there shall be paid only one-half of such fee.

Officer to grant license.

3. Every license under this Act shall be granted by the Collector of Land Revenue of the district or place in which the person requiring such license carries on his trade or dealing: provided that, if such person carries on his trade or dealing in more than one district or place in the North-Western Provinces, the license shall be granted by the Collector of the district or place in which his principal place of business is situate.

Every such license shall be signed by the Collector granting it, or by any Assistant or Deputy Collector under the Collector's orders, and the Courts shall take judicial notice of such signature.

Particulars to be specified in the license.

4. Every such license shall specify—

(*a*) the date of the grant thereof;

(*b*) the name, father's name, caste, and trade or dealing of the licensee:

(*c*) the fee paid for the license:

(*d*) the place or places where the licensee intends to carry on trade or dealing for the ensuing year; and

(*e*) the term for which the license shall remain in force,

and shall be received in evidence as *primâ facie* proof of all matters contained therein.

Commencement and expiration of license.

5. Every such license shall have effect and continue in force from the day of the date thereof till the first day of April next after the day of the granting thereof.

Renewal of license.

6. Every person to whom any such license has been granted and who desires to continue to carry on his trade or dealing after the expiration thereof, shall take out a fresh license for that purpose for the following year, to expire on the day appointed in the last preceding section, and shall renew the same so long as he desires to continue to carry on such trade or dealing.

Collector to determine class and grade under which licensee is to be charged.

7. The Collector shall from time to time determine under which of the classes and grades mentioned in the said schedule every person to whom a license may be granted by him as aforesaid shall be charged.

List of Licensees.

Collector to prepare annual list of licensees.

8. As soon as may be after the first day of April 1877 and the first day of January in every subsequent year, the Collector shall prepare a list of the persons licensed under this Act in the district or place aforesaid. Such list shall state—

(*a*) the trade or calling of each of the persons therein named;

(*b*) the class and grade under which he is charged; and

(*c*) the fee paid for his license.

Such list shall be filed in the office of the Collector, and the list, or such part or parts thereof as he shall think fit, shall be filed in such other places as the Collector directs, and shall be open to public inspection at all reasonable times, without any payment.

Collector to issue notification showing classes and grades chargeable, &c.

9. The Collector shall, at or about the same time, issue a notification, in such form as the Local Government directs, showing the classes and grades chargeable under this Act, and the fees which members of each class and grade are charged, with such other information as the Local Government may direct.

The notification shall be published in the principal muhallas or ganjes of all towns, and in the chaupál, or other public place, in all villages concerned.

Notice to person charged.

10. So soon as may be practicable after the issue of such notification, notice shall be served on each person charged: provided that in any year it shall not be necessary that such notice shall be served on any person charged under this Act in the year immediately preceding.

Such notice shall contain—

the name, father's name, caste, and trade or dealing of the person charged;

the class and grade under which he falls;

the fee payable by him under this Act;

the date on which such payment is to be made;

the mode and place of payment and the person to whom the fee may be paid;

the penalty incurred by failure to make payment of the fee on the given date;

and shall notify that if the person so served continues his trade or dealing, payment of the amount specified in the notice must be made in the year 1877, within thirty days of receiving the notice, and within thirty days next after the first day of January of each subsequent year.

Petition of objector.

11. Any person served with such notice and objecting to the class or grade under which he is charged may, within thirty days after such service, apply by petition to the Collector in order to establish his right to have his name transferred to another class or grade or altogether removed from the list.

Verification.

The statements contained in the petition shall be verified by the petitioner or some other competent person in manner required by law for the verification of plaints.

Hearing of petition.

Appeal from order on petition.

12. The Collector shall fix a day for the hearing of the petition, and on the day so fixed shall hear the same and pass such order thereupon as to him shall seem fit:

Provided that if in his judgment the fee which the petitioner has been charged exceeds two per cent. upon his annual nett earnings, such excess shall, for the purpose of section eleven, be deemed a valid objection:

Provided also that if in the judgment of the Collector the nett annual earnings of the petitioner are less than two hundred rupees, the petitioner's name shall be removed from the list.

Any person dissatisfied with such order may, within fifteen days from the date thereof, present a petition of appeal to the Commissioner of Revenue of the Division, whose decision upon such appeal shall be final.

Every petition presented under this section shall be accompanied by a copy of the petition to the Collector, the Collector's order thereon, and all other documents (if any) connected with the case.

Penalties.

Penalty for carrying on business without a license.

13. If after expiry of the period mentioned in the notice served on him under section ten, for payment of the amount specified therein, any person carries on his trade or calling without having taken out a license as required by this Act, he shall be liable, by order of the Collector, to pay twice the fee with which he would otherwise have been chargeable under this Act, and on receipt of such payment, the Collector shall grant him a license.

All sums due under this section shall be recoverable as if they were arrears of land-revenue.

License to be produced on demand.

14. Every person required by this Act to take out a license, who without reasonable excuse neglects or refuses to produce and show his license when required so to do by an officer generally or specially empowered in writing by the Collector to make such requisition, shall, on conviction before a Magistrate, be liable to a fine not exceeding one hundred rupees.

Prosecution to be at instance of Collector.

No person shall be proceeded against for any such offence except at the instance of the Collector, and there shall be no appeal from any sentence under this section.

Receivers, Courts of Wards and Trustees.

Receivers and managers chargeable.

15. Receivers or managers appointed by any Court in India, and the Courts of Wards, shall be chargeable under this Act in respect of any trade or dealing of which the income is officially in their possession or under their control.

Power to retain assessment paid by trustee, &c.

16. When any trustee, guardian, curator, committee or agent is charged under this Act in such capacity, or when any receiver appointed by any Court or Court of Wards is charged under this Act, every person and Court so charged may, from time to time, out of the money coming to his or its possession as such trustee, guardian, curator, committee or agent, or as such receiver or Court of Wards, retain so much as is sufficient to pay the fee charged.

Every such person or Court is hereby indemnified for every retention and payment made in pursuance of this Act.

Municipalities.

Power to require returns from Municipalities.

17. The Collector of the District may require any Municipal Committee constituted under Act No. XV of 1873 to furnish, within a period to be specified under the orders of the Local Government, returns showing the names and numbers of persons chargeable under this Act resident within the limits of such Municipality, together with the class and grade under which they respectively fall and the fees payable by them respectively.

If the Municipal Committee fails within the period prescribed to make such returns, or if it make such returns, but the Collector of the District has reason to doubt their accuracy, he may at any time cause a return showing the names, numbers, classes and grades aforesaid to be prepared in such manner as may be prescribed by the Local Government.

Notice to Municipalities.

18. When the return mentioned in section 17 has been furnished or prepared, notice shall be served on the Municipality, calling

on it to pay to the Collector of the District, within a period to be specified in the notice, a sum calculated on such return in accordance with the provisions of this Act.

Any Municipality may appropriate any part of its revenues to the payment of the sum leviable from it under this section, or raise such further sums in addition to its existing revenue as may be needful for such payment: provided that such further sums be raised in accordance with the said Act No. XV of 1873.

Miscellaneous.

Payment of taxes raised and penalties recovered under Act.

19. All taxes raised and penalties recovered under this Act shall be paid to the credit of the Local Government, or as such Government shall from time to time direct.

Powers of Collector and Commissioner under Act may be exercised by other officers.

20. All or any of the powers and duties conferred and imposed by this Act on a Collector, an Assistant or Deputy Collector, and a Commissioner of Revenue, may be exercised and performed by such other officers or persons as the Local Government shall from time to time appoint in this behalf.

Every person shall be legally bound to furnish information to any officer or person so appointed when required by him to do so.

Exemptions from Act.

21. Nothing in this Act applies to (*a*) persons being itinerant vendors only, or (*b*) persons earning their livelihood solely by agriculture.

Power to exempt and make rules.

22. The Local Government may, from time to time, with the previous sanction of the Governor General in Council,

(*a*) exempt from the operation of this Act any portion of the territories subject to such Government or any class of trade or dealings falling under the said schedule;

(*b*) make rules consistent with this Act, (1) for regulating the time and manner of collecting the fees charged under this Act, (2) for allowing to the persons employed in the collection fees not exceeding three per centum on the fees so collected charged to the licensees, and (3) generally for the guidance of officers in matters connected with the enforcement of this Act.

THE SCHEDULE ABOVE REFERRED TO.

CLASS I.

		Fee payable by licensee.
Bankers	First grade ...	Rs. 64
Wholesale-dealers in country-produce ...	Second grade	,, 32
	Third grade ...	,, 16

CLASS II.

		Fee payable by licensee.
Cloth-sellers ...		
Dealers in iron ...		
Metal-vessel-sellers ...		
Fuel-sellers (talwálas)		
Chaudhrís ...	First grade ...	Rs. 32
Agents	Second grade	,, 16
Letters-out of conveyances and cattle ...	Third grade ...	,, 8
Contractors (thíkadárs)		
Printers and publishers		

CLASS III.

Persons carrying on any trades or dealings not above specified.	First grade ...	Rs. 16
	Second grade	,, 8
	Third grade ...	,, 4
	Fourth grade	,, 2

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to impose a light License-tax on Traders and Dealers in the North-Western Provinces. Similar measures are in force in many large Indian towns and (under Act XIV of 1867) in the Central Provinces. The principal trades have been classified and graded, and a specific sum is put down against each class and grade: the highest license fees proposed are those on Bankers and wholesale dealers in country-produce; and they vary from Rs. 16 to Rs. 64 a year: other traders will have to pay smaller sums, which are in some cases as low as Rs. 2, and in no case exceed Rs. 32.

CALCUTTA, *16th March 1877.*

J. STRACHEY.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor-General of India for the purpose of making Laws and Regulations on the 21st March 1877:

No. 8 OF 1877.

A Bill to facilitate the admission of Military Lunatics into Asylums.

Preamble.

WHEREAS it is expedient to facilitate the admission of European Military Lunatics into Asylums, and to amend the law now in force with regard to the admission thereto of Native Military Lunatics; It is hereby enacted as follows:—

Short title.

1. This Act may be called the "Military Lunatics Act, 1877:"

Local extent.

It extends to the whole of British India and, so far as regards subjects of Her Majesty, to the dominions of Native Princes and States in India in alliance with Her Majesty;

Commencement.

And it shall come into force on the passing thereof.

Repeal of Act XXI of 1872.

2. Act XXI of 1872 (*to facilitate the admission of Native Military Lunatics into Asylums*) shall be repealed

Procedure in respect of European officer or soldier declared lunatic.

3. Whenever any European officer, Warrant-officer, Non-commissioned officer, soldier or other person subject to the provisions of the Act for punishing Mutiny and Desertion and for the better payment of the Army and their quarters for the time being in force has been declared a lunatic, in accordance with the provisions of the military regulations of the Presidency to which he belongs, and has been ordered to be forwarded to any one of the Presidency-towns, and it appears to one of the Surgeons' General, either of the British Forces or of the Indian Medical Service, according to the Presidency and the service to which the said lunatic belongs, that it is inexpedient that he should be removed to England, or that he should be detained in military custody until he can be conveniently sent to England, such Surgeon General may, if he think fit, make an order under his hand for the reception of the said lunatic into the Lunatic Asylum at Bhowanipur, Madras or Bombay, or such other Lunatic Asylum as may be duly authorized for the purpose by the Governor General in Council;

and the officer in charge of such asylum shall receive the lunatic in the asylum, and detain him therein until he is discharged therefrom, in accordance with the local military regulations in force for the time being, or until the Surgeon General applies for his transfer to the military authorities in view to his removal to England.

Report in case of Native officer or soldier appearing to be insane.

4. Whenever any Native officer, Non-commissioned officer or soldier appears to be insane, the officer commanding the regiment or detachment to which he belongs shall report the case to the general officer commanding the division or district or force in which such regiment or detachment is serving.

Examination of Native by committee.

5. Such general officer shall thereupon cause the said Native to be examined by a committee composed of at least two medical officers, or (if this be impracticable) by a regimental committee comprising the officer in command of the wing or squadron to which the Native belongs and the medical officer in charge of the corps or detachment of which such wing or squadron forms part.

Procedure on Native being found by committee to be insane.

6. If the said committee or regimental committee (as the case may be) are satisfied that the Native is insane, the officer commanding the division or district or force may, if he thinks fit, make an order under his hand for the reception of the said Native into a Lunatic Asylum, and shall then send him thither under military escort; and the officer in charge of such asylum shall receive the Native into the asylum and detain him therein until he is discharged therefrom in accordance with the local military regulations in force for the time being.

Procedure for discharge of European or Native military lunatic.

7. Whenever it appears to the officer in charge of a Lunatic Asylum that the discharge of a military lunatic, whether European or Native, is necessary either on account of his recovery, or for any other purpose, such person shall be brought before the visitors of the asylum, and on the visitors recording their opinion that the discharge should be made, the general officer commanding the division, district or force, or other officer authorized to order the admission of military lunatics into asylums, shall forthwith direct him to be discharged, and such discharge shall take place in accordance with the local military regulations in force for the time being.

Payment of expenses of lunatic.

8. The Paymaster of the military circle within which any such asylum is situate shall pay to the officer in charge of such asylum the expense of the lodging, maintenance, clothing and medicine of every lunatic, whether European or Native, received and detained under this Act.

Legalization of past receptions in asylum.

9. All military lunatics heretofore received into Lunatic Asylums shall be deemed to have been so received in accordance with law.

STATEMENT OF OBJECTS AND REASONS.

It appears that at present there is no law whatever under which British soldiers afflicted with mental disease can be admitted into, or (when cured) discharged from, Lunatic Asylums in this country; and the primary object of this Bill is to legalize such admission and discharge.

At the same time the opportunity has been taken to amend the law as to the discharge of Native military lunatics. The Bill proposes to repeal Act XXI of 1872 (*to facilitate the admission of Native Military Lunatics into Asylums*) and re-enact it with the necessary addition.

H. W. NORMAN.

CALCUTTA,
The 2nd March 1877.

WHITLEY STOKES,
Secy. to the Govt. of India.

[First Publication.]

The following Bill was introduced into the Council of the Governor General of India for the purpose of making Laws and Regulations on the 21st March 1877:—

No. 9 OF 1877.

A Bill to revive and amend Act No. XXIII of 1867.

Preamble.

WHEREAS Act No. XXIII of 1867 (*for the suppression of murderous outrages in certain districts of the Panjáb*) received the assent of the Governor General on the 18th day of March 1867, and by section 17 of the said Act was limited to expire in ten years from the date of passing it; And whereas it is expedient to revive the same Act and to amend it in manner hereinafter appearing; It is hereby enacted as follows:—

Act XXIII of 1867 to be revived.

1. The said Act shall be revived and shall remain in force until the Governor General in Council otherwise directs.

Amendment of Act XXIII of 1867.

2. For the word "Commissioner" wherever it occurs in the said Act, the words "Sessions Judge or Commissioner" shall be substituted.

STATEMENT OF OBJECTS AND REASONS.

The Panjáb Murderous Outrages Act, XXIII of 1867, expired on the 18th instant, and the primary object of this Bill is to revive it.

At the same time the opportunity has been taken to amend the Act by extending to the Sessions Judge the jurisdiction which it gives to the Commissioner only.

E. C. BAYLEY.

SUPPLEMENT TO

The Gazette of India.

No. 12. CALCUTTA, SATURDAY, MARCH 24, 1877. Register No. 33.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known.*

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of six Rupees per annum if delivered in Calcutta, or nine Rupees if sent by Post.*

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 28th February 1877.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant-Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K.C.B.
The Hon'ble Sir Arthur Hobhouse, Q.C., K.C.S.I.
The Hon'ble Sir E. C. Bayley, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble Sir J. Strachey, K.C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble D. Cowie.
The Hon'ble Mahárájá Narendra Krishna.
The Hon'ble F. R. Cockerell.
The Hon'ble B. W. Colvin.
The Hon'ble R. A. Dalyell.
The Hon'ble R. E. Egerton, C.S.I.

SALT-TRANSPORT BY SEA BILL.

The Hon'ble MR. HOPE presented the Report of the Select Committee on the Bill to restrict the transport of salt by sea.

The Hon'ble MR. DALYELL said that, although there was no motion before the Council, he desired to ask permission to say a few words with reference to the report of the Select Committee, as he found himself constrained to dissent from its most important recommendation, and he might not have another opportunity of acquainting the Council with his reasons for doing so.

His Excellency THE PRESIDENT having given his consent,

MR. DALYELL said that it would be in the recollection of the Council that about four weeks ago his hon'ble friend Mr. Hope had introduced the Bill to restrict the transport of salt by sea, and that MR. DALYELL had then criticised it as a most arbitrary measure, and one which was likely to press with very considerable hardship on a large class of poor sea-faring people in the Madras Presidency who were engaged in the coasting and over-sea salt-trade, and who invariably carried on their operations in vessels of a lesser burthen than three hundred tons. His hon'ble friend had, in moving for leave to introduce the Bill the previous week, merely stated that there was no law in force at present to prevent foreign salt, or salt shipped from Bombay without payment of duty, with intended destination to Madras or Calcutta, being surreptitiously landed at any port on the coast, and smuggled salt being taken in lieu of it and carried on to the port for which the vessel was originally cleared, and that that had caused a considerable amount of smuggling which it was proposed to put a stop to by the provisions of the Bill, as it would prevent salt being carried in vessels of a lesser burthen than three hundred tons except under very strict conditions, and would authorize the boarding and search of vessels suspected of carrying on an illicit traffic in salt. Now, MR. DALYELL confessed that he did think that before the Council was asked to accept and to refer to a Select Committee a measure conferring on the executive such great powers of inquisitorial and vexatious interference with a considerable portion of the coast and over-sea trade of the country, they were entitled to receive a somewhat less brief account of the circumstances which, in the opinion of his hon'ble friend, had rendered the measure necessary, than had been accorded by him. It was also clear from the remarks which had fallen from the Hon'ble Mr. Bullen Smith when the Bill was introduced that he held the same opinion, and MR. DALYELL had been a good deal surprised that neither his hon'ble friend Mr. Hope, nor the hon'ble member who was in charge of the Department from which the Bill had originally emanated, was apparently in a position to inform the Council, in reply to the remarks which were then made, on what grounds it was necessary to introduce the measure. It was true that his hon'ble friend Mr. Hope had alluded to a certain large bundle of papers, which he had not brought with him, but which was said to contain voluminous correspondence with the Local Governments on the subject of the Bill, and he had told the Council that the objections which had been raised by the Madras Government had been referred to the Madras Salt Commission, and that they had reported in favour of the measure. But he did not adduce from the large bundle any argument in favour of the Bill, nor did he inform the Council what was the nature of the objections which had been raised by the Madras Government. MR. DALYELL also thought that his hon'ble friend's allusion to the restrictions on salt carried by land over the inland-customs-line were peculiarly unfortunate, when he remembered the debate which took place two years ago on the Madras Salt Bill, in which nearly every member who spoke on the question had alluded in no measured terms to the restrictions placed on salt carried by land by that very line, and to the hindrance caused thereby to the inland trade—a hindrance which, according to Sir Barrow Ellis, the member in charge of that Bill, amounted almost to a stoppage of interchange of commodities between the Central Provinces and Orissa. Though MR. DALYELL had been surprised that his hon'ble friend could not give any good reasons for the measure, he concluded that there *were* such reasons which his hon'ble friend could not call to mind, and that his first step would be to take an early opportunity of printing and circulating papers which would clearly show the necessity of the measure. Nothing of the sort, however, had taken place, and though MR. DALYELL had obtained from the Madras Government some of the correspondence which referred to that Presidency, it was only through the courtesy of his hon'ble friend that he had obtained a glance at the voluminous papers on the subject, and he believed that the very papers on which the Committee's report purported to be based had not yet been printed and circulated. A cursory inspection of those papers at their meeting had had the effect of inducing the Committee to make considerable modifications in the Bill, for it would now only take effect on the west coast

of India, although the power of extending it to other parts of India would still rest in the executive Government. Since the meeting of the Committee, he had had a further opportunity of examining the papers more carefully, thanks again to the consideration of his hon'ble friend, and he believed that if other members had been able to do so, they would have come to the conclusion which he had arrived at, that no satisfactory case had been made out for the passing of any measure at all. When he said no case, he meant that no satisfactory evidence had been adduced that smuggling was so rife, or that danger to the revenue was so considerable, as to justify a measure which must cause serious annoyance and vexation to the whole petty coasting and over-sea trade of the empire. No doubt it was not intended to interfere with the honest trader. But if the Bill was not intended to be a dead letter altogether, it was clear that under its provisions all the small craft which swarmed upon the coast must constantly be overhauled and inspected whether they were engaged in carrying salt or any other article of merchandize, and that this inspection would probably be carried out by a poorly paid Marine Police. In fact, as far as he could judge, the result of the Bill would be to extend to all the coasts of India all the most objectionable features of the salt-customs-line, and the result might here also be the stopping of the interchange of commodities as far as small country-vessels were concerned; or in other words, the suppression of the means of obtaining their livelihood of a not insignificant proportion of the Native population.

MR. DALYELL's further perusal of the correspondence had also led him to conclude that his hon'ble friend had not clearly appreciated the intention of the measure, and a second examination of his printed Statement of Objects and Reasons appeared to show that he was also mistaken in his estimate of the existing law. For, as MR. DALYELL understood the law, the Customs-law, which prohibited the surreptitious landing of any articles of merchandise, applied to salt as much as to any other commodity. Then he apparently supposed that the Bill would prevent salt being smuggled from Bombay on to the west coast, but it appeared from the papers that it was intended to effect this object in quite a different manner, namely, by an executive order. In future all salt shipped in Bombay would be required to pay the full duty before being removed for export. And, as the whole manufacture of salt was under strict Government supervision, that would effectually prevent any smuggling of this kind of salt. The declared object of the measure, according to the Revenue-circular of the Government of India and the Madras Salt Commission's report, was clearly the suppression of illicit traffic in *foreign* salt, that was, salt made at Goa, Muscat and other places, and there was no satisfactory proof given in the papers that the smuggling of *this* salt was at all general at present. It was true that it was stated that, as soon as this order was passed in Bombay requiring the pre-payment of full duty, the traders who now carried salt to the west coast would turn to Goa for their supply. But it would be time enough when they did so, and when a large amount of smuggling took place to call on this Council to legislate. And even then he questioned whether the Bill would have the desired effect, for it would not be possible under it to seize Goa-salt in Goa-ships unless within British India, that was to say, within three miles of the coast; so that a salt-smuggler would only have to cruise about at a distance of three miles from the coast and watch his opportunity of running a cargo, and by this means avoid the provisions of the Bill altogether. It seemed to him that the far preferable course would be, if it should occur that the salt-traders obtained their supplies from Goa and smuggling took place, to make some arrangement with the Portuguese Government that an export-duty should be charged in the same way as a duty was chargeable on salt exported from Bombay.

Another very serious objection to the Bill which had occurred to him was that it must necessarily enhance the price of salt in these two districts in an objectionable manner, although the price had been raised some fifteen per cent. only two years back, and although the compulsory pre-payment of duty at Bombay must also have an effect in the same direction. It was true, no doubt, that the financial necessities of the State might authorise the levy of

a duty even on a commodity which was so essential to the very existence of the people as salt. But he thought that the Government were bound not to pass any measure which could in any way increase the price of salt independently of the duty levied upon it, and that they should moreover endeavour to remove any cause existing which was likely to have that effect. He had always felt himself that the proper course was to view the salt-tax as merely an engine for the purpose of collecting a moderate poll-tax, and on these grounds he should be glad to see a change in the mode of levying the duty by the adoption of a plan which he did not think had ever been brought under consideration in the very numerous discussions which had taken place during a long series of years in regard to this tax. He thought that the salt-duty should be a differential duty, not as at present with reference to locality, but regulated by the saline properties—the *strength*, so to say—of the article, in the same way as the excise-duty on spirits varied according as it was above or below London proof. This change of system would be a great boon to the two Madras districts which would be chiefly affected by his hon'ble friend's measure. And he believed it would not result in any reduction of the Government revenue, although there was reason to suppose that it would have the effect of putting a stop to a great extent of the smuggling which was said to exist. He thought he was approximately correct in saying that the salt made in these districts was of inferior quality and so deficient in saline properties that one pound of Bombay or east-coast salt would go as far as two pounds of district-made salt. If this was the case, it was clear that if the population of these districts were to use district-made salt instead of foreign salt, they would be obliged to consume double the quantity which they now used; so that even if the duty on the district-salt were reduced by one-half, it would result in no reduction of the revenue; and as it was said that the cost of the manufacture and carriage of foreign salt was double or more than double the cost of production of the indigenous salt, the public would to that extent be the gainer. No doubt it would be impossible to carry out the proposed system with strict exactness, but he thought when any particular district or group of districts was found to produce salt of very inferior quality, the people of the locality should be allowed to bring it into consumption by permitting them to consume it at a lower rate of duty than that charged on a superior quality of salt. Such a scheme would no doubt open out an entirely new field of enquiry as to the consumption of salt in different parts of the empire, and it might result in clearing up anomalies as to consumption in different localities. For instance, if it was found that Cheshire salt imported for use in Lower Bengal was thirty per cent. stronger than the salt in Madras, that would account for the fact that in Madras twelve pounds per head were consumed and in Bengal only nine pounds, and would prove that the true duty charged upon the article in the two places was not so different as it was now supposed to be.

He felt however that he was perhaps digressing from the subject of the Select Committee's report, but he might say briefly, after going carefully through the correspondence, that he found himself unable to recommend the passing of the Bill; first, because he believed that the order about to be passed in Bombay, requiring prepayment of full duty on all salt exported, would remove all existing necessity for any Bill of the sort; secondly, because, even if the necessity should arise hereafter, the Bill as it stood would not, in his opinion, effect the object in view; and, thirdly, because it would unnecessarily enhance the price of salt in the two west-coast districts of the Madras Presidency.

In conclusion he could not do better than read to the Council the final remarks of the Madras Government as to this Bill, and he ventured to submit that the opinion of that Government was entitled to the gravest consideration at the hands of the Council in regard to a Bill which so largely affected the Madras Presidency. His Grace in Council had written as follows in the last communication on the subject:—

"Without an efficient preventive force, the provisions of the Bill cannot be enforced. The provision of such a force both by land and sea to prevent smuggling on an extensive coast-line must prove exceedingly expensive, while its success will be doubtful; and the Bill will

either deprive a large number of Madras vessels of an ordinary article of freight, or will introduce a harassing system of passes and exemptions, which, to the small ship-owner, means either cost in money or loss of time."

The Hon'ble SIR ALEXANDER ARBUTHNOT thought, as the information which had been circulated to the Council in reference to this Bill was considered by the hon'ble member to be defective, it was desirable that the correspondence which had taken place should be further examined and an ample selection printed and circulated for the information of members before the question of passing the Bill was taken into consideration. He hoped that, with that understanding, the hon'ble member would be satisfied.

The Hon'ble MR. HOPE said that, after listening to the remarks of his hon'ble friend Mr. Dalyell, he felt somewhat disposed to infer that his hon'ble friend's own recollection not being very complete as to what had passed when the Bill was introduced, he had attempted to refresh his memory by consulting certain incomplete and inaccurate accounts, instead of referring to the authorized records of the Council. MR. HOPE thought that when reference was made to those records, it would be seen that, on the occasion of introducing the Bill, he had given to the Council sufficient information as to the main principle of the measure. He did not understand that it was necessary or customary, in introducing a Bill, to do more than to sketch its general principle, and to state briefly the necessity which gave rise to it. That sketch he considered that he made. He thought he had said everything that was necessary on the first occasion; especially considering the fact that his hon'ble friend Mr. Dalyell was about to be appointed a member of the Select Committee, which would afford him full opportunity for considering the Bill in any form or at any length he thought proper. As far as he was aware, it was not customary in introducing a Bill to lay before the Council a complete printed *résumé* of all the correspondence. What was done was to explain the principle of the Bill. It then issued to the Local Governments for their opinion, and all the papers received in reply were printed and circulated, and past records were consulted when necessary. Therefore, under the circumstances, and explaining as he did the reasons and necessity for the measure, he did not think that he had afforded an insufficient account of what was proposed to be done. He was glad, however, to think that his hon'ble friend himself had had full opportunity of perusing the papers, which had been sent to him as soon as they had been collected. As for the non-production of the papers at the time of the introduction of the Bill, and the amusing story of their being very voluminous, and left at home, he would remind the Council that what had really taken place was, that His Excellency the Viceroy having been absent on a tour at the time the Bill had been brought up in the Executive Council, and consequently being unaware of what had taken place, had asked him whether the Bill was the result of communication with the Local Governments, and he had replied that there had been a voluminous correspondence with them, which had lasted, as well as he remembered, for four years, but he had not got the papers with him. The same reasons, as to want of information, which were offered by his hon'ble friend for not accepting the measure would, MR. HOPE thought, justify him in not replying to his criticisms in detail until all the papers were before the Council.

The Hon'ble MR. DALYELL desired to explain that the expressions which he had ascribed to his hon'ble friend were taken entirely from the official report of the proceedings of the Council, and he believed that if anybody would take the trouble to compare the version of his hon'ble friend's remarks which he had just given, with the official report of them, he would find them almost word for word the same.

PRESIDENCY MAGISTRATES BILL.

The Hon'ble MR. HOPE also moved that the Reports of the Select Committee on the Bill to extend certain parts of the Code of Criminal Procedure to the Courts of Police Magistrates in the Presidency Towns be taken into consideration.

The Hon'ble MR. COWIE said there was one feature in this Bill to which he desired to offer strong opposition; that portion or clause which proposed to give the Presidency Magistrates greatly extended criminal powers, namely, to sentence prisoners to two years' imprisonment. No doubt that had been introduced in order to relieve the High Courts of a great deal of petty business. But he maintained that it overshot the mark. Many years ago he was told by persons who served as grand jurors and petty jurors, of the very paltry nature of the cases which were sent up to the then Supreme Court for trial, and that was a great error. But now the proposal which had been made much overshot the mark, and he could not sit content to see Magistrates with no great experience authorized to sentence persons to the extreme punishment of two years' imprisonment. In London the Police Magistrates were always Barristers of considerable standing and great experience, sometimes of ten, twenty or thirty years, and he believed that the extent of imprisonment they could award was six months; every offence deserving higher punishment they were obliged to commit to the Court of Criminal Sessions. Why in Calcutta gentlemen of much less experience should be allowed the power of sentencing to four times the amount of imprisonment, he could not for the life of him understand. He was bound to believe that the six hon'ble members who had signed the report of the Select Committee had given great consideration to this and other points of the Bill, but there was such a thing as reconsideration, and if it was possible he would ask that the Bill be recommitted, in order that this point might be again considered. But if that could not be done, he could only record his protest against the measure, and his hope that the Presidency Magistrates would use as little as possible the new powers with which they would be invested.

The Hon'ble MR. HOPE thought it due to the Council to offer a certain amount of explanation supplementary to that which was recorded on a previous occasion. It would be remembered that the Bill laid before the Council in February 1876 was simply an application of the Code of Criminal Procedure (as it stood) in almost all cases excepting certain ones in which alteration was desirable in the Presidency-towns. And the only material difference between it and the Code of Procedure for the Mufassal was a difference in the extent of power which it was proposed to give. It was then proposed to give the Presidency Magistrates without appeal double the power of imprisonment they previously possessed, that was, to give them the power of sentencing without appeal up to one year instead of six months, and also to raise their power of fine up to Rs. 1,000; and it was further proposed to empower them to sentence, subject to appeal, up to two years, in the same manner as the District Magistrates in the Mufassal did. The Bill was republished, and all the objections received were fully considered and a further report was presented in June of last year. The Bill as then laid before the Council contained very material alterations in wording and arrangement. Moreover, it went back so far as to reduce the proposed summary power of one year's imprisonment to the existing summary power of six months and the fine to two hundred rupees. At the same time it left the limit of sentence subject to appeal as was originally proposed. It likewise made three alterations of considerable importance in the nature of the record. It required that the Presidency Magistrate should record the evidence in all appealable cases and in all cases of fine above two hundred rupees and imprisonment exceeding a term of six months. It likewise obliged him to frame a charge in all cases punishable with imprisonment above six months, and laid on him the obligation of recording the reasons for his judgment in all cases whatever of imprisonment, even for a day, and in every case of fine exceeding fifty rupees. It also made another alteration preventing the Magistrate from issuing process upon mere suspicion.

The Bill as now for the fourth time laid before the Council contained only one alteration as to jurisdiction as revised on the last occasion, which was made on the joint recommendation of the Presidency Magistrates of Calcutta, Madras and Bombay, and was to the effect that in cases of fine only, the Magistrate need not record his reasons for conviction, except where the

fine exceeded two hundred rupees, instead of fifty rupees as at first proposed. As regards the constitution of the Courts, however, the Bill made a very important enlargement, for it provided, in accordance with a recommendation made by Sir Richard Temple and repeated by the present Lieutenant Governor of Bengal, that a case might be tried by two or more Magistrates sitting as a Bench. And further, with reference to procedure it made three more amendments in the same direction as the previous one in regard to process. It precluded the Magistrate from ordering a previous enquiry by the Police to ascertain the truth of a complaint; it provided that warrants of arrest and search should always be directed to the Police instead of allowing them to be directed to private persons in emergent cases; and finally it did not contain the clause which had been inserted in the previous Bill, with the view of placing a telegram on the same footing as a letter as regards the power of having it produced in open Court.

On the question of jurisdiction, MR. HOPE proposed to remark at somewhat greater length. He himself was one of those who regretted the change made in June last, of reducing the summary power of the Presidency Magistrates from one year to six months, because it appeared to him that the very material restrictions imposed on the Magistrate of framing a charge and recording the evidence and the reasons for his judgment were quite sufficient. And for this he could now say that he had very high authority on his side. He knew that there were Judges of the High Court, both European and Native, who shared the opinion he held, and he might possibly quote even higher authority. He would ask why Presidency Magistrates should not be competent to exercise the power now proposed to be given to them? He was glad to think that the post of Presidency Magistrate was held in all the three Presidency-towns by Native gentlemen as well as European. In regard to these Native gentlemen, he would not be guilty of the impertinence of expressing his personal or individual opinion as to the manner in which they performed their duties. But he might say, without fear of contradiction, that they performed them to the entire satisfaction of the public at large. He need hardly do more than call to mind two cases which had occurred in Bombay during the past year, in which it had happened that European gentlemen of high position had been brought before Native Magistrates, and it was universally agreed on those occasions that even the Barrister Judges of the High Court could not have shown greater fairness, tact and judgment than had been shown by the Native Magistrates. He would further remind his Native friends who might be disposed to object to this increase of power given to Native Magistrates, that their argument might be used against themselves. If they were not prepared to allow a Native Magistrate in the Presidency-towns to exercise the power, subject to appeal to the High Court, of passing sentences of imprisonment up to two years, and of six months without appeal but subject to *certiorari*, how could they maintain that their countrymen ought to be made District Judges with powers infinitely greater, and District Collectors and Magistrates with all the great powers of an executive nature which we knew they exercised? Then again as to the objections made to such Presidency Magistrates as were Barristers. If they were unfit as a class to have the powers proposed, how could they be fit for Mufassal Judgeships and Benches, to which some people desired to appoint them?

But people might answer—"our objection was not based on the ground of unfitness of the persons appointed, but on our preference for the system of trial by jury which we happen to enjoy in the Presidency-towns." Now this appeared to him to be an objection which was based on sentiment, and it might be said to be as useless to argue against sentiment as to argue about tastes. Trial by jury was a very old institution; it had a very long history, and a history which was studded with conspicuous failures. The fact was, that although it might be a good institution under ordinary circumstances, it failed completely where public feeling was excited. Whenever any strong sentiment possessed the public mind, it was reflected in the jury. We had only to look to Ireland to see that, in cases where religion or politics were concerned, the jury-system did not ensure justice. In England, again, we saw the same

thing when national antagonism was raised by the Orsini trial. And in India we had only to look round us to be aware that it was a constant complaint that justice was not invariably done when the jury had to decide between a European and a Native. In short, one might say that it failed to give either to society or to the subject special protection just at the very time when there was the greatest need of it. One would be disposed to think that trial by a Judge who was trained to weigh evidence, and who was controlled by an intelligent Bar and also by means of a writ of *certiorari* and a provision for appeal, would be more likely in the long run to give satisfactory results than the institution to which he had referred. However, as he had said before, there was little use in arguing against sentiment. The Bill as it stood practically yielded to the force of that sentiment as regards many kinds of cases which would have gone before a Magistrate under the Bill as it was, but which would not do so under it as now amended; and it only withdrew from a jury minor cases, such as were daily tried in the Mufassal without practical harm, though under less light. For further improvement we must trust to time. Time had effected great wonders in the direction of law-reform. We had lived to see that provisions of law which less than a century ago had been considered as the perfection of human wisdom were now considered the perfection of human folly. Already, trial by jury was quietly abandoned in England, in a considerable class of cases, and he had very little doubt that eventually it would be relegated, except in rare instances, to the institutions of the past. It would come to hold, he trusted, the position which we saw occupied by some bowl of ancient and valuable China, placed on high on the mantel-piece or the pier-table for general admiration, but never used except on occasions of the greatest importance. Or again, to change the metaphor, it might come to be treated like that most venerable and venerated personage, our grandmother. We were all familiar with her aspect in old age, surrounded by a large circle of affectionate and respectful relatives, relieved one by one of the various functions, social and domestic, which her declining years rendered her unable to perform, and at last laid gently and honourably in the grave by grandchildren and great-grandchildren, to whom the freshness of her budding youth, and the beauty of her matured womanhood were alike traditions of an earlier generation.

He now turned to a less sentimental branch of the subject, and would observe, with regard to the provision for Benches, that those who had heard the remarks he had made as to the Native Presidency Magistrates would quite understand that their admission to Benches could not otherwise than meet with his approval. He could not say that he himself looked for any great advantage from the collective action of Benches, or thought that the decisions of three Magistrates were likely to be more wise than those of one. But the establishment of Benches would have one valuable recommendation; it would induce Native gentlemen to give their attention to public business, and he hoped that from sitting jointly with stipendiary Magistrates they would be led to sitting singly. Native Honorary Magistrates had done, and were doing, much good work in the Mufassal, and he had no doubt that they might do the same in the Presidency-towns, with equal advantage to the political relations of the State and the public, and to the stipendiary Magistrates who would be relieved in their laborious duties.

With regard to the three further changes made in limitation of the Magistrates' powers, the chief objection that occurred to him was that they would render more difficult the assimilation at some future date of the Presidency procedure to that in the Mufassal.

He should perform his duty very imperfectly if he omitted to notice a memorial which had been received a week ago. It was presented by a society called the Indian League, and it purported to embody certain Resolutions adopted at a public meeting held in March last. But in March last we had not presented our second amendment of the Bill, and yet all the references in the memorial were to the Bill as last amended; so that he had some doubt how far this influential meeting could be said to sanction the present memorial, and whether, if the meeting had seen the amended Bill, they might not have deemed further agitation to be unnecessary. As regards trial by jury, to which much of the memorial was devoted, he need not say anything further. But

there were some minor points which should not be overlooked. The memorialists were under a misapprehension in supposing that the Magistrate was not required to assign any reasons. Again, section 117 was simply copied from the Criminal Procedure Code. Then he found here again entertained a misapprehension which he had endeavoured on a former occasion to dispel, that an appeal by the Crown was given to the Government as the executive Government—that it was a right which was not enjoyed by a private party; whereas in fact an appeal was given to the Crown on behalf of the whole community, and was scarcely ever exercised by the Crown in its own behalf.

There was one point in regard to which the Council was very much indebted to the Indian League. They had pointed out a blot which he proposed to remedy. Under section 174 as it at present stood, the High Court would be able to inflict a higher punishment than what the Magistrate could impose. He would move an alteration in section 174, clause (*b*), to meet that objection.

There were several minor matters in noticing which he would not take up the time of the Council. There was also an objection raised to section 17 with respect to the liberation of a female above the age of fourteen years, and it was said that the section was "fraught with the gravest mischief." But the memorialists overlooked the fact that this provision was in their own Bengal law, Act IV of 1866, section 31. He was not aware that the gravest mischief had arisen from it. It was also noticed with reference to section 87 that hardship would arise owing to the Bill making no distinction between summons-cases and warrant-cases, but the fact was that no summons-cases were tried by the High Court.

There was only one other matter, which had been brought to their notice this morning. It related to the definition of "pleader" in the Bill. The Bill as originally drafted provided that an accused person might be defended by any person with the permission of the Magistrate. This would give, it had been said, an arbitrary power to the Magistrate, who might refuse to allow a prisoner to be defended, and it was amended by giving a right to be defended by an advocate, attorney or pleader, and "pleader" was defined to mean a pleader of a High Court established by Royal Charter. It was now pointed out that the definition was not comprehensive enough, as there were persons practising in the Calcutta Police Courts who were not pleaders of the High Court. That might perhaps be met by adding that "pleader" should mean a pleader as defined under the Act XX of 1865. But it was also objected that even if those words were inserted some other difficulty might arise in Madras or Bombay. He therefore proposed to strike out the definition altogether.

MR. HOPE had to say in conclusion that not only had he taken up much of the time of the Council in making these remarks, but he must plead guilty to two previous convictions for the same offence, and he would only express the hope that the Council would render it impossible that he should offend again by passing the Bill at that sitting.

His Honour THE LIEUTENANT GOVERNOR thought the objections which had been made to the Bill by an hon'ble member were valid and were deserving of fair consideration, but he submitted that they had already received the most careful consideration. The Bill had been before the Council in one form or another nearly four years, and there was no part of it which had received so much consideration and been the subject of so much discussion as the special point which the hon'ble member had raised. The objection of the hon'ble member, as far as he understood it, was made solely to the increased powers to be conferred on Magistrates. But he forgot that precisely the same powers to which he objected were exercised throughout the length and breadth of the country by Magistrates in whose selection we had not the same choice as we had in the case of the Presidency Magistrates. We were obliged to employ a number of officers in sub-divisions and sadr stations of whom we knew very little and had not the same previous knowledge as we had in the case of Magistrates appointed in the Presidency-towns. He should have thought that if in any place it was safe to leave these large powers in the hands of Magistrates, it would be in the Presidency-towns, where every judgment and every word uttered was taken down by reporters and published in the newspapers

and subjected to public criticism and opinion, and where all orders would be subject to an immediate appeal to the High Court on the spot. He thought that if such powers could be exercised at all by any one in the country, they could be more safely exercised by Police Magistrates in the Presidency-towns than anywhere else, and it was out of the question now to go back and say that these powers should not be exercised in the interior.

Then as to the removal of cases from the cognizance of juries, HIS HONOUR thought that by so doing we were more likely to get juries to devote their careful attention to the matter brought before them and arrive at good verdicts, than by over-burdening them and employing them for days and days in deciding petty cases. It must be remembered that our jurors were all busy men and had to be taken away from their work at much inconvenience to sit on juries, and he thought that, as a rule, we should get a better class of men if they found they were only called upon to attend to cases of really serious importance. Other remarks which he had intended to make had been anticipated by his hon'ble friend Mr. Hope, and he need add nothing further.

The Hon'ble MR. DALYELL said he had only one word to say by way of supplement in reference to the hon'ble Mr. Cowie's remarks as to the increased powers proposed to be given to the Presidency Magistrates, that practically the Magistrates in Madras had exercised these powers for a long series of years. The Madras Act permitted them, with the consent of the prisoner, to exercise these extended powers. In all such cases the prisoner was asked whether he wished to be tried summarily by the Magistrate or by the High Court, and he believed that prisoners had always preferred to be tried summarily. No objection whatever had been raised to this course, and as far as he was aware no failure of justice had taken place. The High Court had also been largely relieved of business, to the extent of about three-fourths, that was to say, its present business would be just four times as much if the Presidency Magistrates did not exercise the powers which they did.

The Hon'ble MAHÁRÁJÁ NARENDRA KRISHNA said the Police Magistrates Bill was framed with a view to remove the uncertainty of the procedure for the trial of cases by the Presidency Police Magistrates. So far as it removed that uncertainty and simplified the present complicated practice obtaining in the Police Courts, the proposed measure would no doubt be hailed by the public as an improvement upon the old law. It was also satisfactory to notice that the Bill made no distinction between the powers of a European and Native Magistrate with regard to the trial of British-born subjects.

But he might be allowed to notice some other provisions of the Bill upon which some dissatisfaction might be felt by all sections of the Calcutta community. He alluded to the extension of the jurisdiction of the Police Magistrates as regards the trial of cases hitherto triable by the High Court Sessions. At present the Police Magistrate was invested with the powers of a second class Mufassal Magistrate under the Criminal Code of Procedure. To raise his powers to that of a first class Magistrate, and at the same time to allow him to try a large and serious class of offences without the aid of a jury, would create discontent and would, the Mahárájá feared, work serious evil. If it be determined however to increase his powers, he would recommend the limit to be one year's imprisonment and a fine of five hundred rupees, with an appeal to the High Court in all cases when the sentence exceeded six months' imprisonment and a fine of two hundred rupees, as very properly provided for by section 167 of chapter XII of this Bill. The Natives of this city had come to regard the jury-system as a valuable safeguard of their rights and liberties. They cherished it as one of their dearest privileges enjoyed for a long time past. It was not therefore desirable to take away this safeguard by increasing the number of cases triable by Magistrates under this Bill. As by sections 115 and 116 of the Bill they would be allowed to try cases summarily when the punishment would not exceed the period of six months or a fine of two hundred rupees without the framing of a charge against the accused and the recording of evidence of the witnesses, he would suggest that in all cases in which the Magistrate would inflict more than three months' imprisonment, he would be bound to record the evidence of the witnesses adduced in

behalf of both the parties, and also to state in his judgment his reasons in full for conviction, so that the party who might feel himself aggrieved might have his remedy by way of motion before the High Court. The Mahárájá was certainly of opinion, and he believed the public hoped and expected, that in all cases in which the accused would be liable to more than a year's imprisonment, he should be tried by jurors at the High Court Sessions. The recording of evidence in the cases cited by him would, he apprehended, entail such an amount of work as could not be performed by the present staff of Police Magistrates; but in the interest of justice it would be necessary that the record should be full and complete, even if, for the securing of that object, it be necessary to entertain an additional number of Police Magistrates.

The Hon'ble SIR ARTHUR HOBHOUSE said—"This Bill has been so long before the public, and has met with so much attention and criticism, official and other, that I shall confine the remarks I have to make to its most general and important features. I was indeed under the belief that the objections made to our original proposal to increase the jurisdiction of the Presidency Magistrates had been so carefully considered and so completely met by the modifications which were made in the Bill last June, that all unfriendly feeling to the measure had died away. Notwithstanding the lapse of many months, we heard of no objections to our Bill No. V, except that the Magistrates themselves thought that we had been too cautious in requiring them to record reasons for their judgments in certain cases. A paper however has very recently come to us from a very respectable Society, the Indian League, which shows that the respectable feeling which loves whatever exists has not been quite overcome in all quarters. And we have to-day heard from two of our honourable colleagues that they also have objections to altering that which exists.

"With reference to the memorial of the Indian League, I wish to make some remarks to the Council. They take objection to three important points of principle comprised in the Bill, and more or less discussed in the papers which reached our hands prior to last June. The first, and I think the most important, point is the right of appeal by the Crown in cases of acquittal; the next is the power of enhancing punishment on an appeal by the prisoner; and the other is the increased range of jurisdiction given to the Presidency Magistrates.

"As regards appeal by the Crown, I am glad to see that the objections to it are now confined to a narrower range than formerly. I had the honour some few weeks ago to meet a deputation of the Indian League, at which they contended that it was not just or expedient to allow such an appeal at all, and I on my part did my best to point out that in India appeals were found to be necessary things; necessary evils it may be, but still necessary things; that we had therefore allowed them to the prisoner, and that for the welfare of society, they ought to be allowed to the Crown. I cannot however flatter myself that it is owing to any eloquence of mine that the fundamental objection then felt by them has now disappeared. I suspect that the change is owing to the eloquence of events: for we have recently seen here in Calcutta under our very eyes two striking cases, in which the Lieutenant Governor of Bengal has had to speak his mind, and which I should think would convince the most sceptical that an appeal by the Crown may be a great benefit to society.

"The subject is one on which the Government have lately been making enquiries how the law of 1872 works, and we find that the right of appeal is one which is exercised sparingly and cautiously by the Local Governments, and that both executive and judicial officers are agreed that its operation is beneficial.

"No doubt it is a power which should only be exerted in adequate cases: and if that precaution is observed, it is certain that the suspicion, which so far as I know was only due to its novelty, and which has already died away to a great extent, will wholly disappear; and this appeal will be looked upon as an integral and valuable part of our criminal system.

"But I turn now to the special objections taken by the memorialists. The first is as follows :—

"'In connection with the subject of appeal, your memorialists further feel themselves bound to protest against the anomalous and inequitable character of the distinction laid down in section 168 of the Bill, by which it is proposed not only to reserve to the Government a right, denied to the subject, of appealing against an order of acquittal or dismissal, but while the period for an appeal is limited, in the case of private individuals, to a period of one month from the date of the order appealed against, a period of two months is allowed to the Government for the same purpose.

"'The grievous inequality involved in these provisions is, your memorialists submit, materially aggravated by the circumstance that the Magistrates are appointed, and may be dismissed, by the very authority on whom it is proposed to confer this extraordinary and exclusive right of appeal, and by the vast disparity in power and position between the Government and private suitors.'

"The complaint then is, not that any appeal is given at all, but that there is an inequality between the Crown and the prisoner. The first allegation of inequality is very oddly put, because the memorial complains that the right of appeal against an acquittal is given to the Government, but is denied to the subject. That certainly is so, but then I never heard of a prisoner who desired to appeal against his own acquittal. I suppose the memorial must mean that a prisoner cannot appeal against his conviction. But then the statement, though ceasing to be absurd, would become untrue, for the Bill does allow an appeal by the prisoner against any conviction in a case beyond the present summary jurisdiction of the Magistrates. So the inequality is reduced to this, that the Crown may appeal in all cases, and the prisoner only in the more important ones. But such an inequality as that is a necessary inequality, unless we are to say that prisoners shall have a right of appeal in every case, even if they are fined a pie or imprisoned till the rising of the Court. If there is a conviction, you can distinguish between a light sentence and a heavy one, and say that there may be an appeal in one case and none in the other. But if there is an acquittal, how can such a distinction be drawn? One acquittal is the same as another acquittal, so far as regards the sentence passed. Moreover, though the Crown does not appeal in petty cases, it may wish to appeal on an important question of law, and such questions may arise in a case which is otherwise of no great importance. If anybody will show us a plan for exact equality between Crown and prisoner, we may consider it, but nobody has shown us such a plan, and I believe nobody can do so. If the Crown is to have an appeal at all, the cases for appeal must be left to its discretion. It has not yet busied itself with appeals in petty cases, and I venture to say that it will never do so.

"The other ground of inequality alleged by the memorial is that the Crown has a longer time for appealing than the prisoner has. I must say that these gentlemen seem to have looked on this matter as one of pure arithmetic. They seem to have reasoned thus: a right of appeal is a good thing, therefore a person who enjoys that right for two months is twice as well off as one who enjoys it for only one month. But I beg to say that the right of appeal is not a luxury or matter of enjoyment to some favoured person. It is, as my friend the Lieutenant Governor well knows, a difficult and responsible duty, to be discharged by high and responsible officers. To enable them to discharge it properly, time must be given for the case to reach their hands. They must take legal advice, and they must make such enquiries as are necessary to understand the exact nature of the case and to judge whether it calls for an appeal. If time is not allowed for these things, the public will not get the amount of benefit which the right of appeal by the Crown is calculated to confer. Cases will be appealed in a hurry which further enquiry would show were not worthy of appeal, merely because the time is running out within which the Government must make up its mind. This provision of the Bill has been framed in the public interest, and for the purpose of having the question of appeal or no appeal maturely decided by the high officers who have to exercise their discretion on it.

"I say moreover that, looking at the question merely as one of time, and of work to be done in a given time, the prisoner has before him a very simple

problem to be decided by himself alone; the Crown a complicated one on which several opinions must be taken, and that one month to the prisoner is a more liberal allowance of time than two months to the Crown.

"The next objection taken to an appeal by the Crown is thus stated—

"'A similar objection applies, in the opinion of your memorialists, to the further provision contained in this section, by which it is declared that, in cases so appealed, the High Court may direct a new trial by any Presidency Magistrate; for however justifiable the distrust implied in an application for the removal of a trial may sometimes be in the case of a private suitor, it seems neither decorous nor politic that the Government, in whose favour alone this power could be exercised, should call in question the competency of a Magistrate selected by itself.'

"Here are distinct assertions that certain powers are given in favour of the Crown which are not given in favour of the subject. And whatever may be the value of the argument on pure logical grounds, I decline to examine it, because no one of the assertions on which it rests has any foundation in fact. It is not true that the power of directing a new trial can be exercised only in favour of the Crown, for by section 174 of the Bill it can be exercised in favour of the prisoner. The section under consideration says nothing about the removal of a trial, but speaks only of a new trial. And even if a new trial is ordered to take place before another Magistrate, in the first place that will be the act of the High Court and not of the Government, and in the second place it will not involve any question of the competency of the Magistrate, but only of his fallibility. Unfortunately we are all fallible however competent we may be, and it is in consequence of this common touch of nature, that any appeal at all is necessary.

"So much I have to say of the reasons which are actually expressed in these objections. But besides these it seems to me that there is underlying the whole an idea as false and mischievous as any idea can be; an idea not plainly expressed, probably an attempt to express it would at once show its true character, but so far implied, that if you take it away, the words used become meaningless and lifeless. The idea I speak of is, that in this matter of criminal procedure the interests of the public and those of the Government are contradictory and antagonistic to one another. And I am the more desirous of remarking on it because it enters more or less into other arguments put forward in the paper I am commenting on, and in other utterances both on this measure and on cognate ones.

"Now I ask, what is the meaning of all these insinuations about the great disparity in power between Government and private suitors, which means prisoners: about Magistrates being appointed and removed by Governments, and about its being indecorous and impolitic that Government should call in question the competency of a Magistrate selected by itself? If these expressions mean anything at all, they mean that the Government is to be looked upon as a wicked Government, prone to use Courts of Justice as engines of oppression, and to disgrace Magistrates who are too upright to comply with its wishes. Anything more contrary to the fact, anything more purely imaginary, it is impossible to conceive. The various branches of the Indian Executive Government, being human, are liable to make mistakes, but they certainly do administer the criminal law, whether as original prosecutors or as appellants, in perfect good faith and in the public interest; and since I have been in India I have never heard it so much as alleged that a single appeal from an acquittal or a single prosecution originated by the Government was a vindictive or an improper proceeding. But if there is nothing of that kind to be found in our society, all these remarks are gratuitous insinuations which had better be omitted.

"In the year 1874, when we were making some small alterations in the Criminal Procedure Code, some other friends of ours—the British Indian Association, then represented by the Mahárájá Ramánáth Tagore and now by the two able gentlemen who sit at this table—urged us to revise the Code, and to take away some powers that had been given to the Crown; amongst others, this power of appealing from an acquittal. On that occasion I objected to proceed upon speculative grounds, and asked to be supplied with evidence that the power in question had been worked harshly. No such evidence was forthcoming, and the Council did not think it desirable to make the suggested alterations. So I would tell these memorialists that an ounce of fact will be of greater value than a hundredweight of insinuations that Government is in the habit of abusing power given to it for the public good.

"I do not indeed suppose that the memorialists have formulated to their own minds the proposition which they must maintain in order to gain a footing

for the kind of argument I am speaking of. On the contrary, I feel sure that they, in common with other educated Indian gentlemen, would disclaim all such ideas. All suggestions of this kind seem to me to be mere borrowed plumes which do not fit the borrower. They are borrowed from speeches and writings of purely English origin, which, whatever may be thought of their value as applied to England, are applicable to certain phenomena of English society and certain phases of English history which find no counterpart or similitude in India.

"I will further illustrate this extraordinary preference of speculation to hard facts from the comments which the same paper makes on section 17 of the Bill. That is the section which enables a Presidency Magistrate to set at liberty a woman or a female child under the age of 14 years who is detained for an unlawful purpose. Upon this the memorialists say that it involves an innovation in the existing law, if it is not in direct conflict with sections 372 and 373 of the Penal Code, and that it is fraught with the gravest mischief. Now I can assure the memorialists that there is no conflict between this section and the Penal Code, for the two laws relate to quite different subjects. Whether the practical suggestion which they go on to make is a good one or a bad one I really do not know; but I know that it would require a great deal of enquiry before we could adopt it. I do not now enter into that matter; for the point to which I wish to draw the attention of the Council is, that our section is no innovation at all. It has been the law in Calcutta for at least twenty years, and if it is calculated to produce the evils which these gentlemen apprehend, those evils would certainly have come to the surface. I ask where is the evidence that this provision has produced any evil at all? There is no such evidence. The evils which the memorialists have conjectured are so invisible, so completely non-existent, that they actually do not know that the law they so fear has been long at work in Calcutta.

"I pass now to the question of enhancement of punishment on appeals by prisoners. On this point it appears to me that the memorialists have made one sound stricture. It does not seem to me a matter of great importance, but it is sound and just as far as it goes; and my friend Mr. Hope is about to move an amendment which will meet the objection made by the memorialists. But what is their objection to the principle? It is thus stated,—

"'Section 174 of the Bill gives the High Court, on appeal, power to enhance any punishment that has been awarded by a Magistrate. Your memorialists are aware that the Code of Criminal Procedure already vests the Appellate Courts with a similar power in cases tried in the Mufassal; but they submit that, though the provision is one which, in rare cases, may promote the ends of justice, this consideration is of trifling moment compared with the fact that the fear it must create is calculated to deter innocent persons from exercising the right of appeal, and that it is thus opposed to the principles of both justice and humanity.'

"Now, of this argument as of the former ones, I must say that it is a pure speculation without any basis of fact or probability. I ask what evidence there is of the assertion that any one, be he innocent or be he guilty, is deterred from appealing by the fear of enhanced punishment? There is no such evidence. Speaking of the matter as one of probability, I should say that an innocent man would never be deterred by such a consideration. A man who knows in his own conscience that he is innocent, is just the man who will not suppose that the higher Court will punish him more heavily. On the contrary, he will go to it in the hope that his innocence will be made clear. No doubt the guilty conscience which makes cowards of us all may be so deterred, and if so, I do not see the harm of it. But I cannot believe that the motive would operate at all except in those cases in which a man, being guilty, had the good luck to escape in the lower Court with a very light punishment. Such a man, if his punishment could by no means be increased, might hope that luck would befriend him in the Court above more than it had already done in the Court below. But if he knows that his punishment can be increased, he may think twice over it. Such cases are not likely to be numerous enough to affect the bulk; and in fact we have no reason to believe that the percentage of appeals has been affected by the change in the law which was effected in the year 1872.

"I may add that this change of the law is one which has also been the subject of recent enquiry by the Government, and the result of the enquiry is that the Courts have used their power with much discretion and with quite satisfactory results.

"The third general objection taken by the memorialists has already been observed upon, namely, the extension of the power of the Presidency Magistrates. They speak of its magnitude in rather exaggerated terms, and say that

it can only be justified by some sudden emergency or some very general increase of criminality. Surely it can be justified by showing that it conduces to the general convenience and to the despatch of business; that it is a jurisdiction which is worked without mischief and with benefit over all India except the Presidency-towns; that it is of the same nature as that which has long worked in the Presidency-towns themselves, only with more safeguards attached to it; and that the circumstances of the Presidency-towns, though differing in some respects from the Mufassal, do not differ in this respect that we should be inclined to give a less amount of jurisdiction to the Presidency-town Magistrates than we give to Magistrates in the Mufassal. All we purpose is to give to the Presidency Magistrate the same amount of jurisdiction as a first class Mufassal Magistrate has. Is there any reason for thinking them unfit to exercise such powers? I have heard none. Is there any reason for thinking them fit? I will answer in the words of the British Indian Association, who sent us in a paper when they were opposing this Bill in a prior stage.

"The paper I should say is a very well written one, very interesting from its history of the law, and it has exercised great influence on the deliberations of the Select Committee, and has had a considerable share in moulding the Bill into its present shape. Hear what it says:

"'The present limits of the summary jurisdiction of the Magistrates of the Presidency-towns has worked satisfactorily, and your memorialists are not aware that any public inconvenience has accrued therefrom.'

"Now, speaking broadly, the Presidency Magistrates have for twenty years and upwards been able to inflict fines to the extent of Rs. 200 and imprisonment for a term of six months. That they can do without keeping any record, and with no appeal from them to the High Court; and no sort of complaint is made. Is it likely that they will begin to abuse their powers because they are empowered to pass heavier sentences coupled with the obligation of keeping a record and with the liability of appeal to the High Court? Is it not rather more prudent and more wise to argue from the known to the unknown, and to conclude that those who have been found faithful in a few things may well be made rulers over many things?

"My Hon'ble friend Mr. Cowie has told us that we are overshooting the mark. He has not told us how far we are overshooting the mark, or indeed what the mark is. That I suppose he leaves us to find out. I say that it is impossible to draw any line in such a matter as this, that will be perfectly satisfactory to all minds. I believe I am not misrepresenting the Lieutenant Governor of Bengal when I say that in his opinion we are undershooting the mark, for he thinks that some more jurisdiction may well be conferred on the Town Magistrates.

"Every time such a subject is discussed, there will be some differences of opinion. For an illustration, I turn again to the paper of the British Indian Association. I find that in the year 1856, when it was proposed to confer on the Magistrates of Calcutta the larger jurisdiction which they have since exercised, a most weighty opinion was given against the proposal. Sir Lawrence Peel advised the Government that they ought not to give so large a jurisdiction to a single Magistrate. But the Association go on to tell us that the Bill was passed into law without material modifications, and also that the result had been perfect contentment.

"I dare say the same thing will happen twenty years hence, when the Government of the day come to propose some further extension of the system. The Council will then be told that in the year 1877 two eminent Members of Council, who will then I hope be enjoying a combination of ease with dignity, had opposed the extension of the Magistrates' powers and had said that it would be a dangerous thing to give them so much power. And I trust that the Law Member of that day will be able to answer as I do now. 'Nevertheless, the Bill was carried with no material change, and the result has been perfect contentment.'

"Now one of the great objects of this Bill has been to assimilate the procedure of the Presidency-towns and that of the rest of India so far as their varying circumstances will admit. In several respects material to the present purpose the circumstances of the two localities differ: and those who study this Bill and compare it with the Code of 1872 will find corresponding differences.

hitherto? The only reason I have heard assigned is that the Town Magistrate is generally a younger man. But on the other hand, he has the advantage of a Bar, a Press, a Public, and the close proximity of the High Court, to which the prisoner may appeal, or which can of its own motion, directly it hears of any thing going wrong, call up any case from a Magistrate to itself.

"No doubt to a certain extent jury-trials will be displaced. They will not however be displaced to the extent which is urged in this memorial, nor to the extent which my hon'ble colleagues appear to suppose, because, they put their objection as though every case which may be dealt with by the Magistrate must be dealt with by him. They have not observed that the Magistrate has full discretion to commit to the High Court—a discretion which doubtless he will exercise in important cases. Neither have they observed that, under the large powers given to it by the Act of 1875, the High Court has a discretion to call up any case they please from the Magistrate's file. I ask whether such safeguards are not ample? Is it not certain that if a case is of such importance as to demand the intervention of a jury, it will find itself before a jury, either by the discretion of the Magistrate himself, or by the intervention of the High Court using the more simple process that we have substituted for the writ of *certiorari*?

"I cannot at all go along with my friend Mr. Hope in his onslaught upon juries. I am an English lawyer and have seen something both of Judges and juries, and I say that, apart from political considerations and looking simply at the object of getting justice, there are many kinds of cases which I would sooner take before a jury than before a Judge. I admit that there are difficulties and drawbacks in the way of working the system in India, but I have certainly no abstract dislike to the jury-system. As far as my mind is concerned, it has never for a moment entered into it to advocate this extension of powers from any preference of some other tribunal to a jury. I rest my case upon the public convenience and upon the wisdom of extending a system which has answered so completely as our system in the Presidency-towns. These arguments are strongly reinforced by what my hon'ble friend Mr. Dalyell has told us to-day of the procedure in Madras. The prisoner there has the rather curious privilege of electing his tribunal: on the one side the High Court and a jury, on the other the Magistrate. And it seems that almost invariably—or I think I understood Mr. Dalyell to say quite invariably—he elects to be tried by the Magistrate.

"Let the Council bear in mind that jury-trials are, and have long been, displaced by the jurisdiction of Presidency Magistrates in the majority of cases, and that not a word of complaint is heard. If you wish to be consistent and say that all criminal cases must be tried by juries, you must alter the law in that direction. But can any reason be assigned why we should keep the line drawn exactly at its present point? Why should we not draw it at a different point, if we can thereby relieve our hard-worked High Courts and jurors of some more of those cases which we are told take up a great deal of their time and constantly turn out to be of a very petty character?

"On this point also the memorialists have insinuated that the Magistrate is appointed and removed by the Local Government, as if the Local Government was a lion going about seeking whom it may devour, or as if a Magistrate's Court was a lurking den in which the innocent may be privily murdered. But I will only remind the Council of what I said before on this topic, and will pass it over without further remark.

"When sinister imputations have been set aside; when hard facts have been substituted for guesses; when exaggerated statements have been reduced to their true dimensions, I think it will be seen that this measure is only a natural, moderate and timely extension of a system which has been thoroughly tried by experience and found to be good and suited to the circumstances of India. I do not often venture to prophesy, because it is a very dangerous trade. But in this case I feel very certain that the arrangements provided by this Bill will work with greater ease and certainty, and with no greater amount of complaint, than the law which is now at work, and that in a few years those who now still forebode evil will have quite forgotten their fears, or if they remember them, will wonder why they should have been excited by so simple and reasonable a change.

"Therefore I hope the Council will accept the Report and pass the Bill

The Hon'ble SIR EDWARD BAYLEY wished to say but a very few words. Indeed after the very able and complete exposition which his hon'ble friend Sir Arthur Hobhouse had just given of the operation of those sections of the Bill to which objection had been taken, there was very little that remained to be said. He only wished to refer to one or two points, one of them of a purely personal nature. He desired, in the first place, to recognize the testimony which his hon'ble friend Mahárájá Narendra Krishna had borne to the general usefulness of the Bill in its present shape, to the effect that it was an improvement in the procedure which now obtained in the Magistrates' Courts; and that if regard was had to the Bill in its general aspect, there was much to satisfy the public that it was a measure calculated to consolidate and improve the existing procedure of the Courts, even if a difference of opinion existed on some minor points.

In the second place, he wished especially to express his own entire concurrence in the opinion which had been given by his hon'ble friend Sir Arthur Hobhouse in regard to juries, and to say that he did not in the least concur in the opinion which the hon'ble Mover had expressed as regards the usefulness of the jury-system. He quite admitted that its usefulness as a judicial instrument was not unqualified, though he was not wholly prepared to condemn it even in that respect, and he agreed with Mahárájá Narendra Krishna and some of the memorials which were addressed to the Council, that it should not be regarded solely as a judicial instrument. It was something more; he would not say that it was exactly a political institution, because, though no doubt the jury-system in our own country had played an important part in history, it had not done so, and was never perhaps likely to do so, in India. It had, however, what he might call a legislative function. He recollected many years ago, when he was a pupil of an hon'ble gentleman who subsequently sat with great honour in this Council—Sir Henry Maine—he recollected his remarking with regard to legislation, that in many instances legislation had a share in maturing and advancing public opinion, while on the other hand, public opinion had often exercised a most salutary influence in correcting legislation; and he recollected Sir Henry Maine giving two instances in which these reacting influences had been experienced. One was the case of the law as to duelling, in which legislation had proceeded in advance of public opinion, and had brought it into harmony with true morality; the other was as regards infanticide, and in that instance a strong expression of public opinion had brought the law, originally severe even to cruelty, into a humane and useful shape. There was no doubt that an expression of public opinion upon the condition of the law was often valuable, and the action of juries was one of the most ordinary means of so expressing the law. It was certain as a matter of fact that by the continued action of juries the improvement in the law of infanticide was brought about, and therefore he thought the institution was one not lightly to be discarded.

He came now to some remarks which were made by his hon'ble friend Mr. Cowie, and which, if he understood him rightly, had not been quite completely answered by Sir Arthur Hobhouse. He understood that Mr. Cowie would draw the line at six months, and he understood the hon'ble gentleman to say that he could see there was no earthly reason why a power which was limited in the case of the London Magistrates should be in any way extended in Calcutta.

[The Hon'ble MR. COWIE explained that he would draw the line at six months without appeal, and twelve months with an appeal.]

The hon'ble gentleman's argument seemed to be, either that there was some inherent propriety in limiting to six months cases which should not go to a jury, and that in fact British legislation always recognized this line of distinction, or else that there was no difference between the circumstances of London and Calcutta. As regards the first argument, he thought it had no exact foundation. He himself recollected many years ago going the round of a petty sessions in Ireland with an officer who was there called a Resident Magistrate. He remembered perfectly that at that time the law certainly admitted much heavier punishments being given by Magistrates in petty sessions without the intervention of juries. He was not in a position to say what the law was now, but he believed it had not been materially altered as to the extent of jurisdiction. The presiding Magistrate in practice, he believed, was usually now a Barrister. At that time it was not so. In that particular case the gentleman was a military officer who held the Peninsular and

Waterloo medals, and he did his work very well. Having himself some experience of magisterial work in India, SIR EDWARD BAYLEY was very much struck with the curious analogy in the character of the cases disposed of and in the way in which they were treated. He believed also—he was not quite certain—that in some of our colonies which legislated for themselves large powers were given to Magistrates to deal with certain cases without the intervention of juries. He believed that his hon'ble colleague Sir Andrew Clarke could confirm him on this point; and that in some colonies, as was said now to be the case in Madras by the Hon'ble Mr. Dalyell, a prisoner was allowed to elect to be dealt with summarily by the Magistrate in preference to being committed for trial to a superior Court. Therefore he thought there was no inherent principle in English law which regulated the limit of punishment to be given with or without the intervention of a jury to six months. He thought that nobody who sat here for a moment would doubt that the circumstances of London and Calcutta were not exactly the same, though in many respects certainly we might wish that they were. But with respect to the particular circumstances which bore on this question, there was no doubt, as his hon'ble friend the Lieutenant-Governor had pointed out, that we had not the same abundance or quality of material for juries, nor had we the same facility for employing the superior Courts, as existed in London. The superior Courts in London especially were comparatively numerous. It was not so in the Presidency-towns, where we had only one such Court, and that much overworked. There was therefore no similarity in the circumstances of London to those of Calcutta, and no principle in law which limited the summary trial of criminal cases to six months' imprisonment. He believed that if the Council had done anything, it had rather undershot the mark than overshot it. He himself, as a member of the Committee, was personally in favour of still further enlarging the powers of the Magistrates. But he coincided with the majority of the Committee in thinking that probably as an experiment it would be safer to limit it to the period fixed in the Bill. He had no doubt, as his hon'ble friend Sir Arthur Hobhouse had said, that experience would show that we ought to have proceeded still further.

The Motion was put and agreed to.

The Hon'ble MR. HOPE moved that, for clause (*b*) of section 174 the following be substituted :—

"(*b*) enhance any punishment which has been awarded, but not so as to inflict a greater punishment for the offence which, in the opinion of the High Court, he has committed, than the Presidency Magistrate could have inflicted for such offence, or"

The Motion was put and agreed to.

The Hon'ble MR. HOPE moved that the definition of "Pleader" be omitted

The Motion was put and agreed to.

The Hon'ble MR. HOPE then moved that the Bill as amended be passed.

The Motion was put and agreed to.

STRAITS SETTLEMENTS EMIGRATION BILL.

The Hon'ble SIR ARTHUR HOBHOUSE presented the Report of the Select Committee on the Bill to regulate the Emigration of Native Labourers from the Presidency of Fort Saint George to the Straits Settlements.

PANJÁB COURTS ACT AMENDMENT BILL.

The Hon'ble MR. EGERTON asked leave to postpone the motion for leave to introduce a Bill to consolidate and amend the law relating to Courts in the Panjáb.

Leave was granted.

The Council adjourned to Wednesday, the 14th March 1877.

CALCUTTA,
The 28th February 1877.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Wednesday, the 14th March 1877.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding*.
His Honour the Lieutenant Governor of Bengal, K.C.S.I.
Major-General the Hon'ble Sir H. W. Norman, K.C.B.
The Hon'ble Sir A. Hobhouse, Q.C., K.C.S.I.
The Hon'ble Sir E. C. Bayley, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble Sir J. Strachey, K.C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble D. Cowie.
The Hon'ble Maháráját Narendra Krishna.
The Hon'ble J. R. Bullen-Smith, C.S.I.
The Hon'ble F. R. Cockerell.
The Hon'ble B. W. Colvin.
The Hon'ble R. E. Egerton, C.S.I.
The Hon'ble Maháráját Jotíndra Mohan Tagore.

MILITARY LUNATICS BILL.

Major-General the Hon'ble SIR H. W. NORMAN moved for leave to introduce a Bill to facilitate the admission of Military Lunatics into Asylums. He said that it had recently been brought to notice that no legal authority existed under which European soldiers could be received into or retained in Lunatic Asylums, and His Excellency the Commander-in-Chief recommended that a Bill should be introduced to supply the omission. His Excellency also recommended that Act XXI of 1872, for lunatic Native soldiers, should be repealed, and its provisions incorporated in the Bill, and that, at the same time, a small addition should be made detailing the procedure under which any Native soldier might obtain his discharge. If permission were given, he proposed to introduce a Bill which would supply these wants.

The Motion was put and agreed to.

ACT No. XXIII OF 1867 CONTINUANCE BILL.

The Hon'ble SIR EDWARD BAYLEY moved for leave to introduce a Bill to prolong and amend Act No. XXIII of 1867 (*for the suppression of murderous outrages in the Panjáb*). He had to state that the Act, which was passed on the 18th March 1867, was passed for a period of ten years only. It would in consequence expire on the 18th of the present month, and some explanation was due to the Council of the reasons which delayed the introduction of the present Bill till so late a period. The truth was that some months ago the Panjáb Government submitted a draft measure for the consolidation of several special laws, chiefly relating to procedure, which now obtained in the Panjáb, and among them Act XXIII of 1867 was included. That draft measure necessitated very careful enquiry into various subjects, and a good deal of delay had consequently arisen, more particularly with regard to certain points in civil procedure which depended very much upon the shape which the Bill now before the Council for amending the Code of Civil Procedure would assume.

The consequence was that the remaining period of the currency of the Act had slipped by almost without notice, and it was now likely that the Panjáb Courts Bill, as it was called, would not be introduced into this Council and become law at least for several months to come. Moreover, on reconsideration, the Panjáb Government would prefer that this Bill, which was altogether different in substance to the rest of the Draft Bill, should receive separate consideration, and as it was of a somewhat special character, they desired that it should be introduced and considered in full assembly of this Council before it left Calcutta. This was the reason why the Bill was introduced at this late season of the year and so short a time before the expiration of the law which it was intended to prolong.

He would not detain the Council very long with an account of the policy of the Act itself, because it was very fully discussed indeed when the Bill was originally introduced. As it so happened, the Council then contained several very eminent members especially experienced in the necessities of the districts to which the law was intended to apply. He would mention the names of Lord Lawrence, Lord Sandhurst, Sir Henry Durand, Mr. Brandreth, and Mr. Riddell, who unanimously approved the principle of the measure and considered it a necessary one; and their arguments were accepted by such authorities as Sir Henry Maine, Mr. Massey, and Sir William Muir.

He would very briefly recapitulate the objects of the Act and the reasons which were given for enacting it. The first section of the old law enacted that it should be lawful for the Lieutenant Governor of the Panjáb, with the previous consent of the Governor General of India in Council, from time to time to declare any part or parts of the territories under his government to be subject to the operation of all or any of the provisions of the Act, and also to withdraw the same. When the law should be thus extended any fanatic who should murder, or who should, within the meaning of the Indian Penal Code, section 307, attempt to murder, any servant of the Queen or other person, should on conviction thereof be punished either with death or with transportation for life, and all his property should be forfeited to Government. Then after that the chief provision was, that the person so offending should be tried summarily, usually by the Commissioner, but also in certain cases, where the Commissioner was not on the spot, under the special authority, either of the Commissioner or of the Local Government, by the Deputy Commissioner of the district. From the decision of the officer who so tried the prisoner there was no appeal, but the sentence was immediately executed. The rest of the Act consisted mainly of certain safeguards in order to prevent the measure being extended beyond the immediate necessities of the case; that was to say, the third section provided, for example, that every offence made punishable under the Act should be an offence within the meaning of the Penal Code. The object of that section was to provide for the trial separately of abetments and smaller connected offences. The effect of that clause was therefore to exclude all those minor offences, although connected with the principal offence, from the operation of the Act. It was also provided that, when it was found that a case taken up under the Act ought not to come under it, it should be remitted for trial in the usual way.

These were the provisions of the Act, and the reasons for passing it he would now briefly state. There were a great many of these offences perpetrated on the frontiers of the Panjáb. Our frontier-districts were inhabited by very wild and lawless races, and the districts beyond the border by tribes who were for the most part savage and fanatic to the last degree. Many of these men, simply to gratify motives of fanaticism, were perpetually making attacks, generally on the European civil officers, though not exclusively,—in one case, a lady was attacked. He was informed by the Foreign Department some time ago, that there were twenty-eight cases in which officers were either killed or severely wounded since the annexation of the Panjáb. There were, besides, other cases in which the attack was not successful. That would shew that these attacks were sufficiently common and numerous to warrant the special interposition of Government. As a matter of fact the one thing these people disliked was summary punishment. Sir Henry Maine quoted, in his speech on the introduction of the Bill, a case in which a man who attacked his victim

suddenly and from behind was asked by the officer who seized him why he killed him, and why, if he wanted to kill him, he did not come forward fairly and openly from the front? He said "that would never do; I might be killed myself." The officers, therefore, of the frontier had in self-defence, and practically with the approbation of the Local Government, taken these cases into their own hands, and had, in violation of the law no doubt, summarily tried and executed offenders of this class. In every case, however, a special reference to Government had been requisite for the condonation of their acts, and as Mr. Brandreth pointed out, the officers who thus executed the offenders were in the eyes of the law quite as guilty of murder as the men they executed. It was considered highly indecorous that this authorized scandal should continue to exist. Moreover, it was thought, and, as he should presently show, experience proved rightly, that the formal acceptance by Government—the regular authorization—of this summary procedure would have an extremely good effect in putting an end to these outrages altogether. For these reasons, after a very long discussion, extending over several weeks, the Council in 1867 unanimously accepted the Bill. The Government of the Panjáb now urged that the law should be continued. Their argument was, first of all, that the reasons which necessitated the introduction of the Bill in the first instance remained, it might be said, with undiminished force at the present moment. The tribes were not less fanatic than they were; they had now no more tender regard for human life than they had before; except perhaps within our own border, it could hardly be said that they were less hostile to us: nearly all the causes therefore which operated to bring about these outrages were still as active as ever. But on the other hand, there was no question that the number of these outrages had very materially diminished since the passing of the Act. He was not in a position to give exact statistics, but as he had already stated, between eighteen and twenty years there had been twenty-eight successful attacks of this sort, and during the ten years since the Bill was passed, there had been only one or two—the exact number he did not know. He hoped that he would be in a position, by the next meeting of the Council, to say exactly; but he remembered one case, the case of Dr. Mackertich, in which that gentleman was attacked and seriously wounded, and the assassin was punished under the provisions of this law. The Government of the Panjáb attributed this marked diminution in this class of offences to the existence of this law, the provisions of which were now well known. In fact many a man who would commit an outrage of this kind in the hope of escape, either by the delays of the law, or by some chance, or on appeal, now knew that, instead of having any opening of this kind, his case would be disposed of summarily and he would be executed on the spot, and he would therefore very likely be, and in fact it would seem that many had been, deterred by the existence of this law. The Panjáb Government accordingly requested the Council to continue the law, and the Bill SIR EDWARD BAYLEY proposed to introduce would therefore be simply in the main a continuing Bill. It would provide that Act XXIII of 1867 should continue in force until the Governor General should otherwise direct. In the notice of this motion the Bill was termed a Bill to prolong and amend Act XXIII of 1867, but in reality the amendment was a purely technical one. When the Act was passed, there was no such officer as an Additional Commissioner on the Frontier; that office had since been created, and in the ordinary course of business he would in many cases be the proper person to try such offences. It was therefore proposed to amend the Act by including the term Additional Commissioner, or Sessions Judge, as might be found convenient.

These were the only remarks he had to make. He trusted that they would convince the Council that the reasons for this exceptional procedure as originally enacted were in reality, though the procedure in itself might appear severe, humane and wise, and that the Act since its passing had worked so as to repress what were very cruel outrages, and had effected a very important political object.

The Motion was put and agreed to.

CIVIL PROCEDURE BILL.

The Hon'ble SIR ARTHUR HOBHOUSE presented the final Report of the Select Committee on the Bill to consolidate and amend the Laws relating to the Procedure of the Courts of Civil Judicature.

STRAITS SETTLEMENTS EMIGRATION BILL.

The Hon'ble SIR ARTHUR HOBHOUSE also moved that the Report of the Select Committee on the Bill to regulate the Emigration of Native Labourers from the Presidency of Fort Saint George to the Straits Settlements be taken into consideration. He said:—"I think that after what has been said on previous occasions in Council about this Bill, the very briefest recapitulation of the circumstances will suffice for taking the report into consideration. Emigration from Madras to the Straits Settlements is of old standing, dating from a time anterior to the beginning of this century. Latterly it has been carried on to a considerable extent under contracts which bind the labourer for a definite term, the customary term, I believe, having been two years. By our general Emigration Act of 1864, and again by the general Emigration Act of 1871, the effect, the unexpected effect, was produced of rendering all assisted emigration to the Straits Settlements illegal, and it was found that it could not be made legal by the Government except by subjecting that emigration to all the provisions of the general Emigration Act. Now that is not desirable. Emigration to the Straits Settlements is of a different character to that which is dealt with by the general Emigration Act. There are two very important points of difference; one is the shortness of the distance, which makes quite unnecessary many of the compulsory and expensive safe-guards found necessary for longer distances; and another is the old standing of the emigration and the establishment of large Tamil societies in the Straits Settlements themselves. The course we took was to pass an Act by which the Governor General in Council should be empowered to relieve the Straits Settlements from the provisions contained in the general Emigration Act, and that was done in the year 1872. It was intended that the two Governments, the Government of India and that of the Straits Settlements, should arrange with one another to make the best law for governing the subject; and that has at length been done. The Straits Settlements have passed an Ordinance regulating emigration upon their side, and we have framed a law regulating emigration upon our side, which is the Bill before the Council.

"When I last addressed the Council on this subject I informed them that the Ordinance that had been passed was suspended. We have now heard within the last few days that the suspension has been removed and that the Straits Settlements Ordinance is in full work. Now that Ordinance contains two very important features. One is the establishment of a Protector of Emigrants, who is the nominee of the Madras Government. We shall therefore have an official, who may be called an Agent, within the country to which our subjects go, who will furnish us with ample detailed information as to their condition in that country. That is a thing we have desired to have in other countries to which our subjects go, but which we have not been able to obtain. We shall now obtain it in the Straits Settlements, and we hope to be able from time to time to make such arrangements as circumstances may point out to be best.

"Another feature is that the Ordinance makes illegal, according to the Straits Settlements law, every kind of contract bearing upon emigration which is illegal according to our law; so we have only got to provide by our law that certain things shall or shall not be done, and the Ordinance immediately fastens upon them and makes them a portion of the law in the Straits Settlements. In all cases we have required certain conditions as essential conditions of a contract of emigration. I explained these to the Council when I introduced the Bill, and the Committee have made no alteration in them. The principal features are that we require that a minimum of wages shall be provided, and that a maximum of the term of labour shall be provided, which, under the advice of the Madras Government, we have fixed at three years.

"The Committee have made no material alteration in the Bill as it stood when it was introduced. I mentioned then that we had framed it on the lines

drawn by the Madras Government. We have had no communication since with the Madras Government, beyond sending them notice of what we were doing, and therefore I assume that they are quite content with the Bill as it was introduced; and as we have only altered it in detail, we may proceed with confidence to pass it.

"There is only one other point which I wish to make the Council quite clear about, namely, that we are not interfering in any way with emigration not under contract; that has been going on for a great number of years. I have no doubt that it is greatly to the benefit of both countries, and we therefore do not want to interfere with it. If any person in the Straits Settlements likes to take free emigrants without contract, taking his chance of their working for him, he may do so, but he cannot compel them to work, if they will not. On the other hand if he wants a contract by which he can compel them to work for him, then he must take a contract subject to the conditions which are fixed in this Bill. With regard to the rest of India not being the Madras Presidency, there is now no emigration to the Straits Settlements; we therefore leave that in the same legal position in which it now stands."

The Hon'ble SIR ANDREW CLARKE wished to make a few remarks on this Bill, especially as in its early history he was more or less an involuntary actor in the circumstances that led to its conception. His hon'ble colleague had mentioned that the Indian Emigration Bill in its application to the Straits Settlements was allowed to sleep from 1871 to the present time. The condition of the Tamil settlements in British territory on the mainland of the Malay Peninsula, to which it would only practically apply, was very flourishing. But at the end of 1873 a certain large estate got into excessively bad odour, and there was no doubt that in that estate great neglect had existed with reference to the sick and weak classes of labourers. Some public agitation was locally excited, and the Indian Press subsequently took the subject up. He had just assumed the government of the Settlement and on the circumstances becoming known to him, he at once deputed a special Commission to enquire into the truth of the various statements that had been made. The Commission examined witnesses and went very minutely into the matter, and reported that, with the exception of this single plantation, there was nothing whatever to show that the coolies were not treated excessively well; that in this particular case, however, there was some apparent abuse, and that there was sufficient evidence to warrant a prosecution of the owner of the estate. The usual proceedings were then taken by the Police, and their action resulted in the manager of the estate, and several tindals or overseers, being consequently brought to trial before Sir William Hackett, now Chief Justice of Ceylon, and then Puisne Judge of the Straits Settlements at Penang. The principal, the owner, was sentenced to eighteen months' imprisonment with hard labour, and the manager (quite a young man) and the tindals were awarded punishments of more or less duration. For the enquiries that had been instituted, however, that, and to some extent this, Government were responsible; they showed that the province was destitute of all public means for giving relief or succour to the sick; hospitals, dispensaries, medical aid, all being practically wanting. SIR ANDREW CLARKE took steps afterwards to have this want provided for, and the Madras Government expressed themselves perfectly satisfied. They moreover complied with a requisition made to them and sent down medical men and apothecaries. Hospitals were built and things were fairly established to the interests of the coolies, when both the India and Colonial offices moved in the matter. About the same time, in the House of Lords, a noble Peer who had heard the exaggerated reports drew attention to them; and in referring to this, SIR ANDREW CLARKE hoped that he was not trespassing too much on the consideration of the Council in availing himself of the opportunity thus offered him of making a personal explanation which would remove all imputations under which he lay, and which had been more than once repeated in the Press of India. The noble Lord then, in drawing attention to what had transpired in Province Wellesley, stated that in consequence of pressure put upon him, SIR ANDREW CLARKE had released the owner and manager of the estate alluded to, before their punishment was fully completed. The facts of the case were these, that he himself

did not move in the matter until the Judge, who had tried the case and who subsequently, having reason to doubt the truth of the evidence, went again over the whole of it very carefully, and advised him to remit the punishment; and on his advice and with his full approval, orders by telegram were sent to release at once the manager of the estate, who had been suffering severely in health from the punishment: he was released, but the release came too late, for the unfortunate man had but time to reach his ruined home and family to die. His own conviction was, that the man was guilty only of poverty and mismanagement of his property, but his (SIR ANDREW CLARKE's) responsibility in the matter was simply that of acting on the recommendation of the highest authority, that of the presiding Judge, who was convinced in his own mind that there was a case at least for the mercy of the Crown.

It would be seen, SIR ANDREW CLARKE stated, from what he had said, that the law as it stood was more than sufficient to punish in the Straits all culpable neglect or wrong-doing, and thus passing to the measure itself, he would further say that he believed that the Bill as it stood, as far as the emigrant-population of India and a flourishing industry were concerned, was in the wrong direction. If he could have had the Bill framed by his hon'ble friend the Lieutenant-Governor of Bengal, and the Burma Bill, extended to the Straits Settlements, he believed it would have been greatly to the benefit of Province Wellesley. The practical operation of the present Bill would be to double the expenditure on the Planters; they would have to incur increased expense to bring emigrants from Madras, and on the whole the expense would be very seriously augmented by the cumbrous and involved operations of this Act. It might be said that the Planter would have this weight thrown upon him; granted: but eventually the whole weight would have to be borne by the coolies; while under the old law the coolies contracted to labour for a period of from eighteen months to two years, you now relegated them to an enforced bondage of three years or more. The effect of that would be no doubt to a very great extent, he believed, to reduce legal and under-contract emigration from the Madras Coast to the Straits Settlements, and throw us back to the very infamous system of emigration without contracts, to which his hon'ble friend had alluded.

If legislation took any direction whatever, it ought to take the direction of preventing people from going to the Straits Settlements without contracts. It was among those of the Tamil population who were induced by their own countrymen to emigrate, that evils had arisen. Many of them passed into the Dutch Settlements, and it was asserted that thus many Natives were kidnapped and taken to the plantations of tobacco on the coast of Sumatra, and this could not happen to coolies under engagement with European Planters, who were restricted or who would, by respecting its provisions, suffer from the operations of this law. That blot you practically did not hit by this Bill, although he thought the Government of the Straits Settlements were alive to it and would legislate for themselves. Before he left the subject he would wish to assure the Council and those who had taken an interest in this matter, that having visited the large majority of estates, he never saw labourers more muscular and apparently well-to-do; the women covered with gold or silver ornaments, and quite sufficient to exercise the mind of any Famine Commissioner; the children even quite healthy—and there were numbers of them—were looking perfectly happy and contented. As to their Lines, he had the opportunity of seeing since some of the Lines of Native regiments in India, and he could only say that hints for their improvement might be taken from the Lines of the Planters of the Straits provided for their coolies. Indeed, on the estates of the late Mr. Horsman, nothing could be better built and conserved. Even our Municipality of Calcutta might take a lesson from these Lines, and improve the squalid hovels that to so great an extent existed in this City of Palaces.

This Bill would pass, and he must content himself by saying that he believed it would seriously check emigration, a result which he for one would regret, because there was no doubt that the Tamil population of the Straits were in a better condition than their countrymen whom they had left in

India. Great numbers of them were well-to-do, with large properties, and any thing which would check that emigration from the coast of India was undesirable, at the same time that it would cripple and reduce the large industries in sugar and other tropical staples which were valuable to that part of the country and to interests both English and Indian.

The Hon'ble SIR ARTHUR HOBHOUSE said:—"I wish to say a few words with respect to what has fallen from my hon'ble colleague. His objections to the measure are in effect objections to the principle of the Bill—a Bill which he says truly enough has been the result of a good deal of negotiation between the Governments of India and Madras, and the Government of the Straits Settlements, the India Office and the Colonial Office. So far as my hon'ble colleague objects to the rather cumbrous formalities which our Emigration Acts throw about emigration, I am very much disposed to agree with him; and I have said once or twice, when I have had Emigration Bills to introduce, that prior Emigration Bills have been framed, not with the view of assisting emigration, but of impeding it. I myself believe that emigration is a very healthy thing, notwithstanding there may be some cases of hardship here and there, and it is much to be desired that we should assist it. At the same time, we are making a law under which people will leave their homes and lose their liberty for a period of years, and it is exceedingly difficult to maintain such a law against hardships inflicted on the labourers, unless you take great care to throw protection around them. What has been done in this instance is, in consideration of the nearness of the country, in consideration of having a nominee of one of the Indian Governments to protect the emigrants, and in consideration of old standing practice, to make it easier to conduct emigration to the Straits Settlements than to other countries. I do not believe that other countries find that employers of labourers are ruined by the amount of safeguards we have thrown around emigration. I dare say it is some expense to them; no doubt it is, but still emigration goes on."

[The Hon'ble SIR ANDREW CLARKE explained that in other Colonies the State paid for the cost of emigrants, and that is the reason why he said he would prefer the Burma Bill. The State advanced the money, but in this instance the planters have to borrow it at high rates of interest.]

The Hon'ble SIR ARTHUR HOBHOUSE resumed—"There is exactly the same arrangement in respect of labour-contracts in Assam, Káchár and Sylhet, as in respect of the Straits Settlements, and the law which regulates emigration to the provinces I have named is more stringent in respect to the protection thrown around the emigrant than the law which is before the Council to-day. But the proposed remedy suggested by my hon'ble colleague seems to be calculated to throw on the planter a great deal more burden than the law I ask you to pass. He says we ought to prevent people going without contracts. But if we say there shall be no free emigration, that not a single emigrant shall leave our shores without a contract, surely we shall create a great deal more expense than if we enact the provisions of this Bill.

"Our position is quite plain. If a man goes as a free man, so that his master takes his chance of his serving him or leaving him, he may do so to this country; and people may assist him; though to other countries such assisted emigration is illegal. On the other hand, if he goes for a term of years, he surrenders his personal liberty and subjects himself to a highly penal law if he does not labour in a proper way. Therefore we say certain precautions shall be taken to show that he understands the nature of his contract, and to show that he is a proper man to enter into the contract.

"The other point is that we have not provided against kidnapping. I can understand how in India we can provide against kidnapping, but how are we to provide against it in the Straits Settlements? That should be the office of the Government of the Straits Settlements. No doubt our attention has been called recently to the fact, or at all events to the allegation, that some of the persons who emigrated from Madras to the Straits Settlements were carried over to Sumatra and other countries beyond the dominions of the Straits Settlements. We do not know the details of these proceedings very well, or what became of the people; but we rely on the new agency to be established to be fully in-

formed of these matters, and we have decided to hold our hands from any further arrangement with the Government of the Straits Settlements in these matters until we get that information which we expect to get from the Protector of Emigrants, who no doubt will send full reports on the matter.

"On these grounds I think the Bill is one which the Council may fairly accept, and I trust that the ominous forebodings of my hon'ble colleague in respect of the effect it will have on the planters of the Straits Settlements will not be fulfilled."

The Hon'ble SIR ANDREW CLARKE was alluding, with reference to kidnapping, to the 40th and 41st clauses of the Bill, which made provision for its suppression within British waters in the Straits: but kidnapping might go on without the Straits Government knowing of it, in the case of its taking place outside their territory.

The Motion was put and agreed to.

The Hon'ble SIR ARTHUR HOBHOUSE then moved that the Bill as amended be passed.

The Motion was put and agreed to.

OPIUM ACT POSTPONEMENT BILL.

The Hon'ble SIR J. STRACHEY moved for leave to introduce a Bill for postponing the day on which the Opium Act, 1876, is to come into force. He said that the object of the motion might be stated in a very few words. The Opium Act, which received His Excellency's assent on the 14th December last, provided that the Act should come into force on the 1st of April of the present year. It was provided by section 8 of the Act that rules on various matters of importance should be made by the Local Governments, and these rules required the sanction of the Government of India. The Act was so drawn that it was, he might say, impossible for it to come into operation until the rules had been passed. But unfortunately the framing of these rules had taken up much longer time than was anticipated, and we were now in this position, that rules had been submitted by only two or three Governments, and it had become plain that there was no chance whatever that before the 1st of April the Government of India would even have received the draft rules, much less have had time to consider and sanction them. Under these circumstances, it had become essential to ask the Council to postpone the date on which the Opium Act should come into force.

The Motion was put and agreed to.

The Hon'ble SIR JOHN STRACHEY said that he ought to have stated just now that it had not been thought necessary or desirable to name any specific date on which the Act should come into force, but to say that it should come into force on such day as the Governor General in Council might by notification direct on that behalf. This would remove all chance of a similar mishap to that which had occurred occurring in the future. As it was important that the amendment of the Act should take place as soon as possible, and that we should be able at once to inform the Local Governments that the operation of the Act had been postponed, he would now apply to His Excellency to suspend the rules for the conduct of business.

THE PRESIDENT having declared the Rules suspended—

The Hon'ble SIR J. STRACHEY introduced the Bill, and moved that it be taken into consideration.

The Motion was put and agreed to.

The Hon'ble SIR J. STRACHEY also moved that the Bill be passed.

The Motion was put and agreed to.

His Excellency THE PRESIDENT would adjourn the Council to an earlier date than usual. He wished to adjourn it, if convenient to hon'ble members, to tomorrow the 15th of the present month at the customary hour

of assemblage. And his reason for doing so was that he hoped the hon'ble member in charge of the Financial Department of the Government would be able to take that opportunity of making to the Council his Financial Statement. He thought that hon'ble members would probably feel that it would not be convenient, and indeed would not be practicable, that the Financial Statement should come immediately under discussion on the same day that it was made. He had no doubt that it was a statement which would require the attention of the Council some time, and he proposed at the close of the Council tomorrow, either to adjourn the Council to the customary weekly day of meeting, or to some other day which he hoped to be able to name tomorrow. In the meantime the Council was now adjourned till tomorrow at 12 o'clock.

The Council adjourned to Thursday, the 15th March 1877.

WHITLEY STOKES,
Secretary to the Government of India,
Legislative Department.

CALCUTTA,
The 14th March 1877.

GOVERNMENT OF INDIA.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE ACT OF PARLIAMENT 24 & 25 VIC., CAP. 67.

The Council met at Government House on Thursday, the 15th March 1877.

PRESENT:

His Excellency the Viceroy and Governor General of India, G.M.S.I., *presiding.*
His Honour the Lieutenant Governor of Bengal.
Major-General the Hon'ble Sir H. W. Norman, K.C.B.
The Hon'ble Sir Arthur Hobhouse, Q.C., K.C.S.I.
The Hon'ble Sir E. C. Bayley, K.C.S.I.
The Hon'ble Sir A. J. Arbuthnot, K.C.S.I.
Colonel the Hon'ble Sir Andrew Clarke, R.E., K.C.M.G., C.B.
The Hon'ble Sir J. Strachey, K.C.S.I.
The Hon'ble T. C. Hope, C.S.I.
The Hon'ble D. Cowie.
The Hon'ble Mahárájá Narendra Krishna.
The Hon'ble J. R. Bullen Smith, C.S I.
The Hon'ble F. R. Cockerell.
The Hon'ble B. W. Colvin.
The Hon'ble R. E. Egerton, C.S.I.
The Hon'ble Mahárájá Jotíndra Mohan Tagore.

NORTH-WESTERN PROVINCES LOCAL RATES ACT, 1871, AMENDMENT BILL.

The Hon'ble SIR J. STRACHEY moved for leave to introduce a Bill to amend the law relating to assignments from the general Provincial Fund established under the North-Western Provinces Local Rates Act, 1871. He said—

FINANCIAL STATEMENT.

"MY LORD; For the first time since 1872, a Statement regarding the Finances of British India is made before the public, and in this Council. During the last five years, no legislation has been proposed in connection with the Budget, and, under those circumstances, no Statement could have been made in the Legislative Council, without infringing the provisions of the Act of Parliament by which the Council was constituted: the Government is glad, on the present occasion, to be able to return to the practice which formerly prevailed.

"I do not, however, propose to submit to the Council the whole of the details which explain the accounts of the Revenue and Expenditure and Receipts and Disbursements of 1875-76, and the Regular Estimates for 1876-77. They are more

than usually voluminous; and it seemed desirable to keep them separate from my present Statement. The first year for which your Excellency as Viceroy is financially responsible, is now about to commence, and this is the first opportunity which I have myself had, since I assumed my present office, of stating the opinions which I have formed: the time is especially fitting for making the examination of our existing financial position, and of the operations of the past and the present year, as complete as possible: but I could not do this without entering into a mass of details, which, however valuable and interesting they may be, would be out of place, and sometimes hardly intelligible, in a statement made orally to this Council. I have, therefore, thrown them into a separate Minute: it has been published to-day, and it is now in the hands of the Members of the Council: in it I have endeavoured to give the fullest information in my power regarding the Accounts and Estimates of the two years which are now about to close. I propose to give to the Council a brief summary only of some of the main results which that Minute shows, and to confine myself now for the most part to an explanation of the Estimates of the coming year; to a statement of the facts necessary for a clear understanding of our present position; to noticing some of the more important principles by which the Government of your Excellency proposes to direct its future financial policy; and to describing the measures by which we hope to improve the existing condition of affairs: some of those measures will require the sanction of this Council.

"I must, before going further, quote from my Minute an explanation which is there given at greater length. 'The Abstract Statements of the Accounts of the Revenue and Expenditure of 1875-76 and the Estimates of 1876-77 and 1877-78 differ in form from the Statements prepared during the last seven years.

"'From the 1st April 1871, the Government of Lord Mayo entrusted to the management of the Local Governments and Administrations certain important services, with Consolidated Allotments from the Imperial Revenues for their support, and the revenues connected with these services were, at the same time, surrendered for provincial uses. It was thought inexpedient to retain in the Imperial Accounts and Estimates the details of the revenue and expenditure thus made over to the Local Governments: accordingly, since 1871-72, these transferred Heads of Revenue and Expenditure have been excluded from the General Estimates and Accounts, the whole transactions respecting them being represented there by a single net entry under the head *Allotments for Provincial Services*. The details thus omitted have been published in subsidiary Statements, and each Local Government has given due publicity to its own Provincial Estimates and Accounts.

"'The Government of India now sees reason to regret the method then employed, because, by this method, figures of interest and importance are relegated to subordinate Statements; the General Accounts and Estimates become incomplete; and the character of the arrangements between the Imperial and the Local Governments is not truly represented, nor their operation sufficiently illustrated. The Government of India has, therefore, resolved to re-introduce into the Imperial Accounts and Estimates all the details omitted therefrom since 1871-72. Thus, henceforth, any one desiring to ascertain the gross revenue and expenditure of British India, under the several recognised Heads of Account, will be able to do so from the General Accounts and Estimates. It seems to me that this will be an advantage, and that the re-combination of the Accounts of the Imperial and Provincial Governments into one Imperial Account, will make the whole more intelligible, and enable both the Government of India to control the Revenue and Expenditure, and the public to criticise the Accounts, more effectually than heretofore.'

"I have one more preliminary remark to make. I ask the attention of the Council to the observations made in my Minute, regarding the use of Pounds Sterling in our Accounts and Estimates: for the reasons there given, I came to the conclusion that it was better to state all the figures in Rupees; and I have done this in my detailed review of the Accounts of 1875-76 and of the Regular Estimates of 1876-77. In spite of the apparent inconsistency, I shall to-day usually speak to the Council of Pounds sterling, on the old assumption that the English pound is equal to ten rupees, because I shall thus make myself more readily intelligible to my audience; and, as the figures which I shall have to give will, for the most part, represent estimates only, exact

accuracy is less important: it must, however, always be borne in mind that, when I speak of Pounds sterling, I am really using a conventional term of account, and that the Pound sterling of my Statement means ten rupees, a very different thing from the English pound.

"The Accounts of 1875-76 show a surplus on the ordinary account of £1,668,882. If the extraordinary expenditure on Public Works be included, this surplus becomes a deficit of £2,601,740.

"In 1876-77 a deficit is expected on the ordinary account of £2,278,300. Including the extraordinary expenditure, the deficit is £6,078,300. The result on the ordinary account is worse than the original estimate by £2,422,300. This is due to the famine in Madras and Bombay, which is now expected to cost in loss of revenue and in direct expenditure £5,250,000. Of this sum, £3,100,000 belong to 1876-77, and £2,150,000 to 1877-78. If there had been no famine, there would be a surplus on the ordinary account of £624,800 which exceeds the original estimate by £480,800.

"I come now to the Estimates of *Revenue and Expenditure* in 1877-78, and the *Ways and Means* whereby it is proposed to make provision for the service of the year.

"We estimate that the Revenues of 1877-78 will amount to £52,192,700, and the Expenditure to £56,442,400. Thus we expect a Deficit in 1877-78 of £4,249,700, of which, however, £3,628,000 has been granted for the construction of Extraordinary Public Works. Excluding this outlay, we expect a Deficit on the Ordinary Account of £621,700. We estimate the cost of the Famine in 1877-78 at £2,150,000.

"Thus it appears, *primâ facie*, that, but for the Famine, our Estimates would show a Surplus of £1,528,300. I am obliged, however, at once to dispel the flattering impression that might be gathered from this statement, by the observation that one of the indirect consequences of the Famine is the reduction of the entry under the adjusting Head *Loss by Exchange* by an amount which I cannot estimate at less than £700,000: there would, however, be a set-off to this, if there were no Famine, in a lower charge for interest by perhaps £100,000: thus I am led to think that, but for the Famine, our Estimates, as they stand, would have shown a surplus of £928,300. But this really represents the facts in too favorable a light, because the Expenditure on Extraordinary Public Works includes a sum of £1,206,300 to be spent on works which will not be remunerative, and which, as I shall explain further on, ought, therefore, in my opinion, to be looked on as ordinary: if these charges had been so treated, the estimated Surplus of £928,300 would have been converted into a Deficit of £278,028. It will also be seen, immediately, that I am estimating Opium at net £250,000 more than it was estimated for the current year; and also that the causes of apprehension in regard to the value of silver are, unhappily, by no means removed.

"Still, making all allowances, these general results are decidedly encouraging: the expenditure on unremunerative public works has never been hitherto treated as an Ordinary Charge; and it is highly satisfactory that the Estimates of the year should give us reason to believe that our income will not only cover the whole of the charges which have always been classed as Ordinary, but will go far towards paying for those great public works which, although required for the service of the Empire, are not expected to be directly profitable.

"The Famine is, altogether, so serious a disturbing cause, that it seems hardly worth while to make general comparisons; however, I place together the Revenue and Expenditure of the three years as follows:—

	Revenues.	Expenditure.	Deficit.	Excluding Public Works Extraordinary.		Excluding Public Works Extraordinary and Famine.
	£	£	£		£	£
						Surplus.
1875-76	52,515,789	55,117,536	2,601,747	Surplus	1,668,882	2,177,437
1876-77, Regular Estimate	51,206,700	57,285,000	6,078,300	Deficit	2,278,300	624,800
1877-78, First Estimate...	52,192,700	56,442,400	4,249,700	Deficit	621,700	928,300

"*I. Land Revenue*, shows an improvement, compared with the Regular Estimates, of £934,500, but is still below the Original Estimates of 1876-77 by £441,400. Elsewhere than in *Madras* and *Bombay*, there is a small improvement of £3,300 compared with last year's Estimates: the loss, therefore, is entirely caused by the Famine, which is expected by the Local Govern-

"*II. Tributes.*—Compared with the present year's Original Estimates, the decrease is only £2,100, which is owing to the postponement of the Nawanagar Tribute in Bombay on account of the Famine.

"*III. Forest,* shows a decrease of Revenue, compared with the Regular Estimates, of £32,800, and a decrease of charge amounting to £20,600: the decrease of Net Revenue is thus £12,200. It occurs in *Burmah,* where we cannot depend upon a continuance of the high Revenue of the present year.

"*IV. Excise.*—The increase of Revenue (£74,200) is due partly to the arrangements made with Local Governments, which I shall presently describe, whereby an increase of £15,000 is guaranteed to the Imperial Treasury in *Bengal,* the *North-Western Provinces,* and *Oudh;* but chiefly to the expectation that the *Excise* Revenue will not suffer in 1877-78 from the Famine so much as it is expected to suffer in 1876-77: the increase compared with the Original Estimates of 1876-77 is only £36,700; which is not nearly equal to a full year's normal growth of the revenue under this Head.

"*VI. Customs.*—The small increase of £17,700 is in *Burmah,* where the Revenue is, this year, unusually low, owing to the export of rice being late.

"*VII. Salt.*—Following the usual custom, I do not propose to estimate any increase of *Salt* Revenue.

"*VIII. Opium.*—The recent Estimates under this important Head have been for net round sums, as follows:—

	Millions.
1874-75	5¼
1875-76	5¾
1876-77	6

"The details of the Estimates have, in fact, been adjusted to the total Net Estimate, instead of the Estimate being based upon the details. The actual Net Revenue obtained in past years seems to me to justify the expectation that we shall receive at least (net) £6,250,000 in 1877-78; and I have entered this sum. I am aware that it is important to those engaged in the trade to know the number of chests of Bengal Opium that the Government intends to sell in future; and that, at the present moment, a peculiar interest attaches to the intentions of the Government, owing to the large reserve of 35,315* chests which it already possesses, with the prospect of another good crop this year.

"This reserve has been accumulated in the pursuit of a policy long ago deliberately adopted, the object of which was to enable the Government to make the supply of Bengal Opium to the market as far as possible steady, and independent of calamities of season. The great crop of 1876 has placed the Government in a position to obtain this object earlier than there was any reason to expect; and we have been, for some time past, engaged upon an enquiry what number of chests we can, hereafter, offer to the market without risk of failure and without objection in other ways. It has been, once again, satisfactorily ascertained by the independent testimony of the Revenue Officers, that the cultivation of the poppy is a source of prosperity to the agricultural population in Behar and the North-Western Provinces, and is popular with them, and that it does not tend to any objectionable consumption of the drug by them. But the enquiries necessary to enable the Government of India to determine its permanent policy are not quite completed; and I regret that I can say, at present, nothing more definite than that, in the calendar year 1878, the Government will certainly not sell less than 50,000, or more than 54,000 chests of Bengal opium. We shall not leave the market in uncertainty as to our intentions for a day longer than is absolutely necessary.

"*IX. Stamps.*—It is usual to estimate no increase under this Head, although a normal increase is to be expected: the increase of £32,400 which I enter to-day, is the consequence of the engagements with the Local Governments of *Bengal,* the *North-Western Provinces,* and *Oudh,* which I shall presently describe, and is guaranteed to the Imperial Treasury by these Governments.

"*X. Mint.*—The net revenue from the Mints is estimated to be about the same as this year, the decreased receipts being counterbalanced by decreased charges.

	Chests.
* Behar	18,087
Benares	17,228

"*XI. Post Office* shows an increase of Revenue, £22,100, and a rather larger increase of charge, £30,600: this occurs in England, and is chiefly for the manufacture of the half-anna envelopes, the popularity of which is so great that we have been unable to supply the demand for them: the Government of India was aware that the concession of a labelled envelope for the price of the label only was a substantial reduction of the rate of postage: we may be well satisfied with the complete success of this measure, which will, I doubt not, eventually affect the revenue favorably.

"*XII. Telegraph.*—The provision for this Service is £180,000 net: the Telegraph Department would have been very glad of a larger grant; but we could not, under the circumstances of the year, supply it: it has been arranged, however, that if the Revenue should, as is not improbable, grow during the year, the excess may be added to the grant for expenditure; in other words, we have made a quasi-contract with the Department for a net grant of £180,000 for the year.

"*XIX. Gain by Exchange.*—The decrease of £74,800 follows the decrease in the Revenue from the *Guaranteed Railways*, which I shall presently explain.

"*XX. Miscellaneous.*—The Regular Estimate contains an item of £49,500 for premium on Government shares sold to the Bank of Bengal: this will not be repeated; sundry exceptional receipts in England also are not expected to recur: hence the decrease of £97,900 under this Head.

"*Public Works Ordinary Receipts.*—Of the increase (£65,400) £18,000 is in consequence of a contract to supply the Great Indian Peninsula Railway with 36,000 tons of coal from the Warora Colliery at Rs. 5 a ton. The rest is in Bombay, the Government of which Presidency has resumed for Provincial purposes certain tolls on roads estimated to yield £53,348, which have hitherto been recorded under Local Funds.

"*Irrigation.*—The improvement of £50,900 under *Irrigation* is the ordinary growth of this source of Revenue.

"*Provincial Contributions* are expected to produce £415,100: of this, the sum of £374,700 is contributions from the Governments of Bengal (£274,700) and the North-Western Provinces (£100,000) in discharge of the responsibility which, as I shall presently explain, the Government of India is about to impose upon them for the interest on the capital expended on Extraordinary Public Works; the Balance (£40,400) is the estimated draft upon separate provincial Resources in support of the Services administered by the Local Governments.

"Including a further grant of £25,000 to Burmah, *the Balances of the Local Governments* are expected to increase by the net sum of £69,100.

"On the EXPENDITURE Side, the sum of £101,700 has been retrenched, as will presently be explained, from the Grants to be made over to the Governments of *Bengal*, the *North-Western Provinces*, and *Oudh*, for the additional Services to be entrusted to them. This retrenchment has been *pro formâ* thus shown in the Estimates; but the Local Government may redistribute it at their discretion—

	Bengal. £	N. W. Provinces. £	Oudh. £	TOTAL. £
Land Revenue	...	5,000	...	5,000
Law and Justice ...	10,000	5,000	...	15,000
Police	20,000	...	...	20,000
Education	4,000	...	...	4,000
Stationery and Printing ...	5,000	...	...	5,000
Public Works ...	20,000	9,400	...	29,400
Balances Decreased ...	...	16,000	7,300	23,300
TOTAL ...	59,000	35,400	7,300	101,700

"*Interest* shows an increase of £235,800, which will be explained by the proposed loan operations of the year.

"The satisfactory decrease of £26,500 under *Interest on other Accounts*, is owing to the relief obtained by the Treasury from the charge for interest upon the Guaranteed Railway Revenue Balances; the Government of India had never admitted the right of the Companies to this interest: Her Majesty's Government have acknowledged the force of the arguments used by the Government of India; and the Railway Companies have acquiesced in the withdrawal of the privilege. The charge was only real when the Com-

Guaranteed Interest, and so diminished the net charge upon the Revenues for that item; therefore, in its bearing upon the Estimates of the year, this saving must be taken in connection with the estimated charge for *Guaranteed Interest, less Net Traffic Receipts*, which must show some corresponding increase. The measure is, however, calculated to save at least £6,000 a year.

"*3. Refunds and Drawbacks.*—The Imperial portion of this Grant is always fixed at £300,000; the increase of £15,000 is the amount necessary to make up this sum.

"*4. Land Revenue.*—The decrease of £20,600 is owing to the completion of settlements, and the retrenchment of £5,000 in the North-Western Provinces.

"*8. Salt.*—The increase of £32,200 is nominal, the decrease in 1876-77 having been casual: it occurs chiefly in *Madras*, to provide for petty construction and repairs omitted this year.

"*14. Administration.*—The decrease of £36,000 is estimated in the hope that the expenditure in 1876-77 may prove to have been abnormally high: the amalgamation of Oudh and the North-West Provinces has caused some saving under this Head.

"*15. Minor Departments.*—The excess of £9,500 is for Chinchona operations in Darjeeling.

"*16. Law and Justice.*—The excess of £37,300 would have been £52,300, but for the retrenchments in Bengal and the North-Western Provinces: the excess is to some extent balanced by excess receipts (£34,400): the remainder is for a large increase to the establishment of Law Officers in Bengal, the result of the recommendations of an influential Committee under the presidency of our colleague Sir Arthur Hobhouse, which recommendations have been approved by the Secretary of State for India.

"*17. Police.*—The decrease of £22,400 under *Police* is owing to the *pro formâ* exhibition under this Head of part of the retrenchment from the Government of Bengal: that Government may, possibly, effect the retrenchment in some other way.

"*18. Marine.*—There is a decrease of £21,700, which is partly counterbalanced by a decrease of £6,700 under Receipts.

"*19. Education.*—Including the grant for *Education* from Local Funds (net £274,000) the net expenditure on education is estimated at £913,400.

"*20. Ecclesiastical.*—Adding the Grant under this Head in the *Army* Estimates, the total Grant for *Ecclesiastical Services* is £196,600.

"*21. Medical.*—The increase of £6,500 is almost entirely in the Provincial portion of this Grant, and does not, therefore, require explanation: adding the Grants for *Medical Services* in the *Army*, net £324,300, and from Local Funds, net £93,500, the total estimated expenditure under this Head in 1877-78 is £1,016,400.

"*22. Stationery and Printing.*—The excess of £19,000, notwithstanding the retrenchment of £5,000, is in the Provincial portion of the Grant; it is evident that the expenditure in 1876-77 has been unusually low.

"*23. Political Agencies.*—The expenditure connected with the assumption of the Imperial Title in 1876-77 explains the decrease of £137,100 in 1877-78. In the review of the Regular Estimates for the current year, in my separate Minute, I have shown that the total charges incurred throughout the whole of India on this account, under all heads, will probably not exceed £100,000: the exact net cost of the Delhi Assemblage cannot now be stated, but, according to an estimate lately made, it will be about £50,000: considering the great political importance of the event, I think that this expenditure was very moderate.

"*26. Superannuations.*—The excess of £12,200 is for the most part in England, where the payments on account of the Military Funds and of the annuities of Covenanted Civil Servants are still increasing.

"*27. Loss by Exchange.*—I have already said that the large diminution under this Head is connected with the loan operations of the year. The estimate here is that the Secretary of State will raise 12¼ millions Sterling by Bills for Rs. 18,85,00,000: any one can, of course, calculate that these figures involve an estimate that our Bills will yield 1*s.* 9·23*d.* the rupee; but it is uncertain how much will really be drawn; and the estimate is not intended to indicate that the Government expects that its remittances will be effected at any particular rate.

for the Home Treasury in 1877-78; and I cannot say, with certainty, how much he will raise by bills and how much by borrowing.

"The rate for the adjustment of transactions with the Imperial Government and of furlough allowances and family remittances during the year is fixed at 1*s.* 9½*d.*

"28. *Miscellaneous.*—The expenditure on account of the visit of His Royal Highness the Prince of Wales, which is recorded in the Accounts of 1876-77, will be absent in 1877-78: this is the chief item of the decrease of £40,100 under this Head: the remainder is in the provincial portion of the Estimates.

"*Famine Relief*—Is expected to cost £486,000 less in 1877-78 than in 1876-77. I have given in my review of the Regular Estimates for 1876-77, in the Minute now before the Council, details showing the estimated charges for the famine in the current and in the coming year. The gross estimated cost is £3,735,400 in Madras and £1,809,700 in Bombay, making a total of £5,545,100, of which £2,209,100 is loss of revenue and excess cost of army supplies, and £3,336,000 is direct expenditure on measures of relief. Deducting the estimated addition to the earnings of the railways, consequent on the famine, the total estimated net cost of the famine is £5,250,000, of which £3,100,000 will fall on this year, and £2,150,000 on 1877-78.

"*The Army* shows no improvement in 1877-78 as compared with 1876-77; but, on the contrary, an increase of net charge amounting to £49,500. The other items in the Statement which I have explained in the review of the Regular Estimates for 1876-77, in the Minute now before the Council, are, however, more favorable; and the true net cost of the Army, according to that Statement, will be £145,907 less in 1877-78 than in 1876-77. I have entered at some length in that Minute into the question of Army expenditure, and have shown how extremely serious the question is.

"*Public Works Ordinary.*—The decrease of £70,000, as will be apparent upon reference to the Table given in the review of the Regular Estimates, is partly nominal, and partly in the *Irrigation* Grant.

"The entire Grants for expenditure on Public Works in India during 1877-78 aggregate £11,489,774, as follows:—

	At Home.	In India.	Total, converting Pounds into Rupees at the average rate of exchange for the year.
	£	Rs.	Rs.
Public Works Ordinary ...	102,700	3,86,69,000	3,98,30,139
Less Receipts	18,100	18,14,000	20,18,641
Net ...	84,600	3,68,55,000	3,78,11,498
Net grant from Local Funds ...	...	1,37,57,000	1,37,57,000
Public Works Extraordinary ...	734,500	2,89,35,000	3,72,39,347
Guaranteed Railways; Current Account; as calculated in my separate Minute	...	1,39,24,964	1,39,24,964
Ditto Capital Expenditure ...	747,200	—12,83,600	71,61,964
Loans to Public Bodies... ...	...	50,00,000	50,00,000
Total			11,48,9[illegible]

"*State Railways* show a net improvement of £87,600, the Net Revenue of the year being estimated at £191,800, a satisfactory improvement: as I have shown in reviewing the Regular Estimates for 1876-77, the growth of the revenue from these lines is highly encouraging.

"*Land and Supervision.*—Decrease, £13,200: this item must now diminish as the Guaranteed Railways approach completion: but the charge for Supervision alone is upwards of £50,000.

"The *Guaranteed Interest* payable by the Government is expected to increase by £580,700, and the Gain by Exchange to diminish by £74,300; altogether the Estimate for 1877-78 shows a burden of £610,700 in excess of that of 1876-77. The true burden is, as I have shown in my remarks upon the Regular Estimates, £1,392,496, and the true excess, owing to a more favorable estimate of exchange, only £443,260. Some portion of the decrease of the Net Traffic Earnings is nominal: the half-yearly Accounts of the Railway Companies are made up on the 30th June and 31st December, when any surplus found due to the Companies is paid to them: but the Finance and Revenue Accounts of the Government of India do not, in this respect, follow the contracts, but record the transactions of the financial year: thus the

the Railways to the 31st March 1877. Moreover, it takes some time to complete and audit the Accounts of the Railway Companies and to send them to England; and the surplus due to the Companies is not paid until they have been examined and accepted there. Thus it happens that the large surplus of £400,000 due to the Railway Companies in respect to the period embraced in our Regular Estimates will not be paid till next year, when it will appear in reduction of the Net Traffic Receipts recorded in the Finance Accounts of that year. The surplus payments recorded in the Finance Accounts in 1876-77 are estimated at £299,400, so that the Estimates of 1877-78 are adversely affected by this item to the extent of £100,600.

"I beg to call the special attention of the Council and of the public to the facts and figures regarding these railways which are given in the review of the Regular Estimates for 1876-77 in my separate Minute; I will not repeat them here; but they possess the highest importance and interest; the increase in the traffic, the decrease in the working expenses, and the diminution of the burden imposed on the Revenues of the Empire, are most satisfactory; and I look upon the progress of these Railways as one of the most hopeful and important facts connected with the future of our finances.

"The Delhi Assemblage is estimated to have added a sum of £90,000 to the Net Traffic Earnings of 1876-77, and lastly, the chief part of the Famine Traffic will, it is believed, fall into 1876-77.

"*Public Works Extraordinary.*—The Grant is £3,628,000, of which £128,000 is to cover a payment at Home postponed from 1876-77 to 1877-78: the effective Grant is thus only 3½ millions, of which £2,500,000 is for Railways, and £900,000 for Canals. We are most anxious not to check the progress of these beneficial works, and we shall be glad to grant a little more money in the course of the year, if we find ourselves in a position to do so. Of the present Grant of £3,628,000, £1,206,300 is for expenditure on the *Punjab Northern* and *Indus Valley* State Railways. There will still remain the sum of £1,487,800 to be spent before these Railways, which are not reproductive works (although we hope to reap a small revenue from them) are completed. The programme of State Railway construction operations during the year is as follows:—

	£		£
Rajputana line ...	150,000	Northern Bengal ...	290,300
Western Rajputana ...	100,000	Tirhoot	95,600
Neemuch	196,000	Rangoon	158,500
Holkar	100,000	Punjab Northern ...	272,500
Warda Valley ...	22,700	Indus Valley	933,800
Sindhia	205.400		

I am very glad that the Government is at last able to commence the important work of connecting the lines from Northern India and Rajputana with those of the Bombay Presidency, by Ahmedabad and Neemuch; and I trust that it may be found possible to push the work forward rapidly to completion.

"The total grant for Irrigation Works in 1877-78 is as follows:—

	Grant, 1877-78. £
Ordinary	900,600
Extraordinary	900,000
TOTAL ...	1,800,600

Of the Ordinary grant £143,808 is to be spent on Works, £401,579 on Repairs, £342,292 on Maintenance, Conservancy Establishment, and Establishment for collection of revenue, and the balance on tools and plant and State expenditure on guaranteed Irrigation Works. The Extraordinary expenditure (£900,000) is to be incurred principally on the following projects:—

	£		£
Sirhind Canal ...	140,900	Sone	191,000
Western Jumna ...	74,900	Orissa	63,400
Baree Doab ...	24,800	Midnapore ...	20,500
Swat River ...	30,500	Godavery Deltas ...	28,600
Ganges	80,000	Kistna Deltas ...	14,800
Agra	10,000	Moota Canal ...	31,900
Lower Ganges ...	170,000		

invite attention to the Abstract Tables in the right-hand corner at foot of Statements IV, V, and VI, which contain the figures of which I have now to speak.

"I have stated that the Expenditure of the year is expected to exceed the Revenue by the sum of £4,249,700; £283,300 must be provided from the remaining Balances of the Military Funds to supply the difference between the subscriptions to the Funds recorded under XVIII, *Receipts in aid of Superannuation Allowances*, and the payments to the beneficiaries of the extinct Funds for which the State is now liable: £500,000 is required for *Loans to Native States and Public Bodies*, such as Municipal Corporations, Port Trusts, and the like: the *Guaranteed Railway Companies* will draw upon us for £618,900.

"It is expected that the Balances of these Companies in our Treasuries on the 31st March will be only £421,000: it is satisfactory to observe that we now owe the Companies little; and that, in the course of a few months, we shall owe them nothing.

"The *Deposit and Remittance Accounts* are estimated to result in the net withdrawal of £470,900 from the Public Treasury.

"Lastly, we want the sum of £823,400 in order to raise our Balances to the lowest amount necessary for carrying on the service of the year. The Government of India is not responsible for the management of the Home Treasury by the Secretary of State in Council; but I remark that the transactions of that Treasury during the year are expected to end in a reduction of the Secretary of State's Balances by £136,900, leaving them at only £1,011,200. With reference to the large transactions of the Home Treasury (aggregating £34,000,000 a year), and to past experience, this amount cannot but be considered moderate.

"The amount of the working balance that the Government of India ought to have at its credit or in its treasuries in India at the beginning of the financial year, has been the subject of frequent discussion: like the balances which any private individual keeps ready at his command, the amount which the Government of India requires must obviously depend upon the sum of its transactions and upon their geographical distribution, and upon various other considerations: if transactions are concentrated in one or two treasuries, a much smaller aggregate working balance will suffice than if they are spread over a multitude of treasuries scattered over vast distances.

"The following Statement of the public Receipts and Disbursements since 1869-70 will be useful in an investigation of the proper amount of the working balance of the Government of India:—

Receipts and Disbursements at the Treasuries of the Government of India at Home and in India.

	Receipts.			Disbursements.			Balances at close of the year.		
	England.	India.	Total, assuming £1=Rs. 10.	England.	India.	Total, assuming £1 = Rs. 10.	England.	India.	Total, assuming £1 = Rs. 10.
	£	Rs.	Rs.	£	Rs.	Rs.	£	Rs.	Rs.
1869-70 ...	17,621,823	90,30,62,700	107,92,80,920	17,755,320	86,54,16,230	104,29,69,430	2,892,483	13,94,04,510	16,83,29,340
1870-71 ...	19,473,577	99,68,89,680	119,16,25,450	19,060,088	96,81,06,760	115,87,07,640	3,305,972	16,81,87,430	20,12,47,150
1871-72 ...	15,740,339	118,45,72,750	134,19,76,140	16,235,230	113,27,83,030	129,50,35,230	2,821,091	21,99,77,150	24,81,88,060
1872-73 ...	15,712,672	107,36,30,160	123,07,65,880	15,535,319	110,57,39,380	126,10,92,570	2,998,444	18,78,76,930	21,78,61,370
1873-74 ...	16,121,090	105,08,05,300	121,20,76,200	17,105,896	109,84,07,810	126,94,66,770	2,013,638	14,03,34,420	16,04,70,800

1877-78 ...	16,851,100	101,33,58,000	118,18,69,000	16,988,000	100,37,55,000	117,36,35,000	1,011,200	13,50,00,000	13,51,12,000

"There are in India 233 treasuries, besides 1,048 revenue sub-divisions of districts, at many of which there is some kind of a treasury, and besides outlying treasure-chests.

"A preponderating share of the land revenue is received in India in the spring; but the expenditure and the bills of the Home Government go on, more or less evenly, all the year round: the result of this peculiarity is that the balances of the Government in India, if not recruited by loans, or sustained by interruptions of the Secretary of State's drafts, subside rapidly from about June, till they reach their lowest point about the end of October, the

"Having regard to the magnitude of the transactions at our Public Treasuries, (aggregating upwards of £200,000,000 a year), the vast extent of the territories administered by the Government of India, the numerous separate receptacles of public money scattered over the country, and the unequal distribution of the revenues over the year; remembering also the liability of the Government of India to sudden demands upon its treasury for war, famine, or other public necessities, and the scanty resources of the Indian money market, Lord Northbrook's Government determined, a year ago, that it was only prudent to provide for balances at the end of the year aggregating £13,500,000 for ordinary purposes, besides a reserve which Lord Northbrook thought should be substantial: but, under the present financial pressure, we must put up with the inconvenience of a smaller balance, and I propose, therefore, to provide for a closing balance of only £12,500,000. Enquiries are now in progress as to the smallest working balance necessary in each Province: when these investigations are completed, and further experience is gained of the working of the Reserve Treasury, the Government of India will be in a position once more to consider what is the proper amount of balance, altogether, to provide at the beginning of each financial year.

"Before leaving the subject of the balances of the Government of India, I wish to make a few remarks upon some of the misapprehensions that often prevail concerning them. Some people seem to suppose that the Government of India can spend money from the public balances without entering the transactions in the Public Accounts, and that these balances are a mysterious hoard from which we can help ourselves without the inconvenience of justifying or explaining our proceedings: others have gone the length of gravely proposing that the Government of India should credit its balances, or a slice of them, as revenue.

"But there is really no mystery at all about these balances, which do not differ in character from the balances at credit of any private individual: not a rupee of public money can be spent, or is spent, which does not come from the public balances; and not a rupee can be taken from these balances without the fact being recorded and brought to account. The plain truth is, that the Accounts and Estimates which it is my duty to review and explain to-day, exist only for the purpose of recording what money has passed, or is expected to pass, into and out of these balances, and to explain and justify every addition to, and every reduction of, these balances: if the disbursements recorded in the Accounts of the year exceed the receipts, the balances are reduced; if the receipts exceed the disbursements, the balances are increased. Thus, by submitting to a reduction of the public balances, the Government of Lord Northbrook was able to pay some part of the cost of the Bengal famine, without borrowing; but this did not enable the Government to keep a single item of the expenditure out of the Public Accounts: it seems almost absurd that I should gravely say this; but the strange misconceptions that often appear seemed to demand some such explanation.

"Our liabilities in excess of the produce of our revenues aggregate £6,946,200.

"Of this sum we expect to receive £81,000 from the *Civil Service Funds*, £50,000 from *Savings Bank Deposits*, £139,700 *Surplus of Local Revenues*, and £175,500 from certain other deposits called *Sundry Obligations*, which include the Nizámat Stipend Fund, the Bahu Begam's Stipend Fund, and certain Guaranteed Railway Funds.

"The balance is £6,500,000, and this is the net sum which I now estimate that we may have to borrow in the course of the year. I do not forget that the ten year debentures of 1867, the outstanding balance of which amounts to £458,100, are due and payable on the 1st June 1877; but I am not yet prepared to make any special announcement regarding them.

"Of the net sum of £6,500,000 which the Government thus estimates that it may have to borrow in the course of the year, £250,000 is expected from His Highness the Maháráját Sindhiá for the Gwalior Railway: our present hypothesis is that of the residue, $3\frac{3}{4}$ millions sterling will be borrowed by the Secretary of State in England and $2\frac{1}{2}$ millions in India.

"But I must here give an important warning: upon the face of the Statements Nos. IV, V, and VI will be found, for the first time, the following note—

'The estimates in this Statement of the amounts to be borrowed, and to be supplied to the Home Treasury by bills in 1877-78, are the best that can now be made; but they are subject

that the Secretary of State in Council will raise by bills the exact amount stated; or that the exact amount stated will be borrowed during the year; or that it will be borrowed in India or in England, as the case may be.

This note is added under instructions from the Secretary of State. In order to make these *Estimates of Ways and Means* for the Service of the coming year, it is necessary to set down the amount that it is proposed to borrow, and to frame a hypothesis whether the money will be borrowed in India or in England: but the Government of India is not authorised to commit the Secretary of State to borrow or not to borrow any particular sum during the year: and it is not usually possible to communicate the prospects of the year to the Secretary of State with sufficient fullness to enable him to decide, finally, upon the proposals of the Government of India.

"These important Statements must, therefore, be understood henceforth to be, so far as prospective loan operations are involved, only provisional forecasts; and must not be held in any way to commit the Government of India or the Secretary of State to borrow for the service of the year, either the particular sum set down, or in particular proportions in India and England.

"Moreover, the Secretary of State for India can borrow no money in London without first obtaining authority from Parliament: and at the present moment he has no such authority, having exhausted the statutory powers granted to him on the occasion of the Bengal Famine. It is obviously quite impossible for the Government of India to say that Parliament will authorise the Secretary of State to borrow more money in London; and the Government of India is not even at liberty to pledge the Secretary of State to make application to Parliament for fresh powers to borrow. What I have said, therefore, must be distinctly understood as expressing only the views and intentions of the Government of India, and must not be construed as implicating the Secretary of State, or pledging him to any course of action. I am afraid that this will not be considered altogether satisfactory; but the Government of India is not now in a position to state more definitely how provision will be made for the service of the year.

"The Government of India is fully alive to the importance of satisfying its requirements in India without resorting to the London market more than is absolutely necessary; and if, in the course of the year, circumstances should favor such an arrangement, and the Government of India is in a position to act upon its own judgment, a larger share of the whole amount than £2,500,000 may be offered to the market in India. On the other hand, the Governor General in Council will not, so far as the decision rests with him, submit to any unreasonable terms; and, if the conditions acceptable to the money market in India should appear too unfavorable, he will not hesitate to recommend to the Secretary of State to endeavour to obtain power to borrow in England as much more than $3\frac{3}{4}$ millions sterling as is found to be really wanted.

"Supposing that the Secretary of State borrows $3\frac{3}{4}$ millions sterling in England, it will be necessary for him to raise by bills upon India $12\frac{1}{4}$ millions sterling. To effect this, it is calculated that he must sell bills for about $26\frac{1}{2}$ lakhs of rupees a week throughout the year: the Government of India is accordingly authorised to announce that bills for $26\frac{1}{2}$ lakhs of rupees will, according to present intentions, be offered for sale, weekly, during April and May.

"I will begin what I have now to say to the Council with a brief review of the results of the financial administration of the last seven years, ending with 1875-76, the last year for which the Accounts are completed. I think that this will be useful in enabling us to form a correct judgment of our present position; and the period which I have taken is a convenient one, because, while it was one of general peace and prosperity, a serious famine occurred in it, and a large expenditure took place on unremunerative public works: the results of the seven years may be fairly assumed to contain few elements of a specially abnormal character. In saying this I do not forget the great expenditure on the Bengal famine; but, on the other hand, it must be remarked that, since this period of seven years closed, we have already to meet another famine which will not cost much less; nor have we any right to assume that we shall escape more easily in future.

"The gross revenues during the seven years ending with 1875-76 aggregated

"During the seven years the sum of £19,654,000 was spent upon works classified as extraordinary, and £6,500,000 was spent from the imperial revenues, on the relief of the famine in Bengal.

"Out of the sum spent on Extraordinary Public Works, £4,771,000 was expended on the construction of the Punjab Northern and Indus Valley State Railways. These railways belong to a class of works of which I shall again speak; they were not undertaken as reproductive works; and, although it is anticipated that they may yield a net return of 2 per cent. on their capital cost, I shall, in a review which I wish to be severe, exclude their cost from the extraordinary head of account, and treat it, as I think strictly speaking it ought to have been treated from the first, as ordinary expenditure. This correction will leave the sum of £14,883,700 as fairly representing extraordinary expenditure on reproductive public works; and, if there had been no famine, we should have been able to pay for the whole of these unremunerative works, and there would have been a surplus in the seven years, according to the Accounts as they are now constructed, of £8,401,700.

"But, in order to obtain a true conception of the financial results of the seven years, some further adjustments are necessary; included in the Gross Revenues is the sum of £2,443,300 transferred from the Book Capital of the extinct Military Funds: great doubts are felt whether it is right to reckon these transfers as Revenue at all, unless, indeed, interest be charged *per contra* as if the Funds were still in existence; and, for my present purpose, I prefer to exclude them. I will also exclude the sum of £986,900 by which the financial results of the seven years are estimated to appear better than they really are, owing to the peculiar mode in which the sterling transactions of the Home Treasury are combined with the rupee transactions of the Indian Treasuries.

"If these two disturbing causes be eliminated, the true financial result of the seven years, including the cost of unremunerative public works, and excluding the cost of famine relief, would be a surplus of £4,971,500. But it has to be remembered that during the same period, the income tax, which has ceased to be one of our sources of revenue, yielded, net, £4,364,900: if, therefore, there had been no income tax, there would have been a surplus of £606,500, after meeting the charges for unremunerative public works, but excluding the charges for famine.

"Another consideration favourable to the finance of these seven years deserves mention: we accumulated a reserve stock of 35,315 chests of Bengal opium, the cost of which will be recovered in future years, with the profit or revenue yielded at auction: the cost of these 35,315 chests may be reckoned at £1,412,600, of which about £850,000 is included in the recorded expenditure of 1869 to 1876.

"On the other hand, a substantial benefit accrued to the revenues upon the redemption, on the 30th April 1874, of the capital stock of the East India Company. The Sinking Fund created by Act 3 and 4, William IV, Cap. 85, Sec. 12, amounted, on that date, to £7,876,439, and its appropriation towards the redemption of the stock relieved the Revenues from the payment of about £315,000 a year.

"Upon the whole, it may be said that this retrospect is satisfactory. From the 1st April 1869 to the 31st March 1876, not only was no addition made to the debt of the country, except for reproductive works, but a substantial portion of the money invested for these works was really provided from current revenue.

"If we look at details, we shall find further encouragement: the growth of the Net Revenue under its main Heads was as follows:—

		1869-70.	*1875-76.*	*Improvement.*
		£	£	£
Land Revenue	...	*19,603,000*	*20,142,800*	*539,800*
Excise	..	*1,997,100*	*2,407,000*	*409,900*
Customs	...	*2,167,200*	*2,470,000*	*302,800*
Salt	...	*5,463,000*	*5,702,200*	*239,200*
Stamps	...	*2,224,900*	*2,692,400*	*467,500*
Opium	...	*6,130,900*	*6,252,000*	*121,100*
Total	...	*37,586,100*	*39,666,400*	*2,080,300*

"The Net Yearly Imperial Expenditure during the same period was as follows:—

	Civil, except Famine Relief.	Famine Relief.	Military.	Grand Total.	Total, excluding Famine Relief.	Total, excluding *Loss by Exchange*.
	£	£	£	£	£	£
1869-70	...23,242,400	...	15,250,800	38,493,200	38,493,200	38,314,000
1870-71	...23,246,200	...	15,119,400	38,365,600	38,365,600	37,797,800
1871-72	...22,178,000	...	14,733,700	36,911,700	36,911,700	36,515,700
1872-73	...23,797,000	...	14,596,800	38,393,800	38,393,800	37,628,700
1873-74	...22,494,100	3,864,700	14,217,400	40,576,200	36,711,500	35,725,000
1874-75	...22,258,800	2,237,900	14,386,400	38,883,100	36,645,200	35,747,300
1875-76	...23,226,400	508,500	14,262,900	37,997,800	37,489,300	36,059,600

"Thus the net revenue increased during the seven years by more than £2,000,000, or at the average rate of nearly £300,000 a year, while the net expenditure, excluding famine relief, showed no tendency to increase at all, and was actually less in 1875-76 than in 1869-70. Excluding also *Loss by Exchange*, an element which may be said to be practically altogether beyond our control, the net expenditure in 1875-76 was less than the net expenditure in 1869-70, by £2,254,400, of which about £1,000,000 was in the Army, and the rest in the Civil Department: I wish to call special attention to this fact, for it is very important and very encouraging, and reflects great credit on the past administration of our finances.

"Notwithstanding the large amount borrowed during this period, the net charge for *Interest* rose only from Rs. 4,60,67,220 in 1869-70, to Rs. 4,61,69,190 in 1875-76. This favourable result is due to the redemption of the East India Company's Stock already explained; to various successful operations for the reduction of the rate of interest on our Loans; and to the progress of the investment of the Reserve of the Paper Currency Department.

"I think that the facts and figures which I have given for these seven years* show that the finances were administered during this period with great care, economy, and success: I look upon them as highly honourable to the Governments of Lord Mayo and Lord Northbrook, and to my predecessors Sir Richard Temple and Sir William Muir: nor must I omit to give due credit to Mr. Chapman, who, during the whole of this period, was Financial Secretary, and who, fortunately for the Government and for me, still holds that post. It is not now my object to enter into a detailed review of the Financial Administration of past years; but if I were to do so, I might say much more to show the extreme care with which it has been directed. It must be remembered, also, that during this period considerable reductions in taxation were effected; besides the abolition of the Income Tax, which for my own part I regret, the Customs Tariff was revised, and some of its most objectionable features removed: a great portion of the duties on exports have been swept away; the general rate of import duty has been reduced from 7½ to 5 per cent.; and the whole of the tariff valuations have been carefully corrected.

"It is no doubt very encouraging to find that since 1869-70 we should have paid our way so well: we must not, however, deceive ourselves into supposing that the facts which I have stated prove that the Finances are in a condition which leaves nothing to be desired: it ought clearly to be understood that, if such charges as those for famine and for unremunerative public works cannot be provided out of the ordinary revenues, the state of our finances must be unsound.

* The following abstract shows how Ways and Means were provided for the Public Service during these seven years. It will be seen that besides the *Deficit of Imperial Revenue*, Rs. 12,98,20,550, we had to find Rs. 1,52,03,280 for the several *Service Funds*, Rs. 5,20,04,100 for *Loans to Native States and Public Bodies* (including Rs. 2,01,27,802 for the purchase from the Bombay Port Trust of the Elphinstone Company's Property), and Rs. 1,66,20,930 for the *Guaranteed Railways*. Moreover, we raised the *Balances in our Treasuries at Home* and in *India* from Rs. 13,20,17,840 by Rs. 4,67,06,090 to Rs. 17,87,23,930. Thus altogether our obligations in excess of our Revenues amounted to Rs. 26,03,54,950. Of this amount, the *Surplus of Provincial and Local Revenues* yielded Rs. 51,96,530. *Savings Bank Deposits* supplied Rs. 88,28,280; the net result of the *Deposit* and *Remittance* transactions was in our favour by Rs. 1,79,07,790 (chiefly repayments by Her Majesty's Government of advances made in India for the Abyssinian Expedition), and we borrowed Rs. 22,84,22,350.

Abstract of Ways and Means Account, 1869—76.

"These questions are so serious that I wish to refer to them before going further; for, unless we have clear conceptions regarding them, it will be impossible to understand what our financial position really is.

"It cannot be too distinctly stated that charges for the relief of famine must be looked upon as ordinary charges; they are so shown in the Accounts of the present year, and in the Estimates now before the Council; and they were shown in the same way for the Bengal famine by the Government of Lord Northbrook. In the Financial Statement for 1874-75, Lord Northbrook showed very clearly that, whatever means we may take to obviate or mitigate these calamities, famines cannot, under present circumstances, be looked upon as occurrences of an extraordinary character; he said that, in the ten years which had elapsed before 1874, there had been three serious famines in India—the Orissa famine in 1866, the famine in Northern India in 1869, and the famine in Behar in 1874. We have now, unhappily, to add a fourth to the list, that from which a vast tract of country is now suffering, and which will, I fear, prove a not less serious calamity than those which preceded it. Such being the facts with which we have to deal, we cannot, as Lord Northbrook stated, safely depend upon loans for meeting the charges on account of famine. 'It is necessary,' he said, 'that, besides a fair surplus of income over ordinary expenditure, such a margin should be provided, in addition, in ordinary times, as shall constitute a reasonable provision for meeting occasional expenditure upon famines:' if this condition, he said, were fulfilled, and a sufficient surplus secured in years of prosperity, deficit might be endured with less objection in occasional years of adversity. The Government of India, it was stated, had, therefore, resolved to use its best endeavours to maintain for the future a considerable surplus of income over ordinary expenditure, and thus to make provision beforehand for any calls which were likely to arise on account of famines. This resolution on the part of the Government was undoubtedly wise; but, since the charges for unremunerative public works cannot rightly be excluded, the conditions laid down in 1875 have not, in my judgment, been fulfilled: and considering that we have lost the income tax, it is impossible to anticipate that they will be fulfilled in future, unless we take some further steps for ensuring a larger surplus of income over ordinary expenditure.

"I must now mention the other great Head of expenditure regarding which, if we wish to form a correct idea of our real financial position, it is essential that there should be no misunderstanding: I refer to those great public works undertaken to meet the political and military necessities of the empire, but which are not expected to be directly remunerative.

"As an illustration of the kind of works to which I now refer, I will take the railways already mentioned, which are under construction in the Punjab and on the Sindh Frontier: these works will doubtless be very beneficial to the country through which they pass; but they are not undertaken on such grounds as this, but because they are considered, for political and military reasons, to be essential to the service of the Empire; there is no profession that they will be directly remunerative; and, if we have borrowed money for them, we have done so simply because it was held impossible to construct them in any other way; such works cannot properly be called Extraordinary in the technical sense in which we now use that term. They differ only in magnitude, and not in kind, from the works which we pay for out of the ordinary revenues, such as barracks, or fortifications, or other works which involve a heavy outlay and give no direct return. I am afraid that it can hardly be denied that the system which has hitherto been followed, under which these necessary, but not directly remunerative works have been mixed up with works which we expect to be directly profitable, has tended to make us less chary in spending money, than we should have been if the expenditure had been shown, as the famine expenditure is shown, among the ordinary charges of the year: our public Accounts ought to give a complete statement of the actual facts of our financial position, with no reservations or evasions, however unpleasant the appearance of the facts may be.

"I wish it had now been practicable to remove altogether from the Extraordinary head of account all the works of the class which I have

been describing: it has, however, been decided that we cannot now do this, and that we had better not attempt to correct past errors of classification: for the future, it has been resolved, in communication with the Secretary of State, that no work shall, under any circumstances, be classed as Extraordinary, unless we are satisfied that it will yield a net income sufficient to cover the interest upon its capital cost: it has also been decided, in respect to future works, that, if a work has been classed as Extraordinary, and it be ascertained, subsequently, that the estimates of profit were fallacious, any further expenditure upon it shall not be treated as Extraordinary, but entered among the ordinary charges. I think, for my own part, that there is very much to be said in favour of the view that we might, with propriety, go much further, and do away with all distinction between Ordinary and Extraordinary expenditure: this would involve no change in our policy; we should still borrow money for useful works; and, although our Budget Statements might usually close with the announcement of a deficit instead of a surplus, and would have a less agreeable appearance, the deficits would have no more real or serious existence than they have now: this, however, is a matter which I need not now discuss: the decision which I have now stated, and on which the Government is resolved to act, will, at any rate, place matters on a sounder basis in future.

"The figures which I have given show that, during the past seven years, we should have just managed, after meeting all charges for unremunerative Public Works, to bring our expenditure within our income, if there had been no income-tax and no famine: but we cannot omit famine from our calculations; and we have now no income-tax: it therefore follows, judging by the experience of these seven years, that our ordinary revenues are just sufficient to meet all ordinary charges excepting those for the relief of famine, for which we may consider that no provision is now made: I think that the estimates of the current and coming years tend to confirm this general conclusion.

"What, therefore, we now have to do, is to establish a sufficient margin of annual income over ordinary expenditure, to enable us to meet with certainty not only the charges for famine relief, according to the principle laid down by Lord Northbrook, and charges for unremunerative public works, but for other demands which cannot be foreseen, but which will inevitably occur: this is the more important because, in India, we have, under present circumstances, almost no means, such as those which can always be applied in England for temporarily increasing the public income to meet a temporary necessity.

"Our financial position also requires improvement to enable us to carry out measures necessary for the regular progress and better administration of the country: there are administrative improvements which are very necessary; and, above all, there are urgent fiscal reforms, closely affecting the economical and commercial interests of India, which, for want of means, have hitherto been hardly touched. It is easy to give illustrations of my meaning: there are the duties on cotton goods, of which I shall have to speak again; and, independently of them, I do not think that any one will maintain that our Customs Tariff is in a satisfactory condition. Then, there are the Inland Sugar duties, to which also I shall refer again presently: six years ago I heard them called, in this Council, the most discreditable relic of the dark ages of taxation that exists in India: every one agrees in this judgment; but the Sugar duties still exist. Take, again, the system under which we levy our Salt revenue in Northern India: no one denies that it is a positive disgrace to a civilized Government; but it remains unaltered. The time is perhaps hardly come for talking of the repayment of debt as a practical object to be aimed at, or for hoping that we may be able to dispense with borrowing even for reproductive public works: for works which are not reproductive we ought not, except under the pressure of extreme necessity, to borrow a sixpence: the increase of debt is so serious an evil, that we must strive to reduce our borrowing to a minimum even for remunerative works, and provide as much money as possible for them from ordinary revenues; so always that we do not allow this determination to check the progress of necessary great works of public improvement, or to interfere with the execution of great fiscal reforms such as those which I have mentioned.

"There is another matter which obviously has a most important bearing on this subject—the question of the future value of silver: I am afraid that we cannot, with any confidence, expect to avoid serious loss hereafter from disturbances in the relative values of the precious metals; and no one can now measure the future deranging effect upon our finances of these disturbances. In connection with this subject, I must mention the great importance of sparing no efforts to prevent the increase of the sum which we have to pay annually in England in gold. I have referred to this subject in my separate Minute, and have said that, although I do not now wish to give opinions in regard to the measures, if any, which ought to be adopted, the subject is receiving, and will continue to receive, all the attention which the Government can give it.

"In asserting that our financial position must be improved, I by no means desire to see the improvement pushed to an extreme: I wish for no such surplus of income over expenditure as would involve the necessity of imposing heavy burdens on the country or might tempt the Government to launch out into extravagancies: I ask, only, for such a reasonable margin on the right side of the account, as will enable us to pay our way honestly, to avoid increasing the burden of debt, and to carry out, at a reasonable and moderate rate, necessary measures of administrative and economical progress.

"Now it is certain that we cannot bring about in the coming year any such improvement as I desire: with famine in a large part of India it is obvious that no time could be so inopportune as the present, not only for imposing fresh burdens on the people who are suffering, but even for measures involving serious administrative changes: we could not, at such a time as this, ask the Governments of Madras or Bombay even to undertake the examination of new financial schemes: all that we can now attempt is to lay down, as fully as we can, the principles by which the Government of India intends to be guided, and to take such steps as may be practicable for carrying out our programme in those provinces which are in a prosperous condition.

"The only means by which the necessary improvement in our financial position can be gained are fresh taxation, or reduction of expenditure, or increased productiveness of existing sources of revenue, or a combination of these means.

"It will be understood, from what I have already said, that I have no measures to propose at present for the imposition of any general taxation: it may be a cause of special relief to some of my audience to learn that the rumours which we have heard from time to time about the re-imposition of an income-tax have no foundation. As to the income-tax, I freely confess that I regretted its disappearance; but there has been no thought of restoring it. The Government is obliged to propose some other taxation, of which I shall speak further on.

"In regard to reduction of expenditure, the only head under which there has, lately, been any serious increase of charge is the Army; I have mentioned this in the Minute now before the Council as a cause of grave anxiety, over which the Government of India has comparatively little control: in regard to the possibility of future reductions of Military Expenditure, all I can say is that the Government of India will do everything that it properly can do to effect them. It is only in the great Imperial Services that we can now hope to see much done in this direction; for there is comparatively little room for saving on the ordinary charges of the Civil Administration carried on, for the most part, by the Local Governments: we have, however, every reason to believe that, under the system of provincial assignments established in 1871, and which we are now further developing, these charges will bring no fresh burdens in future on the Imperial Treasury; and the actual reductions of Imperial Expenditure, for which we are able to take credit in our Estimates for the coming year, in consequence of the extension of that system, are, as I shall presently show, not unimportant.

"I believe that much may be done to increase the productiveness of existing sources of income, and I will explain the measures by which the Government hopes that this may be effected.

"We all remember the schemes which a great Englishman put forth, some twenty years ago, for the better government of India. He told us, with an

eloquence which he alone possesses, of the folly of supposing that so vast a country, with its twenty different nations and its twenty languages, could ever be bound up into a single State. 'What you want,' he said, 'is to decentralize your Government: what would be thought if the whole of Europe were under one Governor who knew only the language of the Feejee Islands?' Now, much as I respect Mr. Bright—and no one has a sincerer respect for him than I have—I am not going to defend the projects by which he would have abolished the Governor-General-in-Council and would have established half a dozen separate Governments in India, having no connection with each other, and each of them directly subordinate to the Secretary of State at home: I believe that, sooner or later, the result of such a plan, if it were put in operation, would be the destruction of our Indian Empire; and I am not one of those people, who unfortunately are not wanting now-a-days, who can look with complacency on such a prospect; nor will I accept it as even a possible contingency.

"If there be one thing more essential than another in India, it is, in my opinion, a strong Central Government; and I utterly disbelieve that we can ever get such a Government out of India itself. Nevertheless, there was a basis of truth and wisdom in Mr. Bright's proposals: it is, in many respects, quite true that what we want is to decentralize our Government; although I dislike the term decentralize, because it conveys to many people the false notion that we desire to diminish the central authority of the Supreme Government: on the contrary, we desire to see that authority increased, and made the strongest possible reality; and I am convinced that we can only maintain true imperial control by refusing to meddle with details which the local authorities can alone understand, and with which they alone can intelligently deal: no Government, whether it be Imperial or Provincial, can ever really deserve to be called strong, unless it be conducted on these principles.

"As Your Excellency told us the other day, on a very different occasion from this, we have been far too much disposed to disregard the fact that India is no homogeneous country, but a continent containing many nations, the differences between which are at least as great as those which exist between the nations of Europe: it is farther from Lahore to Calcutta than from London to Naples; and, wide as the difference is between England and Italy, there is probably far less difference between those two countries in all their physical conditions, and far less difference between their inhabitants, than there is between the Punjab and Bengal. Nor is it at all true that our existing Indian Provinces are merely artificial divisions: there are, no doubt, varieties of race and language and customs to be found within a single Province; but Bengal, Madras, Bombay, the North-Western Provinces, and the Punjab have, nevertheless, each of them, a fairly well-defined and distinct character.

"I believe that the views which I have now been stating, and which Your Excellency has, on more than one occasion, publicly declared, are especially true in regard to measures of taxation and finance; we should think it very unreasonable to suppose that the same plans of taxation and financial administration are applicable to all the countries of Europe; and it is just as unreasonable to suppose that the same plans are applicable throughout India; a system which may be excellent in one Province may be as bad as possible in another.

"Now, the Government is not so foolish as to imagine that there is any essential distinction between provincial and imperial taxation, or between provincial and imperial expenditure: when we talk of throwing upon the Local Governments new responsibilities for increasing the public revenues; or of relieving our finances by making provincial certain obligations which have hitherto been imperial; we are not so ostrich-like, or so dishonest, as to imagine or to profess, that, by any juggle of names, we can alter the nature of new taxation and make it less burdensome to the people; or that the actual expenditure of the Empire is diminished, when we say that charges for certain classes of works, which have hitherto been imperial, shall henceforth be provincial; indeed, in the Accounts as now remodelled, no distinction whatever is made between imperial and provincial revenue and expenditure. I have, nevertheless, a strong conviction that decentralization, leading, as I believe it, infallibly, will do, to improved administration, will bring about a great increase in the productiveness of existing sources of revenue, great diminution of the evils of fresh taxation if fresh taxation becomes necessary, and great economy in expenditure.

"In regard to expenditure, an important step was taken by Lord Mayo six years ago. I will ask Your Excellency, although I am afraid I have no better object than that of saving myself a little additional trouble which would be entailed by explaining my views over again to the Council, to allow me to read a passage from an old paper of my own, in which I endeavoured to describe the reasons for the measures taken by the Government of India in 1870: a clear conception of those reasons is essential to the proper understanding of the plans which are now proposed.

"Under the system which Lord Mayo found in force when he became Viceroy, the Local Governments, which practically carry on the whole administration of the country, had almost no powers of financial control over the affairs of their respective provinces, and no financial responsibility: everything was rigorously centralized in the Supreme Government, which took upon itself in detail the provision of funds for every branch of the public service throughout India. The business of supervising in a central office all the details of the receipts and expenditure of the empire had become so enormous, that its proper performance was impossible: 'I do not think,' wrote Sir Henry Maine in 1867, 'that anybody can have observed the recent workings of our system of financial control, without coming to the conclusion that, if it be not on the point of an inevitable collapse, it is, at all events, in great danger of going to pieces unless the strain be lightened somewhere.'

"For many years before Lord Mayo became Viceroy, the ordinary financial condition of India had been one of chronic deficit; and one of the main causes of this state of affairs was the impossibility of resisting the constantly increasing demands of the Local Governments for the means of providing every kind of improvement in the administration of their respective Provinces: their demands were practically unlimited, because there was almost no limit to their legitimate wants: the Local Governments had no means of knowing the measure by which their annual demands upon the Government of India ought to be regulated: they had a purse to draw upon of unlimited, because unknown, depth; they saw, on every side, the necessity for improvements; and their constant and justifiable desire was to obtain for their own Provinces and people as large a share as they could persuade the Government of India to give them out of the general revenues of the empire; they found by experience that the less economy they practised, and the more importunate their demands, the more likely they were to persuade the Government of India of the urgency of their requirements: in representing those requirements, they felt that they did what was right; and they left to the Government of India, which had taken the task upon itself, the responsibility of refusing to provide the necessary means.

"The Government of India had totally failed to check the constant demands for increased expenditure: there was only one remedy—to prevent the demands being made; and this could only be done by imposing on the Local Governments a real and effectual responsibility for maintaining equilibrium in their local finances: there could be no standard of economy until apparent requirements were made absolutely dependent upon known available means: it was impossible for either the Supreme or Local Governments to say what portion of the Provincial revenues was properly applicable to local wants: the revenues of the whole of India went into a common Fund, and to determine how much of this Fund ought fairly to be given to one Province and how much to another, was impracticable. 'The distribution of the public income,' General Strachey wrote, 'degenerates into something like a scramble, in which the most violent has the advantage, with very little attention to reason: as local economy leads to no local advantage, the stimulus to avoid waste is reduced to a minimum: so, as no local growth of the income leads to an increase of the local means of improvement, the interest in developing the public revenues is also brought down to the lowest level.'

"The unsatisfactory condition of the financial relations between the Supreme and the Local Governments led to still more serious evils: constant differences of opinion about petty details of expenditure, and constant interference of the Government of India in matters of trivial importance, brought with them, as a necessary consequence, frequent conflicts with the Local Governments regarding questions of provincial administration, of which they were the best judges, and of which the Government of India could know little: the relations between the Supreme and Local Governments were altogether inharmonious; and every attempt to make financial control more stringent, increased an antagonism, the mischief of which was felt throughout the public service.

"To Lord Mayo belongs the honour of applying the only effectual remedy for these serious evils: he resolved to give to the Local Governments the economical standard which they required; to make over to them a certain income by which they must regulate their local expenditure; and to leave to them, subject to certain general rules and conditions, the responsibility of managing their own local affairs.

"From the commencement of the official year 1871-72 the financial control of the following services was transferred to the Local Governments: Jails, Police, Education, Registration, Medical Services, Printing, Roads, and Civil Buildings.

"The views of Lord Mayo were stated by himself in the Legislative Council on the 18th March 1871, as follows:—'Under these eight heads it is proposed to entrust the administration, under a few general conditions, to the Provincial Governments, and a fixed contribution will be made from Imperial Revenue every year. * * It is impossible to prophesy or say, at present, what can be done in the far future; but I should be misleading the Local Governments if I were not to say that it is our opinion that these sums are now fixed at an

amount which cannot be exceeded for at least a number of years: I think it desirable that this should be perfectly understood; because one of our objects is the attainment of as great an amount of financial certainty as is possible. * * But, in addition to the increased power of administration which it is proposed to give to the Local Governments, an administrative change will take place, which I think they will be able to exercise with advantage: they will have a large sum to devote to local objects; the power of allotment will be left absolutely to them; and they will be able to vary their grants for roads, civil buildings, education, and other heads, from year to year, as they may think most desirable; in some Provinces it may be desirable in one year to spend a larger sum on roads; in others it may be desirable to fill up some shortcomings with regard to education or other objects. The Local Governments will thus be able to exercise that power of allotment with much greater satisfaction to themselves and to the public, than they did under the old system, when they were obliged to consult the Supreme Government, not only as to the allotments that were made in the beginning of the year, but also with regard to any appropriations that were thought desirable within the year, provided that those appropriations exceeded a certain amount * * I have heard it stated that, by the proposals which we make, there may arise a separation of interests between the Supreme and Local Governments: I fail to perceive any strength whatever in this assertion: I believe that, so far from there being a separation of interests, the increased feeling of responsibility and the feeling of confidence which is reposed in them will unite and bind together the Supreme and Local Governments to a greater extent than before. * * I believe that we shall see, in place of greater uncertainty, greater certainty; we shall see works and objects carried on with more vigour, enthusiasm, and with less hesitation, when these works and these objects are effected under the immediate responsibility of those who are most interested in them.'

"The gross sum made over to the Provincial Governments for these services, and some few others transferred since the scheme was first introduced, amounted, including receipts given up, to about £5,600,000."

"After nearly six years' experience, we can confidently say that the results of the new system have been thoroughly satisfactory. Objections have been made to some of the details; and Local Governments have often said that the change did not go nearly far enough; but, in regard to the main principle and the general success of the new arrangements, I believe that neither the Government of India nor any Local Government has ever felt a doubt. Every object with which the change of system was made has more or less been gained: the old friction between the Supreme and Local Governments has been greatly diminished; the authority of the Supreme Government and its powers of general control, instead of being weakened, have become stronger and more real, since the attempt to interfere in all sorts of petty details was abandoned; the Local Governments have been able to carry out many measures of improvement which would otherwise have been impracticable; and, so far as I know, there has not been a single counterbalancing disadvantage.

"The most important object of all, so far as the Imperial finances are concerned, that of economy and preventing increase of expenditure, has been completely gained, as I think the following figures will show. The charges which were made over to the Provincial Governments were selected because they were especially liable to increase. In 1863-64 the net expenditure for the services afterwards transferred to the Provincial Government was £5,112,000; and, during the four following years, it continued to rise, until in 1868-69 it amounted to £6,030,000: in 1869-70 it was nearly the same, but a little less. In 1870-71, before the new system was introduced, a determined and successful effort was made by Lord Mayo's Government to reduce the charges which had been growing at so alarming a rate; and they fell, in that year, to £5,197,000. The new system of which I have been speaking was then introduced; and, after it had worked for five years, the result, in 1875-76, was that the charges for the assigned services were £5,305,000: there was practically no increase of expenditure; the total charges were only about £200,000 more than they were in 1863-64; they were less by £700,000 than they were in 1868-69. It is true, as I have just shown, that the great reduction took place before the change was actually made; but, if we may judge from what had happened before, the demands of the Local Governments for larger grants to carry out administrative improvements would certainly have gone on increasing; and I believe they would have been as irresistible as before.

"I will not take up the time of the Council with details showing the manner in which the charges for each of the assigned services have varied; but it may

be said generally that there has been no growth of expenditure under any heads, excepting *Education* and *Medical*: these charges, which were £458,000 in 1863-64, and £909,000 in 1870-71, rose to £1,007,000 in 1875-76: in other words, the people have got more Schools, and Hospitals, and Dispensaries, although less money has been spent on Jails and Police. The financial results of the new system have, thus, been entirely satisfactory; the constantly recurring demands, and the consequent embittering controversies between the Supreme and Local Governments have ceased; and, I repeat, that, not only has all this been attained without any sacrifice of financial authority on the part of the Government of India, but there can be no question that this authority is stronger and more efficient than before. From the time in which the new system was introduced until now, I do not believe that one single authority who has seen how it has worked has expressed anything but confident approval of the principles on which it was based.

"When the measures of 1870 were taken, there was a great deal of talk about local taxation; and it was loudly asserted that new burdens were being imposed on the country which were none the less serious for being called local. There was no foundation for this statement, nor did the Local Governments obtain any powers of taxation beyond those which they previously possessed: the truth is that, excepting in the Punjab and Oudh, where new rates for local purposes were imposed on land by Acts of the Imperial Legislature, and to a very small extent in Bombay, the measures of 1870 led to no fresh taxation whatever. The estimated revenue, throughout the whole of India, from local taxes, rates, and cesses in 1877-78 is only £2,233,000.

"The weak point in those measures was this, that, while they transferred to the Local Governments the responsibility for meeting charges which had an undoubted tendency to increase, the income of which the Local Governments had to dispose, although not quite a fixed amount, had little room for development: the difficulty has perhaps not, hitherto, been generally felt to a serious extent, because it has been met by economy and good management: it must however, be felt hereafter; and, for this and for still more important reasons I have always maintained that the system of Provincial Assignments established in 1871 ought to be applied not only to expenditure but to income. What we have to do is, not to give to the Local Governments fresh powers of taxation, but, on the contrary, to do all that we can to render fresh taxation unnecessary, and to give to those Governments direct inducements to improve those sources of existing revenue which depend for their productiveness on good administration.

"I will take as an example the two great heads of income, Excise and Stamps (including the items under Law and Justice hitherto reserved as Imperial Revenue), which are estimated to yield together, this year, net, £5,393,800. The whole of this goes into the Imperial Treasury: the increase or decrease in the receipts depends entirely, in the long run, on good or bad management; and bad management means the wasteful throwing away of revenue without any relief to the country. The administration, although centralized in the Government of India, has to be carried on by the officers of the Local Governments, and I doubt whether there is a single Province in which great improvement in the administration is not possible: throughout a large part of India the evasion of the Excise and Stamp duties is notorious; and, although I will make no guesses about the amount of revenue which we are thus losing, my belief is that it is very large. I have a strong conviction of the financial importance of this matter; and the importance is not merely financial, if I am right in believing that better administration would give us a large additional revenue of a thoroughly unobjectionable character, without the country feeling that any new burdens had been imposed upon it.

"How is this better administration to be obtained? The answer seems to me simple: it can be obtained in one way only; not by any action which gentlemen of the Financial Department, or any other Department of the Supreme Government, can take while sitting hundreds or thousands of miles away in their offices in Calcutta or Simla; not by examining figures and writing circulars; but by giving to the Local Governments, which have in their hands the actual working of these great branches of the revenue, a direct and, so to speak, a personal interest in efficient management. It may

be very wrong, but it is true, and will continue to be true while human nature remains what it is, that the local authorities take little interest in looking after the financial affairs of that abstraction, the Supreme Government, compared with the interest which they take in matters which immediately affect the people whom they have to govern. When Local Governments feel that good administration of the Excise and Stamps and other branches of revenue will give to them, and not only to the Government of India, increased income and increased means of carrying out the improvements which they have at heart, then, and not till then, we shall get the good administration which we desire; and with it, I am satisfied, we shall obtain a stronger and more real power of control on the part of the Central Government than we can now exercise.

"We have not yet been able to work out in detail all the arrangements for carrying out this policy; and it is only with the Governments of Bengal, the North-Western Provinces, and Oudh, that it has hitherto been possible even to communicate officially on the subject. Although there will be nothing in the proposed measures requiring legislation, their importance is so great that I will give to the Council some account of the plans which have been, in all points of importance, settled with the complete and cordial concurrence of the Local Governments which I have named.

"I will explain first the measures taken for the North-Western Provinces. We propose to transfer to the Local Government the Revenues derived from Excise, Stamps, Law and Justice, Collections from the Tarai and Bhábar and Dúdhí estates, and some miscellaneous items: the total amount which the Local Government will make good to the Imperial revenues on these accounts will be £698,400: this sum exceeds by £4,700 the amount estimated to have been actually received in the present year. The most important of the revenues transferred are Excise, Stamps, and the hitherto reserved revenues under Law and Justice: the net revenue assigned under these heads is £640,600; and the transfer has been made subject to certain conditions. These sources of revenue have gone on pretty steadily increasing throughout India; and it is not proposed to surrender to the Local Governments any part of that normal growth of income which might have been expected to continue if no change of system had been made. On the other hand, while we desire that the Local Governments shall share largely in any increase of revenue to which their own improved administration may lead, it is evidently reasonable and necessary that the Imperial revenues should share in this increase also. In the North-Western Provinces, however, these particular sources of revenue have grown less, and fluctuated more, than elsewhere, and it is proposed that, for the two next years, the Local Government shall pay to the Imperial Treasury one-half of any net increase which may result under its management, the Government of India undertaking on its part to bear half of any deficit: two years hence, the arrangement will be open to revision. If there should be any new legislation intended to increase or reduce any of the assigned revenues, the amount due to the Imperial Treasury will have to be reconsidered.

"As regards expenditure, it is proposed to reserve as Imperial those grants only which, for some particular reason, it seems inexpedient to transfer to provincial responsibility: these are as follows:—

	Estimated Grant, 1877-78. £
(1).—*Interest on other Accounts*	2,400
(2).—*Refunds (excepting refunds of Excise, Stamps, Law and Justice, and Deposits)*	9,600
(3).—*Settlements*	102,800
(4).—*Allowances to District and Village Officers*	32,700
(5).—*Special temporary increase to the pay of Covenanted Civil Servants*	4,500
(6).—*Forests*	43,700
(7).—*Account and Currency Offices*	22,000
(8).—*Minor Departments*	8,800
(9).—*Ecclesiastical*	20,000
(10).—*Medical Establishments*	28,600
(11).—*Political Agencies*	3,000
(12).—*Allowances and Assignments*	52,000
(13).—*Superannuation, Retired and Compassionate Allowances* ...	62,500
(14).—*Miscellaneous*	3,500
	396,100

"The reasons for the reservation will, in most cases, be self-evident; and I need not trouble the Council with them: I will only say, in regard to one of the heads, "Forests," that the question remains to be considered whether this ought not also to be transferred to local management. The amount provided for these reserved services in the Estimates of 1877-78 is altogether £396,100.

"The principal remaining services are Land Revenue, Excise, Stamps, Administration, Stationery, and Law and Justice. These and some others were estimated to cost, in 1877-78, £736,300: the existing provincial allotment for Police, Jails, Education, and the other services transferred under the arrangements of 1870, is £651,100: the total charges for which the Local Government will be responsible amounts, therefore, to £1,387,400. The Local Government, however, is satisfied that it can undertake those services with a somewhat smaller consolidated grant; and the sum of £35,400 will, therefore, be deducted from the total assignment, and will be a saving to the Imperial Treasury, leaving as the net amount to be actually granted £1,352,000. The revenues made over being £698,400, the net expenditure from the reserved Imperial revenues will be £653,600: subject to the conditions on which the transfer is made, the Local Governments will be entitled to add to its Balance in the Imperial Treasury any sum by which the provincial income in any year exceeds the provincial expenditure, and must, on the other hand, make good any sum by which that expenditure exceeds the income.

"It will be incumbent upon the Local Government, in managing its finances, never to exhaust the Balance at its credit with the Government of India; the Government of India will not accept any Estimates or allow any transactions which involve the expenditure of more money than is at credit of the Local Government in the Imperial Treasury; and it will be the duty of the Accountant General, on behalf of the Government of India, to take care that this condition is never infringed; to enable the Government of India to enforce this condition, the Local Government, when submitting its yearly estimates, will always state its opening Balance, and the effect thereon of the estimates presented. Subject to this condition, and to the other rules and restrictions which have been laid down, the Local Government may spend at its own discretion the funds placed at its disposal. I need not describe these rules and restrictions in detail; but the most important of them provide that, without the previous sanction of the Government of India, no fresh taxation can be imposed, or any change made in any system of revenue management; no new general service can be undertaken; no appointment with pay exceeding Rs. 250 a month can be created, or reduced, or abolished; and no class or grade of officers can be created or abolished or its pay altered; that no standing order or rule of the Supreme Government shall be changed, and that returns and accounts shall be submitted in the forms prescribed. Full power is reserved to the Supreme Government to modify, add to, or repeal any of these restrictions and conditions. The liberty of action thus conceded will not affect the duty of the Local Government to keep the Governor General in Council, in the several Departments, fully informed of its executive and financial proceedings: the Government of India will continue to exercise its general powers of supervision and control in all Departments; but it will, as far as possible, avoid interference with the details of the local administration, and everything which might lead to embarrassment of the provincial finances.

"I will not take up the time of the Council by describing in detail the arrangements made for carrying out a similar change of system in Bengal and in Oudh, because they are, in all matters of principle, similar to those adopted in the North-Western Provinces. The scale, however, of the whole settlement with Bengal is much larger; the exact figures are not yet quite fixed; but the total amount of the revenue surrendered in 1877-78 for provincial uses will not be less than £1,910,000, and the total expenditure transferred for the same year will not be less than £2,430,000. A retrenchment of £59,000 from the existing grants has been made, with the consent of the Local Government; and the existing Imperial expenditure will consequently be reduced by this sum.

"Altogether, the immediate saving to the Imperial Treasury by the arrangements entered into with Bengal, the North-Western Provinces, and Oudh, is

£101,700, besides the guarantee of normal increments to the transferred revenues, amounting to £44,000: the estimates of the year are thus better by £145,700 than they otherwise would have been. I hope that when it becomes possible to enter into similar arrangements in other Provinces, equally satisfactory results may be obtained.

"The measures of which I have hitherto spoken will, we confidently hope, lead to improvement in administration, to economy in expenditure, and to increase of revenue, while they involve no fresh taxation. There are other measures, closely connected with them, which the Government proposes to adopt, which cannot, I am sorry to say, be carried into effect without an increase to existing burdens, an increase which, although it involves no fresh imperial taxation, will not, on that account, be less real. We propose, so far as it may be practicable, to make each Local Government responsible not only for the management of many of the great public works which we are constructing with borrowed money, but for meeting the charges which these works entail.

"I must now refer to the system under which our so-called Extraordinary public works are carried on.

"No one is more alive than I am to the importance of providing the railways and works of irrigation which India requires; and, for my own part, nothing would induce me to support a policy which interfered with their progress. Our railways have, in my opinion, been constructed on a scale more expensive than was necessary, and the system of guaranteeing interest on the capital expended has led to extravagance: I believe that the money which has been actually spent on our railways would have been sufficient, if it had been spent in a more economical way, to cover India with a net-work of railway communication sufficient for all the commercial and political requirements of the country, if not for all the luxuries of locomotion: but it is easy to be wise after the event; the Government of the day had practically to choose between having these expensive railways, and having none at all; and its choice was perfectly right. Although the system of borrowing under which India has had to pay for these works has entailed very serious burdens, the benefit which they have conferred upon the country has been literally incalculable: I will say nothing of the enormous increase of wealth and prosperity which they have given us; I will only ask you to reflect on what would, at this moment, be happening through a vast extent of country in Western and Southern India if we had no railways: but for them, the people would probably be now dying of starvation by hundreds of thousands; and it would have been beyond the power of the Government to save them, if it had devoted to the task all the resources of the Empire. With such facts as these, and those which I have narrated regarding these railways in my review of the Regular Estimates, staring us in the face, the statements which we sometimes hear that these works ought not to have been constructed with borrowed money, and that we ought to have waited until we could provide the necessary funds from the surplus resources of the year, seem to me to deserve no serious consideration.

"We may say the same of the great works of irrigation: the works already in operation have enormously enriched great tracts of country, and have provided for many millions of people security against famine: no one who has seen, for example, as I have, the irrigated districts of the North-Western Provinces, and who remembers what they were before the canals were constructed, can doubt the priceless value of the benefits which they have conferred. I will not now enter into the causes, arising, in my opinion, mainly from defective systems of financial management, which, in many instances, have prevented these great and admirable works from giving as speedy and as large direct returns as they ought to have given; but I have no doubt that these causes are removable.

"Although the value of our railways and canals is so immense, and the necessity of going on with their construction so obvious, I have always felt that the system under which we are incurring, on this account, a heavy load of debt is attended with very serious evils; and I hope that it will not be imagined

that in proposing the changes of policy of which I am about to speak, the Government intends to relax the stringency of the rules which the Secretary of State and the Government of India have prescribed in regard to the construction of public works with borrowed money: we desire, on the contrary, to make these rules more stringent, and to obtain more complete security that, except under special circumstances, and for the necessary protection of great imperial interests, no money shall be borrowed for any works in respect of which we cannot say, with certainty, that the direct receipts will, at the very least, cover the interest on the capital expended.

"The system under which our so-called Extraordinary works are now carried on was described in the Resolutions of the Government of India in the Public Works Department, published in July 1873 and in June 1875: the conclusion arrived at by the Government of India in the former of these Resolutions was that we might continue, without fear of financial embarrassment, to borrow annually a sum of 4½ millions sterling for the extension of Railways and Irrigation works in India. The grounds of this belief were stated in the Resolution of 1875, in the following words:—

"In the year 1872-73, after deducting the net receipts derived from works in operation, there remained a sum of £2,378,140 charged to revenue for the interest of money borrowed, whether directly by Government or indirectly through Guaranteed Companies, for the construction of reproductive public works: the term reproductive is meant to imply, not that all these works are likely to be in themselves remunerative as an investment of capital, but that their effect will be to add to the general wealth of the country. The condition of the finances was such as to satisfy the Government of India that a similar charge of £2,378,140 might be met in future years without increased taxation. As works under progress are completed, and as those lately completed are brought into fuller work, fresh receipts will come in: some increase is also to be expected from old works: in the forecast of 1873 the rate of expenditure upon works in progress and new works was so adjusted for five years, that the estimated additional annual charge upon revenue for the interest of money to be borrowed should be met by the estimated additional receipts, and no increased annual charge upon revenue should be incurred."

"The Resolution goes on to say that the forecast of 1873 had been more than justified by the facts; but that it was deemed expedient to limit to four millions sterling, the annual outlay on reproductive public works classed as extraordinary, for the prosecution of which money might be borrowed,

"New tables," the Resolution continues, "have been prepared on this basis; they include the operations of 1872-73 and 1873-74 taken from the accounts of actual outlay, and those of 1874-75 taken from the Regular Estimates; the operations for 1875-76 are taken from the Budget Estimate, and those of the following four years from the best estimate that can be formed of probable operations. The new forecast extends to the financial year 1879-80; the excess of interest charges over net receipts is estimated to decrease from £2,357,696, the actual charge in 1872-73, to £1,939,806 in 1879-80: this charge is expected to average £20,203,126 per annum from 1875-76 to 1879-80: the result is on the whole much the same as in the calculations of 1873. No allowance has been made for the probability that surplus revenue will be applied to the construction of reproductive works: it will thus be seen that a considerable margin has been allowed for safety in these calculations. The result of the new forecast is satisfactory: it appears that, taking a moderate estimate of the growth of income from existing railways and irrigation works, and very small returns from the new works, an annual capital outlay of four millions for the next five years on State Railways and Irrigation works charged with interest at 4½ per cent. is not likely to lead to any increase of annual charge on the Revenues of India."

"The appendices to the Resolution of 1875 show in detail the works which it was proposed to construct with borrowed money: for State Railways it was estimated that the total outlay from extraordinary funds up to the end of 1879-80 would be £22,183,675; for irrigation works up to the same date, the estimate of outlay was £14,125,363; making a grand total to be borrowed of £36,309,038: these figures include sums expended up to 1875. According to the Forecast, the net charge on the Revenues at the end of 1879-80 would be, as before stated, £1,939,806, and this sum was distributed as follows:—

	£
Guaranteed Railways	1,215,000
State Railways	568,265
Irrigation Works	156,541

"I believe that these forecasts were made with excellent care and judgment; and there is no reason for supposing that the anticipations of Lord Northbrook's

Government in regard to the growth of the income from the Railways and Canals will prove at all too sanguine; upon this subject I ask the attention of the Council to the facts stated in the review of the Regular Estimates for 1876-77 in my separate Minute. Nevertheless, in the last Financial Statement made by my predecessor, Sir William Muir, about a year ago, the Government was obliged to admit that the difficulty of carrying on the existing system had become extremely great: it was explained that, in consequence of the fall in the price of silver, the situation had become so grave, and the future so uncertain, that the Government of India had felt bound to review its position in respect of the expenditure on reproductive works from funds raised by loans: the Government, it was said, felt that it was not justified in adding to our future obligations by incurring any avoidable debt, even for the construction of works admitted to be beneficial to the country and in themselves remunerative: and it would, therefore, if it had been practicable have altogether refrained, under the existing aspect of affairs, from borrowing for this purpose: such a course, however, could not have been taken without great loss, and it was necessary to complete the works which were in course of construction, not only to prevent waste, but in order that the capital already expended might bring in a return of revenue.

"But," it was added, "the Government of India, though thus unable immediately to stop the expenditure from borrowed funds, are resolved at once to contract the sphere of operations. * * * So long as the present adverse prospects continue, this class of expenditure will be gradually diminished, so as, in the end, if need be, entirely to obviate borrowing for the purpose."

"The whole question of our policy of borrowing money for public works has thus been, to some extent, re-opened. The truth, I think, is that it is impossible to foresee so confidently the financial conditions of the future that we can pledge ourselves to go on borrowing money, for a number of years, at the charge of the Imperial Treasury, without any fear that difficulties will arise. The progress of great works of improvement which, if carried out at all, ought to be carried out in a regular and systematic manner, thus becomes liable to interruption at any time by any temporary financial embarrassment: last year, our embarrassment was the depreciation of silver; this year, it is famine; next year, it may be something else.

"Lord Mayo, in his speech in this Council on the 31st March 1871, made some observations on this subject which seem to me very true and very much to the point:—

"Unless," he said, "the Government is supported in organizing a system by which these works can be constructed without placing further serious charges upon Imperial Revenue, I greatly fear that many of these important operations may not be undertaken at all; or, if they are undertaken, they may run the risk of being stopped before they are finished."

and he went on to express his apprehension that we might otherwise have, in a few years, to witness either financial difficulty or the stoppage of some of these great and beneficial works. This anticipation has been exactly verified.

"I am not so foolish as to imagine that there is any panacea for dealing with the difficulties with which this subject is surrounded; but I think that it is posssible to diminish them.

"The works which have hitherto been classed as Extraordinary may be divided into three great classes:—*First*, there are works of the class which I have already mentioned, which, although they are not expected to be directly remunerative, are undertaken because they are necessary for Imperial purposes. I have said all that I have to say at present regarding them; and have explained that, if any new works of this kind are undertaken, they will be treated as Ordinary, and not Extraordinary works.

"Between the *second* and *third* classes of Extraordinary Public Works, of which I have now to speak, there is no broad and distinct line of separation. They are, in both cases, works of improvement for developing the resources of the country, and for meeting its necessary requirements; and, in respect of them, it is anticipated that, besides the indirect advantages to the country arising from their construction, they will yield, within a moderate time, a direct income at least equal to the interest of the capital expended on them. Some of these works which I put into my *second* class are undertaken for objects of such general utility, that they may be fairly called

Imperial: the great trunk lines of railway, for instance, like those which connect Calcutta with Bombay, Madras and Lahore, or that which we hope before long will be completed from Ajmere to the Bombay and Baroda Line, are works which not only confer immense benefits on the Provinces and Districts through which they pass, but are essential to the wealth and prosperity of the Empire: the cost of constructing them falls, properly, so long as private enterprise is not forthcoming, on the Empire at large.

"But there is another class, which I call the *third* class of great works of improvement, which are, primarily, works of provincial or local utility, undertaken for the special benefit of certain districts or places, with the object of increasing their wealth, or protecting them against famine, or for some other purpose: the Orissa canals, for instance, have afforded to that Province an insurance against famine; the Ganges Canal has given absolute immunity from famine to many districts of the North-Western Provinces; the Northern Bengal and the Tirhoot railways will be works of immense local value. There is, as I said before, no broad line of difference between such works as these and works of Imperial utility; Imperial works confer great local benefits; and works of local utility enrich the Empire; but, although the two classes of works thus run into one another, the distinction is, nevertheless, a real one, and it has not been sufficiently recognized.

"It has been frequently said, and I suppose no one denies it, that it is impossible to meet from the Imperial Revenues the obligation of providing all the works of local improvement which India requires; but we still go on as if we believed this to be false, and continue to take in hand, at the charge of the Imperial Treasury, all sorts of works of little imperial importance, and the value of which is mainly and primarily local: these are the undertakings which cause so much financial difficulty.

"I will give a few examples of the practical results of the system which we have been following.

"The total capital outlay on Irrigation works in Lower Bengal up to the end of 1875-76 was £4,072,742; and not less than £1,494,000 will be required to complete the works that are in progress: the gross income from these works in 1875-76 was £23,043, and the working expenses were £52,949; there was a dead loss on the year's operations, independently of interest on borrowed capital, of £29,906: the net loss in interest and working expenses during the year was £203,700; and the total accumulated loss up to 31st March 1876 was £878,100.

"The Orissa and Midnapore Projects had cost, up to 31st March 1876, £2,482,039; and are so far completed that water for irrigation on a large scale has been obtainable for several years past: in 1875-76, these canals yielded an income of £17,953, while the working expenses were £41,406: including interest, the net loss on these canals was £122,567, and the total loss up to 31st March 1876, was £666,131. The further works which it is proposed to undertake in Orissa will cost about £368,000 more; and no one, I believe, pretends that, within any time which can now be foreseen, there is the remotest chance, if things are left as they are, that we shall get any adequate return from this great expenditure.

"The Sône Canals in Northern Bengal had cost, to the end of 1875-76, £1,521,366; and more than £1,185,000 will be required to complete them: they will be, in the highest degree, beneficial; but I am confident that there is not, under the present system, any probability that they will, for many years to come, pay the interest on the capital outlay: the income in 1875-76 was £5,090, and the working expenses were £11,543. I do not lay stress on these figures, because the works are not finished; but it is a curious and most significant comment on them to be told, as we have been on the highest official authority, that the value of the crops saved by these unfinished canals in the single year of drought, 1873-74, was estimated at £480,000.

"The lowest sum at which it is possible to estimate the capital outlay in Bengal on canals and local railways now in operation or in progress, exceeds £8,000,000. After expending £4,072,742 on canals, there was, as just shown, a dead loss to the Imperial Revenues in the year 1875-76 of £203,700. I do not wish to speculate on the results that would probably be obtained under the existing system when the total expenditure reached £8,000,000; but the prospect could hardly be more unsatisfactory: and in spite of all this, the works

"I might give similar, although less extravagant, examples from the works in other Provinces; but I think that enough has been said to show that there must be something radically unsound in our existing policy.

"I come now to the consideration of the remedies for the state of things which I have been describing.

"Six years ago, there was much discussion on the subject of compulsory water-rates; and I wish to refer to that question, before going further, because it is more or less connected with the proposals which I am about to make. So much has been said and written in past times about it (and I am afraid that my own share in the discussion would fill a small volume), that I can hardly say anything which has not been said before: the question, it will be remembered, was one in which Lord Mayo took a deep interest; his views on the subject are well known, and I believe them to have been thoroughly sound. I must explain that, in what I am now about to say regarding compulsory rates for irrigation, I express my own opinions only, and in no way commit the Government at large. The practical measures which are now proposed may, however, be consistently approved by those who disagree with the views which I hold regarding compulsory water-rates; and, if I refer to this subject now, I do so chiefly because I wish to guard myself, personally, against the charge which might otherwise have been brought against me, that I was introducing a measure which I hoped would lead to results very different from those which were apparent on its face.

"The proposals which were made, some years ago, to impose compulsory rates for meeting the charges for works of irrigation, took a definite shape in certain Sections of the Punjab Canals Act, which were passed, after much discussion, in 1871, but were subsequently vetoed by the Duke of Argyll, who was then Secretary of State: I should be sorry to see those Sections re-enacted now: their only merit, in my estimation, was that they recognised a true and important principle; but they could not have been worked in practice, and I do not regret their loss.

"The principle for which I contend is simple: under our existing system, almost the only direct returns which we obtain from our canals are those derived from the voluntary payments of the cultivators who take water for irrigating their fields: I assert that this system is wrong and irrational. In a country like India, exposed not to the chance, but to the certainty, of periodical drought and famine, the construction of works of irrigation is often an absolute necessity: it is a necessity, whether the people in ordinary seasons take the water or not, and whether the canals pay or not.

"I take as an illustration the case of the Orissa Canals, to which I have just referred: there has been an immense expenditure of money; and the result is that an insurance has been provided against the recurrence of any such terrible calamity as the famine which happened some years ago: but, in ordinary years, when the rainfall is sufficient, the people will not pay for the canal water; they know that, in case of necessity, the water is there, and that they can get it; but, under ordinary circumstances, they think they can manage well enough without it: the result is that, although the Province of Orissa is secured against famine, the canal gives no direct return on the great sum of money borrowed for its construction, and does not pay even its working expenses; and the whole burden of the charge falls, not on the people really benefited, but on the Imperial Revenues, or, in other words, on the tax-payers of the Empire.

"I have just given similar figures for the Sône Canals in Behar; the Province is rich and prosperous, and well able to pay for the great local benefits conferred upon it; but, for some reasons which I, for my part, have never been able to understand, or in the least degree to appreciate, we choose to give these advantages to the people of Behar at the cost of the people of India: the people who are to get the benefit are to pay as little as they please; the people are to pay who get almost no benefit at all.

"What I want to know is why irrigation works, which, in many parts of India, are, incomparably, the most beneficial works which it is possible to undertake, and the works which have the greatest possible local utility, are to be singled out as the only local works for which the people immediately benefited are to pay nothing: why are districts and towns to pay for their

own roads, and schools, and hospitals, for the paving and drainage of their streets, and their supply of drinking water; and why is it wrong that they should pay something for the irrigation works on which the actual existence of the people depends?

"It is idle to say that, in the one case, the people are themselves consulted before the expenditure is incurred, whereas, in the other case, the works are undertaken without any reference to their wishes; every one knows perfectly well, that, whatever may be the theory, the fact is, putting aside some altogether exceptional cases, that the people at large have no more to do with the regulation of local and municipal expenditure than with the expenditure on canals and railways; and that, for many years to come, this must continue to be true.

"As it cannot be denied that we cannot go on, for ever, constructing at the expense of the Imperial Revenues, works which will not pay, although those works may be absolutely necessary as a protection against famine, it comes virtually, under our present system, to this, that the question whether we are or are not to make canals, and whether we are or are not to save millions of people from misery and perhaps from actual starvation, is to depend on the views which certain ignorant peasants may hold in regard to their own personal interests.

"Almost everything that I have been saying about canals is, in regard to some parts of India, just as applicable to railways: there are many districts in which irrigation works are not wanted or cannot be made, and where cheap local lines of railway are the proper and only effectual means for preventing or relieving famine.

"I will not now discuss this subject further, because the Government of India has no propositions to bring forward in regard to it: all that we now desire is to enforce provincial responsibility for works of provincial utility; and it will be left to the Local Governments to take, if they should think fit to do so, the initiative in proposing the adoption of more complete measures under which a really local responsibility shall be enforced for meeting local wants: I do not disguise my own opinion; and it is my hope that the system which we now desire to introduce, will lead to results in the direction which I have indicated.

"Our present plan is this: we desire to throw upon every Province, so far as this is now practicable, the responsibility for meeting the cost of its own local requirements.

"It will be objected that to enforce strictly local responsibility in such a matter may be right; but that it is quite another thing to throw such a responsibility on a whole Province: this, it may be said, is, in principle, as bad as making the responsibility Imperial. Now, I fully admit that, in my own opinion, our proposed measures, if they be taken by themselves, are imperfect; and that they ought to be supplemented by others in the manner which I have suggested: but, under existing circumstances, it is not possible for the Government of India to do more than distribute between the various Provinces the burden which now improperly rests on the Imperial Revenues; and, in doing this, and obliging each Province to meet the charges for its own works of local utility, it will have taken a great step in the right direction. It is, for instance, at any rate, less unfair that the cost of the Ganges Canal should fall upon the people of the North-Western Provinces than upon the people of Madras and Bombay.

"When Local Governments find that this responsibility has been imposed upon them, and that the only means of obtaining, without fresh taxation, the works of improvement which they require, is the wise and economical management of the works themselves, and the development of the income which they yield, they, and their officers, will take an altogether different interest in these matters from that which they feel now, when the only apparent practical result of careless financial administration is diminished profit to the distant treasury of the Empire. When new proposals to construct works of improvement with borrowed money are brought forward, the incentives to economy and care on the part of the Local Governments will be especially strong, and a powerful check will be placed on extravagant projects and enthusiastic estimates of profit. Under the present system, every Province desires to get for its own useful works as large a share as possible of borrowed money, knowing that, whether the anticipations of future income prove to be accurate or not, there

the Province, and loss to the Imperial treasury alone.

"The principle on which we base our proposed measures is strictly just: we start with the fact that each of our great Indian Provinces has an individuality of its own; that it is something more than a mere geographical expression; and that its people have, in a great measure, common wants and common interests. I will take as an illustration of my meaning, and of the manner in which our plans will work, the North-Western Provinces and the Ganges Canal: the people who actually take the water to irrigate their fields are the first who profit; the people who, although they do not take the water, can do so whenever they choose, and for whom an insurance against drought has been provided, are those who profit next: but these are not the only people who derive a positive benefit from the canal; it not only gives protection against famine to a great agricultural and non-agricultural population in the tract through which its immediate influence is felt, but, now that the country is intersected with railways and roads, there is hardly any part of the North-Western Provinces which does not receive from it more or less advantage, or which may not fairly be expected to contribute something towards the cost of its construction and its maintenance: in times of drought, it provides food not only for the districts through which it passes, but for those which are less fortunately situated, and it prevents the price of grain from rising to a point which would cause privation and suffering to the poorer classes of the population.

"So far, therefore, as the Government of India is now concerned, the unit with which we shall deal will be the Province which is benefited: it will be the duty of the Local Governments to endeavour, so far as may be practicable, to distribute the charges imposed upon them, so that the burden on any district, or any class of people, shall be proportionate to the benefits received.

"These plans cannot be carried out without imposing fresh taxation in the Bengal Presidency: they will scarcely affect Madras and Bombay, except in regard to new works which it may be proposed to construct hereafter; and the application of these principles to those Presidencies must be reserved for future consideration: it may be added that the present time would obviously be inopportune for imposing fresh burdens in Provinces suffering from famine.

"I do not assert that it will now be possible to apply these plans strictly to all cases in which canals and railways of local utility have, in past times, been constructed at the expense of the Imperial Revenues: all that we say is that they shall be applied, so far as this can now be done, without unwisely and unjustly throwing fresh burdens on provincial resources, and always bearing in mind that there is, as I have said before, no real distinction between imperial and provincial taxation.

"I can do little more, now, than explain the general principles of the policy which the Government proposes to adopt; and I can only describe in detail the plans for carrying it out in the North-Western Provinces: they are the only measures which it has been possible to bring to completion in concert with the Local Government; and they alone will at present require legislation in this Council.

"The capital expended on canals in the North-Western Provinces and classed as "Extraordinary," will amount, at the end of 1876-77, to £5,291,000, and, at the end of 1877-78, to £5,560,000: these figures do not include anything on account of the accumulated interest paid in past years in excess of the net income derived from the works: for our present purpose, there is no propriety in making such an addition to the capital, because the interest has in fact been discharged, from year to year, as it became due, and no longer constitutes any burden on the Revenues.

"The revenue of these canals from water rates, navigation, and other direct returns, in 1877-78, is estimated at £310,100; and the indirect revenue, consisting of land revenue due to the works, at £92,300; so that the estimated gross revenue derived from the canals in 1877-78 is £402,400: the working expenses are estimated at £146,100: thus the Net Revenue will be £256,300 or £164,000, according as the indirect revenue is or is not taken into account. One year's simple interest at 4½ per cent. on the capital hitherto expended is estimated to be £244,000; according to these calculations, therefore, the works will, in 1877-78, after providing for interest on the capital, and taking credit for the indirect Revenue, yield a surplus profit of £12,300.

"These figures do not really exhibit any close approximation to a real profit and loss account: on the one hand, the sum shown as Capital Expenditure includes no interest during construction, nor does it, or the sum shown as working expenses, include any provision for Absentee Allowances and Pensions, or for incidental charges, such as Stationery, Printing, Medical Stores, Imperial Supervising Offices, &c., which are not recorded in the Public Accounts as expenditure on Public Works, but under other heads. On the other hand, the amount shown as Capital Expenditure includes a large outlay on works not yet in operation, and therefore not yielding revenue.

"The following statement shows the estimated Capital Expenditure on the works completed to the end of 1876-77, and the Net Revenue expected to be derived from those works in 1877-78:—

Canals.	Capital expended.	Gross estimated Earnings, 1877-78.	Working Expenses.	Net Revenue.
	Rs.	Rs.	Rs.	Rs.
Ganges	2,80,00,000	(a) 22,16,000	9,71,000	12,45,000
Eastern Jumna ...	24,24,000	6,34,000	2,17,000	4,17,000
Dhoon	6,14,000	51,000	32,000	19,000
Rohilkhand and others	14,62,000	83,000	68,000	15,000
TOTAL ...	3,25,00,000	29,84,000	12,88,000	16,96,000

(a) Including Rs. 43,000 from Owners' Rate.

"It appears from this Statement that out of the total capital expended to the end of 1876-77, no less than £2,040,700 has been spent on works still in course of construction, or which are not yet producing Net Revenue, and that the interest on the capital yielding revenue, *viz.*, £3,250,000, is, at 4½ per cent., £146,250. These completed works are thus estimated to yield, in 1877-78, a net profit, over and above the interest on their capital cost, of £115,650, including the indirect revenue, or £23,350 if we exclude it: making all allowances for the omissions from the Capital Expenditure and Working Expenses above noticed, there can be no doubt that these results are very satisfactory: it must, however, be remembered that they were only arrived at after the canals had been in operation for a long period of years.

"The exigencies of the Supreme Government will not admit of the surrender of any part of the Net Revenue which it now receives from these works: it has been decided that the most convenient way of adjusting this claim of the Government of India will be, in the first instance, to reserve to the Imperial Treasury the indirect returns from the canals, which are now credited as Land Revenue: they amounted last year to £92,300: this leaves a further sum of £23,350 to be made good; but, as some of the items of the calculation are uncertain, the Government of India will be satisfied with a fixed contribution of £20,000 in addition to the indirect revenue. It must be remembered that the Imperial treasury, in thus claiming the entire profits on capital hitherto expended, only claims what it receives already; and that it foregoes, at the same time, all claims for returns on the large indirect expenditure before referred to. The Local Government will thus be responsible for making good to the Imperial treasury every year the interest on the whole capital expended, plus the sum of £20,000; and to meet these charges the Local Government will receive the whole of the Net Revenue from the works, excepting that portion of it which is credited as Land Revenue: some special arrangements, with which I need not trouble the Council, have been made regarding that portion of the Canal receipts known technically as *Owners' Rate.*

"The amount which will thus be due from the Local to the Imperial Government in 1877-78 may be estimated at £100,000: subject to this payment, and to certain further conditions which I shall notice presently, the Government of India will make over the whole of these works to provincial management, and the whole of the revenue derived from them to provincial uses. The Government of India will advance from the Public Treasury the funds required for completing the irrigation works now in progress or proposed, and for the construction of Railways for local purposes. During the next three years, the account between the two Governments will, it is proposed, be settled in the manner that has been described: the arrangements will then be open to

"It must rest with the Supreme Government to determine how much money it can place at the disposal of the Government of the North-Western Provinces, each year, for the construction of these works. The Governor General in Council will endeavour in this matter, as far as possible, to meet the wishes of the Local Government, and to supply the necessary funds at such a rate that the works shall go on regularly to completion with no avoidable delay: the amount, however, that it is expedient to borrow for the whole of India, in each year, must be determined upon general considerations; and the Government of India alone must decide how the available funds can be most profitably distributed among the several Local Governments: the demands upon the Public Treasury, ordinary and extraordinary, are too uncertain for it to be possible for the Imperial Government to promise, absolutely, to supply a fixed sum to any Local Government for a succession of years.

"It is understood that the capital cost of the canals and local railways now in existence, under construction, or contemplated in the North-Western Provinces, is estimated at about £8,500,000; so that, to complete the whole, there will still be £3,000,000 to spend after the year 1877-78. Assuming it to be possible to provide £400,000 annually for this expenditure during the next five years, the liabilities of the Local Government for interest and Imperial profits would increase from their present amount of £264,000 to £315,000 at the end of the fifth year; on the other hand, it is anticipated that the receipts will increase, during the same period, at an average rate of £20,000 a year, or from the present amount of £164,000 to about £264,000. On this assumption the amount to be contributed from other sources, which is now £100,000, would have fallen to a little over £80,000 at the close of the five years: the prospective burden undertaken by the Local Government is, therefore, never likely to become formidable. It is no doubt possible that the estimate of £3,000,000 for future expenditure may be increased; but this will not materially affect the calculation, since, in that case, the term for spending the money would no doubt be extended also.

"As the burden imposed upon the Local Government becomes reduced by the growth of the net direct revenue, it is necessary that the Local Government should contribute to the Imperial Treasury a share of the advantage: it would be premature now to define what may ultimately be an equitable settlement between the Imperial and Local Government; but, as a temporary arrangement, open to revision at the end of three years, the Local Government will surrender to the Imperial Treasury one-half of any reduction that it may be able to effect in the charge of £100,000 which it now undertakes. For instance, supposing that the interest plus the profits of the Imperial Treasury payable by the Local Government should increase to £300,000, and the net revenue received by the Local Government should increase to £240,000, the sum to be provided from other sources would fall from £100,000 to £60,000, and, if no further condition were imposed, the Local Government would be in a better position by the difference, *viz.*, £40,000. The Government of India will concede to the Local Government one-half of this future advantage, reserving to itself the other half only, instead of the entire profits which it would keep for the Imperial Treasury if it were to apply to the profits of the future the same rule which has been applied to past profits accruing prior to the transfer now proposed: it is the expectation of the Governor General in Council that this arrangement will be profitable to both Governments; because it is hoped that the change of system will lead to better administration and to increased advantage from the works.

"I must add that some of the figures which I have now given may be somewhat modified before final arrangements are made; but in this case the changes will tend to diminish, and not to increase, the burden placed on the Local Governments.

"Although I hope that the Local Government will endeavour to secure from the land more or less directly benefited by the canals, larger returns than those which are obtained under the existing system, several years must elapse before the completion of the great irrigation works now in progress; and, until they begin to yield income, some general contribution from the Province will be unavoidable.

"As a matter of principle, I think that the larger portion of charges such as those of which I am speaking, ought to fall on the owners of land, rather than on other classes, because the benefit conferred by these works will be permanent: the whole community, however, derives great advantage from them, and it is equitable that the non-agricultural class should contribute also: it is not thought desirable, at present, to impose fresh burdens on the land in the North-Western Provinces; and, without doing this, we can obtain what we want.

"I will now give a sketch of the plans which are proposed, leaving it to my Honorable friend, Mr. Bazett Colvin, who may now be held to represent the North-Western Provinces in this Council, to describe, hereafter, the details of the measures which will require legislative sanction.

"The first of the proposed measures will be a not very extensive amendment of Act XVIII of 1871, which provides for the levy of rates on land for local purposes. Although these rates were only placed on a strictly definite and legal basis in 1871, they have been levied, for many years past, in the greater part of the North-Western Provinces: every estate in which the settlement of the Land Revenue is subject to revision, is liable to the payment of a local rate, not exceeding five per cent., on the annual value of the land: in permanently settled estates, rates are levied for the same purposes at an amount not exceeding annually two annas for each acre under cultivation. All these rates are, in the first instance, credited to a General Provincial Fund, from which the Lieutenant-Governor is bound to assign amounts to be applied in each district for certain specified purposes: these are the construction and maintenance of Roads and Communications; Rural Police; District Post; Education; Hospitals; Lunatic Asylums; Markets; Wells and Tanks; and other local works likely to promote the public health, comfort, or convenience: the annual assignment made to each district must not be less than the total amount of local rates levied in it; but any portion of such assignment which remains unexpended at the end of the year may be spent in any way which the Lieutenant-Governor thinks beneficial to the North-Western Provinces generally.

"The principle is thus recognized, that these rates may, in part at least, be expended on objects of provincial utility; and, as a matter of fact, a large portion of them has been so expended. As it is not now wished to increase the burdens on the land, all that is proposed is to authorise the Local Government to make assignments from the local rates for the purpose of meeting charges on account of Irrigation works and Railways of provincial utility: it is proposed to fix the maximum amount of such assignments at 10 per cent. of the total sum levied under the Act, leaving 90 per cent. to be spent as at present: but I see no reason for anticipating that the actual proportion of the rates so assigned will amount to this maximum. The total amount of the local rates levied annually in the North-Western Provinces is about £130,000, and the proposed amendment of the law will not seriously diminish the existing grants for local purposes.

"The second measure now proposed is the imposition of a light License Tax on trades and dealings in the North-Western Provinces. The Bill that will be laid before the Council is taken, in great measure, from a Bill proposed by Sir William Muir when he was Lieutenant-Governor in 1871, under the belief that it would be necessary to impose fresh taxation for provincial purposes: that Bill was introduced into this Council by Mr. Inglis, and passed through Committee; but the Lieutenant-Governor came to the conclusion that additional taxation was after all not necessary, and the Bill was dropped. The original Bill imposed small duties on certain specified trades, and the amount of the duties in no way depended on any trader's means: although, in this respect, the new Bill will not be so satisfactory as the old one, which would not yield as much money as we require, and the estimated receipts from which are admitted to have been greatly over-rated, no inquisition will be made into any man's actual profits, and the measure will not be an income tax in disguise: it will be similar to the License Taxes actually imposed for local purposes in many large Indian towns, and to the Pándhri tax, which has long been levied in the Central Provinces. The principal trades, as the Council will see from the Bill

which I hope to be allowed to introduce to-day, have been classified and graded, and a specific sum is put down against each class and grade: the highest license fees proposed are those on Bankers and Wholesale dealers in country-produce, and they vary from Rs. 16 to Rs. 64 a year: other traders will have to pay smaller sums, which are in some cases as low as Rs. 2, and in no case exceed Rs. 32. It is extremely difficult to say what this measure will probably yield, but, for my present purpose, I will assume it to be £50,000 a year.

"If the plans which I have described are carried into effect, the first step for the Local Government to take will be to look thoroughly into its Public Works Establishments, and to consider whether the existing system under which the canals are managed, and under which the canal revenue is collected, cannot be improved and made less costly: it will then have to consider what means can be taken for increasing the income yielded by the existing canals: there will, therefore, I hope, be no necessity for depending only upon new taxation and on the assignments from local rates, for the means of meeting the new charges.

"The measures which I have thus described will, it is believed, enable the Government of the North-Western Provinces to satisfy, without difficulty, the obligations imposed upon it.

"The whole of these arrangements have been settled in communication with Sir George Couper, the Lieutenant-Governor, and have received in all respects his cordial approval.

"In the imposition upon Bengal of similar responsibilities for meeting the charges for extraordinary public works, similar principles will be applied; but, as the existing works are at present unprofitable, the sum to be made good annually by the province will be larger than in the North-Western Provinces: it will amount at present to about £275,000.

"The Government of India is in communication with the Local Government on this subject: the Lieutenant-Governor will consider what portion of the whole burden can be recovered from the people who are primarily benefited by the works which have been constructed, and what portion must be raised by fresh taxation upon the province at large: I hope that, so far as the immediate demands of the Supreme Government are concerned, there may be no necessity for throwing on the Province generally the whole of this new demand; but, on the other hand, it must be remembered that the obligations which have been placed on the Local Government will, unless the income from the works be rapidly developed, have an undoubted tendency to increase. It must also be remembered that there are new works of extreme importance urgently required in the interests of the people of Bengal for which, under the system we are now inaugurating, the Government of India will not make itself responsible. Whatever legislation may be necessary will take place, not in this Council, but in that of the Lieutenant-Governor, and it would be improper in me to refer in detail to the measures which His Honor may think fit to initiate: any schemes for new taxation must of course first receive the sanction of the Supreme Government. It is hoped that the Government of Bengal will avail itself, as far as possible, of existing modes of raising revenue, and endeavour to extend and expand them, rather than have recourse to new and unfamiliar systems of taxation, and that it will be able to carry out all necessary measures through its present establishments: even if it were possible to devise new forms of taxation theoretically better than the forms which already exist, it would still be wiser to adhere to systems understood by the people, rather than adopt innovations which might cause dissatisfaction and apprehension, and which might lead to oppression through the creation of new collecting and assessing machinery. Although the amount to be raised is in itself considerable, the increase of taxation which it involves will really be very small, when distributed over an enormous population: I have no doubt that the Local Government will be able to adapt successfully its present system to meeting this increased demand: I am sure that it will be the universal feeling, not only of this Council, but of the public, that the initiation of the necessary measures could not be in better hands than in those of my honorable friend Mr. Eden; and in regard to this matter the views of the two Governments are completely in accord.

"In regard to the Punjab, I can say nothing definite at present: it is thought desirable to wait until the Government arrives at Simla, when it will have the advantage of the presence and co-operation on the spot of the Lieutenant-Governor and some of his most experienced officers: meanwhile, I have the satisfaction of knowing that my honorable friend and present colleague, Mr. Egerton, who will, before long, assume charge of the office of Lieutenant-Governor, will give his cordial support to the principles which have been laid down, and that he anticipates no serious difficulty in their application to the Punjab.

"The total amount of the contributions thus made to the Imperial Treasury for Bengal and the North-Western Provinces is estimated to be, in 1877-78, £375,000.

"The combined result of the arrangements made with the Local Governments in regard to both Ordinary and Extraordinary income and expenditure is that the estimates of the coming year have been improved to the extent of £520,000: it will be understood, from what I have already said, that it is not now possible to state exactly what portion of this amount will be provided by new taxation; but it will not exceed £325,000, and will probably be less.

"The questions of which I have been speaking are closely connected with another subject of great importance. In a despatch to the Government of India, dated the 25th November 1875, the Secretary of State called attention to the question of the proper incidence of the charges which have to be incurred for the relief of famine: he said that, however plain may be the primary obligation of the State to do all that is possible towards preserving the lives of the people, it would be most unwise to overlook the great danger of tacitly accepting, if not the doctrine, at least the practice, of making the General Revenues bear the whole burden of meeting all local difficulties or of relieving all local distress, and of supplying the needful funds by borrowing in a shape that establishes a permanent charge for all future time. The Secretary of State fully admitted the difficulty of a satisfactory solution of the question of how local resources can be applied to aid in meeting local wants; but he said that this difficulty ought not to be allowed to obscure the perception of the vital importance of such a solution to the future well-being of the country, and the necessity for establishing some system under which shall be suitably recognized the undoubted responsibility which rests on the people themselves to provide for their own support.

"In the instructions lately issued by the Government of India to Sir Richard Temple, in respect of the inquiries which he is now conducting with signal ability and success in the famine-stricken districts of Madras and Bombay, the same doctrine of the necessity for enforcing some system of local responsibility for providing local relief was recognized by the Government of India; and I wish that it were now in my power to inform the Council that some practical conclusions had been arrived at. This I cannot do; but the question will receive the careful consideration of the Government, and I hope that a useful solution of it may be found, by which, while the Imperial revenues are duly protected, no unjust or excessive burdens shall be imposed upon local or provincial interests: this last condition is obviously essential. Meanwhile, the measures which I have been explaining are a step in the direction which I have mentioned; by throwing upon each province the responsibility for meeting the charges necessary for providing the canals and railways required to protect its own people against famine, we give practical recognition to the principle on which the Secretary of State has insisted, and we obtain, to a certain extent, though far from completely, that safeguard for the Imperial Revenue which he thought so necessary. This at least is certain, that the relief of famine must be looked on as an ordinary charge to be met from revenue, and not from borrowed money.

"The question has often been raised of late, whether it is really possible for the State to undertake the responsibility of preserving the lives of the people during famines, the periodical recurrence of which in India must unhappily be looked upon as certain: for my own part I do not think the answer difficult: it seems to me idle to discuss whether the Government of India, on account of

financial considerations, can deliberately allow people to die of starvation: it is quite clear that it can do nothing of the kind: it is a fact which has to be accepted that life must be saved, whatever be the cost. It is conceivable that the performance of such a task might become impossible; but I can conceive many other causes which would make the Government of India by the English impossible; and I see no use in speculating on what may happen, in consequence of financial or other ruin, in some distant future, under circumstances which cannot now be foreseen.

"I have tried to read for myself the lessons of the past, and they appear to me to show that if we treat this great famine question in a rational way, and base our measures on true principles, we shall find no insuperable difficulty in dealing with it. The first thing to be distinctly declared is that, while the State fully accepts the necessity of saving life, and of preventing extreme distress, it refuses to attempt to take upon itself, in time of famine, more than in any other time, the impossible task of preventing and relieving all human suffering; and that we will not allow the strong and natural desire to provide immediate remedies against present misery, to blind us to the duties which we owe to the people of the Empire at large, and to future generations. The task of giving relief to all those who suffer, offers the noblest opportunities of doing good to well-applied private charity and intelligence and zeal; but it cannot be undertaken by the State.

"So far from the experience of past and present famines showing that the performance by the Government of its proper duties in regard to the relief of famine is, on financial grounds, impossible, all the facts seem to me to point to an opposite conclusion: it is not only in the relief of famine that it is easy to throw away millions; and, whenever there has been a very heavy expenditure on famine relief, it has (such at least is my belief) resulted from causes which, we can now see, might have been avoided, and which we ought to be able to avoid in future.

"I earnestly hope that we shall not allow the present famine to pass away, without learning from it the necessity of adopting a clear and definite policy for dealing with such calamities in future: I believe that we can undertake to do everything that a Government ought to do, without any of the ruinous consequences which are sometimes predicted. Very serious obligations are undoubtedly imposed upon us: we must, and will, take measures for guarding against the dangers with which these periodical famines threaten our finances; and, although I cannot now say what those measures will be, the Government of India will not shrink from the duty which rests upon it.

"When, my Lord, only a few months ago, I accepted my present office, I looked forward confidently to proposing, in my first Financial Statement, several fiscal reforms of extreme importance: I hoped, among other things, that we should have been able to undertake measures which it has long seemed to me are more urgently required than almost any that can be named; measures for the reform of the system under which the salt duties are levied throughout India; for enabling the people, through vast tracts of country, to obtain what they cannot obtain now—plentiful supplies of cheap salt; for abolishing that opprobrium of our Government, the Inland Customs Line; and for getting rid, at the same time, of one of the very worst taxes ever levied by a civilised Government, the transit duty on sugar the produce of our own territories. I hoped, at the same time, that it would have been possible to take a really practical and decisive step towards redeeming the pledges given by the Secretary of State for the removal of the Customs duties on cotton goods: those pledges were, in my opinion, wisely given; and I looked forward with the greatest satisfaction to being able to take an active part in carrying out the policy which Her Majesty's Government has approved. Unfortunately these hopes have been disappointed: the terrible famine, from which so large a portion of India is now suffering, and which causes such unceasing anxiety to the Government and imposes such serious burdens upon the finances, has rendered it impossible to deal with these questions. The next best thing, however, to bringing great measures into effect, is to prepare the way for their execution hereafter; and I desire to tell the Council and the public what the policy is which

the Government is firmly resolved to carry out: the Government has a distinct programme which it intends to keep constantly in view.

"There is, perhaps, no great Indian question which has provoked so much discussion as that of salt, and no question on which high authorities have come to more opposite conclusions: it has been declared, on the one hand, that among all the main sources of the existing income of the State, the tax upon salt is one of the best, and one of those least felt by the people, and that by means of it, we raise a great revenue with the least possible objection: it has been frequently declared, on the other hand, that of all taxes this is the worst and wickedest.

"If I were to attempt to repeat to the Council all that has been said in support of these contending views, I should not get through my Financial Statement to-day: all that I can do is to state the conclusions of the Government, and the reasons for them: having, for many years past, given to this subject a large share of my attention, I feel great confidence that the policy is right which the Government, with the approval of the Secretary of State, intends to pursue.

"It is unnecessary now to discuss the question whether salt is or is not a proper subject for taxation in India; we, obviously, cannot do without the revenue which it gives us: for my own part, however, I believe the tax to be, on principle, open to no objection; and this is the view which was laid down by the Secretary of State when the question was before him some years ago. I will read to the Council an extract from a despatch from the Duke of Argyll on this subject, dated the 21st January 1869, not only because it appears to me to express, with great clearness, views which are statesmanlike and true; but because it contains, I believe, the last authoritative statement of opinion on this subject given by Her Majesty's Government to the Government of India:—

"On all grounds of general principles, salt is a perfectly legitimate subject of taxation: it is impossible, in any country, to reach the masses of the population by direct taxes: if they are to contribute at all to the expenditure of the State, it must be through taxes levied upon some articles of universal consumption. If such taxes are fairly adjusted, a large revenue can be thus raised, not only with less consciousness on the part of the people, but with less real hardship upon them than in any other way whatever: there is no other article in India answering this description upon which any tax is levied: it appears to be the only one which at present, in that country, can occupy the place which is held in our own financial system by the great articles of consumption from which a large part of the imperial revenue is derived. I am of opinion, therefore, that the Salt tax in India must continue to be regarded as a legitimate and important branch of the public revenue.

"It is the duty, however, of the Government to see that such taxes are not so heavy as to bear unjustly upon the poor, by amounting to a very large percentage upon their necessary expenditure.

"The best test whether an indirect tax is open to this objection is to be found in its effect upon consumption.

"I observe that several of those officers whose opinions upon this question have been given in the papers before me, found that opinion upon what they have heard, or what they have not heard, in the way of complaint among the native population: but this is a very unsafe ground of judgment: it is one of the great advantages of indirect taxation, that it is so mixed up with the other elements of price, that it is paid without observation by the consumers: even at home, where the people are so much more generally educated, and more accustomed to political reasoning, the heavy indirect taxes formerly levied upon the great articles of consumption were seldom complained of by the poor: they were not themselves conscious how severely they were affected by those taxes, and how much more of the articles they would consume if the duties were lower. But whilst this peculiarity of indirect taxation makes it a most convenient instrument of finance, it throws additional responsibility upon all Governments which resort to it, to bring the most enlightened consideration to bear upon the adjustment of taxes which may really be very heavy and very unjust, without the fact being perceived or understood by those on whom they fall."

"The Government has endeavoured to give to this great question the consideration which the Secretary of State thus referred to: Does the Salt tax press heavily and unjustly on the people?

"I must state, in the first place, that, although the Government of India has adopted the conclusions which I shall presently describe, it must not be supposed that the Government is committed to every opinion which I am about to express: I do not know that, in fact, any difference of opinion exists among the members of the Government; but, on a question of so much difficulty, there may be many matters of detail in which unanimity can hardly be expected.

"The circumstances under which the Salt duties are levied vary greatly in different parts of India. Bengal and Assam, with sixty-seven millions of people, get nearly the whole of their salt supply from Cheshire, a result mainly of the fact that the exports which India sends to Europe greatly exceed the imports which she receives: salt comes virtually as ballast. Almost the only local source within easy reach, from which Bengal can obtain salt, is the sea, and the natural facilities for making salt on the Northern coasts of the Bay of Bengal are not great: the climate is so damp that salt cannot easily be obtained by the cheap process of solar evaporation; and owing to the vast quantities of fresh water poured in by the Ganges and Brahmaputra, the sea is less salt than on the other shores of India.

"In Madras and Bombay, on the other hand, containing together about forty-seven millions of people, the manufacture of salt from the sea is cheap and easy; and, for these Presidencies, as well as for the greater part of the Central Provinces and the Native States of Southern India, the sea is the great source of supply.

"Coming to Northern India we find that the Punjab possesses inexhaustible supplies of rock-salt, which is consumed by about fourteen millions of people. Throughout the North-Western Provinces and Oudh, and a portion of the Central Provinces and of the Punjab, on the other hand, although there are many places where more or less impure salts can be produced, the home sources for the supply of good salt could never be sufficient: forty-seven millions of our own subjects depend almost entirely for their salt on the Native States of Rajputana or on places on the confines of those States.

"The system under which the duty is levied, and the rate of duty, vary in the different provinces. In Madras and Bombay the rate of duty is Re. 1-13 per maund (82 lbs): in Madras, this is collected under a monopoly by which all salt is manufactured on behalf of the Government, and sold to the people at a price which gives a profit equivalent to the duty: in Bombay the duty is levied as an excise. In Lower Bengal the tax is Rs. 3-4 per maund, and is levied chiefly in the form of a Sea Customs Import duty. In the Upper Provinces of this Presidency the rate is Rs. 3 per maund: in the Punjab, this is included in the selling price of the rock-salt, which is the property of the Government; in the rest of the Upper Provinces, the duty is levied when the salt is imported from Rajputana.

"For this purpose, and to prevent the ingress of salt taxed at lower rates, a Customs Line is maintained, extending from a point north of Attock to near the Berar Frontier, a distance of more than fifteen hundred miles: similar lines, some hundreds of miles in length, are established in the Bombay Presidency, to prevent untaxed salt from Native States entering British territory. Along the greater part of this enormous system of Inland Customs Lines, which, if they were put down in Europe, would stretch from London to Constantinople, a physical barrier has been created, comparable to nothing that I can think of except the great wall of China: it consists principally of an impenetrable hedge of thorny trees and bushes, supplemented by stone walls and ditches, across which no human being, or beast of burden, or vehicle, can pass without being subjected to detention and search: it is guarded by an army of some eight thousand men, the mass of whom receive as wages six or seven rupees a month. The bare statement of these facts is sufficient to show the magnitude of the evil.

"Although I believe that every thing is done, which can be done under such circumstances, to prevent abuses, it may be easily imagined what inevitable and serious obstruction to trade, and annoyance and harassment to individuals, must take place: I remember a graphic account by Sir George Campbell, in which he described the evils of the system, and the instruments of the nature of cheese-tasters which are thrust into the goods of every one whose business takes him across the line. The interference is not confined to the traffic passing into British territory; for, owing to the levy of the export duty on sugar, to which I have still to refer, the same obstructions are offered to the traffic passing in the other direction. In spite, however, of the evils inseparable from the existence of an Inland Customs Line, it is practically impossible to dispense with it so long as we levy our Salt tax at different rates in different Provinces, and have no means of controlling the manufacture and

taxation of salt produced in Native States until the salt reaches the British Frontier.

"The great object at which the Government ought to aim is to give to the people, throughout India, the means of obtaining, with the least possible inconvenience, and at the cheapest rate consistent with financial necessities, a supply of salt, the quantity of which shall be limited only by the capacity of the people for consumption.

"Although much has been done, during the last six or seven years, towards this object, we are still far from its attainment: a comparison between the average consumption of salt per head in different parts of India proves, incontestibly, that, where salt is cheap and abundant, the consumption is much larger than where it is dear, and where the supply is restricted. In Madras, for instance, the recent inquiries of the Salt Commission show an average annual consumption of more than 12 lbs. per head; and, in the greater part of the Bombay Presidency, the rate does not fall much short of this: in Bengal the consumption is about 9½ lbs. per head: while in the North-Western Provinces and Oudh, although it is very difficult to speak positively on the subject, the rate can hardly exceed, if indeed it amounts to, 6 lbs. per head.

"The existing system in Northern India has not even the merit of being financially profitable: for instance, the Madras Salt Commission show that thirty-four millions of people in that Presidency pay Salt duty at Re. 1-13 per maund, amounting to £927,000: if these people, instead of consuming more than 12 lbs. a head, consumed, like the people of Northern India, less than half that amount, and paid a duty of Rs 3 per maund, the revenue would be only £750,000. There can be no doubt that, in the interests of the revenue, the best system would be that under which we should levy throughout India a low rate of duty on unrestricted consumption.

"I have a strong belief that more than a hundred millions of people fail now to obtain a full supply of salt: I do not for a moment assert, nor do I believe, that the actual supply is insufficient for the preservation of health; nor do I at all agree with those who maintain that the salt tax presses with extreme severity on the poorer classes: but, however this may be, it is a great evil that the supply of this necessary of life should be restricted; and the restriction is not only mischievous in respect of human consumption, but in this way also, that there is little salt for the cattle, and little for any of the manufacturing processes in which it would be useful.

"It must not be forgotten, however, that the price of salt depends not only on the amount of the duty imposed, but on other charges: for example, as I have said elsewhere, the North-Western Provinces depend practically for their salt on the inexhaustible supplies which exist in the Native States of Rajputana: for a long time, the British Government acted as if it were its object to aggravate by artificial obstructions, the natural difficulties in bringing the salt into its own territories; we placed between our markets and the salt sources a great Customs Line; imposed on all salt crossing it a heavy duty; and ignored everything on the other side of that line: thus, for example, salt from Sámbhar had to find its way two hundred miles through Native States, with no roads or bridges, and subjected to imposts, and exactions, and hindrances of every kind, until, at last, it came to the greatest hindrance of all, our own preventive line.

"For such a state of things it was obvious that the mere reduction of the duty would do little or no good: the salt dealers, and not the consumers, would have been the chief gainers: with the existing means of communication, it was a physical impossibility to bring from Rajputana the salt required for some fifty millions of people: that task was one that could not be performed by any number of carts, and camels, and ponies which it was possible for the country to furnish; and these were the only means of transport: therefore it was that I have sometimes asserted that there was a salt famine in Northern India, meaning thereby, not only that salt was dear, but that sufficient salt could not be provided. For such a condition of things reduction of duty would no more afford a remedy than it would be a remedy in a food famine to give money to the people when no food existed in the markets: Lord Mayo saw

that there were two essential conditions to be fulfilled before relief could be found: it was necessary to provide cheap means of transport, to a practically unlimited extent, between the salt of Rajputana and our own markets; and also to make arrangements by which the price of salt to our people should be freed from influences outside our territory.

"The first condition could only be provided by making railways into Rajputana; the second condition rendered it necessary that our Government should obtain complete control over the manufacture and supply of salt at the chief places of production. The first of these two conditions has recently been fulfilled by the extension of Railway communication from Agra and Delhi to the Sámbhar salt lake: towards the second a great step was made when we obtained, under Lord Mayo's Administration, from the States of Jaipur and Jodhpur, the lease of this lake, the most important of the salt sources of Rajputana, and acquired, by an amicable arrangement which was as profitable to the Native Chiefs as to the British Government, the complete control over the local manufacture of salt.

"The practical result of these measures has already been, not only to facilitate the supply of salt to the Upper Provinces, but greatly to reduce its price: salt which, before 1869, was sold at Agra for Rs. 5-12 per maund, is now procurable for Rs. 4, and the price is still diminishing.

"During the Administration of Lord Northbrook, another important step in advance was taken: in 1874 about 800 miles of the Customs Line in the Central Provinces, maintained for the purpose of levying the difference between the duty on salt levied in the Central Provinces and that levied in the Bombay and Madras Presidencies, was abolished: at the same time, the difference between the rates of duty levied in the Bengal and Madras Presidencies was shaded off by a sliding scale down the Orissa and Ganjam Coast: the result of these measures has been greatly to reduce the price of salt in the Central Provinces and in Orissa, with practically no financial loss to the Government.

"Recently the extension of the Northern State Railway to Jhelum has stimulated the sale of rock-salt at the Government mines in the neighbourhood, and decreased its price to the people.

"We are, at present, engaged in further negotiations with the Native States of Rajputana, which, when completed, will enable us to abolish the greater part of the Inland Customs Line, and to establish, instead of it, a system of local management at the places of production: the measures now in progress will benefit not only the British Government, but the Native Chiefs also: there is no antagonism between our interests; and I confidently anticipate a successful issue. It will not, however, be possible to abolish the Inland Customs Line simultaneously with our obtaining the control over the manufacture of salt at the places of production: there will be, for some time, in Rajputana and Central India, large quantities of salt which have left the places of production and are scattered about in the hands of traders: if the Customs Line were removed, this salt might be brought into British Territory; and, if it could not be taxed, a corresponding loss would be occasioned to our Salt Revenue. Although, therefore, establishments on the Line may be, to some extent, reduced, the line will not be removed, or the pass system abolished, until the Government is satisfied that there do not exist outside the Line large stocks of salt which has not been taxed, and which cannot be otherwise prevented from entering British Territory until it is taxed. Nor would it be safe to abolish the Customs Line until we learn by experience whether our arrangements for controlling the salt manufacture are efficient or not.

"Moreover, before these objects can be accomplished, it will be necessary to take steps towards the equalization of the duties on salt; and this is also an indispensable preliminary to their general reduction: I had hoped on this occasion to have been able to announce some immediate measures in this direction; but, as I have already stated, this is rendered impossible by the famine. I should have been glad, had it been possible, to have seen an immediate reduction in the rate of duties in the Bengal Presidency to that in force in Madras and Bombay: but there is reason to fear that, before this point can be reached, it will be necessary that some temporary mea-

sures should be taken for raising the lower rates of duties while lowering the higher.

"I have alluded to the duties levied on sugar exported across the Inland Customs Line: these are one rupee per maund on refined sugar, and six annas per maund on unrefined sugar, or saccharine produce. Except where the line runs along the left bank of the Indus, exports across it are taken to Native States; but, when it passes the Indus, the sugar is merely taken from one part of British territory to another. This sugar is all the produce of our own people in the North-Western Provinces, Oudh, and the Punjab: it is one of the most important agricultural staples of those provinces; and it is important not only to the agriculturists and manufacturers and consumers, but directly to the Government, which looks greatly to sugar cultivation for its irrigation revenue.

"While we are taxing heavily our own sugar grown on the east of the Customs Line, for the supply of the country beyond it, we admit into the same country the Mauritius sugar, which is imported largely to Bombay, taxed at a much lower rate. It is calculated that the Inland Customs duty is equivalent to 10 per cent. on the value; but the incidence of the duty varies considerably, particularly on refined sugar: on the cheaper kinds the duty is equivalent to more than 20 per cent. on its value: the sea import duty on Mauritius sugar is 5 per cent. *ad valorem*. I do not assert that there is, at present, any great competition between the sugar of the Upper Provinces of this Presidency and foreign sugar; but, so far as competition exists, the Inland Customs duty acts as a protective duty in favour of foreign and against our own sugar: to this extent, the duty must fall on the producer within the Customs Line. The competition will be more apparent and severe when the connection of the Rajputana State Railway with the Bombay and Baroda Line is completed.

"Little or no sugar is grown in Rajputana or Central India; and the increase of price caused by the Inland Customs Line must tend to diminish consumption, and so, still further, to injure the producer: it is impossible to estimate the injury to the people and the Government caused by placing artificial obstructions on the export of one of the great agricultural staples of the country; and such obstructions obviously affect not only the export but the import trade as well: the Government of India has repeatedly urged upon Native States the policy of abolishing their transit duties; but it is difficult to see with what consistency we can do this, so long as we retain our Sugar duties. They yield about £165,000 a year: this is my only excuse for not proposing their instant abolition: they will, at any rate, disappear with the abolition of the Inland Customs Line.

"My Lord, I have reserved to the end of my Statement the remarks which I wish to make regarding the Customs duties on cotton goods. I do not now wish to re-open the discussion which was finally closed last year by the Secretary of State: it was then decided by Her Majesty's Government that "the interests of India imperatively require the timely removal of a tax which is at once wrong in principle, injurious in its practical effect, and self-destructive in its operation." The Secretary of State, while leaving to the judgment of the Government of India the mode in which the policy thus laid down should be carried out, declared his opinion that measures for the abolition of these duties should have priority over every other form of fiscal relief to the Indian taxpayers. Financial embarrassments arising from the depreciation of silver prevented any practical steps being taken, last year, in this direction: it was thought unwise to give up any revenue at such a time; and the Secretary of State concurred in this decision. It is with great regret that I have to announce that, for reasons similar to those which prevailed a year ago, it has been decided that nothing can be done, at the present moment, towards the abolition of these duties: the financial difficulties caused by the famine are so serious that we cannot sacrifice any source of income.

"I regret this, not only because we are thus unable to carry out the orders of Her Majesty's Government, to which this Government owes a loyal and unhesitating obedience, but I regret it, personally, because, as the Council are aware, I am no recent convert to the policy which has been laid down, but have been, for many years past, one of those who have advocated the abolition of these duties at the earliest possible opportunity.

"I altogether disbelieve that there is, in this matter, any conflict between Indian and English interests: I am satisfied that these interests are identical, and that they alike require the abolition of this tax. I will not speculate on what ought to have been done if the case had been different; but there is one thing which I wish to take this opportunity of saying: we are often told that it is the duty of the Government of India to think of Indian interests alone, and that if the interests of Manchester suffer it is no affair of ours: for my part, I utterly repudiate such doctrines: I have not ceased to be an Englishman because I have passed the greater part of my life in India, and have become a member of the Indian Government. The interests of Manchester, at which foolish people sneer, are the interests not only of the great and intelligent population engaged directly in the trade in cotton, but of millions of Englishmen: I am not ashamed to say that, while I hope that I feel, as strongly as any man, the duties which I owe to India, there is no higher duty in my estimation, than that which I owe to my own country. I believe that our countrymen at home have a real and very serious grievance, and that it is no imaginary injury against which they complain: I know that Your Excellency has resolved that the Government of India shall not shirk this business; and there need be no fear that it will be regarded in any half-hearted spirit. Your Excellency took the earliest opportunity which could be found, after you had assumed the office of Viceroy, to declare publicly your views upon this subject; and if I say no more regarding it now, it is mainly because I feel sure that Your Excellency will not lose the present opportunity of publicly declaring those views again: for myself personally, if I had not confidently expected to take part in this great reform, I doubt whether anything would have induced me to accept my present office; and I trust that I may still have a share in the performance of a task which I look upon as one of the most important which this Government has before it.

"It is important, in my opinion, not only on its own account, but for the results which may follow hereafter. The net Sea Customs Revenue proper of India amounted in 1875-76 to £2,475,530, of which the duties on cotton goods yielded £850,000: when the cotton duties are removed, there will remain export duties on rice, indigo, and lac yielding together £620,000; and import duties on a multitude of articles yielding £930,000. Excluding the duties on cotton goods, the export and import duties together give £1,550,000: many of these duties are so objectionable that it is impossible that they can last: and can it be supposed that we should long continue to maintain huge establishments for the purpose of levying the small remnant of revenue that might survive? The truth is that cotton goods are the sole article of foreign production which the people of India largely consume, and there is no possibility of deriving a large customs revenue from anything else: I do not know how long a period may elapse before such a consummation is reached; but, whether we see it or not, the time is not hopelessly distant when the ports of India will be thrown open freely to the commerce of the world.

"I feel, my Lord, that the Statement which I have made to-day is open to this general objection, that I have said comparatively little of what has actually been done, and a great deal of what may be done in the future: I may be told that it is seldom wise for a Government to go out of its way to pledge itself to Measures which it intends to adopt hereafter, and which may turn out, after all, to be impracticable. Under our present circumstances, I do not think that this is applicable to us: a distinct conception having been formed of some at least of the great objects at which our financial policy ought to aim, it seems to me highly desirable that a clear and public avowal of those objects should be made: the Government may thus hope to obtain the greatest advantage which an honest Government can desire,—a full examination and discussion of its proposed policy: such discussion will either help it to carry that policy into effect, or will enable it to avoid errors into which it might otherwise fall.

"I have now, my Lord, finished my Statement: I have endeavoured to place before the Council and the public all the facts which it seemed to me might help them to form an accurate judgment on our financial position and on our

proposed policy: I have not attempted to keep out of sight anything which was unpleasant; but have perhaps rather been inclined to err in the other direction, and to bring almost too prominently into notice the weak points of our financial administration.

"The final result which seems to me to come out very clearly is that the finances of India are, on the whole, in a prosperous and satisfactory state; and, that although there are some serious defects of system, they can certainly be removed: while I do not disguise from myself the fact that there may be grave difficulties before us, I look forward to the future not only with hope but with confidence."

MINUTE, DATED 15TH MARCH 1877, BY THE HON'BLE SIR JOHN STRACHEY, K.C.S.I., ON THE ACCOUNTS OF THE REVENUE AND EXPENDITURE AND RECEIPTS AND DISBURSEMENTS OF BRITISH INDIA IN 1875-76, AND THE REVISED ESTIMATES FOR 1876-77.

I PROPOSE, in this Minute, to review the Accounts of Revenue and Expenditure and Receipts and Disbursements, which are now completed for the year 1875-76, and the Revised Estimates for 1876-77, the year which is now about to close. My explanation of the Budget Estimates for the ensuing year, 1877-78, will, on this occasion, be made in the Legislative Council.

I must, in the first place, explain that the Abstract Statements of the Accounts of the Revenue and Expenditure of 1875-76 and the Estimates of 1876-77 and 1877-78 which I have now the honor to place before the Council, differ in form from the Statements prepared during the last seven years.

From the 1st April 1871, the Government of Lord Mayo entrusted to the management of the Local Governments and Administrations certain important services, with Consolidated Allotments from the Imperial Revenues for their support; and the revenues connected with these services were, at the same time, surrendered for provincial uses. It was thought inexpedient to retain in the Imperial Accounts and Estimates the details of the revenue and expenditure thus made over to the Local Governments: accordingly, since 1871-72, these transferred Heads of Revenue and Expenditure have been excluded from the General Estimates and Accounts, the whole transactions respecting them being represented, there, by a single net entry under the Head *Allotments for Provincial Services*. The details thus omitted have been published in subsidiary statements, and each Local Government has given due publicity to its own Provincial Estimates and Accounts.

The Government of India now sees reason to regret the method then employed, because, by this method, figures of interest and importance are relegated to subordinate statements; the General Accounts and Estimates become incomplete; and the character of the arrangements between the Imperial and the Local Governments is not truly represented, or their operation sufficiently illustrated. The Government of India has, therefore, resolved to re-introduce into the Imperial Accounts and Estimates all the details omitted therefrom since 1871-72.

Accordingly, in the Abstract Statements which I now present to the Council, the heads of *Police* and *Education* appear again on each side of the Account, and the head *Allotments for Provincial Services* disappears, its elements being distributed among the several Heads of Revenue and Expenditure from which they were originally subtracted. Moreover, the Statements contain three new Adjusting Heads which are necessary in consequence of the arrangements between the Imperial and Local Governments, and which will, I believe, usefully illustrate the practical working of these arrangements.

The Local Governments are entitled to keep for provincial uses any surplus, while they must make good from provincial resources any deficit, upon their Provincial Accounts as a whole; such surplus is added to, and such deficit, in the first resort, supplied from, the Balances of the Local Governments in the hands of the Imperial Government. These additions and subtractions will henceforth be recorded under the Heads *Balances of the Local Governments Increased* and *Balances of the Local Governments Decreased.*

It may happen, however, that the balance at credit of a Local Government does not suffice to cover a deficit in its Provincial Accounts; or, for other reasons, a Local Government may think it right to contribute funds from its separate provincial resources in support of the Imperial services which it administers. Whenever such contributions are made, they will be recorded under the Head *Provincial Contributions*. It is not deemed expedient to open on the expenditure side a corresponding account of *Contributions to Local Funds*, because, although such contributions are frequent, and might be found to counterbalance some substantial part of the *Provincial Contributions*, their object and destination can always be classified under some Service Head, and it is considered better thus to classify them, than to show them under a mere Transfer Head, which would give no information as to the nature of the service for which they are made.

Taking the three Adjusting Accounts *Provincial Contributions*, *Balances of the Local Governments Decreased*, and *Balances of the Local Governments Increased* together, a very good idea can be formed of the financial working of the arrangements with the Local Governments.

The engagements between the Imperial and Local Governments will no longer affect the form of the Imperial Accounts and Estimates, except through the adjusting accounts which I have described. The Revenue and Expenditure under all other Heads will be recorded without any reference to the several responsibilities of the Imperial and the Local Governments, which will be matter for arrangement altogether apart from the Accounts. Thus, henceforth, any one wishing to ascertain the total imperial revenue and expenditure of British India, under the several recognised Heads of Account, will be able to do so from the General Accounts and Estimates. It seems to me that this will be an advantage; and that the re-combination of the Accounts and Estimates of the Imperial Revenues and Expenditure, whether immediately administered by the Imperial or by the Local Governments, into one Imperial Statement, will make the whole more intelligible, and enable both the Government of India to control the Revenue and Expenditure, and the public to criticise the Accounts, more effectually than heretofore.

It will be necessary for the Local Governments to excerpt, for their own information, the items of Revenue and Expenditure for which they are primarily responsible: they will be required to publish the Accounts and Estimates thus compiled, which will be of great local interest; but such local Accounts will not form a part of the Accounts of British India.

A change is made in the manner in which the transactions of the Guaranteed Railway and Madras Irrigation Companies are exhibited in Statements Nos. IV, V, and VI. Hitherto these transactions have been there shown net after elimination of the effects of the conditions of the contracts as to the rate at which, in the accounts between the Government and the Companies, Rupees are converted into sterling. Henceforth these transactions will be shown gross, in Rupees, just as they occur.

I ask a passing notice for another change of importance in the character of the Abstract Statements. For the last ten years, these Statements have been prepared, ostensibly, in Pounds Sterling, on the hypothesis that the English Pound is equal to ten Rupees. Since the Revenue and Expenditure and Receipts and Disbursements of the Government of India, in India, are really calculated in Rupees, the value of which, compared with the English money of account, varies from time to time, it is plain that the Pound Sterling used in these Statements was not a real Pound Sterling, but a conventional money of account peculiar to this purpose. So long as the value of Rs. 10 did not much vary, as for many years it did not, from £1, there was a certain convenience in this arrangement; and the figures conveyed to English readers a meaning not very far from the truth: but, of late years, there has ceased to be any close or normal relation between Rs. 10 and £1, and Statements prepared upon the hypothesis of such a relation, are now untrue and misleading. I shall, therefore, revert to the use of Rupees in the Abstract Accounts and Estimates appended to the Financial Statement: the Secretary of State will use his own discretion as to the money of account in which the Accounts and Estimates presented to Parliament shall be stated. In combining the Sterling Receipts and Disbursements under each Head, at the

Home Treasury, with the Rupee Receipts and Disbursements under the same Heads at the Indian Treasuries, it is only a degree less incorrect to call the totals, under each Head, Rupees, than it is to call them Sterling: the consequent errors of detail, which, under the existing system, cannot be avoided, and which, as will appear in the course of this Minute, are often highly inconvenient, are neutralised in the Grand Totals by the entry of the sum of them under the adjusting Head *Loss by Exchange;* the errors do not involve some of the most important Heads or the Grand Totals; and, although I am unable at present to eliminate them, I prefer to state the Accounts and Estimates in Rupees, as, on the whole, much less misleading than if I were to state them in Pounds Sterling.

PROVINCIAL ACCOUNTS, 1871—76.

It would have been interesting to compare the Accounts of the Local Governments for 1875-76 as now re-incorporated in the Imperial Accounts, with the corresponding portions of the last Accounts (for 1870-71), before the introduction of the system of Consolidated Allotments for Provincial Services; I shall attempt such a comparison in my Statement before the Legislative Council; but I fear that it cannot be made quite completely.

As already explained, it is possible that a portion of the expenditure for Education and Public Works now recorded as Imperial in 1875-76, would have been treated as Local in 1870-71 and *vice versâ*. In any case, the growth of the expenditure upon these important Services in the five years was trifling; and the Imperial Government has been, certainly, set free from importunate claims upon its resources.

It will be remembered that the Governments of India inaugurated the Provincial system by granting to the Local Governments balances aggregating Rs. 20,00,000. Their receipts in the five years, apart from *Provincial Contributions*, have aggregated Rs. 29,57,31,568, and the sum of Rs. 55,93,660 has been contributed to the Delegated Services from Provincial Resources. The expenditure upon the Delegated Services has amounted to Rs. 30,03,76,338, and the balances of the Local Governments on the 31st March 1876 were Rs. 29,48,890. Of the whole expenditure, Rs. 15,27,296 is recorded as Contributions to Local Funds; but I am doubtful whether this can be accepted as accurately representing the relief to Local Funds by the transfer of expenditure from the Local to the Imperial category; the net burden upon separate Provincial Resources cannot, in any case, have been very heavy. Of the gross sum of Rs. 55,93,660 shown as *Provincial Contributions*, Rs. 8,98,434 is on account of *Famine Relief* in Bengal, and explains the abnormal amount recorded under this Head in 1875-76. The Abstract Account of the five years is as follows:—

Assigned Revenues of the Local Governments, and their Expenditure upon the Delegated Services, 1871—76.

	Rs.		Rs.
Opening Balance, 1st April 1871	*20,00,000*	*Expenditure on Transferred Services*	*30,03,76,338*
Assigned Revenues	*4,13,05,938*	*Closing Balance, 31st March 1876*	*29,48,890*
Allotments from Imperial Revenues	*25,44,25,630*		
Provincial Contributions ...	*55,93,660*		
Total ...	*30,33,25,228*	*Total* ...	*30,33,25,228*

In 1875-76, the Local Governments spent net Rs. 33,72,860* more than their Fixed Allotments and Assigned Revenues together, of which Rs. 18,91,710 was taken from the balances at credit of the Local Governments in the Imperial Treasury, and Rs. 14,81,150 was provided from Provincial Resources.

	Rs.	Rs.
* *Provincial Contributions*		*14,81,150*
Balances of the Local Governments Decreased	*23,33,590*	
Balances of the Local Governments Increased	*4,41,880*	
		18,91,710
		33,72,860

I think it well to offer a few further explanations of the Provincial Contributions, to which much interest attaches. The Local Funds in any Province are of two kinds: many of these Funds belong exclusively to particular

districts or localities, and can be expended only for their benefit; but, in each Province, there is a more or less considerable residuum at the disposal of the Local Government for use, at its discretion, throughout the Province. When the system of Consolidated Allotments of Imperial Revenue for certain Delegated Services was adopted, it was, at first, thought convenient to amalgamate the Accounts of the Transferred Services and Revenues with those of the Local Funds at the disposal of the Local Governments for general provincial purposes, and unnecessary to maintain any separation between these two Accounts. But this amalgamation was found to be inconvenient; as it made it difficult for the Government of India to ascertain, from time to time, all the financial consequences of the new system as compared with the old. The Government of India determined, therefore, some time ago, to arrange for as complete a re-separation as possible of the transactions which would, under the old system, have been recorded in the Imperial Accounts, from those which would have been treated as transactions of Local Funds.

The abandoned system had made such progress that it is doubtful whether this separation can be completely effected as regards the past, or, even, whether it is, as yet, perfectly accomplished as regards recent and current expenditure. For this reason it cannot be said with confidence that the revenue hitherto recorded as *Provincial Contributions* is all of the nature of a demand upon separate Provincial Resources which would not have occurred under the old system. Indeed, it is certain that some considerable portion of these contributions is balanced by the record as imperial of expenditure which would, under the old system, have been a charge upon Local, or separate Provincial Resources. I hope, however, that the means will gradually be found of altogether removing from both sides of the Imperial Accounts, in future, all transactions which, under the old system, would, directly or indirectly, have been recorded under "Local Funds:" when this is effected, the demands upon local resources for imperial purposes will, I believe, be found to be, as yet, inconsiderable.

It will be seen from Statement No. VII that the whole sum raised in India in 1875-76 by Local Taxes, Rates, and Cesses was only Rs. 2,03,83,620: the estimated amount in 1876-77 is Rs. 2,07,32,000, and in 1877-78 Rs. 2,23.29,000. This last amount is, however, exclusive of new taxation to be imposed under the measures which I shall this day describe in the Legislative Council.

ACCOUNTS OF REVENUE AND EXPENDITURE, 1875-76.

I proceed to explain the differences between the Regular Estimates of the Revenue and Expenditure of 1875-76 made by the Hon'ble Sir William Muir on the 31st March last, and the Accounts of that year as since completed.

Sir William Muir estimated that the Grand Total Revenue would be Rs. 50,99,10,000, and the Grand Total Expenditure Rs. 53,88,70,000; and that there would be a Deficit of Rs. 2,89,60,000; or (the Extraordinary Expenditure being estimated at Rs. 4,14,30,000), a Surplus on the Ordinary Account of Rs. 1,24,70,000. The completed Accounts show the Revenue to have been Rs. 52,51,57,887, the Expenditure Rs. 55,11,75,355, and the Deficit Rs. 2,60,17,468, being less than the estimate by Rs. 29,42,532: the Extraordinary Expenditure having been Rs. 4,27,06,290, the Surplus on the Ordinary Account was Rs. 1,66,88,822, being more than the Estimate by Rs. 42,18,822.

The Revenue has exceeded the Estimate by Rs. 1,52,47,887, and the Expenditure by Rs. 1,23,05,355. Of these excesses, Rs. 97,23,653 on each side of the Account is due to the re-incorporation, in gross, of the transactions of the Local Governments, which were represented in the Regular Estimates, by a single net entry; if this disturbing cause be abstracted, there remains an excess Revenue of Rs. 55,24,234, and an excess Expenditure of Rs. 25,81,702, of which Rs. 13,05,412 is in the Ordinary Section of the Account, and Rs. 12,76,290 is Extraordinary. This latter excess is due to the purchase of certain stores from the Guaranteed Railway Companies for the State Railways, a transaction not anticipated when the Regular Estimates were closed.

It is not necessary now to make any minute comparison between the details of Sir William Muir's Estimates and the Accounts, and I shall content myself with mentioning only the principal items of difference. Only two of the Heads of Revenue yielded, in a noteworthy degree, less than the estimate, *viz.*, *Salt*, Rs. 4,15,850, the clearances of Foreign Salt during March having been abnormally deficient, and *Irrigation*, Rs. 1,12,800, an old Account having been adjusted: all the other important Heads of Revenue show improvement, the chief items being as follows:

Land Revenue, Rs. 13,17,420, occurred in Bengal, where unexpected arrears were collected, and in Madras. So large a portion of the Land Revenue is collected at the close of the year, that it is impossible to secure absolute correspondence even between the Regular Estimates and the Accounts of Land Revenue.

Forest, net improvement Rs. 6,88,598, which occurred chiefly in British Burmah, and might perhaps have been foretold.

Marine, net improvement Rs. 5,35,639, chiefly in Bengal, where there was an unexpected transfer entry.

The only important failure in the Estimates of Expenditure is under *Refunds*, under which Head it became necessary to adjust a large erroneous credit of Land Revenue in Bombay.

The expenditure on *Famine Relief* was considerably less than the sum shown in the Regular Estimates. The Imperial Expenditure was, indeed, only Rs. 50,85,550, being less than the Regular Estimate by Rs. 14,74,450. But, under the new system of combining the two Accounts, the Provincial Expenditure, in 1875-76, upon the Famine, Rs. 8,72,243, is added to the Imperial Expenditure, and the whole becomes Rs. 59,57,793.

In the Original Estimates of Revenue and Expenditure for 1875-76 provision was made for a Surplus upon the Ordinary Account of Rs. 50,60,000. The actual Surplus was Rs. 1,66,88,822; and this, notwithstanding a revision of the Customs Tariff, in the middle of the year, with an estimated effect of Rs. 26,60,000 adverse to the Estimates; notwithstanding, also, an unestimated adjustment from the Imperial Revenues of Rs. 50,85,550 for *Famine Relief*.

The Revenues exceeded the Original Estimates by Rs. 1,72,34,234, and the Expenditure exceeded the Estimates by Rs. 56,05,412. The principal items of improvement are *Opium*, Rs. 50,28,600, and *The Army*, Rs. 51,31,540: minor improvements are *Land Revenue*, Rs. 12,47,420; *Forest*, Rs. 10,30,080; *Excise*, Rs. 12,63,770; and *Customs* (notwithstanding the revision of the Tariff), Rs. 4,46,580. The chief items of deterioration are *Famine Relief*, Rs. 50,85,550, and *Public Works Ordinary*, Rs. 19,05,530.

Of the Extraordinary Expenditure, Rs. 3,16,51,840 was spent upon Railroads, chiefly as follows:—

	Rs.		Rs.
Rajputana ...	33,69,370	Punjab Northern ...	32,69,800
Holkar	28,39,730	Sindhia	5,57,810
Neemuch ...	20,03,080	Tirhoot	9,75,760
Wardah Valley ...	14,08,940	Northern Bengal ...	31,88,540
Indus Valley ...	1,00,62,100	Rangoon ...	40,95,180

and Rs. 1,10,54,450 on Canals, principally as follows:—

	Rs.		Rs.
Orissa Canals ...	10,50,430	Lower Ganges ...	25,22,870
Midnapore ...	3,35,730	Western Jumna ...	4,91,840
Sône	25,75,140	Bari Doab ...	3,27,090
Ganges	5,82,550	Sirhind ...	14,84,260
Agra	5,91,450	Godavery Delta Works	4,48,300
		Moota Lake ...	3,35,650

The Total Capital Expenditure on Irrigation Works in India, to the end of 1875-76, amounted to Rs. 16,55,44,070, of which Rs. 8,70,80,510 was classified as Extraordinary as follows :—

	Ordinary.	Extraordinary.	Contribution.	Capital value of land used for works.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.
I.—Capital outlay in Provinces in which the Revenue due to the Canals has been ascertained—					
Bengal	14,63,490	3,92,12,490	...	51,440	4,07,27,420
North-Western Provinces ...	2,82,10,100	2,01,27,210	...	10,57,960	4,93,95,270
Punjab	1,63,22,770	1,27,68,910	41,80,090	83,260	3,33,55,030
	4,59,96,360	7,21,08,610	41,80,090	11,92,660	12,34,77,720
II.—Capital Outlay in Provinces in which the Revenue due to Canals has still to be ascertained—					
Madras .. .	1,20,36,200	67,34,780	...	...	1,87,70,980
Bombay	1,03,17,420	80,50,140	16,810	2,34,660	1,86,19,030
Rajputana	10,14,140	1,86,980	...	...	12,31,120
	2,33,97,760	1,49,71,900	16,810	2,34,660	3,86,21,130
III.—Capital Outlay in Provinces in which Operations on Irrigation Works have been suspended—					
Central Provinces ...	3,40,860	...	...	...	3,40,860
Oudh	4,41,080	...	...	...	4,41,080
	7,81,940	...	...	...	7,81,940
Total of I, II, & III...	7,01,76,060	8,70,80,510	41,96,900	14,27,320	16,28,80,790
IV.—Capital Outlay on Embankment Works in British Burmah	26,63,280	...	...	...	26,63,280
	7,28,39,340	8,70,80,510	41,96,900	14,27,320	16,55,44,070

	Rs.
The total Receipts during 1875-76 have been	69,86,570
From this sum the amount to be deducted for working expenses is...	33,41,780
Thus leaving the Net Revenue at	36,44,790

which is 3·6 per cent. on a Capital Outlay of £10,072,328, which is the amount spent on Canals now yielding revenue.

Of the Rs. 4,27,06,290 classified as Extraordinary Expenditure, Rs. 1,66,88,822, or 39 per cent., appears from the Accounts to have been provided from the Revenues of the year, leaving only 61 per cent. to be met from borrowed money. The financial results of the year 1875-76 would thus have been highly satisfactory if all the Extraordinary Expenditure had been on really reproductive works. Unfortunately, however, no less than Rs. 1,33,25,923 was expended under this head on the Punjab Northern and Indus Valley Railways in 1875-76, and, as I shall have occasion to explain elsewhere, the direct returns which we shall get from these Railways will be very small.

The expenditure for the relief of the Famine of 1874 in Northern Bengal, may now be said to have been completely brought to account: there may be still some outlying items; but they will not be important. The total is as follows:—

	Rs.
In 1873-74	3,86,46,730
In 1874-75	2,23,78,600
In 1875-76 (including Expenditure from Provincial Funds)...	59,57,793
Total	6,69,83,123

of which Rs. 8,98,434 was provided from Provincial Resources, and Rs. 6,60,84,689 from the Imperial Revenues. There was a set-off in increased Net Traffic Receipts on the *Guaranteed Railways* estimated by Sir William Muir, last year, at Rs. 17,00,000; but, on the other hand, there was some loss of *Excise* and other revenue, and a substantial expenditure from Local Funds. The whole net cost of the measures for the relief of the Bengal Famine cannot now be stated at less than 6¾ crores of Rupees.

If there had been no Imperial Expenditure for Famine Relief, the Surplus Imperial Revenue of the three years on the Ordinary Account would have been—

	Rs.
1873-74...	2,05,70,050
1874-75...	2,55,70,575
1875-76...	2,17,74,370
Total ...	6,79,14,995

Thus, according to the Accounts, the Revenues of the three years bore the whole cost of the Famine, and even yielded a Surplus of Rs. 9,31,872. If we add to this the sum of Rs. 8,98,434 contributed from Provincial Resources, the net Surplus of the three years on the Imperial Ordinary Account would be Rs. 18,30,306. This apparently happy result is marred by the fact that there was, during these three years, an expenditure of Rs. 3,35,26,565 upon the Railways which I have just mentioned, which, although treated as Extraordinary Works, cannot be expected to be, in any sufficient degree, reproductive. In speaking of the arrangements proposed for the coming year, 1877-78, I shall refer more particularly to this subject, and shall explain the resolution of the Government to treat, hereafter, expenditure of this kind as ordinary.

ACCOUNTS OF WAYS AND MEANS, 1875-76.

I have still to examine the Ways and Means by which provision was made for the service of the year 1875-76, and to compare them with the Regular Estimates. The figures which I am about to quote will be found, in a convenient shape, in little tables at foot of the page in the left hand corner of Statements Nos. IV, V, and VI. Those with which they are to be compared are in the corresponding little tables in the centre of the same Statements appended to Sir W. Muir's Financial Statement of 31st March last. If any one wishes for more details than these little abstracts contain, they are to be found in the body of the Statements themselves.

We have seen that the deficit of Imperial Revenue in 1875-76 was altogether Rs. 2,60,17,470, being an improvement upon the Estimate of Rs. 29,42,530. We lent, during the year, to Native States and Public bodies Rs. 38,74,876 more than we received: the sum is smaller by Rs. 7,40,124 than was expected. The Guaranteed Railway and Irrigation Companies withdrew from our Treasuries the sum of Rs. 1,04,31,836, being less than was expected by Rs. 19,86,164. The disbursements from the balances of the Military Funds were Rs. 41,36,267, being Rs. 733 less than Estimate: the amount is abnormal, being due to the refund of their subscriptions to a large number of the members of the Bengal Medical Retiring Fund. The Local Governments drew for separate provincial and local purposes Rs. 40,22,930, being more by Rs. 60,930 than was estimated. Altogether we had to make good from other sources than the public Revenues the sum of Rs. 4,84,83,379, being less than Sir William Muir estimated by Rs. 74,16,621.

Towards meeting this obligation we borrowed the net sum of Rs. 4,10,95,219, being more by Rs. 20,68,219 than was expected; the excess was in England. The money deposited in our Savings Banks exceeded the money drawn out by Rs. 8,40,206, being less by Rs. 1,22,794 than was estimated: the deposits of the Covenanted and Uncovenanted Civil Service Funds were Rs. 11,18,471, being more by Rs. 85,471 than the Estimate, and the balance on the Deposit and Advance Account was in our favour by Rs. 20,18,538, being less by Rs. 30,25,462 than was expected. The remaining transactions yielded to the Treasury the net sum of Rs. 23,93,032, while it was estimated they would withdraw from the Treasury Rs. 18,08,000.

Thus it happened that, instead of the estimated reduction of Rs. 98,33,000, the actual reduction of the cash balances during the year was only Rs. 10,17,913, an improvement of Rs. 88,15,087, of which Rs. 70,93,000 was in India and the rest in the Home Treasury.

FINANCIAL AND COMMERCIAL STATISTICS, 1875-76.

In the following table some important financial and commercial statistics belonging to the year 1875-76 are compared with the same statistics for the two preceding years.

(Values (excepting (*a*),) in Rupees.)

	1873-74.	1874-75.	1875-76.
Net imports of gold	*1,38,00,000*	*1,87,00,000*	*1,54,00,000*
Net imports of silver	*2,47,00,000*	*4,64,00,000*	*1,56,00,000*
Total Net imports of Treasure ...	*3,85,00,000*	*6,51,00,000*	*3,10,00,000*
Public Debt incurred, including Guaranteed Railway Capital ...	*1,01,00,000*	*9,24,00,000*	*4,79,00,000*
Bills drawn by Secretary of State upon Government of India	*14,25,00,000*	*11,76,00,000*	*13,75,00,000*
Amount in sterling obtained for each rupee (a)	*22,37d.*	*22,12d.*	*21,62d.*
Average price of an ounce troy standard Silver in London (a) ...	*59,16d.*	*58,16d.*	*56,20d.*
Commodities excluding Treasure.			
Exports	*55,00,00,000*	*56,36,00,000*	*58,09,00,000*
Imports	*33,82,00,000*	*36,22,00,000*	*38,89,00,000*
Net exports	*21,18,00,000*	*20,14,00,000*	*19,20,00,000*

The excess net imports of silver, and the reduction of the Council Bills, in 1874-75, are due to the large amount borrowed in that year for the campaign against the Bengal Famine, and for Railways and other Public Works.

In 1873-74, for the first time for 23 years, the average price of an ounce troy of standard silver in London fell below 60*d.*: the continuous fall in 1874-75 and 1875-76 marks the course of a phenomenon that has already caused, and must, I fear, for some time to come, cause, grave anxiety to all interested in India: I shall have to refer to the subject hereafter.

The value of commodities (other than treasure) exported in 1875-76 exceeded the exports of 1874-75 by Rs. 1,73,00,000: but the value of Imports grew by the still larger sum of Rs. 2,67,00,000: consequently, the Net Exports of India (excluding treasure) fell off by Rs. 94,00,000.

Including treasure, the Net Exports of the three years were—

1873-74.	1874-75.	1875-76.
Rs.	Rs.	Rs.
17,33,00,000	13,63,00,000	16,10,00,000

So that the Net Exports of 1875-76 altogether, though less than those of 1873-74 by Rs. 1,23,00,000, exceeded those of 1874-75 by Rs. 2,47,00,000.

The most important of our exports is *Cotton, Raw*, the statistics of which are as follows:—

	1873-74.	1874-75.	1875-76.
Cwts.	45,00,000	56,00,000	50,10,000
Value (in Rupees) ...	13,21,22,000	15,25,73,000	13,27,90,000

The great exports of 1874-75 were thus not maintained in 1875-76: this is attributed, partly, to an abundant crop in the United States, and, partly, to increasing demands for this important staple for home consumption. In correspondence with this latter influence, the exports of *Manufactures of Cotton*, including twist and yarn, show an important development, as follows:—

1873-74.	1874-75.	1875-76.
Rs.	Rs.	Rs.
52,26,000	51,24,000	66,34,000

The imports of Cotton Goods, including twist and yarn, were:—

1873-74.	1874-75.	1875-76.
Rs.	Rs.	Rs.
17,78,46,000	19,42,13,000	19,25,87,000

The value of the imports of Cotton Manufactures, excluding twist and yarn, has not decreased. The figures are—

1873-74	1874-75.	1875-76.
Rs.	Rs.	Rs.
15,15,57,000	16,26,36,000	16,46,39,000

There was, indeed, a decrease in the value of grey (unbleached) goods imported, on private account in 1875-76, as compared with 1874-75, amounting to Rs. 73,58,240; but it was more than counterbalanced by increases under other descriptions in both quantities and values. It should be mentioned here that the values of grey goods returned in 1873-74 and 1874-75 were tariff values, which were above the market values; while, in 1875-76, their recorded values have been the actual market values, exclusive of duty.

The following table contains the Statistics of our most important Exports for the three years:—

(Values in Rupees.)

			1873-74.	1874-75.	1875-76.
Cotton Goods, Twist and Yarn	lbs.	...	2,45,5,000	2,83,5,000	6,22,9,000
	value	...	12,84,000	14,76,000	26,69,000
„ *Manufactures*	value	...	39,42,000	36,48,000	39,65,000
Coffee	(cwts.)	...	364,000	312,000	372,000
	value	...	1,49,14,000	1,30,53,000	1,62,70,000
Hides and Skins, raw, dressed, and tanned ...	(value)	...	2,61,82,000	2,67,78,000	2,94,36,000
Indigo	(cwts.)	...	116,000	81,000	110,000
	value	...	3,55,53,000	2,57,63,000	2,87,51,000
Jute, raw and manufactured	(value)	...	3,63,77,000	3,18,55,000	3,29,15,000
Lac	(value)	...	25,77,000	25,10,000	75,57,000
Opium	(chests)	...	89,000	95,000	88,000
	value	...	11,34,19,000	11,95,70,000	11,14,84,000
Rice	(cwts.)	...	20,245,000	17,393,000	20,416,000
	value	...	5,54,98,000	4,76,53,000	5,31,11,000
Saltpetre ...	(cwts.)	...	4,51,000	5,53,000	415,000
	value	...	46,50,000	50,15,000	34,89,000
Seeds	(cwts.)	...	4,433,000	6,075,000	10,507,000
	value	...	2,36,14,000	3,23,59,000	5,46,20,000
Silk	(cwts.)	...	19,000	14,000	11,000
	value	..	1,14,37,000	76,65,000	41,60,000
Sugar and Saccharine produce	(value)	...	22,78,000	31,92,000	25,39,000
Tea	(cwts.)	...	1,72,000	1,88,000	2,17,000
	value	...	1,74,29,000	1,93,74,000	2,16,64,000
Wheat	(cwts.)	...	1,756,000	1,069,000	2,498,000
	value	...	82,76,000	49,04,000	90,10,000
Wood, Teak ...	(cubic tons)	...	51,000	43,000	61,000
	value	...	38,13,000	32,86,000	44,06,000
Wool, raw ...	(cwts.)	...	1,81,000	1,90,000	2,12,000
	value	...	93,83,000	95,99,000	1,09,42,000

This table shows a healthy condition of our export trade. The augmented exports of *Coffee*, *Hides*, *Seeds*, *Tea*, *Wheat*, and *Wool* are especially noteworthy. It is interesting to find that, as with *Cotton*, so with *Hides* and *Jute*, the export of manufactured articles is, in an important degree, superseding the export of the raw material; our chief customers for gunny bags are, *Australia* for wool packs, *California* for grain-sacks, and the *Eastern Asiatic Countries* for grain-bags, &c. The serious decline in the silk trade is

compensated by the growth of other items. I hope that the nascent demand for Indian wheat will not be checked by malpractices in India, or by the carelessness of exporters. There are complaints of the admixture in Indian wheats of barley, gram, and other grains; and, should this continue, India will fail in her competition with the United States, Austro-Hungary, Southern Russia, Egypt, and other wheat-producing countries.

The following table contains statistics of our most important imports besides *Cotton Manufactures*. The growth of the imports of *Metals* and *Woollens* is interesting. The *Salt* figures indicate a serious decrease in the value of that staple, by which, however, consumers must have profited—

(Values in Rupees.)

	1873-74.	1874-75.	1875-76.
Apparel	57,82,000	62,05,000	61,60,000
Coal, excluding coke and patent fuel			
(tons)	3,54,000	3,51,000	3,69,000
(value)	72,22,000	66,19,000	63,47,000

Woollen Manufactures (value) ...	66,89,000	55,76,000	86,98,000

Upon the whole, the trade of India, at the end of 1875-76, seems to have been in a satisfactory condition.

REGULAR ESTIMATES, 1876-77.

I come now to the present prospects of the current year, 1876-77, which I will first compare with the Estimates of Sir William Muir published on the 31st March 1876. As those Estimates have been recast in the form that I propose henceforth to use, I shall be able to enter into any detail that seems expedient.

Sir William Muir estimated that the Grand Total Revenue would be Rs. 50,48,00,000; that the Grand Total Expenditure would be Rs. 54,09,50,000; and, thus, that there would be a Deficit of Rs. 3,61,50,000. These same Estimates recast in the new form are as follows:—

	Rs.
Expenditure	55,11,04,000
Revenue	51,49,54,000
Deficit ...	3,61,50,000

In both cases alike, the Deficit is converted into a Surplus of Rs. 14,40,000 if the Extraordinary Expenditure (Rs. 3,75,90,000) is excluded from consideration.

The present Estimates are—

That the Expenditure will be Rs. 57,28,50,000, exceeding the Original Estimates by Rs. 2,17,46,000.

That the Revenue will be Rs. 51,20,67,000, or less than the Original Estimates by Rs. 28,87,000.

And, thus, that the Deficit will be Rs. 6,07,83,000, or more than Sir W. Muir's Estimates by Rs. 2,46,33,000.

If the estimated Extraordinary Expenditure be excluded from the Account, the Deficit is reduced to Rs. 2,27,83,000, being a result worse than Sir William Muir expected by Rs. 2,42,23,000.

These Estimates may be compared thus :—

	Sir William Muir's Estimates. Estimates of 31st March 1876. Rs.	*Sir William Muir's Estimates.* As now recast. Rs.	*Present Estimates.* Rs.	*Worse.* Rs.
Grand Total Expenditure ...	54,09,50,000	55,11,04,000	57,28,50,000	2,17,46,000
Grand Total Revenue ...	50,48,00,000	51,49,54,000	51,20,67,000	28,87,000
Deficit	3,61,50,000	3,61,50,000	6,07,83,000	2,46,33,000
Public Works Extraordinary ...	3,75,90,000	3,75,90,000	3,80,00,000	4,10,000
Result if Extraordinary Expenditure is excluded ... *Surplus*	11,10,000	14,10,000	*Deficit* 2,27,83,000	2,42,23,000

This untoward result is due entirely to the Famine in the Madras and Bombay Presidencies. Without describing afresh the extent and severity of this calamity, I will, here, simply state its effects upon the Estimates of Revenue and Expenditure, both for the current and the coming year, so far as they can now be traced. This will be most conveniently done in the following tabular form :—

Effects of the Famine in the Presidencies of Madras and Bombay, upon the Estimates, 1876-77 and 1877-78.

	Loss of Land Revenue. Rs.	*Loss of Excise Revenue.* Rs.	*Loss of Forest Revenue.* Rs.	*Direct Outlay for Famine Relief.* Rs.	*Excess charges in the Army.* Rs.	*Total.* Rs.
1876-77						
Madras ...	99,65,000	9,25,000	50,000	1,44,10,000	5,00,000	2,58,50,000
Bombay ...	38,80,000	...	1,50,000	17,00,000	3,00,000	90,30,000
Total ...	1,38,45,000	9,25,000	2,00,000	1,91,10,000	8,00,000	3,48,80,000
1877-78.						
Madras ...	31,84,000	3,33,000		73,50,000	6,37,000	1,15,04,000
Bombay ...	17,67,000	...		69,00,000	4,00,000	90,67,000
Total ...	49,51,000	3,33,000		1,42,50,000	10,37,000	2,05,71,000
Grand Total	1,87,96,000	12,58,000	2,00,000	3,33,60,000	18,37,000	5,54,51,000

The gross estimated cost of the Famine altogether is—

	Rs.
In Madras	3,73,54,000
In Bombay	1,80,97,000
TOTAL ...	5,54,51,000

of which Rs. 2,20,91,000 is loss of revenue and excess charges in the Army, and Rs. 3,33,60,000 is direct expenditure on measures of relief. From this gross sum of Rs. 5,54,51,000 must be deducted the gain to the Revenues from the increased earnings of the Guaranteed and State Railways; and this I find it at present impossible to estimate with any accuracy. I shall presently have to speak of a very gratifying improvement in the net traffic earnings of these Railways; but how much precisely of the improvement is due to the Famine, it is impossible, as yet, to say. Perhaps, on the whole, as near an estimate as can now be made of the net cost of the Famine is five and a quarter crores of Rupees, of which Rs. 3,10,00,000 falls on this year, and Rs. 2,15,00,000 on next year.

The eventual cost of this Famine will depend upon how far it is found necessary wholly to remit the Land Revenue of which the collection is, for the present, suspended. The Hon'ble Sir Richard Temple is strongly of opinion that, if favorable seasons follow, the people will, hereafter, be able to pay at least Rs. 1,29,50,000 of the Rs. 1,87,96,000 Land Revenue which must for the time be left uncollected: but the Governor General in Council has considered it right to leave to the Governments of Madras and Bombay an unfettered discretion in this matter. These Governments will doubtless receive Sir Richard Temple's recommendations with all the deference which they deserve; and I may perhaps be permitted to express a hope that, without any undue harassment of the people, the Local Governments may yet find themselves able to recover, for the benefit of the general tax-payers, from those on whose behalf this great expenditure is being incurred, more than they now think possible.

I cannot quit this part of my Statement without calling again to mind the zeal, energy, and ability with which Sir Richard Temple, abandoning a distinguished position of comparative ease and comfort, has devoted himself to those important public duties which he is now performing with admirable success.

If there had been no Famine, there would have been no Deficit in 1876-77, but, on the contrary, if the Estimates of the cost of the Famine are trustworthy, a Surplus on the Ordinary Account of Rs. 62,48,000,* that is to say, an improvement upon the Original Estimate of Rs. 48,08,000. Here, however, it must again be remembered that the sum of Rs. 1,38,58,850 was expended on works classed as extraordinary, but which cannot be called reproductive.

The following are the explanatory remarks which seem called for regarding the various increases and decreases shown in the Abstract Statements.

I. Land Revenue.—The whole of the decrease, Rs. 1,37,59,000, is due to the Famine, but for which there would have been a small net improvement of Rs. 86,000.

II. Tributes.—The improvement of Rs. 50,000 is due to arrear payments by Banswara and Udhaypur.

III. Forest.—The Original Estimates were for a Net Revenue of Rs. 18,26,000; the Regular Estimates are for a Net Revenue of Rs. 17,31,000, being less by Rs. 95,000. The failure is in the *Bombay* and *Madras* Presidencies, and is attributed to the Famine, which is estimated to have reduced the Net Revenue from *Forests* by at least Rs. 2,00,000.

IV. Excise.—The Net Revenue from this source is now expected to be only Rs. 2,37,92,000, instead of Rs. 2,43,80,000. The decrease of Rs. 5,88,000 is much more than accounted for by the loss of Revenue from the Famine in Madras. But for the Famine, there would have been a considerable improvement. The Net Revenue from *Excise* in recent years (deducting Refunds) has been as follows:—

	Rs.		Rs.
1869-70 ...	... 1,99,20,810	1873-74 ...	... 2,19,12,340
1870-71 ...	... 2,07,93,600	1874-75 ...	... 2,25,44,140
1871-72 ...	... 2,23,24,660	1875-76 ...	... 2,10,70,560
1872-73 ...	... 2,19,09,070	1876-77, Regular Estimates	2,37,33,000

The steady improvement is satisfactory.

V. Customs show a serious decrease as compared with the Original Estimates of Rs. 15,08,000; the loss is generally distributed. It seems probable that the Original Estimates, which were based upon last year's Regular Estimates, were too sanguine. The net *Customs* Revenue of the last few years (deducting Refunds and Drawbacks) has been as follows:—

	Rs.		Rs.
1869-70 ...	... 2,16,63,020	1873-74 ...	... 2,37,36,730
1870-71 ...	... 2,35,11,350	1874-75 ...	... 2,42,17,380
1871-72 ...	... 2,34,05,590	1875-76 ...	... 2,47,00,620
1872-73 ...	... 2,40,11,230	1876-77, Regular Estimates	2,20,77,000

The net yearly Revenue sacrificed by the revision of the Tariff on the 5th August 1875 was estimated at Rs. 30,84,000: this sum deducted from the Net Revenue of 1874-75, the most productive recent year before 1875-76, would leave only Rs. 2,11,33,380, from which point the Revenue of 1876-77 shows a satisfactory recovery of 9½ lakhs of rupees. The *Customs* Revenue of 1875-76 was evidently abnormal; we cannot expect so speedy a recovery from the standard of 1874-75 as was estimated in March last.

Salt.—The Net Revenue was estimated at Rs. 5,77,40,000: it is now estimated at Rs. 5,85,65,000, being a gross improvement of Rs. 8,25,000. The

* Estimated cost of Famine in 1876-77 ... ... Rs. 3,10,00,000
Deficit on ordinary Account 2,27,83,000

Surplus but for Famine ... 82,17,000
Deduct loss by Exchange saved by Secretary of State reducing his drafts 19,69,000

Remains ... 62,48,000

Net Revenue under this important Head (deducting Refunds) has been as follows :—

	Rs.		Rs.
1869-70	5,46,20,160	1873-74	5,64,60,590
1870-71	5,68,52,590	1874-75	5,73,52,620
1871-72	5,45,57,090	1875-76	5,70,22,180
1872-73	5,64,28,950	1876-77, Regular Estimates ...	5,81,99,000

so that the Net Revenue of 1876-77 will, if the present Estimates are realised, be the largest yet obtained.

VIII. Opium.—The Net Revenue was estimated at 6 crores of Rupees ; it is now expected to be Rs. 6,37,50,000, an improvement of Rs. 37,50,000. The Gross Revenue has only once before been exceeded ; and the Net Revenue would have been much larger than is now expected, but for the unprecedentedly large crop of 1876. The cost of this great crop fell upon the Revenues of the year, its surplus yield being added to the reserve store in the possession of the Government, which now amounts to 35,315 chests more than the quantity which will be sold during the calendar year 1877. The recent figures of the Opium Revenue are as follows :—

	Gross Revenue.	Expenditure.	Net Revenue.	
1869-70	7,95,15,570	1,82,06,830	6,13,08,740	
1870-71	8,04,54,590	2,01,44,280	6,03,10,310	
1871-72	9,25,38,590	1,59,66,460	7,65,72,130	Short crops.
1872-73	8,68,16,910	1,81,12,680	6,87,04,230	Short crops.
1873-74	8,32,48,790	2,00,12,800	6,32,35,990	
1874-75	8,55,66,290	2,34,15,160	6,21,50,830	
1875-76	8,47,14,250	2,21,85,650	6,25,28,600	
1876-77	9,17,68,000	2,80,18,000	6,37,50,000	Great crop.
	68,16,52,990	16,60,92,130	51,85,59,860	

The average yearly Net Revenue for these eight years has been Rs. 6,48,19,982, the Net Revenue of particular years depending much upon the outturn of the crop paid for. The Net Revenue of 1876-77 is rather below the average of the eight years, but compares favorably with all but two of these years. Bengal Opium is now expected to yield net less than the Estimate by Rs. 1,60,000, the excess expenditure being, by this amount, larger than the large excess revenue. Malwa opium is expected to yield Rs. 38,90,000 more than the Estimates.

On the 19th December 1876, the Opium Act (No. XXIII of 1876) received the assent of the Governor General. This much-needed Law will enable the Government to regulate and supervise the growth of the poppy and all transactions with Opium throughout India : hitherto, in many parts of the country, either there has been no law, or the law has been doubtful.

IX. Stamps.—The Net Revenue from *Stamps* and *Law and Justice* (the portion now Imperial) is now expected to be Rs. 3,09,25,000 instead of Rs. 3,05,00,000, as at first estimated, an Improvement of Rs. 4,25,000. The Net Revenues from *Stamps* and the existing imperial items under *Law and Justice* (deducting Refunds) show a steady improvement as follows :—

	Rs.		Rs.
1871-72	2,68,40,230	1874-75	2,88,44,860
1872-73	2,84,31,580	1875-76	2,97,10,000
1873-74	2,89,55,410	1876-77, Regular Estimates	3,02,05,000

X. Mint.—Sir W. Muir estimated the Net Revenue from the Mints at Rs. 3,00,000 ; it is now expected to be Rs. 8,46,000, the excess (Rs. 5,46,000) being due to a large coinage of silver.

XIII.—The decrease of Rs. 3,37,000 under *Law and Justice* is in the Provincial portion (*Jails* and *Registration*), and is partly set off by a saving of Rs. 1,75,000 under the corresponding Heads of Expenditure.

XIX. Gain by Exchange.—The large improvement in the Net Traffic Earnings of the Guaranteed Railway Companies entails the improvement of Rs. 11,57,000 here shown.

XX. Miscellaneous.—The improvement of Rs. 2,91,000 occurs mainly in England, the chief items being £9,600 for Cinchona bark sold, £6,400 from the exhibition of the presents taken home by His Royal Highness the Prince

of Wales, and £5,000 fines on contractors subsequently remitted, and shown under the corresponding Head of Expenditure. A curious item in India is the State share of nine ingots of gold, valued at Rs. 53,240, discovered in the Kistna District.

Irrigation.—The small decrease of Rs. 2,63,000 is due to the favorable season in the Punjab causing a loss of Rs. 1,37,200, and to disappointments in Bengal.

The probable Extraordinary outlay on Canals in 1876-77 is Rs. 1,01,20,000, as follows :—

	Rs.		Rs.
Madras	3,75,000	North-Western Provinces	33,00,000
Bombay	6,49,000	Punjab	20,00,000
Bengal	37,50,000	In England ...	46,000

In 1876-77 the total direct receipts from Irrigation Works are estimated to amount to Rs. 50,06,750. Of this sum, the amount expected to be derived from the completed Canals on which the Capital Outlay has been Rs. 10,07,23,280 is Rs. 47,01,000 : the estimated amount of Land Revenue due to or dependent on the works is Rs. 20,20,340 : thus the Gross Revenue is estimated at Rs. 67,21,340. The working expenses from which this Gross Revenue is derived is estimated to amount to Rs. 33,78,060 : so that the expected Net Revenue is Rs. 33,43,280, or 3·3 per cent.

State Railways.—The Net Revenue from State Railways was estimated at Rs. 11,80,000; it is now expected to be only Rs. 10,42,000; the decrease of Rs. 1,38,000 is owing to slackness of trade, especially on the Holkar Line, and also to the Northern Bengal and Indus Valley Lines not having been opened for traffic so soon as was expected.

The growth of the revenue from State Railways is, however, encouraging : as follows :—

	Gross Earnings.	Working Expenses.	Net Traffic Earnings.
	Rs.	Rs.	Rs.
1872-73 ...	... 1,65,330	1,79,140	— 13,811
1873-74	... 3,99,140	7,28,240	— 3,29,100
1874-75	... 13,09,860	18,38,830	— 5,28,970
1875-76	28,95,120	21,47,130	7,47,990
1876-77, Regular Estimates ...	... 36,96,000	26,54,000	10,42,000
1877-78, Original Estimates ...	... 67,48,000	48,30,000	19,18,000

The Capital Expenditure on State Railways to the end of 1875-76 was Rs. 11,78,34,920 ; the Expenditure in 1876-77 is estimated at Rs. 2,95,80,970 ; and that in 1877-78 at Rs. 2,60,00,000, making the total Capital Expenditure to the end of 1877-78 Rs. 17,34,15,890.

Provincial Contributions and Balances of the Local Governments.—According to the Estimates, the Local Governments were to supplement their Assigned Revenues from separate Provincial Resources by Rs. 3,07,000, and from their balances by (net) Rs. 14,82,000 ; total Rs. 17,89,000. It is now expected that they will have to draw upon local resources for only Rs. 1,85,000, and upon their balances for only Rs. 7,84,000, *i. e.*, for (net) Rs. 9,69,000 in all : the amount would have been larger, but for a special grant of Rs. 2,50,000 from Imperial Funds to British Burmah, the rapid expansion of which Province makes such assistance indispensable. The Punjab draws from its local resources more than any other Province ; it seems probable that some expenditure may still be classed there as Imperial, which, under the old system, was local.

I pass now to EXPENDITURE. The net charge for *Interest* is now expected to be larger than was estimated by Rs. 3,42,000. The excess is entirely in the Estimates of the Home Treasury, where a larger sum was borrowed than was intended in March last. The Estimate then was that £2,640,000 would be

borrowed; the actual sum raised was £4,600,000, besides £500,000 borrowed temporarily.

(In Rupees.)

Interest Estimates compared.

(1876-77.)	Original.	Present.	Worse.	Better.
Interest on debt ...	5,36,00,000	5,41,07,000	5,07,000	
Interest on Service Funds, &c. ...	39,07,000	38,61,000	...	46,000
Total ...	5,75,07,000	5,79,68,000	4,61,000	
Receipts ...	50,80,000	51,99,000	...	1,19,000
Net Charge	5,24,27,000	5,27,69,000	3,42,000	

The following Government Securities were purchased by the Government of India early in the year, before any cause of anxiety had arisen respecting the crops:—

	Capital. Rs.	Premium paid. Rs.
Bearing interest at 5½ per cent. ...	35,65,000	1,23,000
,, ,, 5 ,, (debentures) ...	3,75,000	3,000
,, ,, 4½ ,, ...	68,80,000	98,000
,, ,, 4 ,, ...	17,20,000	14,000
	1,25,40,000	2,38,000

These Securities have been cancelled, and will not be re-issued: the premium has been written off under the Head of *Interest*.

The Debt of the Government of India is estimated to be on the 31st March 1877 as follows:—

(*Debt of India; combining Sterling and Rupees on the assumption that £1=Rs. 10.*)

Rate of Interest.	Capital amount outstanding. England. £	India. Rs.	Total. Rs.	A year's Interest thereon. Rs.
5½ ...	...	9,84,52,000	9,84,52 000	54,15,000
5 ...	17,200,000	1,05,84,000	18,25,84,000	91,28,000
4½ ...	...	15,44,96,000	15,44,96,000	69,52,000
4 ...	37,176,000	45,37,40,000	82,55,00,000	3,30,20,000
3½ ...	...	6,52,000	6,52,000	23,000
Nil ...	21,000	3,50,000	5,60,000	*Nil*
	54,397,000	71,82,74,000	1,26,22,44,000	5,45,38,000

Thus, the average yearly rate of interest upon the Registered Debt of India at the end of the current year is estimated to be 4¼ per cent. The Capital of the Railway and Madras Irrigation Companies, interest upon which is guaranteed from Indian Revenues, is £96,946,907, the interest thereon being £4,716,100. The total Debt of British India, therefore, of all kinds is £151,343,907, and Rs. 71,82,74,000, and the interest thereon is £7,063,104, and Rs. 3,10,68,600: if a Rupee is worth 1*s.* 9½*d.*, the entire Debt of India is Rs. 2,40,76,94,357, or £215,689,286, and the interest thereon, Rs. 10,99,12,551, or £9,846,333. The average interest upon the whole Debt of India, including the Guaranteed Capital, is 4·56 per cent.

The proportion of the Rupee Debt held by Natives of India on the 30th of December is estimated, from the distribution of the actual payments of interest, to have been as follows:—

1869	22,50	1873	25,29
1870	20,25	1874	25,23
1871	24,74	1875	24,34
1872	22,76	1876	25,87

The excess over the Grant under *Land Revenue* (Rs. 2,19,000) occurs chiefly in *Bombay*, and is nominal, being an increase in Village Allowances set off by increased Revenue under *I, Land Revenue*.

The excess of Rs. 2,13,000 under *Excise* is for stores (probably hydrometers for Madras) from England.

The saving under *Salt*, Rs. 3,95,000, is in the item Petty Construction and Repairs in *Madras*.

Post Office.—The estimated Net Expenditure on this Service was Rs. 9,11,000; it is now only Rs. 5,99,000, an improvement of Rs. 3,12,000. The following are recent figures of the Post Office:—

	Expenditure.	Revenue.	Net Expenditure.
	Rs.	Rs.	Rs.
1873-74	80,86,840	68,81,980	12,04,860
1874-75	80,75,960	73,94,000	6,81,960
1875-76	82,20,790	76,35,970	5,84,820
1876-77	86,37,000	80,38,000	5,99,000

It is to be borne in mind that the Post Office carries the correspondence of the State at a reduced rate. It is satisfactory to find that the loss from the reduction of the Overland Postage (from 8 annas to 6 annas *viâ* Brindisi, and from 6 annas to 5 annas *viâ* Southampton) has been almost made good already.

13. Telegraphs.—The estimated Net Cost of this Service was Rs. 19,80,000; it is now only Rs. 15,97,000. The improvement of Rs. 3,83,000 occurs chiefly in India, and is due to increased traffic. The following are the figures for the past eight years:—

	Expenditure.	Revenue.	Net Expenditure.
	Rs.	Rs.	Rs.
1869-70	55,34,000	25,71,340	29,62,660
1870-71	50,54,310	24,70,100	25,84,210
1871-72	44,99,110	22,83,680	22,15,430
1872-73	48,29,750	24,98,020	23,31,730
1873-74	41,18,180	25,06,380	16,11,800
1874-75	43,20,300	28,64,790	14,55,510
1875-76	49,06,240	30,90,400	18,15,840
1876-77, Regular Estimates ...	49,18,000	33,21,000	15,97,000

The improvement since 1872-73 is satisfactory.

14. Administration.—The increase of Rs. 6,52,000 is due, for the most part, to an insufficient provision having been made for tour and staff expenses in India; but partly to increased charges at Home.

16. Law and Justice.—The saving (Rs. 1,75,000) is in the Provincial portion (*Jails and Registration*). The Imperial portion, which constitutes, as yet, the greater portion of this Grant, shows an increase of Rs. 6,16,000, the largest item in which is for the Convict Establishments on the Andaman and Nicobar Islands.

17. Police.—This grant is entirely under the control of the Local Governments, and the small excess (Rs. 1,56,000) does not require explanation from me. There is a corresponding excess receipt, amounting to Rs. 1,28,000.

19. Education.—This service, too, is entirely under the Local Governments The net saving of Rs. 3,57,000 is generally distributed: it seems probable that some economies may have been effected in consequence of the warning given by His Excellency the Viceroy in July last, to which I shall have occasion hereafter to refer.

22. Stationery and Printing.—This resuscitated Head shows an increase of Rs. 4,25,000, some portion of which occurs in the Central Press of the Government of India, the work of which is constantly increasing; but the greater portion is for Stores from England.

23. Political Agencies.—Of the excess of Rs. 18,39,000, the sum of Rs. 13,71,000 is for the ceremonies throughout the country attending the assumption by Her Majesty the Queen of the title of Empress of India. There are other items of increase which need not be explained.

The gross cost of the ceremonies throughout India on the 1st of January is Rs. 13,71,000 under this Head; Rs. 2,83,000 in the Public Works Department; and Rs. 3,00,000 under the Army: total Rs. 19,54,000: there was also an inconsiderable outlay in England, the particulars of which we do not yet know. Against the gross outlay is to be set the increased revenue from the Railways (estimated at, at least, net Rs. 9,00,000), and under Telegraphs and other Heads: upon the whole, it does not seem likely that the net cost exceeded Rs. 10,00,000. It will be understood that these charges are by no means on account of the Delhi Assemblage only, but include the gift of a day's pay to the Army, and the cost of the ceremonies at the Presidency towns and at

every large station throughout India: such charges as these had no connection with the Assemblage. The net cost of the Assemblage itself cannot at present be exactly ascertained; but, in an estimate sent last month to the Secretary of State, it was calculated at about Rs. 5,00,000, a sum which must be looked upon as extremely moderate.

24. Allowances, &c., under Treaties.—The decrease of Rs. 1,71,000 is owing to sundry lapses.

25. Furlough Allowances in England.—The increase of Rs. 1,76,000 is attributed to an increase in the number of Officers on furlough, and, to some small extent, to the privilege of drawing furlough pay at 2*s.* the Rupee, which has been granted, with retrospective effect, to those Military Officers who, before 1st July 1871, elected, under the option given to them, the Furlough Rules of 1868. The charges under this Head have been as follows:—

	£
1873-74	260,556
1874-75	216,704
1875-76	229,199
1876-77, Regular Estimates	240,600

27. Loss by Exchange.—The present Exchange Estimates may be compared with the Original Estimates as follows:—

	Loss by Exchange.	Gain by Exchange.	Net Loss.
	Rs.	Rs.	Rs.
1872-73	76,51,090	30,14,360	46,36,733
1873-74	98,65,300	39,51,680	59,13,620
1874-75	89,78,780	39,53,350	50,25,430
1875-76	1,42,97,220	39,53,650	1,03,43,570
1876-77, Original Estimate	2,33,20,000	34,70,000	1,98,50,000
1876-77, Present Estimate	2,13,51,000	46,27,000	1,67,24,000

Thus, the whole improvement compared with the Estimates is Rs. 31,26,000, of which Rs. 11,57,000 has been already explained as due to improved Guaranteed Railway Receipts. Almost the whole charge entered under *27, Loss by Exchange*, is incurred upon the Bills upon the Government of India, by which the Secretary of State supplies the Home Treasury with funds. The Estimate was that the sum thus raised in London would be £13,660,000, and that, to produce this amount, Bills would be sold for Rs. 15,99,20,000, being at the rate of Re. 1=1*s.* 8$\frac{1}{32}$*d.* It is now estimated that we shall pay Bills for Rs. 14,53,96,000, which will yield to the Home Treasury £12,418,000, the rate realised being still estimated at Re. 1=1*s.* 8$\frac{1}{32}$*d.* The cost now estimated of the £12,418,000 thus supplied to the Home Treasury is only Rs. 16,310 more than it would have been at the precise rate originally estimated: that the Original and Revised Estimates should thus precisely correspond, is only a curious coincidence; for no one could, in March last, have foretold what the average rate of exchange during the year would be, and the Government of India had certainly little confidence in its own Estimate. The gross saving of Rs. 19,69,000 under this Head is wholly due to our having paid for £1,242,000 less than we expected; and this, again, is due to the Secretary of State having borrowed more than was, at first, proposed: the reason for this excess borrowing was chiefly the state of the exchanges between England and India during the early part of the year.

This brings me to speak of the fall in the price of silver, which began to alarm the Government of India and all those interested in the prosperity of the country long before the last Financial Statement was made, and which, during the year, assumed formidable proportions. It is impossible for me, in making this Statement, to avoid reference to a subject so intimately affecting the interests of India: at the same time, I desire, on this occasion, to treat the matter historically only, and not to express any opinion of my own upon the causes of the divergence of the value of the two metals, or upon the remedies, if any, which ought to be adopted.

The fall in the value of silver dates from November 1872. For 22 years before that date, the price in London of an ounce Troy of standard silver had never been below 60*d.*, and for 18 years more, it had never been below 59*d.* In the calendar year 1873, the average price was 59·22*d.*, the lowest price (*13th November*) being 57$\frac{1}{16}$*d.* In 1874, the average price was

58·37*d.*, the lowest price (*31st December*) being 57¼*d.* In 1875, the average price was only 56·76*d.*, the lowest quotation being (*on the 3rd June*) 55½*d.* In 1876, the average price fell to 53·08*d.*, the lowest quotation being (*8th July*) 47*d.*; sales were reported even as low as 46*d.*: the recovery from this depression was rapid; the highest point since attained being (*18th January 1877*) 58⅝*d.*, the highest price quoted since 23rd July 1874: there has since been, again, a downward re-action, the latest quotation being 55*d.*

On the 17th July 1876 the Secretary to the Bengal Chamber of Commerce transmitted, for the consideration of the Governor General in Council, the following two Resolutions adopted at a Special General Meeting of the Chamber held on Saturday, the 15th July:—

RESOLUTIONS.

1*st.*—"That the continued depreciation in the value of silver is a question most seriously affecting the political and financial interests of the Country; and that, in view to its very great importance, the Committee be requested to address the Government in order to obtain such information as they may be able to give, in regard to the policy which they propose to pursue under the circumstances.

2*nd.*—"That the Chamber approves of the suggestion of the Committee that it is expedient, in view of any ultimate measures that the Government may adopt, that Clause 19 of Act XXIII of 1870, making it obligatory on the Mints in India to receive all silver tendered for coinage, and also section 11, clause (b) of Act III of 1871, making it obligatory on the Currency Department to issue Notes against silver bullion sent in, be temporarily suspended, at the discretion of Government; and that, during such suspension, or till further notice, it be not lawful to import coined rupees from any foreign port."

On the 22nd July, the Secretary to the same Chamber forwarded, for the consideration of the Government, a copy of the Proceedings of the Chamber.

In this letter, the Committee of the Chamber, while recognising the difficulty of the position of the Government of India, remarked that the uncertainty which had hitherto shrouded the action of Government had been attended with serious consequences to merchants and bankers, and would continue to embarrass their transactions so long as they were kept in ignorance of the course of action the Government proposed to take. The Committee, therefore, expressed a hope that His Excellency the Viceroy would, in the interests of commerce and of the country generally, accede to the prayer of the first Resolution of the meeting, and make public the intentions of the Government.

As to the second Resolution, the Committee pointed out that its object was not to prohibit coinage altogether; for that would be likely to bring about a collapse of credit; but to place all coinage in the hands of the Government to be exercised at its discretion. It appeared to the Committee suicidal for the Secretary of State to allow the competition of bar silver with the rupees which he has to offer to those requiring money in India, and that to suspend the free conversion of silver bullion into legal-tender coin was not only a wise and reasonable, but a necessary precaution for the Government of India to take, for the preservation of its own currency, and to support the credit of its own loans, as well as to prevent the country from being swamped by silver sent in by foreign nations.

The Committee argued that the fact that the Government of India was compelled to put their Mint Stamp to all silver sent to India had given an artificial and fictitious value to silver, which would cease as soon as the law was suspended. Bar silver would then, gradually, fall to its own intrinsic value; and the extent to which it was depreciated would be soon gauged; whereas, as things were, it was impossible to say how much its value was appreciated by our 'open coinage system.'

When all Europe was closing its doors against the import of silver with the avowed object of having as little of the metal as possible, should the depreciation be found permanent, it seemed most impolitic, the Committee thought, to keep ours wide open for the reception of an unlimited quantity, costing the country, through our coinage laws, far more than its real intrinsic value. The Committee could see no valid reason against the immediate adoption by the Government of the second Resolution of the Meeting, and considered that the objections brought against it were based either on a misconception of its real scope, or on abstract principles ignored by other States; whereas the position of affairs was altogether exceptional, and ordinary rules did not apply. The Committee represented that the measures recommended in the Resolution were not more

stringent than, in fact, scarcely so stringent as, those which the first financiers in Europe had found it necessary to adopt.

Lastly, the Committee pointed out that there was a third proposition put before the Meeting, recommending the adoption of a gold standard, which, in deference to the feeling apparent among members present, was temporarily withdrawn; and they referred the Government to the debate at the Meeting upon this proposal.

On the 31st July the Government of India published a Resolution inviting attention to the immediately probable financial consequences of the fall in the gold-price of silver, and insisting upon the necessity for the utmost economy of the public resources.

On the 1st August the Secretary to the Calcutta Trades' Association forwarded a Memorial from the Master, Wardens, and Committee of the Association to His Excellency the Viceroy and Governor General of India in Council.

In this document the Memorialists represented that they had, for many months past, been suffering great loss from the low rate of exchange which bid fair to paralyse trade. The Memorialists joined earnestly with the Bengal Chamber of Commerce in urging on the Government the importance of declaring the policy it intended to pursue for the remedy of this evil, and prayed that the policy of a temporary suspension of the compulsory coinage of silver might receive the early consideration of Government.

The Memorialists further expressed great satisfaction at the desire manifested by the Government to encourage local manufactures, and suggested a relaxation of the rules against the purchase of imported stores for the Government in India.

On the 22nd September 1876, after considering the "Report by the Select Committee of the House of Commons on the depreciation of silver, with the Proceedings of the Committee, ordered by the House of Commons to be printed on the 5th July 1876," the Government of India published a Resolution (No. 3044) upon the suggestions of the Bengal Chamber of Commerce and the Calcutta Trades' Association. The following is a summary of its arguments and conclusions.

1. The recent change in the value of silver measured in gold may be due to changes in the value of one metal or the other, or of both; before a fit remedy can be applied, it is essential to ascertain what exactly has happened, whether gold has risen or silver fallen, and how much the value of each metal has changed. It cannot be assumed, without decisive proof, that the divergence of the two metals is due wholly, or even chiefly, to the fall in the value of silver.

2. The prices of commodities and of the precious metals, in London and in India, witness to a considerable rise in the value of gold since March 1873, and especially since December 1875, and do not show any fall in the value of silver measured in commodities other than gold: using these prices with all reserve, it must still be said that they afford evidence of this fact at least that a rise in the value of gold is one of the causes which has disturbed the equilibrium of the two metals.

3. The divergence of the values of the two metals seems due to three principal causes, of which the first appears to be the most efficient:

(1).—The substitution of gold as the standard of value, in Germany, the Netherlands, and the Scandinavian Kingdoms, for silver; and, in the countries of the Latin Convention, for their customary alternative or compensatory standard of silver and gold.

(2).—The increased production of silver in the United States of America.

(3).—The decreased demand for silver in India.

4. The value of gold and silver, like that of any other commodities, depends, on the one hand, upon the supply, on the other, upon the demand for them; and this again depends upon the uses made of them: the long-continued equilibrium between the value of gold and that of silver is due to the two metals having shared, without material change of conditions, the only great field for the employment of either of them, *i. e.*, the supply of legal-tender metallic money: this equilibrium has been disturbed by the rapid supersession of silver by gold in Europe and America as the standard of value, and there-

fore as the material of legal-tender metallic money: this supersession is calculated, *a priori*, to raise the value of gold no less than to lower the value of silver.

5. Excessive importance is not, *per se*, attached to the increased production of silver in the United States of America.

6. When India is in a normal condition, *i. e.*, when there is no abnormal demand for any of her staples, and she is not borrowing large sums from abroad, the amount of treasure required to settle her accounts with the world is not considerable; and a substantial proportion of the treasure received has always been gold: the large imports of treasure into India since 1850 are due to abnormal circumstances, as follows:

(1).—The Crimean War transferred to India large demands for produce theretofore obtained from Russia.

(2).—The American Civil War exaggerated temporarily the value of Indian cotton.

(3).—Great sums of money have been borrowed for—

(*a*) the suppression of the mutiny;

(*b*) the construction of railroads (Guaranteed and State) and canals;

(*c*) the Bengal famine.

It would be altogether misleading to treat the great imports of treasure in the last 25 years as normal, or to expect that they will, or can, continue: there is, therefore, no reason to expect that silver will be poured into India, although of course, if it falls in value, a greater weight of it must come to represent the same value.

7. To suspend the free coinage of legal-tender metallic money, as advocated by the Bengal Chamber of Commerce, would give a monopoly value to the existing stock of rupees, and so reduce prices; whereas prices are not yet risen.

8. The value of no substance can serve as a standard-measure of value unless its use as the material of legal-tender currency is freely admitted: if, therefore, the free coinage of silver on fixed conditions were disallowed in India, silver would no longer be the standard of value of India, but another standard would be substituted, *viz.*, the monopoly value of the existing stock of rupees, tempered by any additions made to it by the Government, or illicitly: if no such additions were made, the value of the rupee would gradually, but surely, rise, owing to the supply being cut off.

9. The stamp of a properly regulated mint, such as the Indian Mints, adds nothing, except the cost of manufacture and seignorage, to the value of the metal on which it is impressed; but only certifies to its weight and purity.

10. A sound system of currency must be automatic or self-regulating: no civilised Government can undertake to determine from time to time by how much the legal tender currency should be increased or decreased; nor would it be justified in leaving the community without a fixed metallic standard of value even for a short time: it is a mistake to suppose that any European nation has rejected silver as a standard of value without substituting gold.

11. For all these reasons, the Government of India rejected as inadmissible the proposal that the Mints should be closed to the free coinage of silver for the public on fixed conditions, unless they were, at the same time, opened to the free coinage of gold as legal-tender money on fixed conditions.

12. The Government of India further concluded that there was nothing, as yet, demanding recourse to a measure so costly, and of which all the conditions were so uncertain, as the adoption of a gold standard.

Thus, the conclusions stated in the Resolution were:

1stly.—That the divergence of the values of gold and silver is not necessarily attributed only to a diminution in the value of silver; that there are strong reasons for believing that gold may have increased, as well as that silver has decreased, in value; and that this consideration must have an important bearing on the action of Government in reference to the present disorder.

2ndly.—That although it is most desirable, in the interests of trade, that the standard of value in India should be the same as the standard of value in the chief countries with which India inter-

changes commodities, yet trade will not be permanently injured by a fall in the value of the rupee measured in gold, provided only that a fresh stable equilibrium of the precious metals be attained.

3rdly.—That, up to the present moment, there is no sufficient ground for interfering with the standard of value.

This Resolution of the Government of India was issued some time before I took charge of my present office, and I do not now wish to offer any comments on its conclusions.

The only other representations received upon the subject by the Government of India have been complaints by various European officers in its service of the loss which they are suffering from the fall of the sterling-value of the rupee, and prayers for assistance from the State: some of these memorials are still under consideration: the Government feels much sympathy with its officers; but I cannot at present say whether it will be possible to help them.

I am afraid that we cannot, by any means, conclude that the partial recovery of the value of silver which we have lately witnessed is permanent, and that our exchange with countries whose standard is gold will not be again, seriously, and perhaps frequently, disturbed. I can only say that the Government of India is devoting, and will continue to devote, anxious attention to the subject.

The representation of the Trades' Association in regard to stores is still receiving attention: it is the present policy of the Government of India and the Secretary of State to allow much greater freedom of resort to the local markets than heretofore.

I may mention, here, that the amount of Government Promissory Notes enfaced for the payment of Interest in London by drafts upon India decreased, during the year, from Rs. 14,20,23,120 to Rs. 12,94,59,526, or by Rs. 1,25,63,594, and that the price of our Four per cent. Rupee securities fell, at one time, in India (13th January) to Rs. 96¼, and in London (16th July) to Rs. 77. Our Four per cent. Rupee securities had not been at a discount in India since March 1873, and had not fallen below 90 in London since May 1868; they are now again quoted there at 88½: our Sterling bonds did not share the depression of the Rupee paper in London, which was doubtless due entirely to the fall in the price of silver. In India, our Rupee paper did not fall to a discount till the 3rd October, and the fall since then may doubtless be partly attributed to the apprehension that the Government may have large demands to make upon the money-market on account of the Famine, and to the scarcity of money in India.

28. Miscellaneous.—The excess of Rs. 4,15,000 is accounted for by some charges connected with the visit to India of His Royal Highness the Prince of Wales having escaped record in the Accounts of 1875-76, and by the refund of £5,000 fines levied upon contractors in England and credited under the corresponding Head of Revenue.

The item of Rs. 1,91,10,000 for *Famine Relief* requires no further explanation.

The Army.—The following are the accounts of the Army in recent years compared with the Original and Revised Estimates of the current year—

	Established Strength of the Army.		Expenditure.	Revenues and Contributions from Native States.	Net Expenditure.	Loss by Exchange on sterling expenditure.	Cost of Military Buildings.	Cost of Military Secretariats.	True Net Expenditure.
	Europeans.	Natives of India.							
	No.	No.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1869-70 ...	69,262	122,442	16,32,87,390	1,21,30,730	15,11,66,660	10,94,924	,84,94,790	5,29,720	17,12,86,094
1870-71 ...	67,150	122,122	16,07,47,990	1,05,01,630	15,02,46,360	21,69,448	,25,13,140	5,04,120	16,54,33,068
1871-72 ...	67,062	121,981	15,67,81,120	1,02,87,930	14,65,13,190	14,83,805	20,33,150	4,80,800	16,05,11,005
1872-73 ...	66,965	121,959	15,50,36,120	98,04,520	14,52,31,600	18,19,661	,16,65,58[illegible]	4,52,480	16,91,69,321

1875-76 ...	66,908	123,479	15,30,84,[illegible]	1,12,46,240	14,18 38,350	37,81,659	,33,77,38[illegible]	4,63,180	15,94,50,540
1876-77* ... }	66,624	123,484	{ 15,97,90,000	93,73,010	15,04,16,990	70,35,435	,22,84,00[illegible]	4,71,070	17,02,07,495
1876-77† ... }			{ 16,20,77,000	97,00,010	15,23,67,990	72,00,897	,44,88,340	4,90,270	17,24,97,497
1877-78* ...	66,543	123,605	16,23,86,000	95,13,010	15,28,72,990	53,83,314	,23,19,850	4,64,270	17,10,40,424

The Revised Estimates of the net expenditure upon the Army, as recorded in the Accounts, exceed the Original Estimates by Rs. 19,51,000,

* Orig. Est. | † Rev. Est.

and the actual net expenditure of 1875-76 by no less than Rs. 1,05,29,640: if we use the true rate of exchange for converting the Home Expenditure into Rupees, this excess over 1875-76 rises to Rs. 1,39,48,878: if all the items entered in the preceding Statement are counted, the excess is Rs. 1,30,46,918.

It appears from this Statement, which does not quite exhaust the public expenditure upon the *Army*, that even its net cost in 1876-77, Rs. 17,24,97,497, exceeds one-third of the entire gross expenditure of British India, excepting the charge for Famine relief: the importance of our Military Finance is therefore pre-eminent; and I think it necessary to examine carefully the causes of the alarming growth of the cost of the Army.

The Army Receipts in 1875-76 were accidentally swollen by about Rs. 15,00,000, so that the increase to be explained upon the accounts of the Army, as recorded, is really the increase of gross expenditure (Rs. 89,92,410). Of this amount, again, it will be found that £300,000 is nominal, being due to the accidental transfer of payments at Home, amounting to £150,000, from 1875-76 to 1876-77.

I proceed then to compare the Revised Estimates of expenditure for 1876-77 with the Accounts of 1875-76, in order to ascertain how the residue of that increase, *viz.*, £764,505 in England and Rs. 13,47,360 in India, has arisen. The following table brings out clearly the causes to which this increase is due:—

	Effective.				Non-Effective.			Grand Total, taking £1 = Rs. 10.
	England.		India	Total, taking £1=Rs. 10.	England.	India.	Total, taking £1 = Rs. 10.	
	Stores.	Other items.						
	£	£	Rs.	Rs.	£	Rs.	Rs.	Rs.
1869-70 ...	878,491	1,436,207	12,19,32,870	14,50,79,850	1,190,403	63,54,630	1,82,58,660	16,33,38,510

1872-73 ...	811,736	1,432,806	11,34,64,880	13,59,10,300	1,279,743	63,28,390	1,91,25,820	15,50,36,120
1873-74 ...	852,635	1,248,208	11,21,38,690	13,34,47,120	1,254,645	62,90,720	1,88,37,170	15,22,84,290
1874-75 ...	1,124,644	1,056,314	11,08,12,280	13,26,21,860	1,436,820	67,61,530	2,11,29,730	15,37,51,590
1875-76 ...	1,096,917	1,027,986	11,06,15,180	13,18,64,510	1,458,262	66,37,160	2,12,20,080	15,30,84,590
1876-77, Estimate	1,996,100	1,335,600	11,20,89,000	13,64,06,000	1,916,000	65,11,000	2,56,71,000	16,20,77,000
1877-78 ...	996,000	1,215,100	11,41,29,000	13,62,40,890	1,957,500	65,70,110	2,61,45,110	16,23,86,000

It will be observed that the excess in 1876-77 over 1875-76 is about equally divided between the Effective and Non-effective branches as follows:—

	Rs.
Increase in Effective	45,41,490
„ in Non-effective	44,50,920
	89,92,410

The Effective increase is divided between India and England thus:—

England	£306,767
India	Rs. 14,73,820

The *Home* increase is mainly in the *Home charges of Her Majesty's Regiments serving in India*, including *Furlough Allowances of Officers of the British Service*. The charges under these two Heads have been as follows:—

	£		£
1869-70	725,233	1874-75	509,407
1870-71	658,710	1875-76	453,812
1871-72	590,805	1876-77, Regular Estimates...	750,000
1872-73	659,774	1877-78, Original Estimates...	700,000
1873-74	567,012		

Of the increase in 1876-77, £180,000 is attributed to the accidental transfer of certain payments, amounting to £90,000, from 1875-76 to 1876-77, but for which transfer the figures would have been—

1875-76	£547,958	1876-77	£660,000

Still even this residue of increase which continues in 1877-78 is formidable: it is the result of much negotiation with the War Office at Home, and does not seem susceptible of definite explanation in India.

An increase of £7,655 in the *Furlough Allowances of Indian Officers* is doubtless due to the concession of the privilege of drawing Furlough Pay at 2*s.* the rupee, with retrospective effect, to Officers who elected the Furlough Rules of 1868 before the 1st July 1871.

The net cost of the passages of officers and troops and of the Overland Troop Transport Services has been as follows:—

	At Home.	Altogether at Home and in India, counting £1 = 10 Rupees.
	£	Rs.
1869-70	278,132	42,76,430
1870-71	311,652	82,56,750
1871-72	271,373	38,42,010
1872-73	329,395	44,22,090
1873-74	381,506	46,11,760
1874-75	292,859	47,01,140
1875-76	266,734	33,44,700
1876-77 } Estimates	316,600	35,61,000
1877-78 }	241,100	28,74,500

This charge has of late years been somewhat diminishing, but the cost of the transports is still great.

The recent charges for stores, the yearly cost of which has been stated already, have been very heavy: this is owing to the supply of Snider Rifles to the Native Army, of new rifled guns to the Artillery, and of Martini-Henry Rifles to the European troops.

Of the Effective charges in India the following items show, on the whole, till lately, no important increase of cost; *Army and Garrison Staff, Regimental Pay and Allowances, Ordnance Establishments, Stores and Camp Equipage, Ecclesiastical, Education and Volunteer Corps.*

The total expenditure for these items is as follows:—

	Rs.		Rs.
1869-70	7,79,97,350	1874-75	7,62,55,820
1870-71	7,58,73,910	1875-76	7,65,58,510
1871-72	7,63,10,110	1876-77 } Estimates ...	7,69,86,000
1872-73	7,58,66,690	1877-78 }	7,85,99,100
1873-74	7,57,65,150		

The growth in 1876-77, and still more in the coming year, is in the item *Regimental Pay and Allowances*, and is due to increased allowances to Native Troops (estimated in all at Rs. 14,22,840 a year) and to Non-Commissioned Officers of British Troops (estimated to cost Rs. 4,00,000 a year): only a small part of these new burdens falls on 1876-77.

The *Administrative Staff, Commissariat, Clothing* and *Medical Establishments and Services* also show rather a saving than an increase:—

	Rs.		Rs.
1869-70	3,19,24,510	1874-75	2,71,28,750
1870-71	2,91,67,380	1875-76	2,64,75,270
1871-72	2,66,86,370	1876-77 } Estimates ...	2,66,56,000
1872-73	2,75,12,120	1877-78 }	2,81,56,310
1873-74	2,79,07,690		

The increase in 1876-77 and 1877-78 is chiefly in Commissariat supplies due to the Famine, which is estimated to add, in the two years, Rs. 18,00,000 to the cost of the Army, and to the purchase of malt liquor in India instead of in England, to the relief of the account there. Contracts have been made for 18,714 hogsheads of beer brewed at Murree, Kussowlie and other stations; and it is estimated that, in 1877-78, Rs. 3,62,220 will be thus transferred from the Home Accounts to India. Improved pay to British Medical Officers is calculated to cost Rs. 2,24,000 a year.

The remaining Heads are *Remounts and Cattle, Barrack Establishments, Martial Law, Sea Transports and Miscellaneous Services*, and they show a nominal diminution as follows:—

	Rs.		Rs.
1869-70	1,20,11,010	1874-75	74,27,710
1870-71	1,41,02,470	1875-76 ...	75,81,400
1871-72	1,10,88,310	1876-77 } Estimates ...	84,47,000
1872-73	1,00,86,070	1877-78 }	73,74,180
1873-74	87,65,850		

The decrease, as compared with earlier years, is, to a great extent, nominal, owing to the establishment of the Troop Transports, the cost of which is recorded in the Home Accounts, and to the transfer of Barrack Establishments to the Public Works Department. The excess in 1876-77 is in the item *Miscellaneous Services*, and is due to a charge of Rs. 10,00,000 awarded under revised instructions from the Secretary of State as compensation for loss of sums paid, up to the 1st February 1861, for the purchase of promotion; to the charges throughout India connected with the assumption of the Imperial Title (Rs. 3,00,000); and to compensation for dearness of provisions in Madras and Bombay (Rs. 4,00,000) included in the sum of Rs. 18,00,000 already stated.

Thus, of the increased Effective charges, £180,000 is due to accidental transfers of payments, amounting to £90,000, from 1875-76 to 1876-77, and the remaining Rs. 27,41,480 appear to be essentially due to the increased charges at Home for Her Majesty's Troops serving in India, and to the improved pay and allowances granted to the Native Troops and to British Non-Commissioned and Medical Officers.

I will now examine the increases in the *Non-effective* charges, which increases all occur at Home.

The first item is *Payments to the Imperial Government on account of the Retired Pay, &c., of Troops serving or having served in India*, the charges for which have been as follows:—

	£		£
1869-70	217,000	1874-75	318,388
1870-71	239,562	1875-76	350,000
1871-72	479,974	1876-77 } Estimates ... {	605,500
1872-73	371,635	1877-78 }	598,500
1873-74	288,300		

This item shows an increase in 1876-77 of £255,500, of which £120,000 is attributed to the postponement of payments, amounting to £60,000, from 1876-77 to 1877-78. But for this postponement, the figures would have been—

1875-76 ... ... £410,000 | 1876-77 Estimate ... £545,500

the increase being £135,000. Like the *Home Charges of Her Majesty's Regiments serving in India*, these charges are the result of long negotiations with the War Office, and are beyond the control of the Government of India. The item *Deferred pay to discharged or deceased soldiers for service in India subsequent to 1st April 1876*, which is entered at £2,000 in 1876-77 and £40,000 in 1877-78, is expected to rise to £200,000 a year.

The next item appears for the first time in 1876-77, *viz.*, *Payments to the Imperial Government on account of the capitalised value, from 1st April 1874, of the proportion chargeable to Indian Revenue of the pensions granted between 18th February 1861 and 31st March 1870 to soldiers transferred from the Indian Local Army to the British Army*. This charge, which we do not expect to recur, is estimated to be in—

1876-77 ... ... £100,000 | 1877-78 ... ... £130,000

The third item is *Retired Pay of Officers of the Indian Service, including Colonels' Allowances and including also the capitalised value of pensions granted to Indian Officers on retirement, representing the estimated value of the proportionate claim to the Colonels' Allowances*. The charges for this item, which accounts for £119,086 of the increase, are as follows:—

	£		£
1869-70	759,867	1874-75	982,209
1870-71	754,347	1875-76	982,114
1871-72	750,575	1876-77, Estimates ...	1,101,200
1872-73	765,004	1877-78 Do. ...	1,120,
1873-74	816,598		

of which the capitalised payments, which are calculated to prevent a still larger increase hereafter, are:—

	£		£
1874-75	147,040	1876-77 } Estimates ... {	111,200
1875-76	75,775	1877-78 }	100,000

The pensions from Lord Clive's Fund are diminishing, thus:-

	£		£
1869-70	204,384		133,462
1870-71	131,478	1875-76	121,908
1871-72	131,535	1876-77 } Estimates ... {	108,500
1872-73	132,730	1877-78 }	108,000
1873-74	133,167		

Thus it appears that, of the whole increase of £457,738 in the Home non-effective charges, £120,000 is due to an accidental transfer of payments from 1875-76 to 1876-77, £119,086 to the growing charge for *Retired Pay of Indian Officers, including Colonels' Allowances*, and £218,652 to increased demands by the Imperial Government for the retired pay and deferred pay of the troops serving or having served in India.

In concluding this Review of the Army Expenditure I have only to add that the Government of India must certainly endeavour to find the means of meeting the increased military charges, some of which are apparently inevitable, by economies in other Departments of the Military Service: their endeavours must be largely dependent for success upon the support of Her Majesty's Government. I do not assert that the whole of the additional expenditure on the Army has not been incurred for excellent objects, or that it could have been avoided; but that the Indian Revenues are liable to have great charges thrown upon them without the Government of India being consulted, and almost without any power of remonstrance, is a fact the gravity of which can hardly be exaggerated.

Guaranteed interest less net traffic receipts shows the gratifying improvement of Rs. 84,07,000.

The following Statement exhibits the whole effects recorded in the Public Accounts and Estimates upon our Revenues, of the transactions with the Companies upon whose capital interest is guaranteed from Indian Revenues.

Transactions as recorded in the Finance Accounts, upon the hypothesis that £1 = Rs. 10.

								1876-77, Original Esti	1876-77, Regular Esti	1877-78 Original Esti-
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Guaranteed Interest, less Net Traffic Receipts ...	1,54,70,640	1,83,48,110	1,72,32,180	2,11,05,010	1,43,73,520	1,24,45,620	97,53,100	1,26,00,000	41,93,000	1,00,00,000
Land and Supervision ...	9,13,000	8,29,530	6,61,630	16,10,560	15,24,380	5,53,940	8,33,130	9,30,000	9,12,000	7,80,000
Interest on Revenue Balances	2,78,544	2,37,392	2,57,241	2,31,363	2,69,337	3,56,431	3,49,700	3,08,000	3,20,000	9,000
Total Expenditure ...	1,66,63,084	1,94,15,032	1,81,51,051	2,29,46,933	1,61,67,237	1,33,55,991	1,09,35,930	1,38,38,000	54,25,000	1,07,89,000
Deduct Net Gain by Exchange	4,02,170	13,18,670	20,96,760	28,66,150	33,34,890	36,14,520	35,71,610	32,41,130	42,43,000	35,00,000
Net Cost of undertakings to the Indian Revenues as recorded in the Finance and Revenue Accounts ...	1,62,60,914	1,80,96,362	1,60,54,291	2,00,80,483	1,28,32,347	97,41,471	73,64,320	1,05,96,870	11,82,000	72,89,000

According to this Statement, the improvement in 1876-77, compared with the Original Estimates, is, altogether, no less than Rs. 94,14,870, and the net cost of the undertakings in 1876-77, only Rs. 11,82,000: but this Statement does not exhibit the true effect upon Indian Revenues of the transactions with these Companies: the system by which we combine the sterling transactions of the Home Treasury with the rupee transactions of the Indian Treasuries upon the hypothesis that Rs. 10 = £1, and call the totals pounds sterling or rupees, has many inconveniences; and especially obscures the truth as regards the important transactions with which I am now dealing.

In the following table I have collected the facts of the last seven years, and the estimated facts of the present and coming years, as regards these

undertakings, from which the results to the Indian Exchequer have to be ascertained: these facts are, in themselves, well worthy of a place in this review.

Transactions of the Companies upon whose Capital interest is guaranteed from Indian Revenues.

		1869-70.							1876-77, Original Estimates.	1876-77, Regular Estimates.	1877-78, Original Estimates.

Gain by Contract Rates of Exchange on Capital Ac ...	12,25,671	2,23,468	53,976	...					51,759	
Total sets off ...	2,97,87,901	2,81,43,218	3,13,40,807	2,77,89,319	3,52,09,432	3,75,48,868	4,03,56,677	3,76,70,000	4,66,87,759	4,03,40,000
Net cost to Revenues	1,44,99,426	1,95,61,092	1,74,15,641	2,36,06,036	1,70,83,763	1,47,28,497	1,29,58,838	1,91,19,489	94,92,361	1,39,27,964

The last table which I shall give is the following comparison of the true cost of these undertakings to our Revenues compared with the results shown in our Accounts:—

	Net cost to Indian Revenues according to Finance Accounts.	True net cost.	More.	Less.
	Rs.	Rs.	Rs.	Rs.
1869-70	1,62,60,914	1,44,99,423	...	17,61,491
1870-71	1,80,96,362	1,95,61,092	14,64,730	
1871-72	1,60,54,291	1,74,15,641	13,61,350	
1872-73	2,00,80,483	2,36,06,036	35,25,553	
1873-74	1,28,32,347	1,70,83,763	42,51,416	
1874-75	97,41,471	1,47,28,497	49,87,026	
1875-76	73,64,320	1,29,58,838	55,94,518	
1876-77, Original ...	1,05,96,870	1,91,29,489	85,32,619	
1876-77, Revised ...	11,82,000	94,92,361	83,10,361	
1877-78	72,89,000	1,39,24,964	66,35,964	

Although the true estimated net cost, this year, of these undertakings thus exceeds the amount shown in our Accounts by Rs. 83,10,361, still it is by far the smallest burden that has resulted from them to our Revenues for many years; and the relief of Rs. 96,37,128 compared with the Original Estimates is most acceptable: the particulars of this improvement are as follows:—

	Better. Rs.
Net traffic Receipts applicable to relief of Indian Revenues ...	89,66,000
Exchange on Capital transactions	2,61,530
Reduction of Interest on Capital	4,03,598
Land and supervision	18,000
TOTAL ...	96,49,128
Interest on Revenue Balances, worse	12,000
Net improvement ...	96,37,128

Of the improvement in the Net Traffic Receipts, about 9 lakhs of Rupees is attributed to the Delhi Assemblage, and about 29 lakhs to the Famine; the remainder is said to be due to a great traffic in seeds, wheat, and other produce, corresponding with the increased exports which we shall presently observe: the saving in interest is owing to the discharge of some debentures and to the renewal of others at lower rates.

The fact that the gross traffic earnings are expected, for the first time, to exceed ten crores of Rupees, appears to me to be full of promise, and to be a signal demonstration of the services which these Railways already perform for India: there can be no question that multitudes will owe their lives to them this year. The gross traffic earnings of 1876-77 exceed those of 1869-70 by no less than Rs. 3,25,93,680, or 46 per cent., and the Net Traffic Receipts applicable to the relief of Indian Revenues in 1876-77 exceed the amount so applicable in 1869-70 by Rs. 1,80,73,770, or 46 per cent. The decrease in the percentage of working expenses is highly creditable to the management of these great undertakings, and to the supervision of the Government in the Public Works Department. Altogether, I have found nothing so gratifying in my present review of our finances as the progress of these Railways.

Their net financial result is burdened by the inclusion of the operations of the Madras Irrigation Company, which is, as yet, an absolute failure and a dead weight upon the Revenues, not nearly even paying its way.

The true cost of the Madras Irrigation Company's Works to the Revenues in 1876-77 is estimated to be Rs. 6,77,729, so that the whole cost of the Guaranteed Railway system (5,866 miles) to India in 1876-77 is now estimated at Rs. 88,14,632.

The following is the Net Revenue earned (including Companies' Surplus) by each line:—

	Rs.		Rs.
East Indian	2,34,81,000	Sindh, Punjab, and Delhi ...	22,00,000
Great Indian Peninsular	1,43,00,000	Eastern Bengal	18,88,000
Bombay and Baroda ...	28,00,000	Oudh and Rohilkund ...	11,86,000
Madras	28,00,000	South India	9,75,000
		TOTAL ...	4,96,30,000

Public Works Ordinary.—The excess over the Net Grant in the Imperial portion of this Head is Rs. 9,28,000; but savings in the Provincial portion reduce the net excess to Rs. 5,57,000. The following figures show the Imperial expenditure of recent years compared with the present Estimates; they include the Estimates for 1877-78, which I shall presently explain:

	Original Estimate, 1876-77.	Regular Estimate, 1876-77.	Original Estimate, 1877-78.	1875-76.	1874-75.	1873-74.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Military Works	1,22,84,000	1,24,69,000	1,23,19,850	1,33,77,380	1,18,59,260	1,12,29,600
Other Services	27,14,000	29,68,000	32,34,650	32,06,110	30,05,750	29,97,970
Collieries	1,57,000	1,30,000	2,59,000	1,16,270	1,83,370	2,12,720
Furlough Allowances ...	4,90,000	5,40,000	5,40,000	4,71,960	4,47,750	4,99,940
Royal Civil Engineering College, England	2,30,000	2,40,000	2,40,000	2,37,650	2,67,190	3,97,690
Miscellaneous payments .	45,000	40,000	40,000	33,050	25,130	— 21,080
Irrigation Works ...	91,00,000	95,88,000	90,06,000	1,07,02,400	92,56,330	82,40,390
Delhi Assemblage ...	...	2,83,000	...	...	..	...
	2,53,20,000	2,62,58,000	2,56,39,500	2,82,44,820	2,50,44,780	2,35,57,230

The excesses over the Grant are as follows: *Military Works*, Rs. 1,85,000 attributed to expected saving not being realised; *Other Services*, Rs. 2,54,000, of which Rs. 2,00,000 is for the new Government House and other Offices at Simla, and the rest is more than accounted for by the transfer of certain Light Houses from Provincial to Imperial Funds with a grant of Rs. 64,000; *Furlough Allowances*, Rs. 50,000; *Irrigation Works*, Rs. 1,88,000. It has been found necessary to grant, in all, Rs. 3,47,350 for urgent irrigation works not provided for in the Estimates; of this sum, Rs. 1,59,350 is made good by savings on items included in the grant; the excess of Rs. 1,88,000 remains. The only important item remaining is Rs. 2,83,000, which I have included in the Estimate given under the Head of *Political Services* of the total cost of the ceremonies of the 1st January 1877 throughout India.

Public Works Extraordinary.—The Grant was increased in the middle of the year by Rs. 20,00,000; that the excess now expected is only Rs. 1,10,000 is owing to the accidental transfer, at the last, of a payment in England of £128,000 for stores from 1876-77 to 1877-78. Of the whole Grant, Rs. 2,83,00,000 is being spent upon Railways and the rest on Canals.

The Railway expenditure is as follows:—

	Rs.		Rs.
Rajputana ...	13,99,000	Sindhia .	18,90,000
Western Rajputana	81,000	Northern Bengal .	42,69,000
Neemuch ...	18,63,000	Tirhoot .	15,10,000
Holkar ...	15,50,000	Rangoon .	31,04,000
Wardha Valley ...	7,59,000	Punjab Northern .	38,59,000
Chatisgarh ...	76,000	Indus Valley .	1,00,00,000

This completes my review of the Revenue and Expenditure of 1876-77 as now estimated. Compared with the Original Estimates, the general result is that, but for the Famine, the Original Estimates, although they were in some respects more sanguine than is usual, would have been more than made good. In the midst of the gloom that the Famine casts upon the financial situation to-day, we must not forget that this result was, at one time, little expected: in July 1876 the Government was justly so alarmed at the continued fall in the price of silver, that the Viceroy deemed it right to issue a general warning to all authorities throughout India that every possible economy was called for: I am hardly prepared to say that the comparatively favorable results which, apart from the Famine, I have

now set forth, can be directly traced to that warning; but I know that, in some cases, it led to vigorous measures of retrenchment, which have already facilitated certain important financial measures which I shall describe in speaking to the Legislative Council of the arrangements proposed for the coming year.

WAYS AND MEANS, 1876-77.

I must next compare the Regular Estimate of *Ways and Means* for 1876-77 with the Original Estimate, using, as before, the abstract tables in Statements IV, V, and VI.

The *Deficit of Imperial Revenue* has grown, as we have seen, from Rs. 3,61,50,000 to Rs. 6,07,83,000. The *Deficit of Provincial and Local Revenue* is now estimated at Rs. 28,77,000, being more than the Estimate by Rs. 1,07,000. The payments on account of the *Military Service Funds* are now estimated at Rs. 27,69,000, being Rs. 89,000 more than we expected. The net *Loans to Native States and Public bodies* are expected to be Rs. 61,30,000 being Rs. 16,50,000 more than was expected.

As these transactions possess considerable interest, I present the following account of them :—

Loans to Native States and Public bodies.

		Advanced.	Recovered.	Net advances.
1872-73	...	43,88,360	17,89,690	25,98,670
1873-74	...	58,08,490	12,36,850	45,71,640
1874-75	...	80,16,540	19,00,270	61,16,270
1875-76	...	55,87,980	17,13,110	38,74,870
1876-77	...	75,10,000	13,80,000	61,30,000
TOTAL	...	3,13,11,370	80,90,920	2,32,91,450

During these five years, the sum of Rs. 2,32,91,450 has been for the most part (the loans to Native States being inconsiderable) invested, by the agency of various public bodies, in works of local improvement. The Grand Total outstanding due to the Government of India on this account, on the 31st of March 1876, was Rs. 5,67,78,790, full details of which are given in the 70th Account appended to the Finance and Revenue Accounts of India for 1875-76. The largest items are Rs. 2,14,75,860, due from the *Bombay Port Trust*; Rs. 92,05,560 from the *Calcutta Municipal Corporation*; Rs. 59,83,420 from the *Calcutta Port Fund and Port Trust*; Rs. 57,51,000 from the *Bombay Municipality*; and Rs. 21,26,670 for the *Hooghly Bridge*.

The Guaranteed Railway Companies were expected to withdraw net Rs. 10,43,000: they will, it is believed, actually withdraw Rs. 1,21,42,000. Deposits and Remittances shew an adverse balance of Rs. 78,00,000, being more than Estimate Rs. 53,70,000. Thus, we now expect to have to provide, otherwise than from the Revenues, Rs. 9,25,01,000, being more than Sir William Muir's Estimate by Rs. 4,19,08,000.

Of this large sum, the Covenanted and Uncovenanted *Civil Funds* will yield Rs. 11,40,000, being more than was estimated by Rs. 2,50,000. *Savings Banks Deposits* are expected to supply Rs. 10,60,000 instead of Rs. 5,00,000.

This item is not important financially; but it has so much interest of its own, that I will state the past figures :—

	Savings Banks.		
	Deposited.	Withdrawn.	Net Deposits.
	Rs.	Rs.	Rs.
1872-73	89,89,940	65,75,820	24,14,120
1873-74	1,17,73,520	91,86,580	25,86,940
1874-75	73,08,730	72,09,370	99,360
1875-76	73,75,390	65,35,180	8,40,210
1876-77	57,60,000	47,00,000	10,60,000
	4,12,07,580	3,42,06,950	70,00,630

The balances in the hands of the Government on the 31st March 1876 are shown in the 65th Account appended to the Finance and Revenue Accounts for 1875-76 to have been Rs. 1,83,08,140, of which Rs. 1,15,19,370 were in the

Presidency Savings Banks (Rs. 93,86,040 in Bombay alone); Rs. 17,13,540 were in Regimental Savings Banks; and Rs. 20,75,230 in District Savings Banks. It was ascertained in 1873 that the Presidency Savings' Banks were being used, especially at Bombay, for purposes for which they were not intended; and means were taken to prevent the abuse. The *District Savings Banks* have made some progress during the year, but they are still quite in their infancy.

Rs.
borrowe[illegible]
by the purchase of securities already described.

If some unimportant items are omitted, the rest of our requirements for the year have been supplied from the Balances in our treasuries, which have been reduced by Rs. 5,41,27,937 in India, and raised by £228,200 in England. Sir William Muir calculated upon a reduction of only Rs. 1,76,23,000: he expected the Government of India to reduce its Balances by Rs. 2,69,06,000, and the Secretary of State to increase his Balance by £928,300. I have shown that the Opening Balances proved to be larger by Rs. 88,16,000 (*viz.*, Rs. 70,93,000 in India, and £172,300 in England) than was at that time expected. But making allowances for this, the net reduction amounts to the formidable sum of Rs. 2,54,07,000 in excess of Sir W. Muir's estimate, of which Rs. 2,01,29,000 is in India, and £527,800 in England. I cannot speak for the Secretary of State as regards the Balances in the Home Treasury, but the estimated Balances in India on the 31st March next (Rs. 11,53,97,000) are decidedly too low; and we have only submitted to them under the pressure arising out of the Famine.

COMMERCIAL STATISTICS, 1876-77.

The Exports and Imports of Merchandise (including Government stores but excluding treasure) during the ten months from April to January, in the years 1872-73 to 1876-77, were—

April to January.		Exports (including re-exports).	Imports.	Net Exports.
		Rs.	Rs.	Rs.
1872-73	...	*43,78,45,284	25,52,53,692	18,25,91,592
1873-74	...	*43,09,58,722	26,43,52,662	16,66,06,060
1874-75	...	44,31,72,208	29,42,86,036	14,88,86,172
1875-76	...	46,30,93,697	30,82,62,938	15,48,30,759
1876-77	..	48,26,54,961	30,24,29,230	18,02,25,731

* These figures are for private trade only, those for Government Stores not being available.

Including treasure, the Net Exports during the same periods were—

April to January.		Net Exports of Merchandise.	Net Imports of Treasure.	Net Exports.
		Rs.	Rs.	Rs.
1872-73	...	18,25,91,592	2,90,97,380	15,34,94,212
1873-74	...	16,66,06,060	1,15,05,223	15,51,00,837
1874-75	...	14,88,86,172	5,01,96,376	9,83,89,796
1875-76	...	15,48,30,759	2,45,25,580	13,03,05,179
1876-77	...	18,02,25,731	5,21,85,306	12,80,40,425

The Gross Exports of commodities (other than treasure) in the ten months of 1876-77 exceeded those in the corresponding period in 1875-76 by nearly 2 crores, whilst the imports were 58 lakhs less: the Net Imports of treasure in the ten months of 1876-77 were 276 lakhs more than in the corresponding period in 1875-76.

The exports of the principal articles of Indian produce were as follows :—

(Values in Rupees.)

		1872-73.	1873-74.	1874-75.	1875-76.	1876-77.

	Value	40,77,000	40,64,000	38,70,000	25,50,000	30,27,000
Silk, Raw and manufactured ...	Value	1,11,61,000	1,08,14,000	87,27,000	53,19,000	80,14,000
Sugar and saccharine produce ...	Value	46,77,000	19,17,000	27,91,000	22,66,000	60,60,000
Tea	lbs.	15,710,000	16,800,000	17,231,000	21,255,000	25,186,000
	Value	1,40,33,000	1,52,02,000	1,59,09,000	1,89,99,000	2,36,18,000
Wood, Teak	Value	32,53,000	33,16,000	26,39,000	35,63,000	27,32,000
Wool, Raw	lbs.	16,344,000	16,062,000	17,924,000	19,507,000	19,815,000
	Value	66,58,000	74,55,000	80,68,000	89,93,000	89,10,000

The export of *Cotton Goods* continues to grow remarkably. There are now, or will immediately be, fifty-two mills at work in India for spinning and weaving cotton, *viz.* :—

	Mills.	Spindles.	Throstles.	Looms.
Bombay ...	40	932,530	21,476	8,390
Bengal ...	4	101,194	3,352	100
North-Western Provinces	2	27,350	...	275
Madras ...	3	26,800	...	44
Nagpur ...	1	30,000	...	450
Hyderabad ...	1	15,172	...	200
Indore ...	1	*No information.*		
Total ...	52	1,133,046	24,828	9,459

The increase in exports of *Wheat*, *Seeds*, and *Tea* is very considerable; and, after three years of depression below the amount in 1872-73, the export of *Sugar* in 1876-77 has greatly exceeded that in 1872-73.

The following table of imports of principal articles during the ten months from April to January in 1872-73 to 1876-77 shows a slight improvement in *Cotton Goods* and a material improvement in *Metals*, which two classes of goods form the bulk of the imports. Grey cotton goods, of which the quantities in 1875 declined below the imports in 1874, show an improvement in the ten months, compared with the corresponding period in 1875-76. In the remaining articles there is, on the whole, a falling off in comparison with 1875-76 :—the decline of machinery and mill-work being considerable : woollen manufactures, though less than in 1875-76, are in advance of the corresponding amounts in 1872-73 to 1874-75. I reserve for my Statement in the

Legislative Council the remarks which I have to make regarding the import duties levied on cotton goods.

The Net Imports of gold and silver were as follows :—

April to January.	Net Imports of Gold.	Net Imports of Silver.	Total Net Imports of Treasure.
	Rs.	Rs.	Rs.
1872-73 ...	2,18,65,723	72,31,657	2,90,97,380
1873-74 ...	1,13,64,648	1,40,575	1,15,05,223
1874-75 ...	1,63,00,406	3,41,95,970	5,04,96,376
1875-76 ...	1,48,62,220	96,63,360	2,45,25,580
1876-77 ...	-41,02,337*	5,62,87,643	5,21,85,306

The condition of Trade in 1876-77 is understood to have been flourishing: doubtless the expansion of the Net Imports of Silver and the fact of there having been, for the first time, a Net Export of Gold, are closely connected with the fall in the gold-price of silver, and the consequent depression of the sterling exchange.

The Bank of Bengal's rate of interest on loans payable on demand has varied from 11 per cent. (from the 13th to the 27th April) to 5 per cent. (from 4th August to 21st September). Money has thus been scarce and dear, a fact which may be attributed, partly, to the contraction of the Government Balances and the creation of a separate Government Reserve Treasury, but, to a much greater degree, probably, to the apprehensions felt by banks and capitalists as to the future value of silver. There is reason to believe that much capital was for a time, and may again be, withdrawn from the East in consequence of these apprehensions.

The Government Securities held by the Presidency Banks have fallen from Rs. 2,44,71,000 on the 1st April and (by the latest returns) Rs. 1,64,73,000. The largest amount held by these institutions was at the end of June Rs. 2,69,15,000, since which date they have sold securities for Rs. 1,04,42,000. The following Statistics of the transactions of these Banks at the close of the 8th week (the latest date for which we have complete Statistics) of each calendar year are interesting.

	Assets.					Liabilities.			
	Government Securities held.	Advances on Government Securities.	Mercantile bills discounted.	Cash Balances.	Other Assets.	Reserve Funds.	Public Deposits.	Bank Post bills.	Other deposits and liabilities.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1871	151,28,000	128,57,000	351 48,000	995,08,000	58,94,000	25,14,000	624,14,000	21,76,000	677,75,000
1872	145,84,000	424,70,000	432,26,000	945,63,000	35,04,000	25,91,000	1,160,19,000	10,07,000	451,05,000
1873	219,52,000	145,01,000	370,13,000	896,36,000	55,11,000	29,79,000	795,65,000	3,83,000	520,64,000
1874	163,06,000	188,92,000	403,20,000	516,16,000	29,04,000	34,92,000	531,81,000	7,33,000	390,27,000
1875	231,93,000	170,92,000	380,22,000	579,90,000	38,07,000	35,56,000	512,00,000	6,61,000	471,00,000
1876	257,07,000	152,11,000	347,73,000	598,52,000	39,31,000	41,78,000	514,41,000	10,28,000	452,35,000
1877	164,13,000	148,87,000	325,91,000	472,81,000	33,02,000	41,96,000	305,74,000	3,86,000	443,18,000

* Net Exports.

The public Deposits fell at one time (second week of January 1877) to Rs. 2,54,66,000. Their depletion is due to the decrease of the general Balances of the Government, and, latterly, to the demands for money for the operations against the famine in the Presidencies of Madras and Bombay.

The Presidency Banks' Act No. XI of 1876 came into operation on the 1st of May 1876, and is understood to have worked satisfactorily. New agreements have been completed, under this Act, between the Government and the Banks for the conduct of the public business at the Presidency Towns, and at the Branches of the Presidency Banks at country towns; and these agreements, too, have worked smoothly and well.

A Government Reserve Treasury was opened in Calcutta on the 11th May 1876. The largest Balance accumulated in this Treasury was Rs. 1,66,25,677 (*on the 1st November*): this amount rapidly decreased; and, since the middle of December, the contents of the Reserve Treasury have been nominal. Local revenue is not received at this Treasury, which is supplied only by remittances from the Calcutta Mint and from the interior of the country. It is considered important to concentrate the spare resources of the State, as far as possible, in one Government Reserve Treasury, in order that they may be more readily available for use, in case of need, than they would be if they were deposited, as heretofore, in the Presidency Banks and employed in their ordinary business. The Government intends always, in ordinary times, to leave with each Presidency Bank a balance calculated upon a liberal scale with reference to the public transactions at each Bank.

The rates of exchange at which the Secretary of State sold his bills upon the Government of India have ranged from 1*s.* 6·57*d.* the rupee on the 5th July to 1*s.* 10·33*d.* on 24th January, following, of course, the Sterling price of silver: the average rate, as we have seen, is 1*s.* 8½*d.*

The rate fixed for the adjustment during the year of transactions with the Imperial Treasury is 1*s.* 9¾*d*: this rate is fixed once a year, according to the state of the exchanges in London on the date on which the calculation is made: hitherto, no forecast of the probable course of the exchanges during the year has influenced the determination of the rate: this year, the rate has been so much above the market rate that the Treasury has lost heavily by it. The amount to which the rate applies, directly, in 1876-77 (apart from furlough allowances, the proportion of which affected by the rate I cannot exactly calculate) is estimated to be net £1,371,000. At the average rate of the year we should have received in India, in exchange for this sterling sum, Rs. 1,60,52,236; by the operation of the adjusting rate we have received only Rs. 1,51,28,275; the difference (Rs. 9,23,961) is loss to the Indian Treasury arising from the adjusting rate; and perhaps Rs. 1,50,000 may be added for loss on furlough allowances. The furlough allowances of our civil and military officers and the family remittances of military officers are affected by the adjusting rate; and, in so far as the high rate of the year has mitigated the loss sustained from the depreciation of silver, by our military officers and by our poorer civil officers, the Government does not grudge its loss. One consequence of the advantage enjoyed, this year, by these officers is to be observed in the remittance by them to their families through the India Office of £275,000 more than was expected.

The Paper Currency circulation during the first ten months of 1876 was only marked by the ordinary fluctuations due to season: towards the close of the year the circulation was increased by the issue of notes against bullion,—a measure authorised by the law but not hitherto adopted. The lowest point of the circulation, Rs. 10,53,22,945, occurred, as in 1875, in May: the recovery, however, which is observable in the dull season, took place earlier and more rapidly than in 1875: this agrees with the movements of the money-market; in 1875, the highest point of the Bank of Bengal's rates of discount was reached on the 13th May, and the first reduction took place on the 27th May; in 1876, the highest point was reached on the 13th April, and the first reduction took place on the 27th April. At the close of 1876, the amount of the circulation was almost exactly 12 crores of rupees. The largest circulation, Rs. 12,27,36,080, was on the 15th December.

The Money Orders issued by the Government fell to a lower number and amount than has been reached for several years, as follows:—

	No. of Orders issued.	Amount.	Average amount of each Order.	Profit.
		Rs.	Rs. A. P.	Rs.
1869-70 ...	210,781	1,16,63,338	55 5 4	60,891
1870-71 ...	242,702	1,30,55,924	53 12 8	64,891
1871-72 ...	251,213	1,25,14,115	49 13 5	58,017
1872-73 ...	269,435	1,29,21,632	47 15 4	58,387
1873-74 ...	245,879	1,07,20,240	43 7 3	66,825
1874-75 ...	242,001	1,01,67,465	42 2 3	56,919
1875-76 ...	231,907	91,26,625	39 5 8	55,664

The low average amount of each order is satisfactory, as showing that these orders are being used for the purpose for which they were intended, *viz.*, to make small remittances: the diminishing use of the orders seems to show that the means of remitting money in the interior are becoming cheaper.

The Motion was put and agreed to.

The Hon'ble SIR J. STRACHEY also applied to His Excellency the President to suspend the Rules for the Conduct of Business.

THE PRESIDENT having declared the Rules suspended,

The Hon'ble SIR J. STRACHEY introduced the Bill.

The Hon'ble SIR J. STRACHEY also moved that the Bill be published in the *Gazette of India* in English, and in the *North-Western Provinces Gazette* in English and in such other languages as the Local Government directs.

The Motion was put and agreed to.

NORTH-WESTERN-PROVINCES LICENSE BILL.

The Hon'ble SIR J. STRACHEY moved for leave to introduce a Bill for the licensing of certain trades and dealings in the North-Western Provinces.

The Motion was put and agreed to.

The Hon'ble SIR J. STRACHEY also applied to His Excellency the President to suspend the Rules for the Conduct of Business.

THE PRESIDENT having declared the Rules suspended.

The Hon'ble SIR J. STRACHEY then introduced the Bill.

The Hon'ble SIR J. STRACHEY also moved that the Bill be published in the *Gazette of India* in English, and in the *North-Western Provinces Gazette* in English and in such other languages as the Local Government directs.

The Motion was put and agreed to.

CIVIL PROCEDURE BILL.

The Hon'ble SIR ARTHUR HOBHOUSE begged leave to make a short statement with reference to the course which the Government proposed to take with the Civil Procedure Code. He said:—"I said nothing on the subject yesterday, because I expected to speak so soon on the subject at large. It has however been suggested to me that that was a mistake, and that it would be more satisfactory if I were to state publicly what would be the course of business. What the Government propose then is, that the list of business for Wednesday, the 28th instant, shall contain notices of motion in my name for taking the reports into consideration and for passing the Bill. If then it is found that this discussion more than exhausts the day, or if amendments are carried which necessitate a careful examination of the draft, there will be time for an adjourned debate, and His Excellency the President will doubtless appoint some convenient day for the purpose.

"I am afraid that it may occasion some inconvenience and hurry to Members of Council, that so large a measure should be debated within so short a time after the last report has been presented. But it is important to pass a

measure which has reached such a stage of maturity as is the case with the Civil Procedure Code; and having regard to the movements of the Government of India, it will be difficult to perform that operation during the present year if it is not performed during the present sittings in Calcutta. Moreover, it will be recollected that a large proportion of the Members of this Council, no less than eight, are also Members of the Select Committee, and they are acquainted with at least the larger details of the Bill. Still there is hurry, but our Secretary is hard at work, preparing the new prints of the Bill, so as to get them into the hands of the Members as early as possible, and I believe that every one will have time to study such portions of the Bill as interest him.

"As regards those who are outside this Council, the case stands thus. The Committee have made many alterations in the current draft, Bill No. IV, but the great bulk of those alterations relates to technical or professional matter, which is not only not interesting to the general public, but which requires a long period of study for anybody to digest and to comment on. In fact there are only two subjects which have attracted anything like general interest, one being the remedies given to creditors against their debtors, and the other being the distribution of business between District Courts and Subordinate Courts.

"On those two subjects some alterations were proposed by Bill No. IV, which have received a great deal of comment adverse and other. But in settling Bill No. V, the Select Committee, with an eye to the passing of the Bill during these sittings, have carefully abstained from widening the field of alteration opened by Bill No. IV. Such alterations as they have made have distinctly narrowed that field of alteration, and have travelled back again in the direction of Bill No. III. There is therefore nothing, so far as regards the two subjects I have mentioned, which is contained in Bill No. V and which was not contained in distinctly greater force in Bill No. IV.

"Now Bill No. IV was published at the end of September last, so that by the time we come to debate it will have been six months before the public. Moreover, it was not published as a rude and undigested mass of details from which each man might pick what suited him if he could find it. It was accompanied by comments proceeding partly from myself and partly from my friend Mr. Cockerell, for the very purpose of calling attention at once to the material alterations, so that those who had comments to offer on them might offer them without loss of time. Surely the time which has passed is sufficient for the purpose. In point of fact we have received some very able and efficient comments on our proposals, and I can hardly think we should get much more if more time were allowed."

The Council adjourned to Wednesday, the 21st March 1877.

WHITLEY STOKES,

CALCUTTA,
The 15th March 1877.

Secretary to the Government of India,
Legislative Department.

ABSTRACT

Of the Financial Statement for Electric Telegraph and Press.

Financial Statement by the Honorable Sir John Strachey, K.C.S.I., published this day.

Accounts, 1875-76: Revenue, £52,515,789; Expenditure, £55,117,536, of which £595,779 for Famine relief, and £4,270,629 for Public Works Extraordinary: Deficit, £2,601,747: Surplus, excluding Public Works Extraordinary, but not famine, £1,668,882.

Regular Estimates, 1876-77: Revenue, £51,206,700; Expenditure, £57,285,000, of which £3,800,000 for Public Works Extraordinary: Deficit, £6,078,300, or, excluding Public Works Extraordinary, £2,278,300: Estimated cost of Famine, including loss of Revenue, £3,100,000: Surplus on Ordinary Account, excluding Famine, £621,800.

Budget Estimates, 1877-78: Revenue, £52,192,700; Expenditure, £56,442,400, of which for Public Works Extraordinary, £3,628,000: Deficit, £4,249,700, reduced to £621,700 if Extraordinary Works be excluded. Estimated cost of Famine, £2,150,000, making £5,250,000 in the two years; Surplus on ordinary account, excluding famine, £928,300.

Net Amount borrowed in 1876-77, £3,724,000.

Loans in 1877-78, £6,500,000, of which £250,000 from Sindhia for Gwalior Railway: of the remaining £6,250,000, the Government of India proposes to raise £2,500,000 in India. Government of India is not authorized to pledge the Secretary of State as to loans in England, but will recommend him to ask Parliament for power to borrow £3,750,000 in England.

No fresh Imperial taxation; but Bengal and the North-Western Provinces required to guarantee £375,000 interest on money spent on Canals and local Railways, which are made over to Provincial management, and for maintenance and completion of which provincial responsibility will be enforced. This will necessitate fresh Provincial taxation, the maximum amount of which is estimated at £325,000, of which £275,000 in Bengal and £50,000 in North-Western Provinces. Measures for raising amount in Bengal not yet actually settled, but extension of existing system of Provincial taxation proposed, and no tax of novel character. For North-Western Provinces light license tax on trades; and authority given to assign for canals and railways ten per cent. of existing local rates. Large extension in Bengal, North-Western Provinces, and Oudh of system inaugurated by Lord Mayo of making over revenues and expenditure to Provincial uses and management: further development promised in other Provinces hereafter.

Programme for the future: unremunerative public works and famine to be classed as ordinary and provided from revenue; special measures for meeting famine charges under consideration; abolition of Inland Customs Lines and Sugar duties; equalisation and reduction of Salt duties; Government pledged to abolish import duties on Cotton goods with least possible delay. All measures of fiscal relief postponed this year on account of famine. Financial position considered satisfactory and future promising.

Estimated bills upon India in 1877-78, Rs. 13,85,00,000. Present intention of Secretary of State to sell bills for 26½ lakhs a week during April and May.

Estimated Balances at credit of Government of India: at end of 1876-77, £11,539,700; at end of 1877-78, £12,500,000.

HOME DEPARTMENT.

GILCHRIST SCHOLARSHIPS.

No. 1, dated 18th January 1877.

From—The Secretary of State for India,
To—The Government of India.

I forward herewith for the information of Your Excellency in Council copy of a correspondence* between this Office and the Trustees of the Gilchrist Educational Trust, from which you will observe that the Trustees are prepared in future to assign a sum of not less than £50 for the return passage of each successful scholar whose passage shall not have been otherwise provided for.

* Letter from India Office, dated 19th August 1876.
Letter from Trustees, Gilchrist Educational Trust, dated 5th December 1876.

2. Your Lordship in Council is aware from the 5th para. of the despatch of the 16th of January, No. 3 of 1868, in the Educational Department, that my predecessor, Sir Stafford Northcote, on the recommendation of Sir John Lawrence's Government, consented to grant the sum of £100 for the return passage of each of those gentlemen who might forfeit his scholarship. I am of opinion that it would not be right to give a larger sum for return passage to an unsuccessful scholar than is given by the Trustees to a successful scholar. I therefore desire that you will announce that the sum to be given in future for return passage to a gentleman who has forfeited his scholarship will be only £50.

Dated 19th August 1876.

From—Sir Louis Mallet, C. B., Her Majesty's Under Secretary of State for India,
To—The Secretary to the Gilchrist Trust, London.

I am directed by the Secretary of State for India in Council to invite the attention of the Trustees of the Gilchrist Scholarship to the following facts.

2. The Secretary of State in Council decided in 1868 to grant the sum of £100 for passage to each scholar proceeding to this country. He also, on the suggestion of the Government of India, determined to allow the same sum for return passage to those gentlemen who forfeited their scholarships.

3. Very recently an application has been received from Mr. Prasanna Kumar Roy for a grant of £100 to defray the expense of his return passage to India. In consideration of the remarkable merit of this gentleman, the Secretary of State has, as a special case, acceded to this application.

4. It appears to the Marquis of Salisbury, 1st, that there is something faulty in the present arrangement, as it seems objectionable that a concession should be made to an unsuccessful scholar which is not, as a rule, made to a successful scholar; and, 2nd, that the passages of all scholars to England and the return passages of unsuccessful scholars being paid from the Indian revenues, it would not be just to make any further change in connection with the scholarships on these revenues.

5. I am, therefore, instructed to invite the attention of the Trustees to these facts, and to ask whether it would not be proper that successful scholars should receive their return passages to India from the funds of the trust; or if that be not practicable, whether a deduction should not annually be made from the emoluments of all the scholarships sufficient to defray the expense of the return passages of all the scholars whether successful or unsuccessful.

Dated 5th December 1876.

From—W. B. Carpenter, Esq., Secretary to the Gilchrist Trust,
To—Her Majesty's Under Secretary of State for India.

I have the honour to forward to you three packets of papers for the examination to be held for the Gilchrist Scholarships in the second week of January, and have to request that you will cause them to be transmitted by the next post to the three presidential capitals to which they are respectively addressed.

Having duly brought your letter of the 19th August under the consideration of the Gilchrist Trustees, I am directed by them to inform you that they will be prepared to assign a sum not exceeding £50 for the return passage of each successful scholar whose passage shall not have otherwise been provided for.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

STATEMENT ON THE PUBLIC WORKS OF INDIA BY COLONEL SIR ANDREW CLARKE, MADE IN THE LEGISLATIVE COUNCIL, 21st MARCH 1877.

My Lord,—The Budget of last year with a written statement reviewing it, prepared by the Member of Council in charge of the Finances of India, was followed by the publication of a detailed departmental review of the estimates for Public Works for the same period.

This year your Lordship has decided, to have the announcement of the Budget for the coming year reviewed orally in open Council, and with your Excellency's assent I will follow the precedent afforded by former proceedings in this Chamber, and will offer some explanations as to the present phase, the progress and the prospects, of the great interests and resources with which I am personally charged.

Adhering to the form adopted last year, I would first observe that it has not yet been found convenient or practicable to include the grants from Provincial Services and Local funds for public works, nor the estimated receipts and expenses of the Port Trusts at Calcutta and Bombay, nor the Harbour Works at Madras. The expenditure from Municipal funds on public works and on loans to Corporations, and the receipts and expenses of the Light Railways under the Government, North Western Provinces, as also the expenditure on public works by Public Works Officers from contributions, cannot be brought under consideration, because the materials for the purpose are still wanting. Consequently these observations do not embrace the whole field of the operations of the Department. Endeavours will be made to obtain the materials required for a comprehensive summary of the entire receipts and expenditure on public works, whether controlled directly, or supervised indirectly, by the State, in time for the next annual review. I will now confine myself to dealing with the facts and estimates relating to the receipts and expenses from Imperial funds and to Guaranteed undertakings included in the Imperial accounts.

The amounts then to be dealt with are—

	£
The estimate of receipts for 1877-78 which provides for a sum of	11,697,500
And an expenditure amounting to	13,485,160
Making a Grand Total of ...	25,182,660
Of the sum shown under receipts the amount expected to be received from rents and other miscellaneous receipts from buildings classed as Imperial, from the Warora Collieries, from fees from students of the Civil Engineering Colleges at Cooper's Hill and Roorkee, and from the Press at Roorkee, is	92,100
From water-rates and other miscellaneous receipts of irrigation works, excluding the share of the land revenue ascribed to such works, the receipts are likely to be ...	551,600
The revenue of the Telegraph Department, both Indian and Indo-European, is expected to amount to ...	315,500
And the revenue from State Railways to	674,800
So that the direct Imperial receipts that will be accounted for in the Public Works Department aggregate ...	1,634,000
The credits to Capital Account of Guaranteed Railways by transfer to Revenue are taken at	1,510,200
From the earnings of the several Guaranteed Railways there is expected to be received	8,540,800
And from the Madras Irrigation and Canal Company ...	12,500
These several items make up the total of ...	11,697,500

The average Miscellaneous receipts of the three years ending with 1875-76 have been £80,663, for 1876-77 the receipts are estimated to amount to £84,000, and in 1877-78 to £92,100. The anticipated increase in the revenue of 1877-78, as compared with the average receipts of previous years and with the probable income of 1876-77, is chiefly due to the receipts from the Warora Collieries being now taken at £18,100 as against £5,700 in 1876-77. This will just pay the cost of working expenses.

I view the future of these collieries, with iron-ore in their vicinity, as a subject of great importance, and of this the present Chief Commissioner of the Central Provinces is keenly sensible.

The sums under this head also include the fees from the students of the Royal Civil Engineering College, Cooper's Hill. These receipts are not sufficient to pay the working expenses of the Institution, on which there is a deficit of £4,300. The expenses, not including first cost and additions to buildings, are £24,000; the receipts £19,700; a deficit of but little importance or significance once admitting that the principle of such an establishment is the right one. The receipts for the Roorkee Press and College are expected to amount to £4,100, of which £600 only is derived from fees of the students; and as the expenses of the College amount to £20,494, the result is a net deficit of £19,894. But the College is mainly kept up for the training of Upper and Lower Subordinates of the Department, and as these classes of students pay no fee for tuition, the College cannot be expected to pay its expenses. The items of income classed as Miscellaneous necessarily vary from year to year in consequence of the fluctuating nature of the source of the income; the receipts realized are commensurate with cost of buildings rented. I may here notice in the case of the receipts from buildings classed as Provincial, the revenue is credited to Provincial Services. The tolls on lines of roads in cases where such tolls are levied, on the Circular Canals and Nuddea Rivers in Bengal and on the East Coast Canals in Madras, and generally on such canals as are used for the sole purpose of navigation, are credited to Local Funds, and are at the disposal of the Local Governments concerned for local works.

The gross direct receipts from Irrigation Works in 1876-77 are expected to amount to £500,700 against an average receipt in the three previous years of £489,880 per annum. In 1877-78 a sum of £551,600 may be realized—so that, as compared with 1876-77, there is likely to be an increase of £50,900. But the receipts in 1876-77 were unduly low in consequence of the favourable rainfall in the Punjab in the winter of 1876, while in Bengal there was some delay in collecting the full assessments. It may be added that no portion of the expected receipts is to be derived from new canals coming into operation during the year.

Of the sum of £315,500 set down as the expected receipts from Telegraph, £241,000 is from the Indian and Ceylon Telegraphs, and the remainder from the Indo-European Telegraph. The average receipts per annum of the three years ending with 1875-76 from the Indian Telegraph Department have been £204,538, the expected receipts of 1876-77 amount to £236,000, so that the estimate for next year provides for an increase of £5,000.

In the case of the Indo-European Telegraph no increase can be expected. The average receipts have been £76,668 per annum, the probable

receipts of 1876-77 £96,100, while those of 1877-78 are £60,285. The decrease is due to exceptional items of receipt on Capital Account in previous years and to the opening of the duplicate cable now being laid between Suez and Bombay which will probably affect the income of the European Telegraph to the extent of £13,900. A further falling off of £14,215 is due to the payment to the Indo-European Telegraph Company for earnings collected in India on messages home, and anticipated to exceed the sum due by the Company for earnings collected in England on messages out. In other words the outward messages *vid* Russia are calculated to be in excess of the inwards due by that route.

In 1877-78 the gross receipts on State Railways are taken at £674,800, the receipts of 1876-77 being £369,600, and the average actual receipts of the three previous years £153,470 per annum. The increase in receipts of 1877-78, as contrasted with those of 1876-77, will be due to the opening of the Indus Valley, Northern Bengal, and Rangoon and Irrawaddy Valley, State Railways, from which there will probably be received £209,300 in all.

The balance £95,900 of the increase occurs in the other Railways, *viz.*, £35,000 from the Rajputana, £11,100 from the Punjab Northern, £18,000 from the Holkar State Railway, and £14,700 from the Tirhoot State Railway. The increase in the receipts of the last two Railways is partly owing to a larger extent of line being opened.

At the rate in which the Government accounts are made up, *viz.*, 2 shillings per rupee, the gross traffic receipts from Guaranteed Lines of 1877-78 are expected to amount to £8,540,800, the probable receipts of 1876-77 being £9,492,600, and the average receipts of the three previous years £8,036,172 per annum. The large revenue of the year 1876-77 is due partly to the increase in the traffic caused by the Imperial Assemblage at Delhi, and greatly to the famine in Madras and Bombay. But the growth of the export trade in seed and grains has also added to the traffic, and this will, I trust, still largely increase and be a permanent source of income to our railways, and of greatly extended prosperity to the whole empire and its peoples.

The scarcity in Madras has improved slightly the income of the Madras Irrigation Company. In 1873-74 the receipts were £4,633 in 1874-75 £4,193, and in 1875-76 £6,620. In 1876-77 they are expected to be £7,000, and in 1877-78 £12,500.

Excluding the items of receipt on Capital Account of Guaranteed Railways which to a great extent have to be deducted from the expenditure side of the account, the total sum due to the operations of the Department and carried to the credit of the Imperial Revenues is £9,915,000, the expected receipts in 1876-77 being £10,786,000, so that there is a decrease of £871,000. The decrease under Guaranteed Railways due chiefly to the operation of the famine is £1,224,100, so that under other heads there is an increase of £353,100. Of this increase £8,100 falls under Revenue Miscellaneous and £50,900 under Revenue Irrigation. Under State Railways the increase is £305,200, and in the receipts from the Madras Irrigation and Canal Company £5,500. On the other hand the receipts from Telegraphs show a decrease of £16,600.

Turning to expenditure the aggregate of £13,485,160 is thus made up—

	£
Grant from Ordinary Imperial funds for expenditure on Public Works (exclusive of the portion given to Provincial Services)	2,563,950
Provision for expenditure on Telegraphs	495,500
„ „ „ on State Railways Ordinary, including working expenses	501,110
Provision for land and control for State expenditure on Guaranteed Railways	78,000
The total Ordinary grant is thus ...	3,638,560
Under Extraordinary the provision is	3,628,000
For Capital expenditure of the Guaranteed Railways there is required	1,382,000
And for working expenses of the same Railways there is wanted	4,457,800
It is necessary to provide for payment of surplus profits to Shareholders of the East Indian, Great Indian Peninsula, Eastern Bengal and Bombay Baroda and Central India Railways	367,000
And for working expenses of the Madras Irrigation and Canal Company it is necessary to provide ...	11,800
Making up the total of ...	13,485,160

The grant for Public Works, Ordinary, as contrasted with the Regular Estimate of the current year and the average expenditure of the three previous years is as follows :—

	Budget-Estimate, 1877-78.	Regular Estimate, 1876-77.	Average actual outlay of previous three years ending with 1875-76.
	£	£	£
Military Works	1,231,985	1,246,900	1,215,541
Other Services	431,365	392,800	406,049
Irrigation	900,600	958,800	939,970
Imperial Assemblage at Delhi	...	2,3800	...
	2,563,950	2,626,800	2,561,560

On the whole the grant for expenditure is £62,850 less than of 1876-77, and £2,389 more than the average outlay of the previous 3 years. Of the decrease in 1877-78 as contrasted with 1876-77, £28,300 is due to the exceptional expenditure on the Imperial Assemblage, and £58,200 to a diminution in the grant for Irrigation Works. Under other Services the increase of £38,565 includes the expenditure necessitated on Government of India buildings and water-supply project at Simla.

The grant for next year for Telegraph amounting to £495,500 includes a sum of £14,215 of refunds to the Indo-European Telegraph Company, which ought to be really deducted from Revenue, so that virtually the expenditure provided for amounts to only £481,285, the probable expenditure in 1876-77 being £491,800, and the average expenditure of the three previous

years £444,816. The net charge on the Revenues of the State by the operations of the Telegraph is expected to amount to £180,000 in 1877-78 against an average of £162,632 in the previous 4 years.

The provision for State Railways under the head of Ordinary is £501,110 against a probable charge of £303,650 for 1876-77. Of this sum £18,100 is for outlay on surveys, and the remainder for working expenses of the several State Railways. The increase in the charge on the Ordinary Revenue of £197,460 is more than covered by the increase of £305,200 shown as likely to accrue under receipts.

Of the increase of £197,460 in 1877-78, £169,300 is accounted for by provision having been made for the working expenses of the Indus Valley, Northern Bengal, and Rangoon and Irrawaddy Valley Railways, the receipts from which are expected to aggregate £209,300. A further increase of £48,270 is expected to be incurred on the expenses of the other State Railways, from which an increased income of £95,900 is anticipated. On the other hand the provision for outlay on Capital account of surveys has decreased by £20,110.

The charge for State outlay on Guaranteed Railways is decreasing. The average charge in the three years ending with 1875-76 was £97,048 per annum. In 1876-77 it is expected to be £91,250, while in 1877-78 the provision made is only £78,000.

The total outlay on Extraordinary Works, Irrigation and State Railways, to end of 1877-78 is expected to amount to close upon £28,000,000. The figures are as follows :—

	Irrigation.	State Railways.	Total.
	£	£	£
Actual outlay to end of 1875-76 ...	8,708,195	11,785,492	20,493,687
Probable outlay, 1876-77	1,012,000	2,788,100	3,800,100
„ 1877-78	900,000	2,728,000	3,628,000
	10,620,195	17,301,592	27,921,787

This is called extraordinary outlay, and is all of it treated as being defrayed from borrowed funds, though much of it has been paid out of current revenue.

The actual charge on the Ordinary revenues for interest on this outlay is estimated at £1,174,850, against £1,007,718 in 1876-77, so that there is an increase in charge of £167,132. Of this increase, £138,500 is met by an increase in revenue, so that the net increased charge really incurred on the income of 1877-78 by the construction of Extraordinary Works amounts only to £28,632.

The Revenue expense of the Guaranteed Lines is nearly £460,000 less for 1877-78 than for the current year.

It is expected that there will have to be paid as surplus profits	£
over the guaranteed 5 per cent. rate of interest	367,000
The probable charge in 1876-77 being	271,000
And the average charge per annum of the three previous years ...	226,638

The increase in the charge for next year is due to the large earnings of 1876-77 whereby the surplus profits to be paid in 1877-78 have been considerably augmented.

The provision made for working expenses of the Madras Irrigation Company is £11,800, the probable charge for 1876-77 being £16,400, and the actual charge of the three previous years £16,025.

Excluding the Capital Account of Guaranteed Railways, the total sum included as grants from Imperial Revenue in 1877-78 is £12,103,160, the probable charge in 1876-77 being £12,524,600, so that there is a decrease of £421,440. The net decrease in the working expenses of Guaranteed Railways, caused chiefly by the hope of a cessation of traffic for famine relief, is £462,800, but this may, I am sanguine enough to think, be partially met by the growth of the traffic in wheat for export; especially if our rates of freight can be kept at a minimum, so as to allow of this staple firmly establishing itself in European estimation. The increase under other heads is £41,360. This increase occurs as follows :—

	£	£
Increase in Telegraph charge		3,700
„ in State Railways Ordinary		197,460
„ in provision for surplus profits to be paid to shareholders of certain Guaranteed Railways ...		93,000
		294,160
Less decreases under the following heads :—		
Public Works Ordinary	62,850	
State outlay on Guaranteed Railways ...	13,250	
Public Works Extraordinary	172,100	
Madras Irrigation and Canal Company ...	4,600	
		252,800
		41,360

	£	£
Excluding Madras, Bombay, Rajputana and Burmah, and deducting the construction outlay on Irrigation works not yet brought into operation, the total Capital expenditure to end of 1876-77 for works from which revenue is expected to be realized in 1877-78 is		10,719,537
The gross direct receipts from these works in 1877-78 is expected to be	518,730	
And the working expenses are estimated at ...	333,863	
Leaving the net revenue at	184,867	
The share of land revenue ascribed to these works is ...	203,634	
So that the *net* total revenue is		388,501

and the net return expected to be derived is 3·7 per cent. of the construction cost.

It is desirable to further analyse these figures so as to bring out clearly the sources of the revenue according to the character of the works. Thus there are the two great canals constructed entirely by the British Government, the Ganges Canal and the Baree Doab. Singling out these two as having been in operation for a considerable time, and therefore such as may reasonably be expected to give a fair return, the results are as follows :—

	Ganges Canal.	Baree Doab Canal.	Total.
	£	£	£
Probable Capital outlay to end of 1876-77 ..	2,921,381	1,545,221	4,466,602
Net direct and indirect return expected in 1877-78	186,252	49,817	236,069
Percentage of latter on former ...	6·4	3·2	5·2

Thus these two permanent canals are calculated to return over 5 per cent. on their construction cost.

The next group of canals, consisting of Orissa Project, Midnapoor Canal, Tidal Canal, Soane Canal, Agra Canal, cannot, according to the experience derived from other canals, be reasonably expected to pay their working expenses in consequence of their having been less than 10 years in operation. The construction outlay on these canals to end of 1876-77 will be £ 5,139,912, and the loss in their working during 1877-78 is anticipated to amount to £20,653, or about ·40 per cent.

The third group of canals consists of the Eastern and Western Jumna Canals, the construction outlay on which as recorded in the accounts includes only that portion spent by the British Government, and shows that with a total outlay of £746,129 to end of 1876-77, and an anticipated revenue in 1877-78 of £150,774, the Eastern Jumna Canal will pay 26·3 per cent. and the Western Jumna Canal 20·2. The results for these canals are expected to be as follows :—

	Eastern Jumna.	Western Jumna.	Total.
	£.	£.	£.
Expected construction outlay by British Government to end of 1876-77	242,433	503,696	746,129
Expected net direct and indirect revenue in 1877-78 ...	63,822	86,952	150,774
Percentage of net revenue on Capital outlay ...	26·3	17·3	20·2

Next come the inundation canals in the Punjab the construction outlay on which to end of 1876-77 is expected to be £124,208, and the net returns in 1877-78, direct and indirect, will probably amount to £12,961 or 10·4 per cent.

Finally, there are the minor works of Irrigation constructed entirely by the British Government, such as the Dun and Rohilkhund Canals, the Bijnour Canals, the Bundlekhund Irrigation Works, the Delhi and Goorgaon Irrigation Works, and the Shahpoor and Shahival Canals. The net return from these works is balanced at £9,350 against a Capital outlay of £242,686, so that the works pay about 3·8 per cent.

Thus the Ganges and Baree Doab Canals are expected to pay 5·2 per cent., the Eastern and Western Jumna Canals 20·2 per cent., the Inundation Canals 10·4 per cent., and certain minor Irrigation Works 3·8 per cent. On the other hand the Orissa, Midnapore and Tidal Canals, the Soane Canal and the Agra Canal having been less than 10 years in operation are to be worked at a loss of ·40 per cent. on construction outlay.

The estimate of the Madras Irrigation and Canal Company provides for a net receipt of £700 in 1877-78. The provision for State outlay on Establishment and land for these works is £1,050, and the charge for interest on guaranteed Capital close upon £50,000, so that the operations of the Company are expected to involve a charge on the State in 1877-78 of £50,350. The conditions under which the Government bore the deficit in the working expenses of these canals have now ceased, the Secretary of State having decided that the Government is not to advance funds for such expenses.

The construction outlay, actual and approximate, Ordinary and Extraordinary, on State Railways to end of 1876-77 is £14,895,668, of which

sum £440,380 will have been expended on lines not in operation during the year 1877-78. The construction cost of the lines, the whole or part of which will earn revenue in 1877-78, is thus £14,455,288.

The net receipts from such Railways during the year 1877-78 are expected to be £191,790 and form 1·3 per cent. of the construction outlay of £14,455,288, which includes £1,703,995 of stores, &c., in suspense.

I have thus given a general sketch of our operations, adhering, for the purpose rather of easier comparison than because the form has anything special to recommend it, to the shape the review of these details took last year. I will now allude to our present and proposed expenditure on Military Works, for which in 1877-78 a grant of £1,231,985 is assigned, that for last year being £1,228,400.

Of this grant, 38 per cent. must be spent on repairs, maintenance of buildings, barracks and furniture, and the very heavy proportion of 22 per cent. on Establishment, a proportion apparently inseparable from all Public Works in India, and which is surprising to those acquainted with the subject at Home. It is quite true this supervision is costly, due to some extent to the employment of a highly paid European staff, but still more due to the fact that the practice in India is to charge salaries and wages of overseers, gangers, and leading men—in fact all who are on permanent employment, or paid by the month—to Establishment, whilst in England and the Colonies this would be charged to the work. I believe our practice in India is better, and really exercises a beneficial influence, and tends to keep down unnecessary establishment: but as it is not understood at Home, our supervision has been often commented on as extravagant.

Since 1873-74 there has been a steady increase for Repairs, due for the most part to existing buildings not having been kept in proper repair during several years prior to 1872-73. Repairs were deferred because the efforts of the Department were mainly directed to pushing on new buildings for the additional European force thrown into the country immediately after the mutiny. There is no point on which the Inspector General is now so particular as that of keeping existing buildings in a sound condition, and we have not withheld the necessary funds for this purpose, even though the result has been to decrease the provision for expenditure on new works.

I have in the last two years practically not permitted any new Barracks, with one exception in Madras, to be commenced, but have concentrated the efforts of the officers to complete those that have been already begun; and when I use the word new works, it only applies to works the construction of which had been approved, or the buildings had really been begun, before 1875.

So that, of the provision for works in progress, it is expected that works, the estimates for which aggregate £467,500 will be completed during the year, the grant being £165,868.

The remaining works in progress, the completion of which in 1877-78 is not anticipated, are estimated to cost £245,000, of which £77,500 will have been expended to end of 1876-77, leaving £165,000 to complete. The grant allowed for next year is £62,180, so that these works may reasonably be expected to be finished off in three years.

Of the provision for new works, £19,789 have been allotted for completion by the close of 1877-78. The remaining new works are 27 in number, estimated to cost £167,500 and the grant allowed is £69,630.

Thus, on the whole, works estimated to cost £930,000 will be in hand during the year, the probable expenditure to end of 1876-77 being £405,000. The grant allowed for the coming year is £347,467, so that a further sum of £175,000 will remain to be provided for their completion. These figures exclude the sum of £45,700 allowed for works the probable cost of which is not known as yet.

The grant for Original Works, Military, may be thus further analysed—

	£
Buildings for accommodation of troops ...	215,082
Drainage works	5,575
Protective „	6,000
Water-supply	74,540
Fortifications	12,850
Works for Ordnance Department	38,400
„ for Commissariat Department ...	11,590
„ for Dock-yards	11,200
Military lines of communication	24,400
Miscellaneous works	6,120
Minor Works	94,793
	500,550

The amount allowed for buildings has been applied to some extent to the scheme for completing barrack accommodation on a permanent scale. It cannot be told exactly what that scheme will cost, as the wants of the army vary from time to time. But we have considered every means for reducing the cost, and in this view, amongst other measures, the principle of remodelling old buildings and adapting them to the requirements of the present day has been followed in some cases with much financial advantage. The buildings so remodelled have been found to answer the purpose.

Under the Government of Madras the chief work, for which provision has been made, is for a new set of buildings for European troops at Poonamalee, estimated to cost £37,037, of which it is computed that £4,001 will have been spent by end of 1876-77, the grant allowed for the work is £10,000. The scheme provides for double-storeyed barracks for 200 men to cost £16,807, barracks for 30 families to cost £8,015, and a double-storeyed hospital for 90 patients to cost £10,200.

Another work for which a provision of £5,000 has been made, and to which it is necessary to draw attention, is the scheme for constructing an entire set of new lines for a Regiment of Native Infantry at Pudupetta near Madras. Rendered necessary in consequence of the existing lines occupied by the Regiment having been condemned by several high authorities as inconvenient and unhealthy, the demand has been considered to be an urgent want which should be met as soon as possible and is an excess. The provision made is for purchase of land for the lines. The probable cost of the scheme is not known as yet.

Of the grant allowed for Bombay, £16,000 is for the project for providing additional barrack accommodation at Ghoreporee, estimated to cost £60,680, of which £2,600 will have been spent by end of 1876-77. The scheme provides for 12 single-storeyed barracks and one block of quarters for married men.

For troops of the Native Army under the Government of Bombay provision of funds has also been made. Thus a sum of £3,000 has been allowed for improvements to lines of the troops at Boree Bunder. The scheme provides for 2 new rows and for re-erecting 25 rows of sheds, and for providing drainage, the latter to cost £2,943, the total scheme involving an expense of £6,141, of which £3,146 has already been spent.

At Poona two new buildings for a Regiment of Native Infantry are about to be provided at a cost of £6,635, the grant for the year being £ 2,600. The buildings consist of a hospital to cost £3,937, a quarter-guard to cost £766, a school-room costing £873, and sundry small buildings including an Armourer's shop to cost £458.

For the troops of the Native force located at Jacobabad £ 2,100 have been given for improving and providing new hospital accommodation.

Under the orders of Government the troops of the Punjab Frontier Force are provided with quarters at the expense of the State, and a grant of £7,570 has been provided for the purpose for 1877-78. Among the works to be executed are the re-construction of Native Infantry lines at Kohat to cost £5,300, the grant for 1877-78 being £2,500. A hospital for the Right Native Infantry lines at Dera Ismael Khan is also to be provided at a cost of £1,360. In the Fort at Dhalipghur the quarters for Native Officers are to be re-constructed at a cost of £970.

At Kamptee, in the Central Provinces, the principle of remodelling existing buildings to suit them to present requirements has been carried out with great success. Following out this principle £7,030 has been provided for remodelling three barracks of European Infantry and one of Artillery. For 24 families of European Infantry at Kamptee accommodation is to be provided at an expense of £6,800, the grant for 1877-78 being £4,000. And at Jubbulpore £3,000 has been allotted for re-roofing three of the barracks of European Infantry.

At Rangoon the scheme of providing new buildings for European Infantry is being gradually carried out. By the end of 1877-78 the first and third sections of the scheme, providing accommodation for 3 Companies and the Band, will have been carried out at a cost of £25,865, the grant for the year being £7,850. The single-storeyed barracks for 80 men and 4 Sergeants in the redoubt at Thayetmyo will also have been finished at a cost of £6,855, the grant for 1877-78 being £2,500.

In Central India the only Military Works of importance are at Neemuch and Mhow both occupied by troops of the Bombay Army. At Mhow a provision of £7,000 has been made for commencing the long desired scheme for providing new accommodation for the Artillery. The estimate of the cost of so doing has still to be prepared. At Neemuch auxiliary buildings are still required to complete the new sets of buildings already constructed for the Artillery, and a provision of £ 8,000 has been made for the purpose.

At Hyderabad, Deccan, the great project for providing an entire set of new buildings for a Regiment of European Cavalry at Trimulgherry is approaching completion. The proved unhealthiness of the buildings occupied by that Regiment at Secunderabad rendered it necessary to remove their location to the adjoining Station of Trimulgherry. The scheme is expected to cost £232,500 of which £165,000 will have been spent by end of 1876-77, leaving £67,500 to complete, the grant for 1877-78 being £20,730. The project provides for the accommodation, in four double-storeyed barracks, of all the

single men of a full Regiment of Cavalry and of 50 married men in four block of single-storeyed buildings. A hospital for male patients, to cost £ 8,500 is also provided. Quarters for Officers have also been constructed, the accommodation being given in single-storeyed buildings constructed on the unit system. The usual auxiliary and subsidiary buildings have also been provided.

Turning to the works in charge of the Inspector General of Military Works, the grant allowed for buildings for accommodation for troops for the force located in Bengal, North Western Provinces and the Punjab is only £ 59,250. Of this grant, £24,750 has been allowed for buildings in the hills, and £34,500 for buildings in the plains.

For buildings in the hills £1,400 has been allowed for the completion of quarters for families at Jullapahar, estimated to cost £2,699 and of which £1,259 have already been spent. For providing verandahs to the barracks for single and married men at Cliffden, Murree, £2,000 has been given, £1,000 having been already spent. For the buildings at Ranikhet £3,450 have been allotted. Of this sum, £3,100 has been devoted to a Regimental Hospital which is estimated to cost £ 10,789 and of which £7,689 will have been spent by end of 1876-77. For the buildings at Chukrata £10,500 has been assigned. Of this sum, £3,000 is for barracks for single men, estimated to cost £5,802 and £300 for barracks for married men to cost £2,949. Of this, £2,649 has already been spent. For quarters for Staff Sergeants £ 2,200 has been given.

Of the grant of £34,500 for buildings in the plains, a sum of £10,000 has been devoted to the re-construction of barracks and out-offices at Lucknow, and £10,000 for a similar purpose at Fyzabad. The schemes are estimated to cost, the former £65,760 and the latter £27,692 and provide for the renewal of the old barracks constructed immediately after the mutiny. By this means the expense of constructing new barracks is avoided.

At Nowgong a barrack for the Royal Artillery will be completed at a cost of £5,378 the sum allotted for the purpose for next year being £4,700. Family barracks for Infantry will also be completed for £7,000 at Agra, the grant allowed being £1,500 and the hospital for the left Native Infantry at the same place will be finished at a total cost of £3,838.

The out-offices for barracks for single men of Infantry at Mooltan will be completed next year with a grant of £2,000, £4,000 having already been spent.

For drainage works only £5,575 I am sorry to say, has been assigned, for it is a service in which I wish I could spend more, as I firmly believe that good drainage and well selected sites, with good drinking water, will ever ensure the health of troops. Of this sum, £1,000 has been allotted for the drainage of the Fort at Govindghur, and £1,000 for the drainage of the Cantonment at Lucknow, both being very urgent sanitary works. For the drainage of swamps lying to windward of European Infantry Barracks at Kamptee £1,000 has been allotted, the expenditure incurred to end of 1876-77 having been £504. For the drainage of the lines of the European troops at Meean Meer £300 has been given.

The encroachments of the Indus at Dera Ishmail Khan were so serious that it was necessary to consider whether the Cantonment should not be removed. But by the skill of the Engineers concerned protective works have been constructed during the past and present year.

The serious overflow of the Kanhan River at Kamptee last rains which led to much property, both public and private, being placed in imminent risk of destruction, has forced us to consider what works should be devised for protection from an inundation which may occur at any time. The result has been a scheme estimated to cost about £6,000, and for which the necessary funds have been allowed. It is expected that the work will be done before the next rains.

I cannot over-estimate the importance to the health of the troops of providing a pure system of supply of water, and it has led me to increase the grant for the purpose from £45,900 in 1876-77 to £74,540 in 1877-78. The works provided for are as follows :—

The Ulsoor Water-supply project at Bangalore will be completed by the end of 1877-78 at a cost of £14,162, the grant for 1877-78 being £500, in addition to £1,250 for providing a new filter, and making certain alterations to the work. The project is in addition to the scheme for supplying Bangalore with water, which is being carried out at an expense of £55,000 from Mysore funds.

A small sum of £1,000 has been provided for settling tanks in connection with the water-supply at Poona.

In the Punjab £1,410 have been given for Artesian borings and wells at two of the frontier out-posts.

A sum of £770 has been allotted for sinking wells at Asirgarh.

For water-supply at Trimulgherry and Secunderabad a provision of £4,610 has been made. Of this sum, £4,000 has been reserved for pipes from England for the project for the North water-supply scheme at Trimulgherry, estimated to cost £ 25,000 The balance of the grant for 1877-78 has been devoted to an engine and pump for water-supply to the 2nd European Infantry Regiment.

At Nusseerabad in Rajpootana it is hoped that the scheme for supplying the station with water at a cost of £25,874 will have been completed by end of 1877-78. The expenditure on the work to end of 1876-77 has been £13,807, the grant for next year being £10,900.

The scheme for water-supply at Mhow, for which a grant of £3,000 has been given, has still to be matured. This is now being done.

For the scheme of the water-supply at Umballa £10,000 has been given. The complete project has yet to be matured. Meanwhile a project for a temporary supply of water is under execution at a cost of £6,800, of which £5,000 will be made use of in the permanent project.

Small sums of £500 and £900 respectively have been allotted for water-supply tanks at Darjeeling, and for a filter and storage reservoir at Chukrata.

For water-supply at Meean Meer £13,700 has been allotted. It is expected to cost £16,000, of which £2,100 has already been spent. The scheme provides for a supply of 6 gallons per head per diem to British Troops.

The grant allowed for the water-supply at Peshawar is £25,000. A sum of £25,400 will have been spent by end of 1876-77 on an estimate of £28,752. But the complete project for the work has still to be prepared.

For clearing and repairing the tank at Fort Kangra, £1,000 has been given.

The limited amount of the Public Works grant prevents much being done under the head of Fortification. A provision of £6,000 has been made for improving the defences at Aden, and of £2,000 for keeping in repair the large stock of plant collected for the harbour defences at Bombay. For the inner. line of defences at Ferozepoor £2,000 has been given. The estimated cost of this work is £4,250, of which £2,220 will have been spent by end of 1876-77, so that the work will be completed next year. The bomb-proof magazine in the redoubt at Thayetmyo will be finished for £2,762, the grant being £1,650. And sufficient funds have been provided for keeping the existing forts in an efficient state of repair.

The additional buildings for the small-arms factory at Kirkee will be completed by the end of 1877-78, the grant for that year being £4,000, and the computed outlay to end of 1876-77 £10,000. For buildings for 6 incorporating mills in the Gun Powder Factory at Kirkee a provision of £5,000 has been made, the estimated cost being £15,190.

Amongst the measures contemplated for a fortified post and place of refuge at Rawul Pindee the provision of buildings for Magazines and other works of the Ordnance Department found a place. The sum it is expected to spend on the purpose is £83,750 and in furtherance of the scheme a provision of £19,900 has been made in the Budget next year for Store-room, Workshops, Armoury, Offices, Laboratory and Small-arms ammunition magazine. These works are expected to cost £38,041, of which it is expected that £15,800 will have been spent by end of 1876-77.

The alteration to the Gun Carriage Factory at Fatehgurh the construction of the Powder Magazine in the Fort at Allahabad, and the provision of Workshops in the Arsenal at Ferozepoor are all expected to be finished during the coming year, at a cost of £4,488, £9,183 and £7,464, respectively, the grant allowed for next year being £1,900, £1,000 and £1,200. A grant of £2,200 has also been allowed for the Pebble Powder House at Ishapore.

Some small works for the Commissariat Department will be completed this year at Allahabad.

A small amount has been reserved for urgent works in hand at the Dockyards, but for Bombay, in view of future contingencies, I wish I could say the sum was larger.

For Military roads the grant to Chukrata is £19,900. Of this sum £10,000 is to be devoted to the completion of the bridge over the River Jumna, which is expected to cost £30,545, and of which £20,500 will have been spent by end of 1876-77. The balance of the grant has been devoted to completing the earthwork and formation of the road.

The road to Dalhousie will also, it is hoped, be finished during the year at a cost of £68,000, the grant for the purpose for next year being £4,500, the outlay to end of 1876-77 being expected to be £63,500.

A provision of £ 19,500 has been made for improving the roof and making sundry additions to the Lawrence Asylum buildings at Mount Aboo.

Next to nothing has been appropriated for the defences of our ports or arsenals, and literally nothing for strong places; if no change in our policy is made, there is no prospect of anything material being done to remedy these wants which, to repeat former warnings, are becoming more imperative and more essential the more you raise and develope the material wealth and value of this country.

Let me not here be understood to advocate the costly and ponderous defences which it has been the fashion of recent years to elaborate under the idea of converting defences into success over attack, but rather more simple measures which may protect us from insult on the sea-board, and be sufficient to leave in the interior the sick and the helpless in comparative safety. But I regard this subject as one of much more serious importance than is practically recognised by the part assigned to it in the distribution of the resources of the State.

The bulk of the outlay on Civil Buildings and Roads is now drawn from grants made over to Provincial Services. The direct expenditure from Imperial Funds is for Departmental and Government buildings, church, burial grounds, harbour works, civil works, roads, as well as for the Establishments at Cooper's Hill and Roorkee, the colliery charges at Warora, and the furlough allowances in England.

The grant for 1877-78 is taken at £ 431,365, or £ 67,500 in excess of that for the previous year, owing to the provision required for the works at Simla.

This sum does not fully represent our wants, and I regret there is but little hope of any great or sensible increase to the sum now set apart.

Under Civil Buildings the grant amounts to £ 139,069, of which one-third is for Repairs. The balance is allowed for Original Works, and distributed among the different departments in the following manner :—

For the Salt works, the sum allotted (£ 5,494) has been fairly divided between Madras and Bombay.

On Opium, the whole grant (£ 14,752), with the exception of a small sum reserved for Oudh, has been fairly apportioned between Bengal and the North Western Provinces.

The greater part of the sum, £ 2,700, allowed for the Mints is needed at Calcutta, and it is most probable that the grant under this head will have to be largely increased for next year.

Of the sum set aside for Postal (£ 13,099), one-half nearly is for the introduction of several small post offices, and the remainder for additions to existing offices throughout India.

Under Telegraph (£ 12,531) allotments have been made for new offices, &c., at Ootacamand, Alipore, Umballa, Gadac, Rajanpur, and Gowhattee, and the amount given to Bombay completes the instalments required for the signallers' quarters. Suitable telegraph and post office accommodation has still to be provided for the Presidency Town of Madras.

The largest sum, £ 21,390, is required for the Government of India Buildings, and includes the cost of additions to the Peterhoff estate, the purchase of houses at Simla, and improvements to the Viceregal buildings generally.

The designs for the Mayo College Buildings at Ajmere by Major Mant, R. E., have been approved, and the grant (£ 6,560) is provided for

the collection of necessary material. The funds (£ 4,194) required for the boarding houses in connection with this College are being found by Native States.

Out of a total of £6,784, sums have been reserved for the completion of the Thuggee Jail at Indore, and for the commencement of a new Jail at Mercara. The Civil Jail at Rewah will probably be constructed from funds supplied by the State of Rewah.

From the amount £4,066 under Churches, &c., the completions of the Bolarum Church and the commencement of a Roman Catholic Chapel at Rawul Pindee have been provided for.

The restoration of the beautiful temple at Ajmere, referred to in the review of 1876-77, has to be continued at an excess on the original estimate, the peculiar nature of the work and the necessity for its extension during the course of reconstruction having led to this result.

The great scheme of restoration and preservation of antiquities in the North Western Provinces is undertaken from Provincial Funds, aided by a grant from Imperial Revenues.

Under Communications the grants allowed are for Provinces to which the Provincial Service arrangements do not apply, *viz.*, Rajpootana, Central India and Coorg. The total £ 64,035 as against £ 69,270 for last year is divided into £ 20,934 for Original Works, and £ 43,102 for Repairs.

The outlay from Imperial funds in the construction of new roads in Rajpootana has practically ceased.

The conditions under which these roads were commenced, *viz.*, that $\frac{1}{3}$ths of the outlay on the portions passing through foreign territory would be provided for by Native States, have in some cases been fulfilled, while in others the roads have been made over to the States concerned to complete. The provision £ 10,553 is for the repair of the roads so constructed, and of this sum nearly $\frac{1}{4}$th is for the portion lying in Foreign Territory.

In Central India also a portion of the outlay on roads has been and is still being met partly from funds supplied by Native States; for in addition to the expenditure (£ 14,050) on the roads from Mhow to Neemuch, Nowgong to Sutna and Dewas to Ashta, the road from Gwalior to Chumbal River receives an allotment of £ 4,800 from a contribution by His Highness the Maharaja Scindiah. Of the total for repairs £ 29,000, more than half is for the Agra and Bombay Road, one-fifth is absorbed between Neemuch and Khandwa, and the balance is distributed over the Gwalior and Jhansee Roads.

The comparatively large grant £ 5,614 to Coorg is to facilitate trade and encourage the export of coffee by opening out new communications ; the maintenance of existing roads also is contemplated to an extent of £3,300 from Imperial funds.

Under Miscellaneous Public Improvements £ 35,320 have been set aside, in which £ 5,935 are included for repairs. Three-fourths of the grant is absorbed by the Simla Water-supply Project, for which, exclusive of Establishment, £27,435 has been provided until the arrangements with the Municipality for the provision of funds have been settled.

Under Lighthouses, £ 1,500 have been assigned to Kurrachee for a new Lighthouse with its revolving light.

For the Harbour Works at Kurrachee, the sum appropriated for Maintenance, Conservancy, Dredging, &c., exclusive of Establishment, is but £ 5,000.

The growing importance of this harbour, with the early completion of the Indus Valley Line, make it desirable to leave as little as possible undone which may facilitate and increase the rapidity of our communications between the Punjab and the Sea. The construction of jetties has also to be considered with the necessary sheds for the accommodation of trade. These works should receive early consideration, and the grant now fixed at £5,000 will probably have to be doubled before the close of the year.

The importance of the Warora Colliery Works to the coal industry of India, and their effect on the reduction of Railway working expenses is obvious. The pits are now in working order, and it is expected during the year 36,000 tons of coal will be raised, and be sold for a sum closely approaching the expenses of production.

The exploration for coal in the Central Provinces continues, and the necessary grants have been assigned for the Satpura and Warora Districts.

The Budget-Estimate of the Telegraph Department for 1877-78 as contrasted with the Regular Estimate for 1876-77, and the actual average receipts of the three previous years shows that—

	£
The RECEIPTS were in 1876-77	332,100
The Budget-Estimate of 1877-78 is taken at	315,500
The average of actuals for the last three years being ...	281,200
The CHARGES were in 1876-77	491,800
The total net charge thus being	159,700
The Budget-Estimate for 1877-78 is taken at	495,500
Making a total net charge of	180,000
The average of actuals for the last three years being ...	444,800
Making a total net charge of	163,600
Thus, on the whole, the expected net charge in 1877-78 as compared with the Regular Estimate for 1876-77 shows a net increase of	20,300
Of this net increase the amount due to an anticipated falling off in the revenue of the Indo-European Telegraph Department caused by the construction of a second line of cable from Bombay to Suez is	13,900
While the payment to the Indo-European Company in England in excess of receipts due to its being anticipated that the messages despatched from Home *viâ* Russia will be more than those despatched from India by the same route, is ...	14,215
so that in these two items alone there is a net increase of ...	28,115

Under Receipts the figures for the Budget and Regular Estimate for the Indian and Indo-European Telegraph Departments, as compared with the Budget-Estimate of the current year and the average actuals of the three previous years, are as follows :—

The Estimate of 1876-77 is—

Indian Telegraph—	£
Indian Telegraph	206,700
Ceylon „	8,500
Total ...	215,200
Whilst the Indo-European Telegraph has a total of	74,800
making a Grand Total ...	290,000

The Regular Estimate for 1876-77 is—

Indian Telegraph—	£
Indian Telegraph	225,700
Ceylon „	10,300
Total ...	236,000
The Indo-European Telegraph has a total of	96,100
making a Grand Total ...	332,100

In the Budget-Estimate of 1877-78, the—

Indian Telegraph—	£
Indian Telegraph	232,000
Ceylon „	9,000
Total ...	241,000
The Indo-European Telegraph has a Total of ...	74,500
making a Grand Total . .	315,500

The average of actuals for the last three years being—

Indian Telegraph—	£
Indian Telegraph	196,100
Ceylon „	8,400
Total .	204,500
Indo-European Telegraph .	76,700
Grand Total .	281,200

Compared with the Budget-Estimate of the current year, the Regular Estimate for the Indian Telegraph Department shows a gratifying increase of £20,800.

The steady increase in the receipts of the Telegraph Department as shown by the preceding figures justifies the expectation that the receipts for next year may be set down somewhat in excess of those for the current year, and the estimate for 1877-78 has therefore been accepted at £241,000, being £5,000 only more than the Regular Estimate for 1876-77.

In the case of the Indo-European Telegraph Department, the Regular Estimate amounts to £21,300 in excess of the Budget-Estimate for 1876-77, of which £6,100 occurs in England, and the balance in India. The increase in England is ascribed to be due to recoveries of revenue earned in the previous year arising from the interruption of the Red Sea route from 15th November 1875 to 3rd February 1876, and to the receipt of £1,986 being an additional instalment of the Persian debt. The increase in India is due to a general increase of receipts on the Government lines due partly to general causes, and partly to the late interruption of the Madras-Penang cable.

For 1877-78 the Budget-Estimate of receipts in India of the Indo-European Telegraph Department amounts to only ..	£ 68,[illegible]
The probable receipts of 1876-77 being	81,200
And the actual receipts of 1875-76	76,165

The opening of the duplicate cable now being laid between Suez and Bombay is [illegible]

Department to the extent of £ 13,900, and the estimate for next year has therefore had to be reduced accordingly—

	£
In England the expected receipts of 1877-78 are set down at	6,100
But in the Budget-Estimate of expenditure a sum of ... is included for amount due to the Indo-European Telegraph Company for earnings collected in India on messages home being expected to exceed the sum due by the Company for earnings collected in England on messages out, so that really the estimate of revenue is for a net charge of	14,215 / 8,115
The expected receipts of 1876-77 being	14,900
And the actual receipts of 1875-76	17,122

The Budget charges have been accepted for a sum of £ 411,900 (including £ 13,050 for Ceylon). Of this amount £ 123,900 are for capital outlay, £ 17,350 being for establishment and other charges, £ 21,560 for additional stores, and £ 84,990 for actual construction operations on the following lines of telegraph :—

State Railway Lines.

	£.
Agra to Gwalior	5,440
Reconstruction, Lahore to Jhelum	1,375
Reconstruction and adding wire, Jhelum to Rawul Pindee	2,870
Rutlam to Neemuch	4,680
Works in progress, *viz.*, Northern Bengal State Railway	9,200
Rangoon to Prome	300
Indus Valley	500
	24,365

Guaranteed Railway Lines.

	£.
Due for Stores and Carriage for South Indian Railway—	
Madras to Tanjore	3,700
Trichinopoly to Tuticorin	3,500
	7,200

Departmental Lines.

	£
Madura to Ramnad	5,290
Extra wire, Madras to Trichinopoly	4,250
Nynee Tal to Ranee khet	875
Extra wire, Chittagong to Elephant Point, Rangoon	25,710
Works in progress—	
Trichinopoly to Tuticorin	300
Calcutta to Chittagong	500
Gowhatti to Debrugurh	1,000
Lahore to Kotree	1,000
Miscellaneous	620
Special—	
Jacobabad to Quetta and Khelat	9,480
	49,025
Minor Works	5,400
Abstract—	
State Railway Lines	24,365
Guaranteed ditto	7,200
Departmental	49,025
Minor Works	5,400
	85,990
Less recoveries	1,000
	84,990

Excluding the sum provided for the completion of the special line to Quetta and Khelat, the whole of the provision made for departmental lines will practically be absorbed by the cost of an additional wire between Chittagong and Elephant Point, and the line Madura to Ramnad with an extra wire from Madura to Trichinopoly. The former will materially improve communication with Burmah, and is rendered necessary by the increased importance of this route in connection with the cable shortly to be laid between Rangoon and Penang, so that it will be necessary to make the line from Calcutta to Rangoon fit for international traffic. On this point the following extract from a letter No. 58, dated 8th June 1876, will show the necessity for the work, the estimate for which has been sanctioned by the Government of India :—

The existing line between Calcutta and Rangoon, although gradually improving with every season's work, is still utterly unfit for international traffic, and incomparably inferior to the line across the Dhunds between Deesa and Hyderabad, respecting which the Indo-European Company have made so many complaints. It consists, moreover, of one wire unequal to the existing traffic, and although a second wire has been sanctioned and is in course of erection, as far as Chittagong, it will be fully taken up by its own local traffic. It will therefore be necessary to add an extra wire throughout, for although we may expect no cable messages so long as the Madras-Penang line is in order, when an accident does occur, and they are diverted *vid* Rangoon, no delays would be tolerated by the Company or by the public.

It may be added that this expenditure has been made the basis of a demand for an increase in the Indian Tariff for all Foreign messages, an increase which cannot be refused and which will add more than £10,000 to the annual revenue of the Telegraph Department.

The latter, that is the line from Madura to Trichinopoly, is needed to strengthen communication between Madras and Ceylon and the south-west coast, by the substitution of an inland line, mainly on a Railway, for the existing precarious sea-coast line between Negapatam and Tuticorin.

The Budget-Estimate for 1876-77 was passed for—

	£
Expenditure	383,000
Receipts	215,200
Net charge	167,800

For 1877-78 the figures are—

	£
Expenditure	411,900
Receipts	241,000
Net charge	170,900

an increased charge, therefore, of £2,100 as compared with the Budget for 1876-77. This increase is entirely due to increased capital outlay, and, excluding capital outlay from the figures for both years, 1877-78 shows an improvement of £19,749 over 1876-77.

There has been for several years a progressive reduction in the difference between earnings and revenue charges. This reduction is very marked during 1876-77, and justifies the expectation that but a very short time is needed for the Department to pay not only its working expenses, but also a small dividend on the capital expended.

Net annual loss on revenue account, *i.e.*, the difference between expenditure, excluding capital outlay and receipts, including *pro formâ* charges :—

		£	
1872-73	... ...	73,211	
1873-74	... ...	56,166	
1874-75	... ...	44,837	
1875-76	... ...	42,367	
1876-77	... ... *Under*	10,000	(*partly estimated*).

The capital expended from the commencement is nominally somewhat over £3,000,000. I say nominally, because this amount includes the value of lines and offices abandoned or destroyed in past years.

In the earlier days of Indian telegraphy, lines were hastily constructed of perishable material, requiring frequent renewal, and were abandoned or replaced by others mainly on military and political considerations; but for the sums spent year by year the State received a full equivalent in the assistance, direct and indirect, which the Telegraph afforded in the administration of the country.

Again, contrary to the experience of Europe, in India the Telegraph preceded the Railway, and long before the Railway was more than an idea, the Telegraph had spread over many hundreds of miles. As the Railways extended, it became necessary to re-erect the Telegraph lines within the Railway fences, to secure the advantages of immunity from malicious interference, and the incomparably greater facilities for locomotion, and consequently for inspections and repairs.

In those earlier days professional knowledge was very imperfect, as indeed it was also in Europe, and many mistakes were made, costly it is true, but a cost absolutely inappreciable, when contrasted with the inestimable services rendered by the telegraph during the mutiny alone.

Increased knowledge obtained by experience of climatic difficulties in this country, and by watching the development of electrical discovery in other countries, has led to the adoption of material which, although in the first cost expensive, will last for many years to come with ordinary care and supervision.

Practically, then, it may be said that the lines, as they at present stand, have, with few exceptions, been created since 1866, and the amount expended upon them, and the speed and skill with which they have been constructed, compare very favorably, not only with the earlier efforts of the Department, but also with the results obtained in other more favored countries.

The vastly improved quality of the line material and apparatus, and the many improvements of late years introduced in the organization and technical management, have raised the character of the Indian Telegraph system to a deservedly high position. The speed and accuracy with which telegrams are transmitted from end to end of this vast continent appear almost marvellous, when contrasted with the state of things that existed not so very many years back, and these results have been obtained in face of considerable difficulties.

Besides the greater number of our station buildings and a valuable plant of stores and apparatus, we now possess 18,120 miles of lines and cables and 41,000 miles of wire. Of these, upwards of 8,000 miles were erected and are maintained by the Department for Guaranteed and State Railways. In addition, the Department maintains lines and wires, the property of Railway Companies aggregating 3,344 miles, which will, it is expected, be shortly more than trebled by the transfer to the Telegraph Department of the maintenance of all Railway telegraph lines in the country.

I look forward to the early accomplishment of this arrangement, as the result, judging from the experience already gained, cannot be other than satisfactory to us and to the Railway administrations.

The direct and indirect value of the telegraph to the administration of the country in the preservation of order and general development of its

resources is so considerable, and the operations of the Department are necessarily conducted in so great a measure with reference to Imperial requirements, that it would be obviously incorrect to judge of them by a purely commercial standard. The only lines that might be expected to pay commercially are those connecting the Presidency towns; and hampered, as the Department is, by the very great extent of its unproductive lines, and by the necessarily expensive construction of its lines generally, it is gratifying to find that the financial result, bad as it undoubtedly is, is not far worse.

While then it may be admitted that the requirements of the State in the matter of telegraphs are in India more onerous than in most European countries, the fact must not be ignored how very large a portion of the total outlay has been, and continues to be, incurred in the interests of the mercantile community. The costly improvements introduced in late years are, indeed, mainly the outcome of the growing demands of commerce, as what is called domestic traffic is here altogether unimportant.

It is true that the revenue of the Department is largely derived from mercantile telegrams, especially those exchanged between the great centres of commerce; but there can, I think, be no doubt that, considering the enormous distances over which these messages are transmitted, the rates are very inadequate and, considering the gain in time over the Post, proportionately much lower than obtain in any other country.

The average distance by alternative routes* from Calcutta to Bombay, Madras and Kurrachee is 1,875 miles. Extreme distances in India are far greater.

The average distance between the following places in Europe is under 1,800 miles, *viz.*:—

Madrid and St. Petersburg.
Paris and Constantinople.
Lisbon and Berlin.

The average cost of a message of 20 words, *including* address, between those places, is 11 francs = 9·68*s.*

The Indian charge is 2*s.* for 6 words, with a free address which may be taken at an average of 6 words.

We have, therefore, 12 words for 2*s.* in India as compared with 20 words for 9·68*s.* for lesser distances in Europe, or, to bring the comparison nearer,—

IN INDIA.

12 words + address averaging 6 = 18 words for 4*s.*

IN EUROPE.

20 words inclusive ... ... 9·68*s.*

For less extreme distances in Europe, *viz.*,—

Madrid to Vienna,
Vienna to St. Petersburg,
Paris to Constantinople,
Madrid to Berlin,

averaging about 1,400 miles, we find the charge to be 8·48*s.* for a 20-word message against the Indian charge of 4*s.* for a message of 12 words, with free address equal to 6 more, and of 2*s.* for a six word message with the same free address.

* By shortest routes the average is about 1,500 miles.

It is not uncommonly insisted that a reduction of tariff is the only *panacea* for a Telegraph deficit; but it is now, I believe, very generally admitted by all political economists who have given attention to the subject, that, under the most favorable conditions, a reduction of tariff results in a diminution of net proceeds. This has been the experience of many European administrations and also of Great Britain. It is a fallacy to imagine that the measures that have proved in Europe so successful in the case of the Post Office must be equally successful when applied to the Telegraph. Professor Jevons, F.R.S., writing on the subject of the British Postal Telegraphs, says with much force:

"There cannot be a greater contrast than between the rapid Progress of the Postal net revenue and the alarming decrease in the Telegraph net revenue. This comparison entirely bears out the statement of the Treasury Commissioners, that "the Telegraph Branch is not in the position of the Postal Department after the introduction of the penny postage. * * *

"The Post Office stands in an entirely unique position as regards the great increase in traffic, which can be carried on with a small increase of cost.

"A postman, to put the principle as briefly as possible, can carry a hundred letters as easily as one, and a ton of mail-bags can be transmitted by railway almost as easily as a single bag. But it is totally the reverse with the Telegraph, in which each message has to be individually received by a clerk, transmitted, re-transmitted, written out, and finally delivered by a special messenger. In this case every increase of traffic involves an increase of expense in nearly the same ratio as regards many items."

An eminent Belgian authority writing on the subject sums up as follows:—

"The effects of a reduction of tariff are under the most favourable conditions (in the interior of a country itself), the maintenance of the gross receipts by the stimulant of cheapness, and under ordinary conditions, the decrease of the gross receipts, the stimulant being insufficient to compensate for the reduction of the mean product per unit. In either one case or the other, without a single known exception, the net product is diminished."

All experience points to the fact that Telegraph traffic follows, more especially in its augmentation, the fluctuations of trade, and that it is influenced by the tariff only in a very secondary degree.

If these be sound conclusions for countries of limited extent, very populous and very rich, how much more strongly must they apply to a country like India, where the distances are so enormous and the average poverty of the people so conspicuous?

I trust that continued financial improvement in the working of the Telegraph Department may obviate the necessity for any revision of the tariff, but the foregoing observations indicate the direction which such revision must take should it become imperative.

The result of the changes introduced in the tariff for international messages by the Convention of St. Petersburg, has not, so far as the Indian Department is concerned, been altogether successful; for while the number of messages exchanged with foreign countries has materially increased, the increase in their value is only nominal, and there are not wanting indications of even a prospective decrease. To some extent this may be traced to the insufficiency of the Indian share of the total tariff, but it is questionable whether the reduction of the unit charge to one word can prove a financial success, unless the rate per word be proportionately very much higher than the [illegible] rates for the larger units.

There are two points of detail in connection with the rules for foreign messages which have given rise to complaints from the Chambers of Commerce in this country—one referring to gratuitous repetitions of messages which are supposed to have been incorrectly transmitted; the other to the charge made for figure cipher telegrams. Proposals have been made to other States, parties to the Convention, by this Government and by the Postal Telegraph Department of England to modify the rules on these points somewhat in accordance with the wishes of the mercantile community, but these proposals have been rejected, and the grounds of their non-acceptance cannot well be contested.

The real grievance of the Indian public lies in the circumstance that the rules are not strictly enforced in England; but it has been explained that the relaxations have there been carried out by private Telegraph Companies in a spirit of competition and with a view to attract customers (though possibly for the present at a loss to the shareholders); that such a proceeding is one which the manager of a private company dealing with private money subscribed for a special purpose may perhaps adopt with some sort of justification, though in defiance of rule, but that his example cannot be followed by a public agent dealing with public funds for the benefit of a class interest at a further sacrifice to the general community, who have already to bear the loss on an unremunerative undertaking. An opportunity will shortly be afforded of reconsidering the rules in concert with other Administrations, and I venture to hope that some means may be found of amending those which have given rise to so much discussion.

The fact not generally known that the telegraphs are worked at a loss in some of the principal countries in Europe, and an examination of the results obtained in Great Britain, enable some conception to be formed of the difficulties with which State, *i. e.*, cheap, telegraphy has to contend under the most favorable conditions; and it is a fair matter for congratulation that India with all her disadvantages possesses a highly efficient and extensive telegraph system which at no very distant date promises to be self-supporting.

I have dwelt at some length on this subject, for I have felt that it is due to the Chambers of Commerce of the three great centres of Indian trade, with whom we have been in communication, to offer to them here a fuller explanation of our motives and position than I could introduce into ordinary official or business correspondence.

I would add a few words of explanation on the Indo-European Telegraph Department which has charge of the Indian Government lines from Kurrachee to Fao and Teheran. The head-quarters of the Director-in-Chief are in London where there is an office of account adjustment with a small branch office at Constantinople.

The lines of the Department are in two sections: the Persian, which includes the lines in Persia, and the Persian Gulf section, which includes the cables connecting Kurrachee with Bushire and Fao and the land line along the coast of Beloochistan from Kurrachee to Jask.

The Gulf section has its head-quarters at Kurrachee where are the offices of the Deputy Director (who is in charge of the section), and of the traffic manager as well as workshops and a store depôt. A special steamer, the *Amberwitch*, is attached to the service of this section for the repair of cables and conveyance of establishment and stores.

The land line consists of 739 miles of line and 1,478 miles wire. It has, besides the usual maintenance establishments, the aid of a special Political Agency at Gwadur, half the cost of which is borne by the Telegraph Department. Subsidies to the extent of £ 3,128 a year are also paid to Chiefs in Beloochistan for protection of this line.

The cables of the Gulf section are 1,738 miles in length, of which 1,235 miles are of Gutta Percha, and 503 miles of India-rubber core.

The Persian section is under a Director whose head-quarters are at Teheran. This section contains 792 miles of line and 2,406 of wire. The lines of the Department do not extend beyond Teheran.

The total length of the lines of the Department is 2,754 miles, consisting of 3,884 miles of wire and 1,738 miles of cable.

	£
Excluding the provision for payment to foreign lines of traffic earnings realized in India, the Budget-Estimate for 1877-78 amounts to	95,985
The Regular Estimate of 1876-77 being	102,200
so that there is a decrease of	6,215

which is due to the work of erection of iron poles to replace existing wooden ones, and for which a provision of £ 3,980 was made in current year's Budget, not being required next year. There is also a decrease of £ 850 in the provision for Repairs.

The estimate has been framed for the authorized scale of expenditure for Establishment and Repairs, and there is nothing in it to call for comment, or which can be reduced.

EXTRAORDINARY IRRIGATION.

The total grant for the year 1877-78 from Extraordinary funds for Irrigation amounts to £ 900,000, distributed to the several Provinces as follows. This amount is exclusive of £ 107,500 to be spent from contribution of the Native States for the Sirhind Canal.

	£
Madras	50,000
Bombay	40,000
Bengal	275,000
North Western Provinces	260,000
Punjab	275,000

The works for which this sum is provided were all in progress during the current year (1876-77) in which the aggregate outlay under Extraordinary is expected to amount to £ 1,012,000.

In Madras the improvements to the Godavery and Kistna systems of canals are still the most important works in progress.

In the Godavery system several works for the improvement of irrigation and navigation in the Eastern and Western Deltas were carried out. The widening of the main canal in the Eastern Delta has been finished; the banks of the Coconada, Ingeram and Coringa main canals were raised and improved. The widening of the bank and Coringa Canals was carried on; nine miles of the former were opened out for navigation; one lock was built and four more were completed; and three weirs finished. Ten minor distributaries with an aggregate length of 25 miles were completed, and some improvements made to drainage cuts.

In the Western delta, widening and other improvements were carried on on nine canals; the widening of the main canal above water-line was completed, as also the widening and deepening of the Bank canal for 22½ miles and some masonry works built: on these works about £20,000 were spent during 1876-77. The sum allotted for the coming year is £ 28,561.

In the Kistna delta the works on Ryves's main canal were much retarded by continued outbreaks of cholera; but they will probably be completed early in the coming year. The new supply head, though incomplete, was opened for the admission of water, the volume supplied by the old heads being insufficient owing to the low state of the river caused by the excessive drought.

The alterations to these channels will probably be completed as relief works. The widening of the Masulipatam Canal will also be completed early next year. The grant for the coming year is £ 14,777.

The Streeviguntum Anicut Project, which will supply irrigation to a portion of the Tinnevelly District and water to the town of Tuticorin, was practically finished during the year; only a portion of the revetment of the Korsur Pallam Tank and the raising to full height of the Ooppar Oday dam being incomplete. The grant for the coming year is £ 3,477.

On the Pennair Delta some expenditure was incurred from the Ordinary grant. A sum of £ 3,183 is allotted from the Extraordinary grant for this work during the coming year.

The Sungum Project for the irrigation of the Northern Delta of the Pennair River from storage reservoirs in the river is still under consideration; no work is contemplated on it in the coming year.

The Perryaur Project referred to in last year's Resolution is still under consideration; the works which will consist of a tunnel through the Ghauts in the Madura District leading from a large storage reservoir are estimated to cost £ 602,762; there is no prospect of their being commenced this year.

In Bombay the only work of any magnitude in progress is the Moota Moola Project consisting of a dam across the River Moota 99 feet in height and 3,683 feet long, exclusive of the waste weir which is 1,453 feet long, with channels for the water-supply of Poona and Kirkee and for the irrigation of about 70,000 acres. The total expenditure to the end of the current year amounted to £ 423,372, a grant of £ 31,924 is proposed for the coming year, which will bring the works so far as sanctioned very near completion, the estimated cost of the works being £ 466,448. The right bank canal, which is capable of discharging 414 cubic feet per second, has been extended to a distance of 39 miles from the head out of a sanctioned length of 71 miles, and this portion is now being carried out as a famine relief work; the left bank canal, discharging 38 cubic feet per second, has been almost completed. A gross revenue of £ 7,385 is anticipated from these works during the coming year, and the working expenses are estimated at £ 4,063.

The remainder of the grant will be divided among five projects of less importance. £. 2,674 are set apart for the completion of the Ekruk Tank in Sholapur, at a total cost of £ 97,446; the water is retained in this reservoir by an earthen dam with a maximum height of 78 feet. £. 3,433 are allotted to a small canal called the Hathmatti in Ahmedabad; the work, which is approaching completion, is estimated to cost £ 38,470. £ 1,177 are allotted to the Lakh Canal in Ahmednagar, which is also very near completion, at an estimated cost of £ 25,954. £ 4,800 are allotted to the Mukti Reservoir, and £ 300 to the Palkhed Canal, both of which are nearly complete, at an estimated cost of £ 26,456 and £ 11,029, respectively.

In Bengal the grants for 1877-78 for the works in Orissa and Midnapoor are £ 63,425 and £ 20,503, respectively. These with the Tidal Canal in Hidgellee are separate sections of the Orissa scheme purchased

by Government from the East India Irrigation and Canal Company. They were originally intended to form portions of a connected system, but are now worked as separate projects. About £ 850,000 have been spent on the Tidal and Midnapoor Series of works out of an estimated total of £ 945,803; 248 miles of distributaries are completed and in operation out of a total projected of 320 miles; and during the past kharif season 32,160 acres were irrigated from them. The navigation works on the Midnapoor Series are not quite finished, but by the end of the current year the canal will be complete as a navigation line throughout, with the exception of 4 miles in the second range in which the locks are still under construction.

The Tidal Canal is in full operation.

The portion of the Orissa Section, to which it has been determined to limit expenditure for the present, consists only of the channels in progress and distributaries for the irrigation of 206,172 acres; the total estimated cost is £ 1,929,568, of which about £ 1,740,000 have been expended to the end of the current year (1876-77), the grant for next year being £ 63,425. The principal lines of canals are nearly finished; before the end of the coming year, with the exception of part of the Kendrapara extension, the whole of the navigable canals will be open for traffic throughout their length. Of the distributaries 501¼ miles are completed and in operation out of a total projected length of 547¼ miles.

For the Sone Project the grant for next year is £ 191,071. The cost of this scheme as now limited is estimated at £ 2,710,361, of which about £ 1,770,000 will have been spent up to the close of the current year (1876-77) by which time the Main Western Canal, the Behea and Doomraon Branch Canals and the Eastern Main Canal will, with their distributaries, be complete. The Arrah Branch, the Buxar Branch Canal, the Chowsa Branch Canal and the Patna Canal will, with their distributaries, be ready for irrigation, and with the exception of some locks and waste weir bridges will be complete throughout. The area irrigable from the completed portions by the end of the year was 443,000 acres. The Arrah Branch has for some months been navigable throughout with exception of the junction with the Ganges at the termination. A cadastral survey of the land commanded by these channels is under execution, and up to the end of the current year about 1,600 square miles out of a total of 2,900 square miles will have been surveyed.

In the North Western Provinces there are three series of works in execution from the Loan funds.

The rectification and completion of the Ganges Canal at an estimated cost of £ 858,843 is the first: up to the end of the current year about £ 387,400, exclusive of value of materials in hand, will have been expended. The grant for the coming year is £ 80,000. The works executed during the past year consisted mainly of protective works to the floorings of the falls in the main canal; the re-construction of two locks and the building of new locks and weirs near Jaoli regulator, Wallipura and Nanoon, with the view of reducing the slope of bed and consequent velocity of the water in the main canal. The completion of the upper portion of the Anoopshahr Branch with an escape into the Ganges, and the preparation of surveys and detailed plans and estimates for some of the new branches and some other minor works. The construction of the new branches will be undertaken shortly.

The Agra Canal is virtually complete, and has been already in operation for two years. The navigation arrangements are nearly complete throughout. A sum of £10,000 has been allotted for the current year for expenditure on drainage works and minor distributaries. The total estimated cost, exclusive of plantation, is £ 772,553, of which £ 40,000 are still unspent. The revenue from this canal has so far more than justified the expectations formed regarding it.

The Lower Ganges Canal is the most important work in progress in the North West Provinces. The supply is drawn from the River Ganges by a masonry weir, the closing of which was successfully accomplished during the past year. The grant for expenditure during the coming year is £ 170,000; revised estimates for this project have been submitted, and are now under the consideration of the Government of India, meantime permission has been accorded to proceed with the more urgent works: the first 40 miles of the main canal and the supply branch, 22 miles in length, will be finished by the close of next year. The remaining earth-work of the main canal, as far as its junction with the old Cawnpoor Branch, is also nearly complete. About £ 1,083,000 will have been spent on this canal to the end of 1876-77; the ultimate expenditure will probably considerably exceed £ 2,000,000.

The project for a canal from the River Betwa in Bundelkhund has proved to be too expensive to justify its execution from the Loan funds; further enquiries are being made with a view to substituting, if practicable, a cheaper and less elaborate scheme.

The execution of the project for the Eastern Ganges Canal to water a portion of Rohilkhund has been postponed indefinitely owing to doubts as to the volume of water available from the Ganges after providing for the Lower Ganges Canal.

In the Punjab there are four series of works in progress from Extraordinary funds; two, the Sirhind and Swat River Canal projects, are not yet brought into operation. Indeed the last has only been just begun, and though it gives fair prospect of paying interest on its outlay, it has been accepted rather on political than on material reasons. With this exception it is the only new Irrigation project which has been sanctioned within the last two years, for in my opinion it is desirable to complete those already commenced, and watch their prospects before we commit ourselves to any further great or doubtful operations; the other two consist of improvements and extensions of existing canals—the Bari Doab and the Western Jumna.

The Bari Doab Canal has been yielding revenue since 1860; the estimated cost of the improvements now in progress is £ 333,114, of which about £ 135,000 will have been spent to the end of 1876-77. The grant proposed for the coming year is £ 24,791. The two new branches have been completed, the grant now to be made will be utilised in constructing distributaries. Two new distributaries have been completed on the old portion of the canal. The escape sluices of the weir across the Ravi at the head of the canal suffered severely from the floods again this year, but not to the same extent as in 1875: the protective and training works were also slightly damaged.

The work on the Western Jumna Canal consists of a masonry weir across the Jumna River with regulating heads for both Eastern and Western Jumna Canals; and of new channels in substitution for portions of the main canal and branches. The estimate for works is about £ 730,000; about £ 262,000 will have

been spent up to the end of 1876-77, and the grant for the coming year is £ 74,900. The head-works are approaching completion, land has been acquired for the portions known as the new Main Line and new Delhi Branch, and a considerable quantity of material has been collected, two of the new distributaries have been completed, and another is in hand.

The largest work under construction is the Sirhind Canal, drawing its supply from the Sutlej River for the irrigation of the British Districts of Loodiana and Firozpoor, and the Native States of Patiala, Jheend and Nabha; the entire cost of the works is estimated at £ 3,087,388, of which £ 1,187,000 will be contributed by the Native States. The outlay to the end of 1876-77 will probably aggregate £ 1,485,000, and the grant for the coming year is £ 248,217, of which £ 107,317 will be contributed by the Native States. The head-works and the excavation of the main canal are well in hand, and seven out of the eight bridges are complete. Convict labor has been tried with success on these works. The Abohur Branch and the first and second feeders are well advanced. The third feeder and the Patiala navigation channel are nearly complete, and the excavation of the Choya Branch is complete to the 20th mile. Work on the navigable junction with the Sutlej at Firozpoor was commenced during the year.

The fourth and last work is the Swat River canal in the Eusufzaie valley, at an estimated cost of £ 167,313; a commencement of work has been made, and about £ 10,000 spent. Its chief object is to induce some of the lawless borderers to settle down in British territory, and betake themselves to peaceful pursuits. It will be desirable to push on the works to completion as rapidly as possible; the grant proposed for the coming year is £ 30,484.

Of the Ordinary grant for 1877-78 amounting to £ 900,600, as against £ 958,800 for 1876-77, £ 141,163 will be an addition to the Capital outlay on the works. £ 544,133 provides for the current expenses of works in operation for which Capital and Revenue accounts are kept, and £ 245,305 are charges debitable to works for which there are no Capital or Revenue accounts.

In Madras the principal works on which Capital expenditure is being partially incurred from the Ordinary Revenues are the Godavery Delta, the Kistna Delta system, the Pennair Delta system and the Chembrumbaukum Tank. For the Madras water-works a grant of £ 2,774 exclusive of establishment is provided in the Budget which will be utilised on embanking the river and left side of supply channel, in extension of weirs in the supply channels and in works of protection from the river floods. The tanks are in good order, and the weir has been raised to full tank level. In the Godavery District a larger extent of cultivation and of revenue is anticipated. In the Tanjore District the high floods towards the end of July breached in the left bank of the Vennaur Tank, and caused considerable damage to the crops. Owing to the prevailing drought the supply in the river has proved insufficient for the irrigation under the river.

The total grant amounts to £ 262,000, the grant for 1876-77 being £ 272,200, and the average outlay of the three previous years £ 266,986. The necessity for increasing the normal Irrigation grant so often urged by Madras owing to the vast revenue at stake and the interests to life and agriculture involved by the efficient maintenance of Irrigation Works, has received consideration and further detailed information has been called for. The large irrigation works already constructed in the Godavery,

Kistna, Pennair, Tanjore, &c., have assisted not only in reducing the extent of the Districts subject to scarcity at exceptional times, but also in increasing production in ordinary years, and in this double capacity they differ from some of the works in Bengal which are more for the prevention of famine only.

Of the grant assigned, £35,999 is for works, and £146,759 for repairs, the balance being devoted to establishment and other charges. Of the grant for works, £3,987 is for Embankments, £3,091 for the Chembrumbaukum Tank Project, and the remainder for sundry minor works.

In the Bombay Presidency there are numerous irrigation works under construction from the ordinary revenues. The Desert canal of Sind which takes its supply from the River Indus to irrigate land both in Khilat and British territory is one of the principal. The estimated cost is £83,481 of which £42,500 have been spent; a grant of £6,100 has been made for expenditure during next year on this canal from which an ultimate net revenue of £7,737 is expected. A grant of £5,362 has been made for the execution of the important series of embankments known as the Kashmor and Begari bunds which are designed to shut out the flood water of the Indus for a distance of 45 miles, and to protect the land on the right bank. The provision now made will, it is expected, suffice to complete the work at a total cost of £72,947. The Begari Canal, 76 miles in length, and yielding a revenue of £17,639 is being enlarged, extended and improved at an estimated cost of £104,942, these improvements are expected to double the area under irrigation, and raise the profits to 15 per cent. on the outlay: this canal will be protected from injury by the Kashmor Bund; a grant of £6,100 is allotted for the coming year. The Sukkur Canal is approaching completion, its supply is derived from the Indus, the main canal is 75 miles long, and is capable of irrigating 88,250 acres, yielding a revenue of £18,400. The estimated cost of the project is £106,892. The grant for the coming year is £2,440. The Eastern Narra system comprises a series of works extending from the Indus at Rohri to the Runn of Cutch. Provision is made for £6,100 for expenditure during the coming year. The Great Marak Canal in the Hyderabad Collectorate has been enlarged at an estimated cost of £17,008. This work promises to yield a good return for the money spent, the grant for the coming year is £400. A grant of £ 1,200 is made for works on the Fuleli Canal chiefly to secure efficient control over the supply of water; the main canal is 95 miles long and the branches aggregate 986 miles. A small provision of £700 is made for the Krishna Canal which is nearly completed, the estimated cost is £62,341, and it already irrigates 4,000 acres: progress on all these canals is much restricted by want of funds.

The total grant assigned is £ 180,000, of which £ 47,365 is for works, £79,465 for repairs, and the remainder for establishment and other charges. Of the provision for new works, £2,387 will be spent in the completion of 12 works, estimated to cost £262,068, and on which it is expected that £248,623 will have been spent by end of 1876-77. For other works in progress, the grants for which will not suffice for completion in 1876-77, £27,604 has been given, the estimated cost being £262,068, and the probable outlay to end of 1876-77 £333,392. The balance of the grant for new works has been devoted to sundry small and minor works.

On Irrigation Works, commenced in view to give employment to the distressed, £225,000 have been spent from famine relief funds, the total estimated cost of these works being £467,500

In Bengal the principal works under investigation, the expenses connected with which are defrayed from the Ordinary revenues, are the Tirhoot irrigation scheme and the Hooghly irrigation scheme; the expenditure during the current year on the former has been £8,148. A very promising scheme of irrigation from the Gunduck River was prepared this year; it consists in diverting a perennial supply from the River Gunduck into some natural beds of streams, which in the ordinary course are dry except in the rainy season.

In the North-West Provinces the expenditure from the Ordinary grant consists almost entirely in Minor Works and Repairs connected with the large canal systems. The subject of drainage has occupied the serious attention of Government, and enquiries have shown that a very large expenditure may prove eventually necessary. During the current year about £ 65,000 were spent on these works, the cost being shared by Extraordinary funds, Imperial revenues and Provincial funds. A project for navigable communication between the Ganges Canal and the Agra Canal at Delhi is under consideration by the North Western Provinces Government.

In the Punjab, the chief items of expenditure from the Ordinary grant are on repairs to the Bari Doab and the Western Jumna Canals; a few Minor Works are in progress and call for no remark.

In Mysore the grant for the current year is £96,800. Irrigation in this part of India is carried on chiefly from tanks and reservoirs. The principal works in progress are the extension of the North Channel, and the completion of the Sereeramdavur dam the Chickdawur Sagar Channel, the Sulikerray Series of tanks, the Hussergutta Series of tanks and various other Minor Works. There is also a scheme for water-supply to the town and station of Bangalore at a cost of £56,925, and for the water-supply of the town of Mysore, at a cost of £41,820.

In British Burmah, the principal works under construction are the Irrawaddy embankments for the protection of the culturable land along the river; one section, 27 miles long, will protect a hundred and twenty thousand acres; £1,500 are entered for expenditure for next year, which will suffice to complete the work, at an estimated cost of £ 12,353. Three other sections previously completed with an aggregate length of 154 miles are to be raised and strengthened at an estimated cost of £30,464, and for these works £ 40,900 have been allotted for expenditure during the coming year. A grant of £1,000 is also made for the reclamation of the Pegu Plain, this sum will suffice to complete the work at a total cost of £24,954, this work is calculated to reclaim 50,000 acres of good land and to afford protection to the canal from inundation; the Pegu and Sittang navigable Canal, executed from Provincial funds at a cost of £118,690, will be completed in the coming year, and will, it is hoped, be open to traffic by April or May 1878.

In Rajpootana, the system of irrigation is from tanks dependent for their supply on local rainfall; the proposed expenditure is on completing and maintaining these tanks, and calls for no special remarks.

The aggregate construction outlay on Irrigation Works, ordinary and extraordinary, throughout India up to the end of the year 1875-76 as booked in the registers of the Public Works Department amounts to £16,554,690, of which the expenditure shown for Madras and Bombay is open to correction, the accounts not having been completely adjusted.

The expenditure in Burmah has been altogether on flood embankments and protective works; the works in Oudh and Central Provinces have been abandoned. In the three Provinces, Bengal, the North-West and Punjab, the aggregate outlay has been £12,318,057, and in these only can a comparison be usefully made of expenditure and returns.

On the financial results of Irrigation Works I have already spoken.

The irrigation from the Orissa, Midnapoor and Tidal Canal is of very slow growth, and it is feared that the income from this source will never, under the present system, yield an adequate return on the Capital that has been invested. The Sone Canal and the Agra Canal have only recently been brought into operation, and there is a fair prospect of their eventually proving profitable undertakings both directly and indirectly; the condition of the Ganges and Eastern and Western Jumna Canals is very prosperous, and the Bari Doab Canal is now yielding a fair income.

It will be premature for me here now to do more than to allude to the proposals for a further localization of Irrigation Works. I have from my arrival in India felt that the success of some, if not of all these works would be better secured if they were the outcome of local sacrifice and self-denial rather than of Government munificence alone, and that local interests and local duties should call this class of improvement into existence. Indeed, without ignoring altogether the responsibilities of the State towards the land, resting on the assurance of those who know India better than I do, and who understand the relations of the landhlolders to the cultivator, I would wish to see no work of Irrigation commenced till those who expected the benefit had either subscribed the Capital or had given a guarantee for the interest of the work which has to be undertaken from Loan funds. I am inclined to draw a distinction between lands, such as those in Sind, in Burmah, and in Bengal too to some small extent, which need protection from flood. I will not dwell further on this matter, leaving time to thoroughly work out what is needed to effect a change in policy, from which, if care and caution are exercised to give it effect in its earlier stages, I for one believe, infinite benefit will ultimately arise, though for the moment extreme advocates for irrigation may not acquiesce in the chances of very rapid development.

Early in last year with the assent of Lord Northbrook I suggested such a course in reference to a very extensive scheme put forward for the protection of Behar against the recurrence of the disasters of 1874, and for the mitigation of the normal misery of that overcrowded district. The response I received from the then Government of Bengal gave but little hope that any means could be relied upon beyond the usual one of the work being undertaken by the Indian Treasury. I trust that the present Government of Bengal will be able to show that its predecessor was deceived.

I am also now in communication with the Government of the Punjab on a project lately submitted by it, in order to ascertain if the work can be undertaken on the conditions we are now seeking to establish.

The extension to Local Governments of administrative control with a simultaneous increase of their responsibilities cannot fail, if guarantees are taken for the continuity of a fixed and stable policy, (the difficulty of all personal

government subject to a short tenure) to result in greater local efficiency even if it does not secure greater economy and thrift in outlay.

Of the application of the same principle of local management to Railways, I confess I do not myself entertain a favorable opinion unless indeed full powers on questions of principle are reserved in the hands of a central authority; for the essential feature of Railway success—I mean financial success—is an arrangement for the public service at once simple, rapid, certain, and this can only be secured by unity and harmony in administration. To localize entirely the control of Railways would increase their cost in management, and re-introduce the worst features of the early European system, which all Railway administrators are now hoping to see followed by a more automatic system.

I hope to see this principle thoroughly recognised in this country at no distant date, and the whole Railway system of India guided by one authority, whilst the improving and increasing Revenue is devoted to the further development of the system itself.

It is possible perhaps, whilst enlisting the co-operation of the Local Government in aiding the sources and development of Railway traffic, not to weaken Railway administration: if this can be secured, the experiment is however worth a trial.

I have now, My Lord, to ask the Council's attention for a few minutes to the prospect of our State Railways.

The length of State Railways open for traffic, under construction and under survey at the close of 1876 was 2,720 miles, of which 170 miles are either Provincial or the property of foreign States, leaving 2,550 miles chargeable to Imperial Public Works Extraordinary. Of this length about 800 miles are now open for traffic, and 1,100 miles are under construction. On the remainder, construction operations have not yet been commenced.

During the past year the increase to the open mileage has not been large, the additional length permanently opened being only 128 miles, distributed over the Rajpootana, Punjab Northern, Tirhoot, Holkar and Neemuch lines. The Rajpootana line was opened throughout.

On the Indus Valley Railway 110 miles have been temporarily opened between Multan and Chuni Gote for the goods traffic of the Flotilla.

During the ensuing year a much greater addition to the open mileage is expected, which will make up the aggregate length to about 1,500 miles, thus maintaining the projected average of 300 miles a year since the date of first opening. The chief additions will be on the Indus Valley, Northern Bengal and Rangoon and Irrawaddy Valley lines, on which it is expected that 660 miles will be opened for public traffic.

The total Imperial Extraordinary expenditure up to the close of 1875-76 was £ 11,785,492.

The estimated expenditure during the current year, 1876-77, is £2,788,000, and the estimate for the ensuing year is £ 2,728,000, which will raise the total expenditure at the close of 1877-78 to about £17,300,000.

The grant for the coming year provides for steady progress on the lines already under construction, and for a commencement of the extension of the Punjab Northern Railway to Rawul Pindee, and of the Western Rajpootana Railway.

It has been necessary in the present state of the finances to restrict the grant for the latter to only £ 100,000. And for the same reason, other lines on which a small commencement should be made so as to carry forward the extension of our railways with regularity must, I fear, be postponed.

These are the Chatisgurh line from Nagpore and the Neemuch-Nasirabad link of the Central Indian system. The extension of the Northern Bengal Railway to the foot of the hills—a distance of about 30 miles—is also a work which, I still trust, may be pushed on if our prospects brighten in the coming autumn.

In the course of the last month the earth-works of two railways, the claims of which had already been before the Government, have been authorized as famine relief works. These are the Dhond and Munmar, forming a chord above the Ghâts between the north-east and south-east lines of the Great Indian Peninsula Railway, and which if existing would be especially valuable in the present crisis,—and an extension of the Madras Railway from Bellary to Hubli. This last line when carried out will not be complete without an outlet on the western coast.

As in the case of the famine of 1874 when the construction of certain lines had to be anticipated, so now, these lines must be accepted as divergences from the fixed programme of our Railway scheme.

With an annual appropriation of three millions approximately for railways, we ought to be prepared to put in hand about 400 miles of line yearly. As respects future extensions therefore it may be mentioned that we have surveys in progress for lines in Burmah towards the frontier;—from Assam on the east to Tirhoot on the west;—from Rawul Pindee to Peshawur; and from Sukkur towards the western frontier.

The receipts from the open lines are, for the current year, estimated at about £370,000 with a mean open mileage of 742 distributed over eight different lines.

The net receipts are estimated at £105,000.

The State Railway system is burdened with several small detached lines, such as the Nalhati, Calcutta and South-Eastern and Wardah Valley. The last will, it is hoped, prove particularly valuable as a mineral branch. It also serves the cotton mart of Hinganghât. Of others, such as the Punjab Nothern, Holkar, Neemuch, and Tirhoot, small sections only are as yet opened for traffic. The open mileage of these seven lines aggregates only 360 miles. This want of continuity is unavoidable, but so long as it lasts, the traffic cannot be large, and the expenses of working must be disproportionately high.

I have already stated that portions of the Northern Punjab and Indus Valley Railways are now open for traffic, and the rapid development of trade especially on the former, even with the very limited rolling-stock available, already shows net receipts in excess of working expenses which justify these works being classed as Extraordinary.

And this consideration leads me to refer to the change which seems to be proposed in carrying out the policy for Extraordinary works, by which no works so classed will be aided by loan money unless they are likely to be *fully* remunerative, and instead of its being required, as formerly laid down by the Secretary of State, that no loan money spent on a work shall be treated as Extraordinary except where the yield will cover the interest on the *loan*, it will be required that no loan money shall be spent on a work except where the yield will cover the interest on the *whole cost*. Heretofore the policy has really been to combine the employment of Loan Funds with that of surplus ordinary revenue, so as on the one hand to expedite the progress of the works, and on the other to keep down the real interest for borrowed money, in order to avoid burdening the future.

Thus when a work has been considered reasonably certain to pay say 3 per cent. on its total cost, or even 2 per cent., it has been thought proper to allow of its inclusion in the category of Extraordinary works, in expectation that so much of its cost would be defrayed by ordinary revenue, that the remaining portion, defrayed by borrowed money, would have *its* interest covered by the yeild; and this has prevented the progress of the work being retarded to only such a pace as would have been possible from the exclusive employment of the current revenues.

Further it is to be considered that the system of Extraordinary State Railways is mainly a system for constructing Railways by the use of funds raised by Government direct, instead of by the use of funds raised by Guaranteed Companies.

There is no more unsoundness, so far as I can see, in the financial policy that would commit the State to the liability for interest on funds raised by itself, than to the policy that commits it to liability for interest raised by Guaranteed Companies; and I think that no one will venture to deny that the liability so incurred has been fully justified, and that the policy was a sound one.

Next year the gross receipts from a mean open mileage of 1,230, distributed over 11 different lines, are expected to amount to £675,000, and the net receipts to a little over £190,000.

The receipts per mile open per week average about £10 only. This is a small figure compared with the earnings of some of the trunk lines, but its increase depends on the gradual completion of a system.

For example the only State line of considerable length as yet open throughout is the Rajpootana Railway, 400 miles long. The last section of this line was opened in February 1876, and in the same half-year the net receipts from a gross traffic, £13 per mile per week, returned 5 per cent. per annum on the capital outlay.

I have seen it stated that the State lines have been constructed at a much greater cost than the Guaranteed lines, and their average mileage cost has been criticised. It is unnecessary to enter into the details of such a question on this occasion, but the fullest information will be published hereafter. For the present I think it sufficient to say that the comparative outlay on particular works and the several conditions under which they have been undertaken and constructed, can be accounted for, and that their cost compares favorably with the lines of other countries. Whether the sums advanced under the guarantee had been excessive or the reverse, the Companies in India owe their prosperity to the fact that they obtained their capital at a moderate rate of interest in virtue of the Government Guarantee.

It has been more than once asserted that the policy which was inaugurated by Lord Hardinge, and to which Lord Dalhousie gave life and vigour, was a policy which has led to great loss and extravagance. My Lord, such loss and extravagance, if there has been either one or the other, are absolutely insignificant when compared with what has been realised by the Americans, and by other nations who have not enjoyed the credit which India could always command, and who from this want of sufficient means were forced to adopt a cheaper and less durable type of road. The heavier outlay had to be incurred at last, and the final cost of the railroads in those countries will be found to exceed eventually the first and permanent outlay upon our Indian lines.

The special standard gauge of India was, without doubt, an error into which I myself fell when introducing Railways into Australia in 1855 and subsequent years, but I believed then with those who also advised the Government of India that the battle of the gauges would result in a compromise, and that the 5 feet 6 inch gauge would be the universal standard.

The result of this controversy subsequently led in this country to the unfortunate break of gauge by the further adoption of the metre gauge; and although no doubt this latter gives on its first cost a better return than is secured on the outlay on a wider gauge, still I question whether a more extended working will secure as large a proportion of profits as the traffic developes.

Had the early founders of the Indian Railways adopted the 4 feet 8½ inch standard gauge of England, I am confident that our lines would long since have been paying a handsome subsidy to the Indian Treasury, that the extent of our Railway system would have been far greater, and that we should not have been afflicted with the curse of a break of gauge.

The Guaranteed Railway system in India was extended during the year ending 31st December 1876 by the opening of a portion of the South Indian Railway in Madras, and by the completion of a short branch of the Bombay, Baroda and Central India Railway in Bombay.

The total number of miles open at the end of 1876 was 5,899 against 5,693 miles at the close of 1875.

Disasters to bridges occurred in Bombay and the Punjab. Twenty-five spans of the Narbada Bridge on the Bombay, Baroda and Central India Railway were swept away by floods, and three spans of the Sutlej Bridge on the Sindh and Punjab line were destroyed, both accidents causing temporary stoppage of traffic upon the damaged sections.

It is estimated that the total capital withdrawals for expenditure on Guaranteed Railway and the Madras Irrigation and Canal Companies to 31st March 1877 will be £95,788,000, which includes a sum of £372,000, the balance of a loan of £600,000 obtained for works by the Madras Irrigation and Canal Company from the Secretary of State.

Divided thus—	£
Expenditure in England	42,628,000
„ in India	53,160,000

5. Deducting the capital invested in the Madras Irrigation and Canal Company, the net expenditure on Guaranteed Railways will be £94,416,000.

The amount of Capital, which it is estimated will be remaining in the hands of Government, belonging to Guaranteed Railway Companies, on the 31st March 1877, is £420,631, which may be distributed over the various Railways as follows:—

	£
E. I. Railway Main Line at their credit	69,227
„ Jubbulpore Line (debit)	**159,836**
Eastern Bengal Railway („)	**171**
Madras Railway (credit)	132,626
South Indian Railway (debit)	**43,090**
Bombay, Baroda and Central India Railway (debit)	**5,230**
Great Indian Peninsula Railway (debit)	**48,507**
Oudh and Rohilkhund Railway (debit)	**101,671**
Sindh, Punjab and Delhi Railway (credit)...	577,283
Total credits to Railways	779,136
Debits	**358,505**
Net credit ...	420,631

Taking into consideration a sum of £514,400, which the Secretary of State estimates will be received on account of Capital during the year 1877-78, it is estimated that, looking at the Guaranteed Railways as a whole, all the funds belonging to them will be exhausted, and a further sum of £343,111 expended.

The details of these figures are :—

	£
E. I. Railway Main Line (debit)	**109,773**
„ Jubbulpore Line (debit)	**152,961**
Eastern Bengal Railway (debit)	**16,471**
Madras Railway (credit)	50,443
South Indian Railway (debit)	**337,840**
Bombay, Baroda and Central India (debit)	**90,230**
Great Indian Peninsula (debit)	**310,524**
Oudh and Rohilkhund (credit)	80,629
Sindh, Punjab and Delhi („)	543,616
Total credits ...	674,688
„ debits ...	**1,017,799**
Net „ ...	**343,111**

It will be seen from the above that some provision of funds will have to be made to meet expenditure.

The gross earnings for 1876-77 were estimated for the Budget at £7,888,000, they are now expected to reach £9,499,000. This large increase is due principally to the following exceptional causes :—

The impetus given to the grain traffic by the famine in the Madras and Bombay Presidencies; the activity in the export trade of grain, created in some measure by the adverse rate of exchange, and further stimulated by the reduction in the rates for long carriage of grain on the East Indian Railway; and the Imperial Assemblage at Delhi.

The working expenses for the Budget of 1876-77 were estimated at £4,238,000, they are now likely to amount to £4,937,000. The net traffic receipts were estimated at £3,650,000, they will now probably amount to £4,562,000.

The moiety of surplus profits payable to shareholders was reckoned at £179,000 for the Budget-Estimate of 1876-77, it will now amount to £274,000.

The gross interest payable under guarantee is expected to be £4,708,000 against the Budget-Estimate of £4,730,000, from which, if the amount of net traffic receipts, less the moiety re-payable to shareholders, be deducted, the remainder £420,000 will represent the loss to the State for the year against the Budget-Estimate of £1,259,000.

The gross earnings for the Budget year 1877-78 are estimated at £8,553,300, which is less than the amount expected to be realized during 1876-77 by £945,700, owing to the abnormally heavy traffic in food grains going to the famine districts, to the increased exportations by the fall in the rate of exchange, and to the exceptional receipts of the Delhi Assemblage in the latter year.

The gross receipts budgetted for next year amount in the gross to a little more than was put down in the Budget for the current year, and than the actuals for the year 1875-76. If, however, the sums set against each Railway are examined, it will be seen that there is a fair increase expected on all Railways except two, the Great Indian Peninsula and Sindh, Punjab and Delhi Railways, whose receipts are taken at £434,000 less than 1875-76. The decrease in the former is trifling, but that on the Sindh, Punjab and Delhi amounts to nearly £400,000, the cause being that in the year 1875-76 a large sum which had been debited to Revenue was written back to the debit of Capital, and consequently increased out of all normal proportion the gross earnings. The normal actuals of 1875-76 might, therefore, be considered as about £7,884,000, and the Budget is some £670,000 more than this.

Unfortunately the working expenses are not affected in the same way, but have to be set down for a progressive traffic, and in some cases to provide for the inevitable heavy repairs which must follow the unprecedented rush of grain traffic caused principally by the wants of the famine districts of Bombay and Madras, and partly by the expansion of the export trade of wheat and seeds. If, as may be hoped, this trade becomes a permanent and prosperous one, we may look for considerable and steady enhancement of receipts, but the carrying resources of both the Great Indian Peninsula and East Indian Railways have been severely strained, and on the latter Railway it has been determined to build more rolling-stock, to enable them to carry all that is offered.

But building rolling-stock takes time, and probably the coming official year will have run nearly its whole length before the necessary additional carrying accommodation is provided.

A further fact has to be borne in mind, namely, that while, in consequence of the enormous traffic which has been carried during this official year, very large surplus profits in excess of the guaranteed interest have been earned, the payment to the shareholders of the moiety of these heavy surplus profits falls in the next official year, and this tends to put next year's transactions in a comparatively unfavourable light.

The estimated loss to the State during 1877-78 compares as follows :—

	1875-76.	1876-77.	1877-78.
	£	£	£
Guaranteed Interest	4,688,000	4,708,000	4,716,000
Deduct—			
Net receipts	3,713,000	4,288,000	3,716,000
Loss	975,000	420,000	1,000,000

But of the sum of £1,000,000 shown as the net charge against the State for 1877-78, an amount of £250,000 may at least be taken as representing the excess moiety of surplus profits earned during the preceding year, but paid to shareholders in that year, so that if each official year could have been made to bear the burden of its own moiety of surplus profits, 1876-77 would have cost the State about £670,000 and 1877-78 about £750,000.

In order to form an opinion of the different undertakings paying or falling short of the guarantee, a table of average receipts per mile per week

and probable ratio of expenses to gross average receipts has been prepared, based upon the Regular Estimate for the year 1876-77 :—

Name of Railways.	Length.	Cost per mile.	Interest at 5 per cent. on Capital cost per mile per week.	Estimated average gross earnings per mile per week.	Probable percentage of expenses to gross earnings.	Probable cost of working.	Probable net profit per mile per week.	Probable Profit and Loss.		Effect of Government Guarantee.	
								Above guarantee.	Below guarantee.	Half gains above guarantee.	Below guarantee.
	Miles.	Rs.		1876-77. Rs.		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
East Indian, Main Line ...	1,270¾	2,32,402	223	520	33	172	348	125	...	41,59,187	...

										52,93,381	98,57,152
											52,93,381
								Net deficit ..		...	46,63,771
								Exchange - £			120,000

* System still incomplete.

These results are approximate only, because the receipts towards the close of the year are necessarily only estimated, and an analysis of accounts has not been made. But they are sufficiently accurate to show which of the undertakings are profitable, and to which of them attention must be directed to endeavour to foster traffic and produce better results for the future.

There are two methods open for the purpose of producing better financial results on Railways in India, the first by measures to promote traffic, the second by means of more economical working.

These two methods, however, really must work in unison. Cheap working of Railways will induce cheap freight charges, and cheap freight charges will undoubtedly promote traffic ; but no economy of this nature can be true, if the efficiency of the Railway is affected by the measures taken to introduce it.

It is only necessary to glance at the table of expenses and receipts to observe that some of the most expensive and efficient lines in India pay the best, but at the same time the fact must not be lost sight of that these lines are the streams of traffic into which the feeders run ; and though expensive arrangements may be necessary in the one case, they become superfluous in the other. Efficiency for the extent of traffic is an absolute need and real economy on all Railways.

The promotion of traffic by the lowering of rates and fares within certain limits is, in accordance with the original Railway contracts, in the hands of the Railway Companies, and in some cases it is not always apparent that the interests of the public and of the shareholders are for the time being identical.

The Government of India may be said to have a life interest in the Railways, whilst the shareholders are tenants for a term only, and circumstances may occur, which place reforms and reductions of rates, in the light of too far distant benefits to recompense the present holders of the Railway stock.

In order to promote the most healthy discussion of all matters connected with Railway administration in India, not only as regards the older Guaranteed Railways, but also for the benefit of the new State lines, a Railway Conference was convened during the past year, from which it was hoped substantial results would accrue. The extent of the calamity in Madras and Bombay rendered it necessary however for all Railway men to be at their posts, and for a time this gathering has had to be postponed.

I am pleased, however, to be able to report that one very important enquiry has been satisfactorily completed. I refer to the matter of Military transport by rail. Enquiries have been conducted by Committees of Officers during the past cold seasons, in regard to the capacities of our stock, and the arrangements provided on the Continent for the transport of sick and wounded, &c., have been reported on by an Officer who visited the Exhibition at Brussells in August last for this purpose.

With this information before us it is hoped that steps may be shortly taken to give practical effect to the suggestions that have been offered, so that the full advantage of our Railway system may be realised in the assistance it will give to the Army at all times.

The traffic, both passenger and goods, on lines in India has had an upward tendency of late years, and which I will state in detail—

Year.	Mean miles of Railway open.	Passenger		Goods.		Remarks.
		Passenger carried over one mile of Railway.	Average number of passenger per mean mile open.	Gross tons of goods booked.	Average tons per mean mile open.	
		Millions.				
1872 ...	5,123	1,133¾	221,291	Not obtained.		
1873 ...	5,309	1,213½	230,277	4,016,191	744	
1874 ...	5,604	1,213¾	216,607	5,135,998	916	Famine year.
1875 ...	5,640	1,334½	236,639	4,472,802	795	
1876 ...	5,841	1,382½	236,275	5,766,526	986	Famine year.

• Reductions in fares and the increased comfort of travellers will doubtless induce larger traffic receipts, in the same manner that reduced freight rates and a liberal classification, will bring about increased goods traffic; but these reforms must be dependent in a measure upon decreased expenses. Decreased working cost of Railways is dependent upon many causes, but the chief agent in effecting economy, and one with which the Government of this country has greatly to do, is the cost of fuel.

Of late the East Indian Railway coal yield at Kurhurballee has greatly increased, and the expense of getting coal has decreased to, perhaps, a minimum of 5*s.* per ton. The Company has also reduced its carrying charge from one-fifth to one-sixth of a pie per maund per mile, and now the Bengal coal is carried as far north as Lahore, as far west as Jabulpur and Ajmere, and is used on the Oudh and Rohilkhund system of lines.

It is not too much to say that the cost of coal limits, so far as Railway carriage is concerned, the horizon of the paying export of the products of India.

Cheap coal will render possible, long inland carriage of Indian grains to the sea ports, far beyond sea export. The movement of products will produce return trade, and thus the question of the development of the Indian coal industry becomes one of national as well as of Railway importance.

The prime cost of getting coal at the pit's mouth affects the matter but little. Taking the present East Indian Railway ruling rates of 5*s* a ton for getting, and one-sixth of a pie per maund for carriage, it may be assumed that the cost of getting is equal to 100 miles of carriage only, and therefore to distribute coal cheaply throughout India, new coal measures in different parts of the land must be worked, and connecting lines of Railway must be made.

It is an imperative duty to foster this subject. A commencement has been made in the Narbada Valley, and a coal line to the Warrora Collieries has been opened during the past year, and the use of the coal from these fields is extending in Western India.

But much remains to be done—Excellent coal has been found in Assam, which will afford a supply to Northern, and ultimately to North-Eastern, Bengal. Coal has been found in the valley of the Godavery, which may, when connecting lines of Railway have been made, afford a profitable supply to Madras and for the southern portion of the Great Indian Peninsula system of Railways.

The manufacture of iron generally follows the discovery and use of coal in all countries, and India is not an exception of this rule. During the past year an Iron Manufacturing Company in Bengal has assumed a definite form, and good results have been obtained from experiments with ore in England. I am also in hope that we may be able to start iron-works at no distant date in connection with the coal of the Wurdah Valley.

To Railways this industry is as important almost as the discovery and cheap distribution of coal. Maintenance of works as well as original construction will be cheaply carried out, and Government, in giving aid to the Iron Manufacturing Company, has confidence that no truer principles of political economy can be exercised in India than those of supplying Indian wants from Indian markets.

The cessation of all action by State agency in India for the material progress and development is strongly advocated by certain eminent public men. The facts and figures I have given are, My Lord, not exaggerated or cooked, and I think that they tend to show that the administration of these matters by the State has not been wholly mismanaged, and I venture to think that, compared with any number of similar enterprises undertaken solely by private agency and directed by the keenest self-interest, the result will not be given against the Public Works of India.

Not many months ago I saw a very strong attack calling in question the construction of Railways in Southern India, and asserting that it had been premature. It is true that they have not paid as yet the full guaranteed interest, but I venture to think that the part they are at this present moment playing in taking food to the famishing and otherwise perishing millions of Southern India is, in money saving value alone, beyond its debt to the public Treasury of India for arrears, setting aside the preservation of human lives, a view it is possible the authors would not recognise.

Having described the material operations and the financial position of the Public Works in India, I would ask, my Lord, to be permitted to say a few words in reference to those who are entrusted with the control and direction of those operations, the magnitude and variety of which can best be comprehended by the statement—dry and hard although from its very nature it must be—which I have just made.

Of the Officers more directly responsible to Government, I can only say, that I believe them trustworthy, and in every way well qualified for their position. I am confident that no nation in the world possesses a body of more able, conscientious and honourable workers than are the Engineers of India; and my Lord, I should be deceiving myself and deceiving you if I did not here publicly record my thorough conviction that this body has claims to consideration at the hands of the Government and public of India.

From the nature of its original composition and development, the present organization does not tend to timely retirement and to such a rapid flow of promotion as is desirable, and it is under this condition of things, with remedies deferred and incentives to work withheld, that the man is disheartened and his energy damped.

It may be years before the disheartening effect of the prejudicial influences I have noticed is fully felt in the morale and discipline of such a zealous body of men; but where the interests of the Government and country, and the very lives, I may say, of the people, are dependent on the labours of this section of our Indian community, no grievance should be allowed to remain.

There is another subject on which much has been said and written, and that is the employment of Natives and the displacement of Europeans on our Railways. On this point I wish clearly to say that the views of the Government of India, if I understand them aright, are that, without discouraging Europeans, every encouragement will be given to the efficient training of Natives for all kinds of suitable work on our lines; not on the grounds of its being a possibly cheaper course—a matter of minor importance when safety of life or limb is at stake—but on the ground that this system will open up to the Natives of India a means by which they can gain strength and self-reliance, and may supplement, rather than supplant, Europeans.

To show how large has been the field of fresh industrial occupation thus extended to the people of both races, I would, my Lord, call attention to the following facts:—At the end of last September, the length of our open lines aggregated some 6,600 miles. Without taking into consideration the number employed upon the lines under construction, there was engaged in the higher or general administration, such as Agency, Audit, Pay, Stores, Medical, &c., an establishment of 305 Europeans, 240 East Indians, and 8,059 Natives. On Traffic and Telegraphs there were 861 Europeans, 1,038 East Indians, and 22,759 Natives. In the Engineer's Branch, 327 were Europeans, 227 East Indians, and 40,670 were Natives. In the Locomotive and Carriage Establishments, 1,539 Europeans, 1,245 East Indians, and 29,766 Natives. Thus making a total of 3,032 Europeans, 2,750 East Indians, and 1,01,254 Natives, and besides this nearly all of the 784 Railway Stations are in charge of educated Natives as Station Masters. These figures, My Lord, speak for themselves, and testify that on our Railways there is a large field open for the employment of Natives. The advantage to the bulk being in their constant intercourse during daily work with an industrious and painstaking class of the European

community, and to the more fairly educated in habits of order and independence which their duties of more or less responsibility are sure to inculcate.

I have, I fear, gone into such detail that possibly the great characteristics and leading features of Indian Public Works, in which the State has assumed the position that in other countries is taken by private or associated enterprise, may have been lost; and I would venture before concluding the more especially to draw attention to them because this year the wave of our Revenue receipts has topped over that of annual liabilities or expenditure for interest on total outlay. It is possible doubtless that this is due to exceptional circumstances, but I believe that, even giving full credit for those circumstances, the next year and those following it will find these relations unchanged.

In dealing with the Budget for Extraordinary Works the actual proposed outlay is not the point to be considered so much as the state of the revenue and liabilities.

The practical mode of dealing with them is to compare the whole revenue of all remunerative works with the interest on all Extraordinary outlay.

I will state more fully what I mean.

The account stands thus—

	£	£
The real cost to the State of the Ordinary Public Works Department is	2,105,000	
(This is an outlay not of a remunerative character.)		
To this should be added the grant from Imperial to Provincial funds for Public Works	1,400,000	
Making the whole cost to the State of Public Works other than those which are meant to be remunerative ...	3,500,000	
The interest annually payable on Guaranteed Capital is ...		4,710,000
The interest payable on the up to date capital of extraordinary works is		1,170,000
Total		5,880,000

Against this there is a Total Revenue of £5,985,000, made up as under—

	£	£
Direct Irrigation	5,000	5,985,000
Railway	3,670,000	
Enhanced land in Madras, Bombay, North Western Provinces and Punjab	2,310,000	

In Madras the Irrigation outlay is a Public Works charge, while virtually none of the Revenue due to Irrigation (which is undeniably enormous, at least £2,000,000) is credited to Public Works, but to Land Revenue, leaving a gain to the State of £105,000.

Even supposing that this gain did not exist, that the indirect revenue from Irrigation were less than what we claim it to be, this account shows that the annual outlay of the State for interest on the capital of Guaranteed Railways and of Extraordinary Works is met by the net profits from our remunerative Public Works; and that, therefore, as matters stand at present, these remunerative works are no burden at all on the tax-payer, even though interest is included on outlay which has as yet given no returns, although these returns are certain yet to come.

I think then we may assume that, whatever they may have been in the past, these works can hardly in any sense now be considered as burdens, conferring as they do incalculable benefits upon the country by increasing enormously its prospective wealth and prosperity. In fact in the aggregate they now meet all the annual liabilities we have incurred upon them.

You have, my Lord, in Council already conveyed to Colonel Dickens, the late Secretary of the Public Works Department, a public recognition of his services to the State. But I seize this occasion to acknowledge the great personal obligation I owe to him for the cordial aid and co-operation which he has afforded me, and which with his experience has lightened my labours in connection with the Public Works of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

[RAILWAY.]

EARNINGS AND EXPENSES OF INDIAN RAILWAYS DURING THE HALF-YEAR ENDING 30TH JUNE 1876.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

RELIEF REPORTS FOR THE WEEK ENDING 3rd MARCH 1877.

Proceedings of the Board of Revenue, dated 9th March 1877.

THE relief reports for the week ending 3rd March 1877 are submitted to Government with the usual statements and maps of the districts noted in the margin. No report has been received from the Tinnevelly District.

Nellore.
North Arcot.
Coimbatore.
Madura.
Salem.
Bellary.
Chingleput.
Cuddapah.

2. *Prices.*—In Kistna prices are nearly stationary, but that of ragi has fallen, probably owing to some harvest obtained. The same grain has fallen in the north and north-west of Nellore, where however cholum has risen. From Cuddapah the Madanapalli report is again wanting. Cholum and ragi have fallen in the eastern and northern taluks; and in Bellary the same grains, especially the former, are cheaper generally along the railway line and in the western taluks. Rice is nearly stationary in these districts. Prices in Kurnool are falling, owing to steady importation and to harvest under the irrigation canal. In Chingleput and North Arcot there is scarcely any change, except that in the latter district cholum is cheaper in Kangundi, Gudiattum and Palmanair. In Salem prices have risen in the south, but cholum, ragi and cumboo are reported to have fallen in Dharampuri. In Coimbatore rice is slightly cheaper in the east of the district, but cholum has risen in the south-west. Prices are stationary in Trichinopoly and Madura.

3. *Rainfall.*—There was no rain, except in Kurnool: a shower fell there on the 4th, and seven-tenth's of an inch were registered on the 6th March.

4. *Grants, &c.*—Funds have been placed at the disposal of the Collectors of South Arcot and Malabar—in the former for relief in the northern taluks bordering on Chingleput, North Arcot and Salem, and in Malabar for the relief of the Wynaad coffee estate coolies, chiefly Mysore people, who are thrown out of work and in distress. The taluk report from South Arcot is for the 24th February, when 1,130 persons were employed in deepening wells and ponds, and Rs. 1,554 had been spent. The works in Wynaad have not yet been opened. Including these districts, the grants made for relief purposes to the 3rd March amounted to Rs. 90,99,763; and the total outlay against these grants was Rs. 3,63,764 in the week, and Rs. 81,91,964. The classification of the outlay on works (Abstract No. 4) is as follows for 11 districts:

	In the week. Rs.	Up to the week. Rs.
Roads—		
New works	1,13,814	32,10,053
Repairs	52,655	8,40,809
TOTAL ...	1,96,199	40,50,862
Irrigation works	19,518	2,98,006
Miscellaneous	31,941	4,77,068
TOTAL ...	2,47,958	48,25,936

5. *Numbers on relief works.*—The numbers have again declined, as shown below:

	24th February.	3rd March.		
Kistna	3,078	2,932	—	146
Nellore	42,389	48,289	+	5,900
Cuddapah	67,728	58,207	—	9,521
Bellary	2,74,163	2,39,820	—	34,349
Kurnool	2,03,453	1,94,645	—	8,808
Chingleput	10,556	7,909	—	2,647
North Arcot	18,572	17,896	—	676
South Arcot	1,130	1,130		...
Trichinopoly	489	...		...
Madura	6,794	5,766	—	1,028
Tinnevelly	640	640*		...
Coimbatore	22,900	21,778	—	1,122
Salem	41,966	43,022	+	1,056
	6,93,864	6,42,034	—	51,830
East Coast Canal	23,889	26,576	+	2,687
TOTAL ...	7,17,753	6,68,610	—	49,143

* Last week's number entered.

The decrease is due to a fall in the numbers in the Ceded Districts, especially Bellary. The numbers on the East Coast Canal are reported to be 26,576 against 23,889 on the 24th February; and the totals for the two weeks, including this work, are 7,17,753 and 6,68,610, giving a net decrease of 49,143.

6. The increase in *Nellore*, apart from the East Coast Canal, is explained by a sudden influx in the Kavali Taluk, where the numbers have risen from 4,959 to 10,862. An increase in Udayagiri is nearly balanced by a fall in Gudur. The *Cuddapah* figures compare by taluks, as follows:

	24th February.	3rd March.		
Jammalamadagu	2,778	3,126	+	348
Pulivendla	9,971	6,951	—	3,023
Proddatur	1,288	2,740	+	1,452
Cuddapah	7,339	5,207	—	2,132
Budwail	7,478	5,463	—	2,015
Sidhout	4,168	3,281	—	1,187
Pullampett	8,866	8,837	—	29
Kadiri	2,333	5,033	+	2,700
Royachoti	1,536	3,255	+	1,719
Madanapalli	16,444	9,955	—	6,489
Voilpad	5,224	4,359	—	865
TOTAL ...	67,728	58,207	—	9,521

The decrease in Cuddapah and Sidhout is attributed to reduction of wages and some demand for labour for harvest of crops under wells. That in Madanapalli is not so great as would appear, as the number for the 24th February was 10,622, not 16,444, as entered on estimate. That in Voilpad is due to task-work. The increase in Kadiri is owing to re-opening of works and re-organisation of gangs to repair some improper reductions made by native subordinates, as reported to Government separately.

7. The Bellary figures are as under:

	24th February.	3rd March.		
Adoni	67,984	56,737	—	11,247
Alur	47,830	31,952	—	15,878
Gooty	22,593	15,522	—	7,071
Tadpatri	10,562	10,359	—	203
Anantapur	6,782	9,584	+	2,802
Dharmaveram	4,297	2,511	—	1,786
Pennakonda	2,145	3,168	+	1,023
Hindupur	4,553	1,276	—	3,277
Madaksira	12,867	13,463	+	596
Raidrug	7,785	7,476	—	309
Bellary	42,396	43,936	+	1,540
Hospett	12,261	13,779	+	1,518
Sundur	3,353	3,580	+	227
Kudlighi	13,026	10,875	—	2,151
Harpanhalli	6,466	6,382	—	84
Hadgalli	9,269	9,220	—	49
TOTAL ...	264,169	239,820	—	31,349

The decrease is entirely accounted for by the falling off in Adoni and Alur, where the proportion of persons on the works to population was altogether excessive. It is due to stricter supervision and to strenuous efforts to eliminate improper objects of relief. The further heavy decline in Hindupur is not accounted for, and the reason of the great difference between it and the neighbouring taluk of Madaksira is not apparent. The Collector will be requested to report the cause.

8. The decrease in *Kurnool* is ascribed to improved supervision, emigration to the East Coast Canal, diminished wages, and enforcement of task-work. That in *Chingleput* is not explained, but appears to be due to the suspension or completion of some works or to reports

being wanting. The return from Ramnad in the *Madura* District was not received in time, and hence the decrease. In *North Arcot*, the numbers in Trittany have increased, but in Vellore, Arcot and Wallaja they have fallen, owing to reduction of wages. In parts of Chendragiri the coolies, it is stated, refuse to work at relief rates. The stoppage in *Trichinopoly* is temporary, the coolies being under transfer from a completed work to a fresh one. The reports from the Dharapuram and Collegal Taluks in *Coimbatore* are wanting, and hence the decrease for the district. It is said that numbers would increase, but that destitute persons are alone admitted. The increase in *Salem* occurs in the Ahtur Taluk.

9. *Rates of wages.*—The scale of wages prescribed by the orders of 31st January has been widely enforced. It has been introduced throughout Nellore, except in Podile and parts of Darsi, in the extreme north. It is in force in 8 out of 12 taluks of Bellary for which wages are given; partially in two taluks of Cuddapah; in three taluks of Kurnool; throughout North Arcot, except Punganur; in Trivellore, and partly in Saidapett and Ponneri in Chingleput; in one taluk only of Madura; in five of Coimbatore; and throughout the Salem district wherever piece-work is not in force under arrangements made before the orders were issued. The scale adopted is that for task-work, not less than 50 per cent. everywhere, except in parts of Coimbatore. There is no information worth reproducing here as to the effect on the coolies. The proportions of wages do not appear to be always correctly worked out. Collectors should adopt the gradations given in Board's Proceedings, 5th February 1877, No. 451.

10. *Gratuitous relief.*—The numbers for districts are compared as follows:

Districts.	24th February.	3rd March.		
Kistna	191	160	—	31
Nellore	5,953	4,081	—	1,872
Cuddapah	1,705	1,634	—	71
Bellary	14,829	16,589	+	1,760
Kurnool	3,538	3,651	+	113
Chingleput	4,843	5,102	+	259
North Arcot	557	835	+	278
South Arcot	...	156	+	156
Madura	230	188	—	42
Tinnevelly	138	...	—	138
Coimbatore	1,297	1,309	+	12
Salem	3,056	3,563	+	507
Total ...	36,337	37,268	+	931

The increase in *Bellary* appears in the taluk of that name and in Harpanhalli. In *Nellore* there is a great fall in the numbers in the Atmakur Taluk from some unexplained cause. The variations in other districts are small, but there is a tendency to increase.

11. The outlay on relief in the districts during and up to the week is reported as follows:

	In the week.	Up to the week.
	Rs.	Rs.
Relief works	3,48,209	79,31,900
Gratuitous relief	15,555	2,60,064
	3,63,764	81,91,964

12. The following statement shows sums advanced from Famine Funds under the Land Improvement Act for the construction of wells:

	In the week.	Up to the week.
	Rs.	Rs.
Cuddapah	2,580	17,830
Bellary	...	1,270
Nellore	8,741	12,846
	11,321	41,946

13. The following is a statement of special establishments entertained for relief purposes: for districts marked (*) the entries in last week's report are repeated, no statement having been received this week:

	Relief.		Payment of wages.		Accounts.		Total.	
	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.
		Rs.		Rs.		Rs.		Rs.
Cuddapah*	139	5,718	35	486	45	518	219	6,722
Bellary	841	16,294	226	3,172	73	1,508	1,140	20,974
Kurnool*	388	15,665	83	852	63	772	534	17,289
Chingleput	65	1,665	2	24	3	39	70	1,728
North Arcot	183	4,435	...	...	9	138	192	4,573

Madura	53	1,643	...	...	...	...	53	1,643
Tinnevelly*	19	185	1	10	...	...	20	195
Coimbatore	48	1,245	1	7	4	47	53	1,299
Salem	162	5,406	16	184	56	803	234	6,393
Total ...	1,898	52,256	364	4,735	254	3,835	2,516	60,826

14. The Board have received from the Commissioner of Police statements regarding gratuitous relief in the Town of Madras, from which the following particulars are extracted. The daily average number of persons receiving two meals during the week was 9,740, and of those receiving one meal 10,992. There were 16,060 resident paupers in the relief camps on the 3rd March, of whom 6,876 came from Chingleput, 4,738 from North Arcot, 4,287 from Nellore, and 159 from other districts. There were 569 in hospital and 15 deaths during the week.

15. The usual memorandum of grants sanctioned to 8th March accompanies. The total is Rs. 1,00,60,973.

(True Extract)

H. E. STOKES,
Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

SCARCITY IN THE DECCAN AND SOUTHERN MAHRATTA COUNTRY.

Statement No. XVIII regarding the Scarcity in the Deccan and Southern Mahratta Country together with a Summary of Government Orders issued during the week ending 16th March 1877.

Districts.	Area in square miles.	Affected area in square miles.	Population of district.	Affected population.	Collectors' reports by telegram, dated 13th and 14th March 1877.	Works in progress.	Number of people employed: During the past week.	Number of people employed: During the present week.	Number of people employed: Percentage of labourers to population of district.	Grants, including the large works authorised in Government Resolution No. 6152 of 27th October 1876.	Expenditure up to latest known date.	Prices of staple grain in lbs. per rupee: Ordinary prices.	Prices of staple grain in lbs. per rupee: During the past week.	Prices of staple grain in lbs. per rupee: During the present week.	Average rainfall, *i.e.* the average of all the talukas for five years.	Average rainfall during the past season of all the talukas.

Total ...	54,355	34,183	7,963,927	5,018,992			221,772	223,763	2 8	64,46,015	32,20,288					

A column has been added to the foregoing table showing the percentage of the labourers upon relief works to the population of the respective districts. This percentage varies from 6·76 in Sholapur to ·32 in Khandesh, and averages 2·8.

There is a slight rise in the price of grain throughout the three Southern Mahratta Country Collectorates of Kaládgi, Belgaum and Dharwar. Prices have also slightly risen in Khandesh and declined in Poona.

The number of people upon relief works in the nine affected districts is 223,763 against 221,772 last week; and there are also 3,078 hill-men and immigrants employed in Ratnagiri and Kanara.

From this it appears that the larger number of those who absented themselves during the late Holi holidays have not yet returned.

There is nothing in the reports received from the different districts to indicate that the general condition of the people is becoming such as to give cause for any increased anxiety.

2. A very interesting account has been received from the President of the Belgaum Private Charitable Relief Committee (Mr. Shaw) regarding the operations of their kitchen, where food is provided, without the exaction of work, for the helpless poor. It appears that the average cost of the daily ration provided by the Committee, including every item of expenditure, such as cooks, cooking utensils and firewood, is 9·9 pie. The ration consists of jowari cakes varying in number with the sex and age of the recipients, with the addition of a certain quantity of dall, &c., providing the requisite nitrogenous matter, and the Committee have no doubt, after four months' experience, that the allowance has amply satisfied each recipient.

3. Tables (A) and (B) are appended as before. It will be noticed that on the 3rd March, the latest date for which complete information is available, the number of people upon works under civil agency had again decreased, and amounted only to 37,060, while the number upon works under the agency of the Public Works Department was 171,415. Only about one-sixth of the labourers were, therefore, upon civil works during that week.

4. Maps of the affected districts are forwarded with this Summary, although there is very little fresh to record that can be exhibited in this form.

5. The following table gives the expenditure by Government during the week ending 3rd March upon charity in the relief of the aged and infirm poor, and in payments made to the young children of labourers employed upon relief works:

Districts.	Collectors' discretionary grant.			Expenditure incurred on account of children under 7 years of age whose parents are upon relief works.		
	Average number of persons relieved during the week.	Expenditure during the week.	Total expenditure up to date.	Average number of children and of Women taking care of them.	Expenditure during the week.	Total expenditure up to date.

* No expenditure has been incurred by the Collector.
† Return from the Executive Engineer for Irrigation not received.

6. A table is appended, showing the condition of the affected Native States.

7. With regard to the movements of food-grains, 3,701 tons were exported from Bombay to the Southern Mahratta Ports during the week ending 7th March, and during the same week 3,137 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Nasik-Bhusawal lines, making a total of 6,838 tons for the week. The table below shows the quantities of grain sent by sea and rail from October till the 7th of March to the Southern Mahratta Ports and the railway stations in the distressed districts. It will be seen that the total amount delivered up to the 7th of March was 1,94,884 tons:—

Food-grains sent to	In October 1876.	In November 1876.	In December 1876.	In January 1877.	In February 1877.	In March (up to 7th.)	Total.

NOTE.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered. These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

REPORTS ON THE STATE OF THE SEASON AND PROSPECTS OF THE CROPS FOR THE WEEK ENDING THE 22nd MARCH 1877.

GENERAL REMARKS.—Rain, in many places amounting to upwards of an inch, and in some to as much as two inches, is reported from all the districts of Madras, except Chingleput, South Arcot and Tanjore; the numbers on relief works are 658,000, about 1,000 less than the (revised) total of last week; there is an increase of 9,400 in Bellary, 4,400 in Chingleput, and 1,100 in Salem: a decrease of 13,800 in Nellore, 1,200 in Cuddapah and 1,000 in Coimbatore. From Mysore also general heavy showers are reported, but the rain is said to have been insufficient to effect much good. In Bombay there has been a little rain in Sholapur and Khandesh: in Sind there have been hail-storms with some damage to crops. In the Central Provinces rain and hail are reported from 11 out of the 19 districts: some damage has been done, but prospects are generally good. Hail has done some injury to the poppy crop in Central India. In Rajputana, prospects are good. No rain has fallen in Berar. In Bengal, there has been almost general slight rain; hail has injured the crops slightly in a few places, but prospects are generally very favourable, and the spring crops are yielding well. Rain and hail are also reported from several districts in the North-Western Provinces and Oudh, but the damage has been slight. Rain fell in all the districts of the Punjab, except Mooltan and Dera Ismail Khan; prospects are very good.

Presidency or Province and District.		Rainfall for week preceding.	State of agricultural prospects.
Madras—			
Kistna	(Mar. 19th)	·17 at Masulipatam, ·70 at Repalli, ·80 at Bezwada and Nandigama, ·50 at Tirur, 1·60 at Gudiwada, 1·80 at Bapatla, 1·35 at Guntur, 1·0 at Narsarowpet, 3·10 at Palnad.	General rainfall on night of 15th; standing crops under wells good; *raggi* outturn full; *dalwa* paddy suffering from blight; prices risen in 8 taluks; cholera seizures 390, deaths 176; fever, small-pox, and cattle disease in some taluks; markets fairly supplied; 3,391 on relief works; 1,073 fed *gratis*; seers of 80 rupees weight—rice 8·63, *cholum* 11·78, *raggi* 14·27, *cumboo* 11·59; imports by sea—rice 126·58 tons, *raggi* 1·7.
Kurnool	(„ 20th)	·61 at Markapur, 1·10 at Cumbum, besides that reported on 16th, 18th, and 19th.	In Sirwell and Ramulkota *cholum* and paddy crops in good condition under wells and spring channels; cholera, fever, and small-pox prevalent; cattle dying, a few being fed on prickly pear in Kurnool; second sort rice 7·14, *cholum* 8·91, *cumboo* 9·31, *raggi* 9·89, seers per rupee; number on relief works 192,028; gratuitously fed 31,577; Government grain imported 278 tons; emigration to East Coast Canal commencing.
Cuddapah	(„ 20th)	Average rain in all taluks 1·03.	Average prices, seers per rupee, in present week—second sort rice 7·45, *cholum* 5·86, *raggi* 10·75, *cumboo* 8·59; people on relief works 57,027, gratuitously fed 3,088; deaths from cholera 625; number of cattle died for want of fodder and disease 1,545.
Bellary	(„ 20th)	·8 at Hindupur; ·5 at Pennukonda; ·6 at Anantapur; ·3 at Gooty; 1·4 at Tadpatry.	Average price, second sort rice 7·29, *cholum* or great millet 8·86, Jubbulpore *cholum* at Bellary 10·82, *raggi* or lesser millet 8·96, *cumboo* 8·31 seers of 80 tolahs; import—tons 4,342, accounts from three railway stations only; 225,936 persons on relief works; increase as compared with revised return for previous week 9,482; this is owing to more coolies having come from different villages in some taluks, and to the admission of coolies from Dharwar and Nizam's territory in the Hadgally taluk; 21,181 gratuitously fed; increase as compared with revised return for previous week 3,829; this is chiefly owing to the admission of children of coolies on relief works in some taluks, and to some more infirm persons in need of relief having been fed in others; 3,387 gratuitously fed by private charity aided by Government grant; cholera in 14 taluks; small-pox and fever also prevalent; cattle still perishing from want of fodder; supply of drinking water diminishing, but not exhausted.

N. B.—In the Supplement to the *Gazette of India*, March 17, 1877, page 487, opposite Kurnool, for "*sajja* or *cumboo* 9·91," read "*sajja* or *cumboo* 9·29, *raggi* 9·91"; and opposite Bellary, for "*cholum* or great millet 8·3,' read "8·83;" and for "*raggi* or lesser millet 8·37" read "*raggi* or lesser millet 8·92, *cumboo* 8·37."

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Madras—continued.		
Nellore (Mar. 20th)	·25 in Gudur, ·95 at Rapur, ·25 at Nellore, 1·0 at Atmakur, ·32 at Kavali, 1·0 at Udayagiri, 1·5 at Kanigiri, ·35 at Darsi.	Second sort rice 7·80, *cholum* 10·3, *raggi* 11·96, *cumboo* 9·52 seers per rupee; 90 tons of Government rice and 377 tons of private rice imported; number on relief works 70,580, including canal coolies, decrease result of reduced wages, task-work, and non-employment of able-bodied persons on way to canal or refusing to go there; gratuitously fed 5,935, decrease due to stricter supervision; 230 deaths from cholera; small-pox, dysentery, cholera, and fever prevalent throughout the district, first particularly so in 5 taluks; fresh in Pennair on 16th; water supply in villages near river improved; large numbers of cattle died for want of fodder.
Chingleput („ 20th)	*Nil*	Prices, second sort rice 9·39, *raggi* 11·04, *cumboo* 10·78, *cholum* 10·42; import of grain 133 tons; number on relief works 10,996, gratuitously fed 5,705; cholera, fever, and small-pox prevail; pasture *nil*; water very scarce.
North Arcot („ 20th)	Average rainfall of 5 stations 0·86.	For week ending 16th March, average prices in Government seers, second sort rice, per rupee, 8·1, *cholum* 9·5, *raggi* 9·7, *cumboo* 8·6, wheat 5·9; relief works, coolies 15,374; gratuitously fed 1,712; cholera still prevalent; fever and small-pox in some parts; pasture scarce; cattle are dying of starvation in some parts.
South Arcot („ 20th)	..	Rice, second sort, 9 seers, *cumboo* and *raggi* 11 seers each, *cholum* 12 seers; rice imported 25½ tons; number employed 621; gratuitously fed 45; cholera, deaths reported 252 out of 314 seizures; cattle disease in some villages; pasture and water deficient.
Salem („ 20th)	1·18	Prices of grain, seers of eighty tolahs, rice 7 3/8, *raggi* 8¾, *cumboo* 8 7/8, *cholum* 8¾; import of all grains 1,230; number on relief works 47,850; number gratuitously fed 3,310; ditto private 920; cholera in all taluks.
Coimbatore („ 20th)	2·40 at Bhowany, 2·0 in some villages of Sattiamangalum; slight in every other taluk—·14, ·15, ·16—general average ·46.	Prices in most taluks stationary; slight rise in rice in Calligal and Erode; in *cholum* in Erode, Coimbatore, Caroor, and Dharapuram; in *raggi* in Calligal and Sattimangalum districts; average, second sort rice 7·86, *cholum* 9·38, *raggi* 9·97, *cumboo* 10·48; imports of rice estimated 366 tons, other grains 229; cholera prevalent in all taluks, 570 attacks, 355 deaths; cattle poor; 1,000 deaths from insufficient fodder and disease on Burghoor range of hills, losses also on Hassanoor hills; fodder scarce; no cultivation except to a small extent under wells; on relief works 23,189; gratuitously fed 1,746; the tahsildar of Sattiamangalum reports that the pariahs, chucklers, and weavers have lost flesh and strength; the division officer reports the same in reference to North Bhowany; Mr. Cook at Oodoomulpetta reports no apparent detioration since last report.
Tanjore („ 20th)	*Nil*	Price, seers, rice 8¾, *raggi* 11½, *cumboo* 10½, *cholum* 11; imports of rice 2,402 tons; relief works none; 239 deaths from cholera; cattle generally healthy.
Madura („ 21st)	Average 1·09 ·47 at Madura, ·75 at Tirumangalam 1·35 at Melur ·85 at Dindigul. 2·00 at Palany. 2·20 at Periakalum.	A few tanks received small supplies: rice 8¾ seers per rupee *cholum* 10 1/10, *raggi* and *cumboo* almost stationary; import of rice 816 tons, other grains 94; number on relief works 8,040; charitable relief 746; people continue to emigrate to other places; cholera and small-pox not abated, 319 deaths; condition of cattle unaltered; cattle disease continues generally.
Trichinopoly („ 21st)	0·85	Second sort rice 7 5/8 seers, *cholum* 16¼, *raggi* 10¾, *cumboo* 10½; import of grain for week ending Saturday, 77 tons; no relief work, all coolies having struck; gratuitously fed on 17th by public subscription 1,379; 252 attacks of cholera, 129 deaths; small-pox, 379 seizures, 35 deaths; condition of cattle and pasture same as last week.
Tinnevelly („ 20th)	...	Good rain throughout the district on night of 16th; moderate freshes in rivers, and some tanks received partial supplies; no abatement in cholera; cattle disease still prevalent, with slight mortality; prices almost stationary; average prices per rupee, second sort rice 8 seers of 80 tolahs, *cholum* 9, *cumboo* 10¾, and *raggi* 11; imports of grain, rice 2,031, *cholum* 2, and *cumboo* 24 tons; number on relief works 1,685; number gratuitously fed 260; decrease in number on relief works owing partly to recent rainfall and partly to non-receipt of accounts from two divisions in Ottapidar am taluk.
Malabar („ 20th)	Average under 1·0	Showers in north-east, south-east and south; markets well supplied; imports by sea and land, rice 3,366, *raggi* 215, *cholum* 321 tons; exports, rice 875, *raggi* 348 tons; prices of rice slightly risen in Cochin and Ponani, fallen in three taluks, stationary in others; highest 7 7/8 Indian seers in *Wynaad*, lowest 10 3/8 in Calicut; average 9 5/8 Indian seers per rupee; *raggi* 11½ Indian seers per rupee in *Wynaad*; cholera in six taluks, deaths 144; small-pox in seven taluks; cattle healthy, pasture failing; fruit trees suffering severely; 1,089 coolies on Kolathur roads; general prospects still unchanged; exports of grain from Madras by rail approximately 7,500 tons up to Saturday, 17th.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bombay—		
Sind (Mar. 21st).		
Kurrachee ...	...	River at Kotri on 12th 5 feet 6 inches, being 7 inches higher than on same date last year; 58 cases of small-pox recovering; in Kurrachee on 11th 7 fresh cases; no deaths reported since 4th, when one occurred; crops in Dádú and Tatta talukas attacked by *rati* (blight); great storms at Keti on 6th, 10th and 13th; property worth Rs. 17,181 destroyed.
Shikárpur	...	Preparations for *pehrus* crops being made; rain and hail fell in western portion of the collectorate.
Upper Sind Frontier ...	...	Weather warm, with dust storms; hail-storm near Thul, slight damage; cattle disease in Ghutt reported.
Guzerat (Mar. 21st).		
Ahmedabad ...	..	No change.
Kaira ...	...	*Rabi* crops harvested; cotton-picking continues.
Surat ...	...	No change; cotton being picked.
Broach ...	...	No change.
Khandesh and Násik (Mar. 21st).		
Khandesh ...	...	Rain in Jamner taluka; fever and small-pox continue in some talukas.
Násik ..	...	No change.
Konkan (Mar. 21st).		
Tanna ...	..	Land being prepared for next monsoon crops; small-pox continues in Wara, Bhiwandi and Bassein talukas; one death from it in Bhiwandi.
Deccan (Mar. 21st).		
Poona ...	...	Small-pox as last reported; few cholera cases in three and cattle disease in two talukas.
Ahmednagar ...	...	Cholera in one taluka, cases 7, deaths 3.
Sholapur ...	·11	Slight cholera in Mádha taluka.
Satara ...	...	Small-pox in Satara and Khatau talukas; 55 deaths from cholera.
Southern Mahratta Country (Mar 21st).		
Belgaum ..	...	Deaths from cholera 353.
Dharwar ...	...	Deaths from cholera 472.
Kanara ...	...	Deaths from cholera 98.
Kaládgi ...	...	Deaths from cholera 90.
Kattywar and Gaekwar's Territory (Mar. 21st).		
Rájkot ...	.	Small-pox in Nawánagar and Rajkot talukas; general health good; weather hot.
Wadhwán ...	..	Weather getting warm; measles slightly in two talukas.
Baroda ..	...	Few cases of small-pox in Baroda; cotton-picking over.
		General Remarks.—Small-pox continues in Sind and cholera in Southern Mahratta Country; *rabi* harvests approaching completion in Guzerat; no material change from last week.
Bongal--		
Chittagong ...	*Nil*	Weather clear and seasonably warm; the cold weather crops promise well, and the seedlings of the *pania aous* are germinating; cholera has almost abated.
Noakholly ...	·05	Weather becoming much warmer; slight rain fell on the 10th and 11th instant; pulses, chillies, &c., are progressing fairly; ploughing for the early rice is going on actively everywhere; cholera has abated considerably throughout the district, except in the low parts of the Begumgunge station.
Chittagong Hill Tracts...	*Nil*	Weather cool and pleasant in the morning and hot at noon; the cutting of *jooms* for the purpose of cultivation is progressing; the tobacco plants are thriving well and the prospects are good; cholera has again broken out at Bandarbán, and is prevalent in many parts of the district.
Hill Tipperah ...	1·40	Weather warm and occasionally cloudy; rain on the night of the 12th instant, accompanied by hail-storm; state and prospects of the crops continue good.
Backergunge ...	*Nil*	Weather seasonable, but getting hotter daily; the state of the crops is reported good; there is a great improvement in the health of the people; sporadic cases of cholera still occur in some places, but the disease in an epidemic form is said to have ceased; the cattle are healthy everywhere in the district.
Furreedpore ...	·17 1·71 at Gonlundo and ·7 at Madareepore.	Weather now fair and cool; the state of the crops is satisfactory; an outbreak of cholera is reported from a village in the sudder subdivision.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—continued.		
Dacca ...	·29	Particulars not furnished.
Mymensingh ...	·07	Weather cloudy and unsettled; occasional showers of rain; state and prospects of the crops are favourable.
Tipperah ...	*Nil*	Weather cloudy, rainy, and hot for the time of the year; the spring rice is thriving well, and there are no other crops of importance on the ground at present.
24-Pergunnahs ...	·57 Previous week ·03	Weather, days hot and nights cool; a little rain fell on the 16th instant; lands are being prepared for the spring sowings; public health is generally good; only a few cases of cholera reported from the Baraset and Barripore sub-divisions.
Jessore ...	·89	Weather fine, with occasional thunder and showers; the harvesting of the cold weather crops is nearly over; the tapping of date trees is closed or closing; wheat is being cut; the ploughing for, and the sowing of, early rice and indigo are going on; all prospects are good.
Nuddea ...	·17	Weather cloudy and close; there was a slight storm on the night of the 16th instant, which has cleared up the air; the harvest is progressing favourably, and the weather has hitherto been most favourable for the preparation of the rice-fields.
Moorshedabad ...	·11	Drizzling rain on the 15th and 16th instant; the weather seems to be clearing; there is hardly any change to report; the *rabi* crops are being reaped, and the outturn is generally expected to be favourable; *boro dhan* is still being sown, and land being prepared for *aous dhan*; general health is good.
Pubna ...	·98	Weather variable; there was a severe hail-storm on the 10th instant; state and prospects of the crops continue to be generally satisfactory, although the hail is reported to have damaged some of the standing crops and the mango blossoms.
Rajshahye ...	·21	In the commencement of the week the weather was hot, but for the last few days it has been cloudy and cool, and slight rain fell on the 15th and 16th instant; the *rabi* harvest has commenced; the autumn rice and *til* (*sesamum*) are being sown, and transplantation of the spring rice is nearly completed.
Bogra ...	·16	Weather very hot at the beginning of the week, afterwards wet and foggy; the crops are all very good.
Dinagepore ...	·19	Weather cloudy; the *rabi* crops are being harvested with large outturn.
Rungpore ...	·30	Weather seasonable; there was a little rain on the 11th instant, and the 16th was rainy; the outturn of the *rabi* crops will be good.
Cooch Behar ...	1·03 ·32 at Mátabhánga and 1·00 at Dinháta.	Weather getting warmer, cloudy at times, and one heavy storm with thunder and hail; the sowings of *bitri dhan* and jute have commenced under favourable weather; general health is good.
Jalpáiguri ...	·28	Weather cool; the tobacco crop is being cut, and is likely to yield a good outturn, though the rain and hail of this week have to some extent injured the leaves in the southern part of the district; the land is in good condition for being ploughed for the autumn rice.
Darjeeling ...	·54	Weather milder; there has been a good deal of wind, with occasional showers of rain, during the week; wheat and barley are progressing favourably; potato and *bhootta* and *kaonee* (millets) are now being sown.
Midnapore ...	·19	Weather cooler of late; storm and rain on Friday night at headquarters; state and prospects of the crops are good.
Howrah ...	·90	Weather, a heavy storm of hail and rain on Friday night; there are no crops on the ground to be injured by the hailstorm.
Hooghly ...	·24	Weather warm, cloudy in the evening and slight rain on the night of the 16th instant; barley and wheat are being harvested; the rice lands are still being ploughed; there is sporadic cholera in the district.
Burdwan ...	·21 ·01 at Raneegunge.	The *rabi* crops are being harvested; cholera is reported to be prevalent in Culna, Sudder, Jehanabad, and Raneegunge subdivisions.
Bankoora ...	·11	Weather cloudy and threatening, with a little rain towards the end of the week; the rain, though slight, has been beneficial to the indigo and cotton crops.
Beerbhoom ...	·40	Weather damp and cloudy; state and prospects of the crops continue good.
Sonthal Pergunnahs ...	*Nil* ·8 at Deoghur, and a few drops at Rajmehal.	Weather, slight showers on the 15th and 16th instant, which have reduced the temperature; the harvesting of wheat and barley has commenced in parts of the district; the *mohwa* season is beginning, and promises to be a good one.
Bhágalpur ...	·38	Weather pleasant; north and east winds prevailing; the *rabi* crops are ripening fast, and harvesting has already commenced, general health is very good.
Monghyr ...	Return not received	Weather fair; the *rabi* harvest is going on, and the outturn, as expected, is good.
Purneah ...	·19 ·63 at Kissengunge.	Weather cloudy and stormy during the week, cool and clear, with west wind, on the 17th instant; state and prospects of the crops are favourable.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Bengal—concluded.		
Maldah ...	·23	The weather, which was getting daily warmer during the first four days of the week, has been cooled by the slight rains on the 15th and 16th instant, attended with south-easterly and north-westerly winds; it was generally fair; the crops are all as good as before; fifteen deaths from cholera reported.
Durbhunga ...	·02	Weather cloudy; mornings cool; the state of the crops is quite satisfactory.
Mozufferpore ...	Return not received.	Weather seasonably warm; the prospects of the *rabi* crops are excellent; the prices of food-grains are stationary; public health is good.
Sarun ...	·37 ·06 at Sewan.	Weather very hot and threatening at the commencement of the week; here was a dust-storm on the night of the 12th instant, and a thunder-storm accompanied with rain on the morning of the 16th; the wind has now veered to the west, and the weather is beautiful; the *rabi* harvest is going on; the late rain must have slightly injured the *rabi* crops, opium, and indigo newly sown; the usual imports have fallen off, probably owing to the drain caused by the famine, and consequently the prices have generally risen; general health is good.
Chumparun ...	*Nil*	Weather cloudy; it drizzled for a short time on the 15th instant; the *rabi* crops are being harvested, and the outturn is over the average.
Patna ...	·18	Weather daily getting warmer, slight rain fell in the early part of the week; the harvesting of *rabi* crops is in fair progress; sporadic cholera and small-pox exist here and there in the district.
Gya ...	·10	Weather cloudy, with rain, and cold for this time of the year; no change in the prospects of the crops, which are satisfactory.
Shahabad ...	·05	Weather cloudy and rainy at the beginning of the week; peas and *musoor* pulse are being gathered; other crops continue promising.
Hazáribágh ...	2·89	Weather unseasonably damp and wet; there has been a heavy thunder-storm accompanied with rain; the rain has done a good deal of damage to wheat, barley, and gram, which are now on the ground remaining uncut; but much of these crops damaged will be recovered if there is no more rain; health of the district is good.
Lohardugga ...	·70 ·25 at Palamow.	Weather fair and cloudy alternately till Friday, the 16th instant, when two very heavy falls of hail took place, which must have injured the *mohwa* crop, which is now ripening, also the wheat, *rahar*, *musoor*, barley, and gram, which are all now about to be harvested; the mango is now in flower, and must have suffered too; all these crops gave full promise before; general health is good.
Manbhoom ...	·41	Weather pleasant but somewhat unseasonable; the only crops now on the ground are a little sugarcane, wheat, barley, and garden produce; the rain will possibly injure the *mohwa*, but as rice is cheap, this will not be of much consequence.
Singbhoom ...	*Nil*	Weather seasonable; no crops to report; health of the district is good.
Balasore ...	·24	Weather generally fine and dry; the ploughing progresses; sporadic cholera is frequent, chiefly along the pilgrim route.
Cuttack ...	·05	Weather hot and dry; most of the *rabi* crops are gathered with good outturn; cotton, sugarcane, and *dalua* rice require some rain now.
Pooree ...	*Nil*	Weather seasonable; the crops generally are progressing well, except the mango, which was injured when in blossom; some of the *dalua* paddy has begun to ripen; ploughing is going on; prices of rice and other food grains are almost stationary; shipment of rice is brisk; cholera is very rife, both in the city and the district.
		General Remarks.—Rain has fallen in most places during the week; in some places it was attended with storm and hail, causing damage to the standing cold weather crops; these crops are being harvested, and the outturn is generally good; the spring rice is doing well; the preparations for autumn rice, indigo, and jute are in fair progress.
N. W. Provinces—		
(Mar. 21st)		
Benares (Mar. 19th)		Prospects favourable.
Allahabad („ 21st)		Prospects good; certain amount of damage done by hail in a few localities.
Agra („ 21st)	From ·15 to ·8 notches.	Hail in five parganas, causing some damage, especially in Jalesar; weather still threatening.
Meerut („ 21st)		Rain and slight hail on 14th; no damage.
Bareilly („ 21st)	1·0	Crops damaged to some extent by hail-storm in some parts; weather cloudy.
Oudh—		
Lucknow (Mar. 21st)	*Nil*	Prospects favourable.
Sitapur („ 21st)		Week's rain did much good to sugarcane; harvesting c
Punjab— (Mar. 21st)		
Delhi	·5	Crops have not suffered; health good.
Hissar	2·0	Weather still cloudy; crops ripening fast; excellent harvest expected, but there were some damages by hail.

Presidency or Province and District.	Rainfall for week preceding.	State of agricultural prospects.
Punjab—continued.		
Umballa	·5	
Jullundur	1·3	Health and crops good.
Lahore	3·0	
Ráwalpindi	1·0	Agricultural prospects and health good.
Mooltan	*Nil*	Harvest prospects and health good.
Dera Ismail Khan	*Nil*	Health and harvest good.
Pesháwar	·5	Agricultural prospects and health of district good.
		General Remarks.—Agricultural prospects still continue good.
Central Provinces—		
Upper Godávari (Mar. 17th)	·27	Cloudy; *rabi* threshing continues, yield about half the average; health good; prices steady.
Sambalpur ...		Cloudy; ploughing continues; cholera prevalent.
Bilaspur ...	·75	*Rabi* crops injured by recent rains; fever and small-pox continue; prices steady.
Raipur ...	·73	*Rabi* damaged by rain; few cases of cholera; prices easy.
Bálághát ...		Clear; days hot, nights cool; wheat slightly injured by blight; cattle disease continues; prices rising.
Chhindwára ...	·22	Cloudy; *rabi* gathering; health good; prices steady.
Chánda (Mar. 18th)	·20	Cloudy; standing crops injured by hail; threshing continues, cattle disease prevalent; prices stationary.
Betúl („ 19th)	·79	*Rabi* crops damaged by hail; health good; prices stationary.
Bhandára („ 20th)		Clear; threshing of *rabi* continues; cold below average; fever and cholera continue; prices easy.
Nágpur („ 21st)	·47	*Rabi* gathered and being threshed; measles slightly prevalent; prices steady.
Wardha ...		Clear; health good.
Nimár ...		Days warm, nights cool; small-pox continues.
Hoshangabad ...	·12	Prospects exceedingly good; prices easy.
Narsinghpur ...		Wheat and gram injured by rain and hail; health good; prices slightly risen.
Jubbulpore ...	1·77	Slight hail; no injury reported; *rabi* excellent; reaping continues; health good.
Saugor (Mar. 22nd)		Hail in places; no damages reported; wheat and gram reaping.
Seoni ...		*Rabi* gathering; slight cholera.
Damoh ...	·8	Prospects good; prices easy.
Mandla ...	2·26	*Rabi* good, except *masur*, which has been injured by recent rains fever and measles continue; prices falling.
		General Remarks.—In spite of damage by hail, prospects remain good.
British Burma—		
Arracan Division (*Mar. 22nd*)		Eighteen deaths from cholera in Akyab Town; a few cases in Naaf, Rathaidoung, and Membya townships, otherwise public health normal; cattle disease in portions of Akyab district.
Pegu Division.		
Rangoon .		Slight cholera in district, otherwise public health good.
Thonkwa .		Health generally good; one case cholera at Maoobin.
Bassein .		One case cholera in town; 4 in Kindat; slight cattle disease in Zaygyoung.
Henzada .		Slight cattle disease and small-pox in Mengyee, Tahpoon, and Myanoung townships, otherwise public health good.
Prome .		16 deaths from cholera in Prome, in Mahathaman 7; small-pox in Prome 17 cases, no deaths.
Thayetmyo .		Health generally good.
Tenasserim Division .		Agricultural prospects good; public health fair; cholera in Moulmein; small-pox in Mergui and Shwegyoen.
Assam—		
Gauháti (Mar. 22nd)	·81 Slight showers on 16th, 17th, and 21st.	Hot and oppressive at beginning of week; *asu* cultivation commenced; public health good.

Shapura („ 17th)		
Bhurtpore („ 22nd)	*Nil*	Weather seasonable; health good; prospects of crops fair.

G. H. M. BATTEN,

Offg. Secretary to the Government of India.

GOVERNMENT

DEPARTMENT OF REVENUE,

STATEMENT REGARDING THE CONDITION OF THE PROVINCE

'RICTS.	Area in square miles.	Affected area in square miles.	Population	Population of the affected area.	Condition of Districts as reported.	No. and description of works in progress under Revenue Officers.			
						Roads.	Tanks.	Miscellaneous works.	Total.
1	2	3	4	5	6	7			
lore ...	2,914	1,914	828,354	384,968	Markets well supplied by importation, except at Anekal, where ragi was scarce owing to prevalence of cholera. Sugarcane, irrigated ragi, javari and Bengal-gram were sown in Hoskote, Nelmangala and Anekal taluks wherever water was available. Sugarcane mills at work in some of the taluks; no rain; cholera and small-pox prevail. Cattle suffer from want of fodder and from murrain. Emigrants towards the Malnad are returning, and flocking into Bangalore. Prices of rice and ragi have risen slightly. Bengal-gram and javari are drying. Potatoes and other garden produce under wells in tolerably good condition.	56	57	180	293
...	2,577	2,577	618,954	618,954	Markets fairly supplied. Prices have risen owing to delay in the transport by rail of grain from Madras to Kolar. In the Gumnayakanpalya and Gudibanda taluks importation of grain is slack owing to cholera. No rain. Sugarcane cultivation is carried on in the Malur and Gumnayakanpalya taluks; in Goribidnur rabi paddy was sown under wells. Javari and Bengal-gram, sown in beds of tanks, are doing well; in some places such crops have been harvested. Cholera prevails more or less in all taluks, but in Malur it is very severe. Murrain also among the cattle here and there.	40	186	72	298
túr ...	3,606	3,606	632,239	632,239	Markets well supplied, except in the Maddagiri taluk, where cholera prevents sufficient importation of food-grains. No rain. Javari was sown in the Túmkúr taluk. The standing crops, javari, Bengal-gram and rabi paddy, are promising. In Chiknayakanhalli taluk cocoanut and areca-nut trees are withering for want of moisture. Emigration to the coffee districts continues though some are returning. Cholera prevails more or less throughout the district. Scarcity of water is felt in many places. Prices stationary. Forage is imported from the Hassan District to the Honnavalli taluk and sold at high prices.	67	208	31	306
e ...	4,127	1,470	943,187	118,032	Markets sufficiently supplied by importation. No export or import in Yedatore owing to prevalence of cholera; no rain; javari was sown during the week under report in Chamrajnagar taluk; sugarcane and cotton crops are withering in the Malvalli and Gundlupet taluks. Bengal-gram, sown in beds of tanks, is thriving; there is cholera in every taluk, and murrain among cattle, and water scarce; many head of cattle were taken to the jungles. The pasture in the jungles of the Gundlupet taluk is reported to have been destroyed by fire. Emigrants are returning. Prices have slightly fallen.	25	15	23	6
san ..	3,291	2,154	668,417	190,873	Markets fairly supplied, except in the Arkalgúd and Harnhalli taluks, where more is required. No rain. The standing crops, javari and sugarcane, are in tolerably good condition. Bengal-gram in the bed of the Channaraypatna tank is withering; a peculiar blight has been observed on some paddy called Kodebhatta. Cholera and small-pox in the town of Hassan, and Cholera in other parts of the district.	17	35	40	
noga ...	3,797	388	498,976	47,431	Markets moderately supplied. Sugarcane, Rabi paddy and Bengal-gram are in tolerably good condition. The latter withered in some parts of the Channagiri taluk. Cholera prevails to a limited extent in some of the taluks. Scarcity of water is much felt in the Channagiri and Honnali taluks.	10	11	47	
lur ..	2,294	691	333,925	100,444	Markets fairly supplied. All the crops are withering in Tarikere. Sugarcane, Bengal-gram and javari are *being harvested*. A slight rise in prices in the Tarikere taluk. Cholera prevails.	16	24	79	1
ldroog ...	4,471	4,238	531,360	511,204	Markets fairly supplied. Importation into the Budihal taluk is slack on account of cholera. The standing crops are in fair condition, except in the Kankuppa taluk, where javari crops in the beds of tanks have withered. Emigrants are returning to their houses. Cholera prevails throughout the district, but not in an epedemic form. On the whole, there has not been much change in the condition of the district.	25	63	175

GENERAL REMARKS.

The area and population of the affected tracts remain practically unal-ed. Instructions to Divisional Commissioners on the point have been t, with a view to their possible correction if necessary. The daily rage number of persons employed on works carried out by the Reve-e Officers shows a decrease from last week of 7,597 chiefly in the rsore and Túmkúr districts; there is possibly some mistake, and ex-nation has been called for, but cholera has separated gangs, and vented others from attending; the operation too of the Chief Com-sioner's Proceedings No. 11381 of the 9th February last, regarding ase-to-house visitation, has probably led to a transfer to the relief chens, of some of those on relief works, who were in a physically it condition to do even moderate work. Regarding this gratuitous lief, clear rules are being laid down: (1) for a well-considered scale of t for general adoption throughout the province, in our kitchens; (2) systematic supervision over the expenditure; and (3) for an accurate lit of the accounts under the different forms of relief. If cholera and all-pox be excluded, the public health has been fairly good. But the ths from the former disease which is of a virulent type are very large. r seven districts they were as below:—

Bangalore	373
Kolar	703
Túmkúr	464
Mysore	459
Hassan	310
Shimoga	4
Kadur	51
TOTAL ..	2,364

The return from Chitaldroog was not received. The Deputy Commis-ner of Túmkúr sends in a statement shewing totals of those attacked, l the deaths therefrom, from 1st January to the 8th March inclusive; numbers are respectively 3,127 and 2,237. It is to be hoped that the of the wave of this visitation has been reached, and that future urns may be more favorable. The Commissioner of the Nundydroog rision describes the panic resulting from the terrible scourge to have rorse effect than the famine itself. The coolies employed on relief rks are said to be doing fair work, and District Officers are cheerfully ng all in their power to mitigate the distress in its varied form. It en reported that a large number of persons who had hitherto found ployment in the frontier zillah of Bellary have returned to this vince, as work was no longer available for them there on easy terms. e fact that large numbers of coolies had been attracted, by the pros-t of good pay to the above zillah, to the Wynad, and to other dis-ts of the Madras Presidency, has formed the subject of correspond-e between the Government of Madras and this Administration. By uest of the former, an Assistant Commissioner has been deputed to ange for the removal to their taluks of all emigrated Mysoreans who y be receiving State aid in the taluks of Madaksira, Hindupur and nakonda. Similar arrangements will be made elsewhere if necessary. regards the question of the temporary maintenance of such emigrants the neighbouring presidency; at the cost of the Mysore State, it was nted out—(1) that the migration was not desired or encouraged, (2) t the inducements to migrate to obtain gratuitous relief were unduly at, (3) that ample relief works were open for them on the condition of k work within the province, and (4) that there was no lack of grain plies. They have now for some time past been returning in gangs, l are being provided for in their taluks.

The following weight of grain was received during the week, chiefly m Madras and Beypore:—

	Tons.
At terminal station	1,756
At Kolar Road	225
TOTAL ...	1,981

falling off as compared with the preceding week. The notification garding the equalization of rates from Nagapatam was received only the 8th. The merchants are fully alive to the advantages of this rnative route, and results will be reported hereafter. The supply m the Western Coast may be expected to cease entirely in the early rt of May, but the port of Negapatam will continue open till October. cal markets are in some instances slightly depressed, but prices are nerally steady, and there is every present indication that sufficient for r requirements will be imported through the agency of private trade; e provision, however, in this respect is carefully exercised. On the 1st rch a scale showing the minimum amount of food that each working ult and child should have daily, was published, *viz.*:—

	A.	P.	
A. For a man, 60 tolas of ragi, the *present value* being	1	6	
Extra in cash for condiments		6	
			2 as.
B.—For a woman, 40 tolas	1	3	
Extra in cash		3	
			1 6
C.—For children from 7 to 14 years, 30 tolas ...		9	
Extra in cash		3	
			1—0

D. For children above 14, scale A or B according to sex.

It was at the same time enjoined on district officers (1) that payments should not be made unless under exceptional circumstances that the most able-bodied men and women should be employed b professional department, (3) that task or piece work should be ex (4) that on relief works under Revenue Officers, the rate of 1 6 pies per cubic yard for earth-work should only *very exceptio* be exceeded, (5) that a just discretion must be exercised, and should grain become dearer, *pro rata*, money payments should be to allow a laborer to earn sufficient to purchase the quantity and q of grain, &c., laid down in the tentative scale.

Colonel Hay, the Commissioner of the Ashtagram Division, state that except in Mandya, Periypatna, Yedatore and Harnhalli Taluks is no actual famine; (2) that importation of rice *viâ* Madras is tc rarily suspended, as home grown grain is procurable, as well as tha ported from the Malnad and from Mangalore; (3) that kitchens have established on the main lines of road from Coorg and the W where special officers dispense charity to destitute coolies returning the coffee estates; (4) that special relief officers have been appointe each taluk (this is general throughout the province) to superi village relief; (5) that two special officers have been appointe arrange for the economical distribution of fodder to the herds of brought to the forest tracts from the plains, (Colonel Pearse also re the care taken in this way by owners of their better kind of cattle) that on the Biligirirangam Range of Hills 99 herds containing 8,900 of cattle, of which about 5,300 belong to a neighbouring zillah o Madras Presidency, find fair pasturage, that about 7,000 cattle 2,000 sheep are pastured in the remaining jungles of the Mysore trict, and that many others procure subsistence in the Malnad talul the Hassan District. Colonel Hay adds that half of the Gover demand in some taluks, and one-fourth in others has been realize that steps have been taken to remove the erroneous impression that a tion from the province would ensure remission of the demand. close personal observation Colonel Hay remarks that the employ relief works were not only working well, but looked well-cared fo that many of them appeared to have resorted to the works not as resource, but with the laudable object of earning a little mone future requirements. Commissioners of Divisions have been asked t mit bi-monthly reports in this narrative form, to supplement the w statistical information. These will be printed for submission to Go ment periodically, with a brief provincial report, the first, *viz.*, from the 1st to 15th current to contain a brief resumé of the rise progress of the scarcity from July last to date. Cheerful co-oper by all the Officers of the Administration is a characteristic of this of difficulty.

In his report, dated 27th February last, on the Ainur-Bennavalli in the Shimoga Division, the Superintending Engineer, Roads Buildings' Branch, reports that the collection of gravel is now g employment to some 200 coolies, who all looked fat and well, and there was no scarcity of grain. Of the 200 persons so employed of them came from the Bellary District.

Register of Rain-fall recorded scientifically at the Government Observatory at Bangalore, for each week in the year, as the usual monthly averages do not give sufficiently reliable information in a tropical climate.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

MINUTES AND MEMORANDA FROM SIR RICHARD TEMPLE.

No. 16, dated 23rd March 1877.

From—The Government of India,

To—Her Majesty's Secretary of State for India.

WE enclose, for Your Lordship's information, copies of Minutes and Memoranda which we have received from Sir Richard Temple during the past week, referring to the following subjects:—

1st.—The utilization of the Negapatam port and route for the supply of grain to Bangalore and the Mysore country.

2nd.—The employment of weavers on some light work suitable to their physical condition.

3rd.—The expediency of making some concession to the caste-feelings of the people in the arrangements of the relief camps.

4th.—The present condition of the districts of Coimbatore and Salem.

5th.—The condition of persons on relief works and receiving gratuitous relief recently inspected by him.

6th.—The question of the sufficiency of the reduced rate of wages.

7th.—The relief operations in the taluks of Alur and Tádpatri in the Bellary district.

8th.—The need for maintaining a steady and sufficient importation of northern grains into the famine districts of the Madras Presidency.

9th.—The causes which led to the enormous influx of persons to the works in the Ceded Districts during the earlier months of the present famine.

10th.—The expediency* of employing European and Native officers and privates of the Madras Army on the relief works.

11th.—The relief camps at the Red Hills and Palaveram.

12th.—The taluks and zemindaris in the Madras Presidency inspected by Sir Richard Temple between the 14th January and 14th March.

2. We also submit a letter from the Resident at Hyderabad, forwarding a report on the present condition of those districts in the Nizam's country which are more or less affected by scarcity, and the measures which have been taken for the relief of distress.

3. None of these papers call for lengthened remarks from us; but in all of Sir Richard Temple's Minutes suggestions are made, which appear to us to merit, and which we have no doubt are receiving, the careful attention of the Government of Madras. The question which still causes us the greatest anxiety is that of the transport of grain by railway into the Ceded Districts both from the north-west and from Madras. Every effort is being made in the Railway Branch of our Public Works Department to overcome the difficulties which at present impede the transport, with sufficient rapidity, of the supplies which are considered to be necessary; but at least six heavy goods engines are needed, in addition to those at present available in this country, to meet the requirements of the grain traffic. We have requested Your Lordship by telegraph to arrange for this number of engines being sent to Bombay by way of the Suez Canal with as little delay as possible.

* The original of this Minute appears to have miscarried in the post. The copy which reached us on the 22nd instant is a duplicate.

4. The facts stated and considerations urged by Sir Richard Temple in his Minute of the 18th instant, regarding the causes which led to the enormous influx of persons to the relief works in the Ceded Districts and in Kurnool in the earlier months of the famine, indicate the urgent necessity of so arranging the works as to render them as little attractive as possible to those who are not in absolute need. Sir Richard Temple shows that whereas in December the number on the relief works in those districts amounted to 950,000, it has now been reduced to 493,000. The relief works were close to the homes of the people; the work was light and easy; the wages were more than sufficient to afford a bare subsistence; all-comers were admitted, without any question as to whether they were able to sustain themselves, and the consequence was that thousands and thousands of powerful men, representing what might be called a fine peasantry, whose physical condition was excellent, and who were really in no need of relief, received State wages as relief labourers. This was the state of things in January. The reduction in the numbers which has since taken place is mainly attributable to the relief works having been so re-arranged as to render them more distant from the homes of the work-people, and to augmenting the task.. Sir Richard Temple states that "instance after instance has occurred of gangs, some thousands strong, being told that the road on which they were engaged was sufficiently finished, and that they must march on to another road ten miles or even five miles off, and their melting away or never mustering again; or being told that they must do such and such a task, and rejoining that they did not like this, as it would involve so many hours a day, and then ceasing to appear." Other causes which have contributed to the diminution of numbers are the reduction of the wage and the discharge of persons who seemed able to sustain themselves; but, in Sir Richard Temple's opinion, the main causes were the re-arrangement of the works and the enforcement of heavier tasks. Both these remedies, he considers, should be still further enforced in the three districts abovementioned, and if combined with petty relief works with light tasks for weakly persons, from which able-bodied labourers should be excluded, and by a searching house-to-house visitation systematically arranged, there need be no apprehension of the distress being inadequately dealt with.

5. We enclose a copy of a telegram which we received on the 18th instant from the Government of Madras with reference to the instructions conveyed, and the suggestion offered, in our letter of the 9th instant, regarding the stock of grain now in the hands of the Government in that Presidency, to which allusion was made in the 2nd and 3rd paragraphs of our despatch of the same date. Copies of a telegram which we have addressed to the Government of Madras calling for further information on certain points, and of a letter expressing our acquiescence, under the circumstances, in the decision arrived at by the Local Government, not to sell for the present the reserve of grain now in their hands at Madras, are also enclosed. Your Lordship will observe that in suggesting the sale to the highest bidders of the stock of Government grain now at Madras, in moderate specified quantities, at specified intervals, our object was to confirm the confidence of the mercantile community in our policy of non-interference with private trade, and to remove the standing menace to the trade which seemed to be involved in the existence of a stock of grain in the hands of the Government, liable to be despatched into the distressed districts or to be thrown into the market at any time, to the serious derangement of the calculations of private traders. From the enquiries which we have been able to make here, we find that at Calcutta there is considerable difference of opinion on the subject, although some of the leading merchants consider that the sales contemplated would tend to remove the uncertainty and distrust which have been felt regarding the action of the Government, and that if conducted in the manner and at the intervals proposed, they would not be of sufficient importance to have any serious effect upon prices. At Madras, however, the preponderance of mercantile opinion appears to be adverse to the measure; and as it appears that His Grace the Governor in Council has given a public pledge that the grain shall be retained in reserve to meet future emergencies, and will not be utilised so

long as private trade meets the requirements of the distressed districts, we have not deemed it advisable to press our suggestion further. We have desired, however, that the reserve shall not be moved or utilised in any way without the permission of the Government of India, which, in case of necessity, may be applied for by telegraph, with a full explanation of the nature of the necessity.

6. We have much satisfaction in reporting that there has been a good fall of rain in several of the distressed districts, including Bellary, Kurnool, Cuddapah, Nellore, Trichinopoly and Tinnevelly. It has also extended to Mysore. The particulars have not yet reached us.

7. Sir Richard Temple telegraphs as follows on the 21st instant :—

I have during past week visited districts of Sholapur and Kaládgi in Bombay Presidency, and inspected in these districts 19,000 relief labourers, most of whom employed on task-work, professionally supervised and measured up. Physical condition generally satisfactory. Gangs under civil officers much diminished in numbers. Efforts to prevent waste or abuse very creditable to local authorities. System of relief strict. Some doubt whether village relief and house-to-house visitation sufficiently effective. General impression of Bombay management favourable. Comparison between Madras and Bombay Presidencies thus: Principles now the same in both ; but in Madras the management more indulgent to people, relief more freely allowed, and expense more liberal. In Bombay the management is more rigid, the system more exact, the economy more complete. In neither Presidency is there enough visitation from village to village to search out individual cases of distress.

8. There has been a slight decrease in the numbers on the relief works in Madras and an increase in Bombay. In Madras the number according to the latest return was 656,997 against 657,365, the number for the previous week. In Bombay the corresponding numbers were 226,841 and 223,865. The net increase in the two Presidencies was 2,608. There was, however, in Bombay a decrease of 11,947 children under seven years of age and of women taking care of them, the number having been reduced from 44,150 to 32,203.

In the number of persons charitably relieved there was a large increase amounting to 23,750 persons in Madras, the number having risen from 58,317 to 82,067. In Bombay the corresponding numbers were 6,135 and 5,566, showing a decrease of 569.

In Mysore the number on the relief works was 36,600, in addition to 30,794 employed by Public Works agency, and 37,361 charitably relieved, making a total of 104,755 against 99,699, the corresponding numbers for last week.

9. It will be seen from the Resident's letter, and from the papers appended to it, the opinion expressed in Sir Richard Temple's Minute on the condition of Hyderabad, which was enclosed in our despatch of the 9th ultimo, that the distress in that State was likely to be less than was at first apprehended, has so far been justified by the event. The condition of the rabi harvest, now in course of being gathered, is generally fairly favourable, and no further extension of the area in which distress has hitherto prevailed is apprehended. The maximum number of persons likely to be on the relief works is estimated at 43,000. The Resident bears testimony to the judgment with which Sir Salar Jung has dealt with the matter.

No. 115, dated Madras, 12th March 1877.

From—The Secretary to Sir Richard Temple,
To—The Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honour to submit copy of a Minute recorded by him in regard to the utilization of the Negapatam port and route for the supply of grain to Bangalore and the Mysore Country. The desirability of working this route first attracted the notice of His Grace the Governor, and it was in accordance with His Grace's suggestion that Captain Bisset was deputed to look into the facts on the spot. It is believed that steps have already been or are now being taken, under the orders of His Grace the Governor in Council, to meet some of the requirements noticed in the appended Minute.

Minute by Sir Richard Temple, *dated Madras, 12th March 1877.*

When recording my Minute of the 19th February, upon the adoption of the Negapatam route for the supply of grain to Bangalore, I was under the impression that the rates for the carriage of grain from Negapatam to Bangalore had already been lowered, and that the effect would by this time have been apparent in considerable despatches of grain to Bangalore by this route.

2. It was hoped that the augmented stock of engines would, by the 1st of March, have put the Madras Railway in a position to despatch grain from Madras up to the full extent of the carrying power of the single line between Madras and Arconum, and in addition to this to carry to Bangalore all the grain despatched from Beypore or Negapatam. And I look forward with much anxiety to the early attainment of this object.

3. With the large amount of grain now on the Madras beach, the immediate importance of the fullest possible despatches of grain from Madras is manifest. But I am advised that with the best arrangements the despatches of grain by the single line of rail from Madras to Arconum are not likely to exceed 45,000 tons a month; while the requirements in all the distressed districts from Madras and other sources of supply may rise even to 90,000 tons a month; and I have therefore invited attention to the great importance of the subsidiary sources of supply, namely, Raichore, Beypore and Negapatam.

4. Captain Bisset has now visited Negapatam and Bangalore, and in the record of his observations he shows that, even at present, 200 tons a day can be landed at Negapatam and forwarded to Bangalore; and that, with improved landing facilities at Negapatam and increased transhipping accommodation at Trichinopoly, a daily supply of 300 tons may be obtained at Bangalore by this route. He has noted, also, that the demand for grain in Bangalore is now put at over 500 tons a day, or nearly 100 tons a day above previous estimates.

5. On account of this growing demand, and because the progress of the doubling of the line of railway from Madras to Arconum is so much slower than I was led to expect when recommending this measure, the arrangements for developing traffic *viâ* Negapatam become even more important than before; and I would invite attention to the several suggestions offered in Captain Bisset's narrative, and would make the following recommendations:—

I.—That increased landing facilities be provided at Negapatam to meet a traffic, which, on the closing of the western ports by the monsoon, will become of vital importance to the country.

II.—That the necessary measures be taken to avoid delays in the supply of wagons at Negapatam, and in the transhipment of grain at Trichinopoly.

III.—That the system of wagon-interchange at Erode be adopted as suggested by Captain Bisset.

IV.—That every publicity be given to the orders for the reduction of grain rates from Negapatam to Bangalore, and that a similar reduction be made in the rates from Negapatam to Kolar Road, a station from which large supplies are sent to the northern parts of Mysore and the southern taluks of Bellary.

RICHARD TEMPLE.

Note by Captain W. S. S. Bisset, R.E., *on the probabilities of landing grain at Negapatam and delivering it at Erode Junction for conveyance to Bangalore.*

Negapatam port.

At Negapatam cargo is unloaded, not on the beach as at Madras, but at a quay on the banks of a river, at the entrance to which there is a bar, which for two hours out of six is impassable to the heavy boats in ordinary use. The quay, or river bank, where goods are ordinarily landed, is within 400 yards of the railway station. From the difficulties at the bar, and from the distance at which the ships lie, the boats which draw 3 feet of water with their ordinary load of 4 tons, are prevented from making more than one trip a day, but they occasionally accomplish two trips a day from steamers, which lie nearer the shore than ships, and also from grain ships to which the boatmen appear partial.

2. Although there are ninety boats on the license register, many are at present out of repair,—some seriously so;—and there are only 53 of them available for work. The Master Attendant has power to withdraw the license from any boat not kept in repair, and he hopes that the knowledge of this power, and the prospect of regular work, may induce the owners to put more boats in working order; but he does not think it likely that many boats from the neighbouring ports will come in to supplement the numbers, even if good prospects of regular work were held out.

3. Allowing for some increase in the number of boats, and for increased delivery from steamers, it appears safe to reckon on landing at Negapatam 300 tons a day of grain and general cargo.

4. During the month of March there are expected to arrive at Negapatam, (1) three ships (already overdue), with a total load of 2,600 tons of stores for the South Indian Railway; (2), forty native craft with rice from Akyab, and also (3), the weekly steamers of the British India Company, which are now bringing grain from Negapatam. If the delivery by these native craft is taken, as I am told it may be taken, at 8,000 tons, and by the British India Steam Navigation Company's steamers at 1,000 tons by the four steamers during the month, there will be ample work for all the boats available, and there will be every inducement for more to get ready for work, by the latter part of the month.

5. The following particulars learnt at Negapatam may be interesting.

A ship with a cargo of 1,700 tons of coal has been 46 days unloading; another ship with 1,300 tons on board has just discharged her cargo in 28 days.

When steamers call with cargo from Negapatam, the boats leave the ships and native craft, and concentrate all their energies on the steamer's cargo, frequently making two trips a day in place of their ordinary single trip.

6. The boats would be able to do more work but for the detention caused by the bar; whether any temporary improvement in the channel could be effected or not is a point on which, without special experience of works on the Madras coast, I would not venture an opinion. If, however, it is desired to work a large traffic at Negapatam, this way of increasing the landing power of the boats will doubtless be considered along with others.

7. If now it is assumed that the special aid given to the conveyance of grain from Negapatam to Bangalore will change the natural current of trade, which at present flows from Negapatam and the Tanjore district towards Madura and the south, it remains to consider what amount of traffic can be worked over the two portions of the South Indian Railway, *viz.* the narrow-gauge line from Negapatam to Trichinopoly and the broad-gauge line from Trichinopoly (after transhipment to Erode). It is confidently stated by the Agent and Officers of the South Indian Railway that there are sufficient narrow-gauge engines and rolling stock to work from Negapatam to Trichinopoly all the grain which the broad-gauge railway stock can work away; and as the whole of the existing traffic is conveyed by day trains, it is evident that many more trains can, if necessary, be worked over the line. Any restrictions imposed by Government on working trains over an unfenced line at night will probably be withdrawn in view of the necessities of the country, and moreover these restrictions do not affect directly the train service between Negapatam and Trichinopoly where the line is fenced.

8. Up to Trichinopoly there need be no limit stated, but at this point the break of gauge necessitates transhipment. The Traffic Manager, in whose department this work lies, is of opinion that, with the present transhipment accommodation, he cannot undertake to tranship more than 30 wagons or about 190 tons a day in each direction. And although I am surprised at the moderate estimate of the work considered practicable with the existing accommodation, it is possible that the less active habits and the smaller physical powers of the loading coolies at Trichinopoly present difficulties which I am not accustomed to consider. The Traffic Manager considers an additional transhipment-platform necessary, and with this, which it is possible to provide within a fortnight, he is prepared to work up to the powers of the broad-gauge engines and rolling stock.

9. Next to the landing powers at Negapatam, the capacity of the broad-gauge section of the South Indian Railway fixes the limit to the traffic from Negapatam to Bangalore. There are altogether ten broad-gauge engines, suitable when in good repair for running trains; but of these five are now undergoing heavy repair. In ten days' time (say the 10th March) one engine of the five now running must go in for repairs, and it will be replaced by a larger one of which the repairs are nearly completed.

After an interval of about three weeks another engine will be turned out after repairs, and another after a similar interval.

The Locomotive Superintendent, with these prospects, considers himself in a position to carry after the 10th March 40 grain wagons a day or 250 tons, and after 1st April 60 grain wagons a day or 375 tons, to Erode.

10. The engine-power being sufficient for the probable landing powers at the port of Negapatam even after allowing for a large increase, it remains to consider the sufficiency of the wagon stock. The stock of about 200 wagons of all sorts, including ballast wagons, would be enough to work about 60 wagons a day between Trichinopoly and Erode; but the through-booked grain will most advantageously and most expeditiously be carried on to Bangalore in the same wagons, and the wagon stock of the South Indian Railway Company will not suffice for this purpose.

11. To work to the best advantage, a system of wagon interchange not now in force would have to be established at Erode Junction; *i. e.*, for every loaded wagon sent off from the South Indian Railway, an empty wagon should, if required, be made over by the Madras Railway Company. In this way the stock of both lines may be worked with more effective results than is otherwise possible. And this joint service will not occupy the wagon stock of either railway longer than is proper to the respective distances on each line.

12. But the distance from Erode to Bangalore is so little shorter than that from Madras to Bangalore, that little, if any, advantage of economy of the engine-power and rolling-stock of the Madras Railway can be claimed for this route. And although from the recently increased number of engines, and from more regular working, an increased delivery of grain may

will for some time yet be overworked, or that the engines can be more profitably employed elsewhere.

13. But with regard to the possibilities of working traffic from Negapatam to Bangalore, I am of opinion that, making allowances for all the difficulties in the way of working a large traffic *viâ* Negapatam, it is possible, by bringing into use the power of the South of India Railway, and by an expenditure of the power of the Madras Railway equal to, or perhaps a little less than is required to work the same traffic from Madras, to carry from Negapatam to Bangalore about 200 tons of grain a day during March, and up to 300 tons a day in April and subsequent months, if more landing power can be provided at Negapatam, and that along with a disturbance of the natural current of trade from Negapatam to Madura and the south, there are some incidental advantages in drawing, even at present, a portion of the food-supply of Bangalore from Negapatam.

But I consider that until the Madras-Arconum section of the Madras Railway is worked so as to feed to the fullest extent of its powers all the portions of the north-west and south-west lines, which are with the least expenditure of carrying power supplied from Madras, there is no material advantage to be gained by the use of the Negapatam route.

14. But as changes in trade routes cannot be made suddenly, it is worth while noting that, if traders begin now to arrange for consignments *viâ* Negapatam, their consignments may be expected to arrive there about April, or just at the time when the greatest strain on the Madras-Arconum section is likely to occur, and when it is to be hoped that this section will be worked to its full power. And it is further to be considered that, before the end of the month of May, the Beypore traffic will probably be stopped by the monsoon, and that the Negapatam traffic, which will be practicable all through the rainy season, will then become of great importance to the country.

BANGALORE; *2nd March 1877.*

W. S. S. BISSET, *On special duty.*

Memorandum by Captain W. S. S. BISSET, R.E., *on the carriage of grain for Bangalore,* viâ *Negapatam.*

I HAVE now visited Negapatam and ascertained by observation and personal enquiry the present and prospective possibilities of landing grain at Negapatam, forwarding it thence to Trichinopoly, transhipping it there to the broad-gauge wagons, delivering it by the South Indian Railway broad-gauge line to Erode on the Madras Railway for conveyance thence to Bangalore.

2. Yesterday, through the courtesy of the Chief Commissioner of Mysore, I had an opportunity of seeing the chief traders here, and of explaining to them the fears that are entertained that the amount of grain required at Bangalore cannot be supplied by the Madras route.

3. I learnt that the merchants were obliged to refuse heavy orders for grain from the interior, and that they could easily sell 100 to 150 tons a day in addition to the present supplies, which have amounted to 330 tons a day in November, 375 tons a day in December and January, and 390* tons a day up to the 22nd February. I endeavoured to explain the advantages which they could have in drawing from Negapatam as much of their supply as could find carriage by that route, and I informed them that I had just been to Negapatam, and that I had ascertained as follows :—

* These figures are for the Bangalore station only. Kolar and other stations in Mysore on the Bangalore branch takes about 16 per cent. (or say 60 tons a day) on the Bangalore receipts.

1st.—That grain sent to Negapatam can be landed easily to the extent of 200 tons a day after allowing for the landing of other general cargo.

2nd.—That the boats can take the grain bags direct from the ship to the river bank which is within 400 yards of the railway station.

3rd.—That by the order of His Grace the Governor of Madras, the rates for the carriage of grain from Negapatam to Bangalore have been made the same as the rates from Madras to Bangalore.

4th.—That the Agent and officers of the South Indian Railway are prepared† to carry from Negapatam during March 40 wagons or 250 tons, and during April and subsequent months 60 wagons or 375 tons a day, and that they can certainly carry at once 200 tons a day.

† For the free working of this traffic some transhipment arrangements are required and can be readily made if considered necessary.

5th.—That fears are entertained that, with equally urgent demands from other distressed districts, the carrying powers of the railway from Madras to Arconum will be unequal to the pressure, and that if additional supplies are required for Bangalore it will be necessary to draw them from another source than Madras.

6th.—That grain can be landed at Negapatam throughout May, June and July, while the western ports will be closed by the burst of monsoon early in May.

4. The authoritative announcement of the reduction of rates had not then, and has not yet, reached the Chief Commissioner, the Railway Station Master or the traders, and my statement on this matter was with difficulty accepted. I assured the meeting that the orders had been received at Negapatam on Monday the 26th February, and that they would find on enquiry that my statement was correct.

5. The merchants said they would at once enquire and instruct their agents to send some of their grain *viâ* Negapatam, so that they might get as much as possible by using all

They evidently had misgivings about the supply of wagons at Negapatam and Trichinopoly, and some of them said they had already been getting a few wagons from Negapatam, and that they had actually experienced this difficulty, and that their grain was much delayed in transit. I referred to the assurance given to me by the Railway officers, and as regards delay I suggested that a few days' delay on the way was less objectionable than long detention on the Madras beach. Another merchant objected that he could get no *raggi* at Negapatam, and that *raggi* could only be got at Beypore, where it comes down the coast from the north. No answer could be given to this, for, as far as I am aware, *raggi* is not to be bought on the eastern side of India. But I endeavoured to explain that the object of my visit was not to desire them to use Negapatam port to the exclusion of other sources of supply, but to inform them of the means which were at their disposal for drawing supplementary supplies from Negapatam and of the reduction of railway rates, which His Grace the Governor of Madras had been pleased to authorise, in addition to the abolition of port dues at Negapatam on any vessels carrying a fourth part of their cargo in grain.

6. I am permitted to record that the officers of the Mysore Administration* who were present at the meeting concur with me in believing that the native traders understood the explanations given, and that they intended to take advantage of the facilities offered.

* Major T. Clarke, Secretary to the Chief Commissioner.
Colonel Pearse, Commissioner.
Colonel Puckle, Deputy Commissioner.

7. I conclude by mentioning an incidental advantage which would arise if any considerable supply of dry grain were to be sent from Calcutta or other port to Negapatam. Karur or Caroor, the head-quarters of the taluk of that name in the Coimbatore district, draws about 100 tons of cholum a day from Beypore. If the landing powers at Negapatam were increased, this supply could be taken to Karur in addition to the supply for Bangalore; for the gradients between Trichinopoly and Karur are easy, and those from Karur to Erode heavy. It may be objected that the supply to Bangalore will diminish the supply to Madura; but Madura can be more easily supplied with sea-borne grain from Tuticorin, and there are, as far as I have learnt, no objections to sending grain there.

8. I would suggest further, that a corresponding reduction of rate be granted on grain consigned from Negapatam to Kolar road.

BANGALORE;
3rd March 1877.

W. S. S. BISSET,
On Special duty.

No. 119, dated Madras, 12th March 1877.

From—*Secretary to Sir Richard Temple,*

To—*The Additional Secretary to the Government of India.*

By direction of Sir Richard Temple, I have the honour to submit copy of a Minute recorded by him suggesting the employment of weavers in the Madras Presidency, who may be thrown upon the hands of Government, on some light employment suitable to their physical condition.

Minute by SIR RICHARD TEMPLE, *dated Madras, 12th March* 1877.

I DESIRE to invite attention to the advisability of establishing some light labour test for the many thousands of weavers and spinners who are now coming upon the hands of Government in several of the famine-stricken districts of the Madras Presidency. It was proposed, as I understand, some months ago by some of the Madras authorities, that Government should advance money to enable destitute weavers to buy material and carry on their trade. For several reasons it was then thought the plan might be deferred. But I submit that the time has come when this proposal might, with such modification as may be required by local circumstances, be resuscitated and carried into effect.

2. Near Bangalore, on a tank, I saw a special gang of poor weavers, who were allowed a higher rate for their piece-work than ordinary relief labourers, because their habits and the condition of their hands and fingers prevented their doing a full day's work. Some similar arrangements are, I believe, carried out in several places in the Madras Presidency also. And such arrangements may suffice for those weavers who make the coarser fabrics at Adoni, at Bellary, and other places.

3. But there are many weavers who work in silk or who do the finer kinds of cotton weaving; and such people might, if put upon tank or road works, become physically unfitted, for a time at any rate, to return to their usual employment after the end of the famine. Yet many of these poor people are undoubtedly in great straits; they can get no market for their products, and they can get no credit wherewith to buy materials. Yet they are many of them quite ready to work to the best of their power, in return for such relief as the State may give them. At Salem, for instance, I learnt that the silk weavers had reduced themselves to some extremity sooner than go on relief works, and at present they are subsisting on an organised private charity. Similar instances will ere long occur in Vellore, even if they are not already occurring.

4. In parts of Bengal (Burdwan and other places), during the famine of 1874, advances were made to weavers, and their manufactures were taken over by Government officers in return for the advances and for their support. At some of the relief houses also weavers were employed in making cotton and silk fabrics. The stores of such manufactures were kept till after the famine, and then were sold to the [illegible]

make similar arrangements at towns or in tracts where there is a large population of weavers who make the finer kinds of cotton or silk cloth. The Collectors, with the assistance and advice of Native officers and non-official Native gentlemen, would be able to carry out arrangements such as are now suggested with the least possible loss to the State, and with much advantage to a deserving and industrious class of the people.

RICHARD TEMPLE.

No. 121, dated Madras, 12th March 1877.

From—The Secretary to Sir Richard Temple,
To—The Additional Revenue Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honor to submit copy of a Minute recorded by him suggesting the relaxation of certain rules at relief camps, and the retention, in part at any rate, of the present system of giving gratuitous relief in the Ceded Districts.

Minute by SIR RICHARD TEMPLE, *dated Madras, 12th March 1877.*

In the distressed districts of the Madras Presidency below the ghauts there have been established relief camps for the reception and treatment of destitute persons who are unfit for labour on relief works. These camps consist of sheds erected in rows within large enclosures. They afford accommodation which is really good: indeed their accommodation ought not to be better than it is, otherwise a standard of comfort would be set up far superior to anything that could be obtained in the villages. They are organised and managed in a way that is most creditable to the officers concerned. Provided that the people were taken care of, their diseases treated and their necessities relieved, it was undoubtedly desirable at the outset that sojourners in these relief camps should not be made so agreeable and attentive as to lead to the pauperisation of the people. And so far the object has been attained.

2. But as the season advances, it is evident that these camps are not so largely resorted to as might be expected under the circumstances of the people. There seems to be some prejudice against them among the poorest classes. And there is actually reason to fear that destitute persons may shrink from going to relief camps for so long that meanwhile they may drift into dangerous distress. It is noticed that in some cases people will not resort to the camps, and paupers who are taken there run away for a few days only to return in a worse condition than ever. It may therefore become necessary for officers in charge of relief camps to make their camps somewhat more popular than they are now.

3. After consulting various Native gentlemen of experience, I think that some concession might be made in relief camps to the caste feeling of the people. For the very poor classes, who in this Presidency are often said to belong to no caste, the present system of public cooks in the camps might suffice. But for those who have grown up with caste feeling, some relaxation of the present arrangements might be permitted. Inmates might be allowed to cook their own food either for themselves or for self-arranged gangs, and they might be allowed to eat their meals apart and free from observation. In most of the camps there would be ample space for the enjoyment of such concessions. Then again, the sheds might be set apart for the principal castes; the casteless, or very low caste, people, would in such case have sufficient shed accommodation for themselves. In most cases it would be possible to make these not very great (but still to Natives acceptable) concessions without any considerable increase of expenditure. If such concessions could be given, the relief camps would certainly become more efficient as safeguards against dangerous distress.

4. While the relief camp system has generally been adopted below the ghauts, different arrangements have been made for giving gratuitous relief in the Ceded Districts. In those districts out-door relief, in the shape of cooked food, is distributed to ticket holders and to orphan children at relief houses. Ordinarily there is one such relief house at the head-quarters of each taluk, and five or six other subordinate relief houses in the interior of the taluk. Each such relief house is under the superintendence of a selected village official, or of a revenue inspector. At the outset there may have been, indeed in some cases there certainly were, abuses at relief houses of this kind; and gratuitous relief was occasionally given with undue liberality at towns, where arrangements, begun from private charity, were afterwards taken over by Government Officers. But now that adequate supervision has been or is being provided for every distressed taluk, these relief houses are inspected once or oftener in each week; abuses will be prevented, and the numbers on charitable relief are by no means excessive.

5. The sad prevalence of cholera, and the practical* difficulties in the way of effective sanitation may prove obstacles to the extension of the relief camp system to the Ceded Districts. And under all the circumstances of the case, I would therefore *now* recommend that in those districts the present system of giving gratuitous relief be allowed to remain; and that the regular systematic inspection of all relief houses be enforced. One or two relief camps only in central places in the Ceded Districts might suffice.

* NOTE.—Persons of the sweeper caste are not readily procurable in the Ceded Distiicts.

RICHARD TEMPLE.

No. 124, dated Madras, 12th March 1877.

From—The Secretary to Sir Richard Temple,
To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honor to submit copy of a Minute recorded by him, together with a Memorandum on his visit to the Coimbatore and Salem

Minute by SIR RICHARD TEMPLE, *dated Madras, 12th March 1877.*

IN forwarding the accompanying Memorandum of my visit to the districts of Salem and Coimbatore, a few brief remarks from me will suffice.

2. There can be no doubt of the heavy losses suffered in the eastern and north-eastern part of the Coimbatore district, and of the serious distress among the labouring classes.

3. The relief has been confined as yet to those classes and has not yet been extended to the purely cultivating classes. Some portions of these classes are no doubt straitened, and had the relief system been at all lax, many of these would by this time have been in receipt of State charity. But the district authorities are very justly alive to the importance of keeping the peasant proprietory off State charity as long as possible.

4. My inspection of the various gangs of relief labourers, about 7,500 persons in all, was highly satisfactory, that is to say, the men and women were almost all of the sort which one would expect to find properly on relief; very few were persons who seemed able to sustain themselves, very few were in a physically reduced condition; task-work was rigorously exacted; there were many signs of system and organisation. About each person, singly, whose appearance seemed at all reduced, special enquiries were made. The local authorities were confident that the village headmen do understand and act upon the Government orders about searching for every individual case of distress throughout the district.

5. It is very satisfactory to find that the Collector does not anticipate any large increase of numbers on relief. This must, however, greatly depend on the weather.

6. On the whole, I consider the Coimbatore gangs to be the most satisfactory gangs which I have yet inspected anywhere. My impression regarding the carefulness, vigilance and economy exercised by the Collector, Mr. Wedderburn, is very favourable. He is manifestly a thoughtful and experienced officer. The same watchfulness on his part which guards against waste or demoralisation will also ensure that no case of real distress will escape unrelieved. His assistant and Sub-Collector, Mr. MacWalters, is an excellent manager; indeed, he is one of the very best relief officers whom I have met in this Presidency.

7. My visit in the Salem district was cut short by the necessity of proceeding to Madras to confer with the Government on certain points. But I had the advantage of carefully examining the Collector, Mr Longley, regarding the relief operations of the district in the presence of Mr. Puckle of the Board of Revenue. Here also I have formed a very favourable impression of the care and management of the Collector. He seems to me to be exacting task-work more strictly and completely than in any other district in this Presidency. Considering the undoubted distress in the northern portion of his district, I think that his numbers on relief are moderate, though I fear they must increase. He is most thoughtful too about searching for individual misery in every village. I have not met any officer yet in this Presidency with sounder ideas on this important matter than Mr. Longley.

8. I have the pleasure to express my unqualified satisfaction with the result of the proceedings of the Collectors of Salem and Coimbatore, and my belief that in both these districts the Madras Government is thoroughly well served.

RICHARD TEMPLE.

Memorandum on Sir Richard Temple's visit to Coimbatore and Salem on 6th, 7th and 8th March.

IN the district of Coimbatore, on the 6th and 7th March, Sir Richard Temple met Mr. MacWalters, the Sub-Collector, the officer in charge of the relief works in the interior, the tahsildars of Bhowany, Parundoray, Pelladum and Coimbatore. He observed on both days the aspects of the country between Erode and Coimbatore, which comprises the tracts that have most suffered from drought. At Coimbatore itself he stayed with Mr. Wedderburn, the Collector, from whom he learnt that on the 6th March there were on relief works 22,351 labourers, the number the week previous having been 22,900. The number of persons fed gratuitously was stated to be 1,312, of whom 600 were at Oodamalapetta, some at Suttyamangulum, and some at Bhowany. He thought now that the numbers would not rise above 30,000 at the worst time. The labourers are only paid for 6 days in the week, and task-work is enforced at the rate of 10 cubic yards for the rupee.

2. All the markets in the district are well supplied, as trade is extraordinarily active; Coimbatore itself is full of grain. The imports by sea all come from the west coast (Beypore). Cholum and ragi are imported largely from Bombay, and even Bengal rice comes round to Beypore. Last week 322 tons of rice were brought in, and 299 tons of dry grains. The price of grain has not varied greatly since last December. About the end of October and beginning of November prices ran up suddenly, in consequence of the demand for Mysore. The ordinary and present prices of food may be thus compared—in Madras measures for a rupee,—

	Ordinary.	Present.
Rice	12·50	7·80
Cholum	20·50	9·33
Ragi	23·50	10·20
Cumboo	24	10·60

The Collector regards the stationary prices of food grain since November as evidence of the existence of old stocks in the district. In his opinion, generally, one or one-and-a-half year's supply is kept in hand, though he has no means of gauging the amount accurately. And the fact of any quantity of rice being available at the rate of 7·80 seers the rupee, he thinks, keeps down the prices of the other grains; rice is only consumed by the upper classes as a rule.

3. The harvest just reaped has averaged about 3 or 4 annas throughout the district. The rice crop from the wet lands is nearly all cut, and the outturn will be a half crop. For 2 or 3 months no field-work or agriculture is expected.

The Collector anticipates no necessity to make any remissions of land revenue in the Coimbatore taluk. Of the five lakhs assessment on "wet" land, where there has been a half crop, he expects to have to remit one lakh, and four lakhs out of the 19 lakhs assessment on the "dry" land.

5. The estimated expenditure sanctioned for the district is Rs. 4,68,346, of which, up to date, Rs. 1,40,860 have been spent.

6. During the week there were 1,158 attacks of cholera and 748 deaths.

7. On his way to Coimbatore, Sir Richard inspected collections of relief labourers, amounting to more than 5,500, at the stations of Perandoorg, Ootakally, Loonanoor and Coimbatore, and on the return journey about 2,800 more at Avenashy Road and Erode. Their condition struck him as middling, though sufficiently good with some few exceptions. Very few seemed to be able to sustain themselves without relief. Most of them belonged to the poorest and lowest classes. The velalars or cultivating classes were but slightly represented in these gangs, and these were either field labourers or cultivators of the poorest class. On the whole, the gangs comprised persons who need relief and hardly any others. There were no signs of waste or abuses, and many signs of care, system, and organisation. As relief labourers, these people appeared to be in a satisfactory condition, just in the sort of condition we should reasonably expect to find. At Coimbatore itself a number of weavers presented themselves, and complained that they had to work at the rate of 10 cubic yards the rupee, which was beyond their power. They had struck work in consequence. The Collector had under consideration the lowering of the task for these people.

8. At Salem, on the 8th, Sir Richard Temple met Mr. R. Puckle, Member of the Board of Revenue, Mr. Longley, the Collector, and the Native Deputy Collector. He inspected the relief camp near the head-quarters of the district, and inspected one gang of relief labourers, who were in very fair condition. He examined some of the wells in the highly cultivated plain near Salem, and found most of them dry although water might be reached by deepening them: these seemed cases for advances being made by Government. He again questioned Mr. Longley carefully on all the points comprised in the memorandum of the 25th January. Mr. Longley had just returned from a careful inspection of the most distressed taluk in the district, namely, Dhurumpuri. Its condition, by all accounts, is very bad—as bad as that of any taluk in the presidency; but the relief operations have been carefully inspected by the Collector, and he is confident of their success and sufficiency. Undoubtedly, those portions of the district which, geographically, form a part of the Mysore plateau must suffer severely. For the other part of the district there is not much anxiety. The Collector's answers to all questions in detail were highly satisfactory. Sir Richard Temple was himself about to visit the Dhurumpuri taluk when he was summoned to Madras on important financial business. He is bound to say that from no Collector in the presidency has he received more sound and explicit replies to all questions regarding relief than from Mr. Longley. The Collector is most strict and zealous in enforcing a full performance of work by the gangs, and most anxious that all cases of misery should be dealt with under the village relief system. He is in some difficulty in regard to finding suitable work for the silk-weavers, who are as a class much distressed. He also regrets that the excellent relief camp is not more largely attended. On the day of Sir Richard Temple's visit, the number of relief labourers was taken to be somewhat below 25,000; the question of this number remaining stationary or rising depended on the falling of the spring showers. In this district, as in Coimbatore, the relief comprises only the poorest and lowest castes, and the poorest stratum of the agriculturists. The numbers on charitable relief were now under 10,000, but these will probably increase. The Collector quite understands the importance of instructing the village headmen to seek out and care for all cases of distress.

9. Sir Richard Temple had the advantage of verifying all these matters with Mr. Puckle, who most forcibly drew attention to the drought and uncertainty of season caused by the rapid denudation of the hill sides once so richly clothed with forests.

MADRAS,
The 12th March 1877.

C. E. BUCKLAND,
Private Secy. to Sir Richard Temple.

No. 128, dated Madras, 13th March 1877.

From—The Secretary to Sir Richard Temple,
To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honor to submit copy of a Minute recorded by him, together with the appended statement of persons on relief works and gratuitous relief inspected by him between the 24th ultimo and 8th current.

Minute by SIR RICHARD TEMPLE, *dated Madras, 12th March 1877.*

In continuation of my Minute dated 24th February, and the statement thereto appended, I desire to submit a further statement of the numbers of relief labourers and recipients of gratuitous relief inspected by me between the 24th February and the 8th March, and some persons of the poorest classes, for the most part in the districts of North Arcot, Nellore, Cuddapah and Coimbatore.

2. These inspections were conducted in the manner previously described. The analysis of the numbers shows that the physical condition of 14,330, 17,069, 2,428 and 1,300 may be considered as having been good, middling, indifferent and bad respectively.

3. I wish to take this opportunity of correcting the description given of the physical condition of the gangs of 500 and 2,000 relief labourers and recipients of gratuitous relief, inspected by me on the 26th and 27th of January at Madras and at Red Hills. Instead of the word "indifferent" I should have used the word "bad." It had been my wish to avoid minute distinctions and to group the gangs into broad classes, which would be readily numbered. But on reflection I think that the gangs mentioned were so inferior in physical condition to any other collection of such persons I have seen, that the word "bad" would have been more appropriately used to describe them.

RICHARD TEMPLE.

Statement shewing the classification of persons on relief work and recipients of gratuitous relief inspected by Sir Richard Temple between 24th February and 8th March 1877.

MADRAS;
The 12th March 1877.

C. E. BUCKLAND,
Private Secy. to Sir Richard Temple.

No. 131, dated Sholapur, 16th March 1877.

From—The Secretary to Sir Richard Temple,

To—The Revenue Additional Secretary to the Government of India.

I AM directed to submit a Minute recorded by Sir Richard Temple regarding the need for maintaining a steady and sufficient importation of northern grains into the famine districts of the Madras Presidency.

2. Sir Richard Temple has directed Captain Bisset, of the Railway Department, who is attached to his staff, to visit Bombay and the Nagpore section of the Great Indian Peninsula Railway, with a view to consulting with the Consulting Engineer of the Bombay Government, and the Great Indian Peninsula Railway authorities as to the best means of securing the result to which Sir Richard Temple attaches such great importance.

Minute by SIR RICHARD TEMPLE, *dated Madras, 13th March* 1877.

I DESIRE to invite the attention of the Government of Bombay to the following remarks regarding the grain trade from (and through) the Bombay Presidency into the distressed districts of the Madras Presidency.

2. In the districts of Bellary, Kurnool and Cuddapah, where the recent failure of harvests has been extreme, cholum (or jowari) is the staple food of the people. During the month of December, cholum was, in those districts, selling, at times, as dear as 7½ seers (15 lbs) per rupee, or even at still dearer rates. At that time the Madras Railway was not able to dispose promptly of all the grain which the Great Indian Peninsula Railway delivered at Raichore. During January much improvement was effected in this respect; and throughout the month of February an average of 105 wagons (about 683 tons) of cholum was daily carried from Raichore into the Madras Presidency. One result of this large and steady importation of food was that the price of white (*i. e.*, northern) cholum became much cheaper in the Ceded Districts, and was ruling at 10½ to 12 seers (21 to 24 lbs. in the markets close to the railway.

3. During the last ten days, however, the smaller despatches of grain through Raichore have attracted attention. And one consequence of this decrease in the importations is that the price of cholum is already beginning to grow dearer. The decrease in the importation is not due to any shortcomings on the part of the Madras Railway, for that Company is now carrying away promptly all the grain wagons which it receives from the Great Indian Peninsula Railway. It was at first conjectured that the fall in prices at Bellary and Adoni might have left no margin of profit for importers. But on the other hand the excellent spring harvests, now coming under the sickle in Northern India, will throw an immense quantity of food into the market. And I am assured that there are still large stocks of jowari, rice and wheat in the districts known as the Nagpore section of the Great Indian Peninsula Railway, and that the dealers there would send off much more jowari (as much as ever), if only they could get wagons to carry it.

4. The season of greatest pressure in the famine-stricken districts of Madras is now approaching. The best estimate I have been able to make shows that from 75,000 to 90,000 tons of imported grain per month may be wanted by those districts during the worst time. And it will be quite impossible to maintain that rate of supply if the grain traffic from the west should remain at an average of 85* wagons (550 tons) a day. I consider that for the due safety of the country the grain imports from the Great Indian Peninsula Railway should not permanently fall below 130 wagons a day, while they ought at the worst time to reach 150 wagons a day.

* This is the average number of grain wagons taken out of Raichore during the first ten days of March.

5. I am aware that there may at the present time be much pressure on the Great Indian Peninsula Railway to carry cotton, seeds and other commodities down to Bombay for export by sea. But I am confident that the Governments of India and Bombay will be pleased to approve of the view that the safety of the lives of the people, and the food-supply which secure that safety, is of paramount importance. And I would urge that such steps as the Government of Bombay may deem right be taken to secure that sufficient wagons be allotted to the grain traffic as will secure the delivery of at least 120 wagons of grain (on the average) daily at Raichore, so long as dealers may be ready to send food-grains into the distressed districts of Madras. If it should hereafter appear that dealers do not come forward to fill with grain all the wagons allotted to the Madras grain traffic, then the position can be reconsidered. But so long as grain dealers are ready to send their grain, a sufficient number of wagons ought in my judgment to be allotted to the grain traffic for the Madras districts. The contingency must be kept in view, that hereafter the average requirement of 130 wagons may have to be raised to an average of 150 wagons per diem.

RICHARD TEMPLE.

No. 133, dated Madras, 14th March 1877.

From—The Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

BY direction of Sir Richard Temple, I have the honour to submit copy of a minute recorded by him reviewing Dr. Cornish's objections to the reduced scale of wages.

Minute by SIR RICHARD TEMPLE, *dated Madras, 14th March* 1877.

IN my minute dated 6th March, I refrained from commenting on the scientific argument used by the Sanitary Commissioner of Madras, Dr. Cornish; but having since had the opportunity of making some enquiry on the subject, I have to make the following remarks.

2. Dr. Cornish's scientific propositions are as follow:—

That (paragraph 4) the carboniferous and nitrogenous principles of food should be in the proportion of 3 of the former to 1 of the latter.

That (paragraph 6) according to all scientific investigators, 140 to 180 grains of nitrogen are required, in a state of rest, to oil the human machine, so to speak, while it is not working.

That in ordinary labour 300, and under great physical exertions 500 to 600, grains of nitrogen will be necessary.

That if such quantities are not provided under the corresponding circumstances, "the body must prey on its own tissues so long as any remain to be preyed upon."

That (paragraph 13) "in regard to this question of a pound of grain being enough or not enough we should never know the result until the mischiefs resulting from a deficient supply of nitrogenous food have gone so far that a retracing of our steps would be powerless to save life."

3. This last statement is made with much confidence. From its nature it can hardly be disproved, but it seems to me that it may be regarded as a mere expression of opinion, if we can show that Dr. Cornish's other propositions given with equal precision and arguable, perhaps, in theory, are not applicable, or but very partially applicable, to the circumstances of native life and native diets.

4. In the Madras Manual of Hygiene, compiled under the orders of Government and published in 1875, the main parts of Dr. Cornish's theories are adopted. It is stated, page 96,—"The unavoidable internal work of the body of an adult human being, that is, the movements necessary for respiration, circulation, and digestion, require a minimum of 138 grains of nitrogen in 24 hours for their maintenance. In a state of idleness of mind and body, *the least amount compatible with health* may be stated as 200 grains for a man and 180 for a woman. In the ordinary circumstances of the soldier, the artizan, the field-labourer, and the prisoner in most of our jails, 300 grains will be a fair minimum. Very great physical exertion will demand 500 grains or even more."

5. Sir Robert Christison's theory, founded, as I understand, on careful experiment on Scotch labourers, and possibly applicable to them, is therefore adopted in its entirety by the Sanitary Commissioner and by the author of the Madras Manual of Hygiene as applicable to the natives of Southern India. It is on this assumption that Dr. Cornish's whole argument is based, and in the Manual it is expressly applied on the "prisoners in most of our jails." Its application, in fact and in practice, has now to be considered.

6. The opinion, that one pound a day of grain might suffice for a relief labourer, together with some allowance for condiments and the like, or some nutritious substance, was not, indeed, based on scientific theory. It was founded rather on probabilities practically deduced from the condition of the poorer classes in ordinary times, and in the results of general experience. It was not put forth with absolute confidence. It was to be subjected to trial, not by theoretical data, but by the observation of its actual results.

7. Dr. Cornish protests against this opinion as "in direct contradiction to the accumulated testimony of scientific observers in every country in which this question of the quantity and variety of food essential to keep a labouring man in health and strength, has been the subject of investigation."

8. Certainly this opinion was not based on so called scientific evidence, apparently taken as proved on the strength of experiments made on men of different race and habits, living under different circumstances, in an altogether different climate, and probably exceeding by a third in average weight the people to whom the results of the experiments are with such confidence applied. For administrative and financial purposes I should not base my recommendations on such data, inasmuch as the question must be one extremely difficult of scientific ascertainment, and in respect to which even the best conducted experiments, if made in different parts of the world, might lead to varying results. And in order to show how little these data can be accepted for these purposes, it is sufficient for me to refer to the Madras Manual of Hygiene itself.

9. In an appendix from pages 361 to 380 are given the whole range of Madras dietaries for soldiers, sepoys, and prisoners, military and civil, under various circumstances, in sickness and in health. The quantity of each food is given, together with an elaborate analysis of its composition and the proportion of each of the physiologically essential elements,— one column showing the amount of nitrogen, another the quantity of carbon in each diet.

10. Had those quantities corresponded to, or even approximated to, the amounts so authoritatively declared to be necessary, it would still have been open to me to say that the dietaries have been decided by European committees by the advice, and with the assistance of, Sanitary Commissioners; that they are intended for persons from whom full work is demanded and who receive in return not a subsistence allowance, but a full ration; that rations are avowedly fixed on a liberal scale so as to suffice for persons who consume more than the average; that it is matter of common reproach, both in this country and in England, that prisoners are better fed than paupers, whose poverty is their only crime; and that it is absurd to suppose that the poorer classes in this or any country get as much to eat as prisoners or soldiers, or that they cannot live on much less.

supply the relief labourer with more than sufficient nitrogen and carbon to keep him in health. They prove first that, as regards natives of this country, the carboniferous bear to the nitrogenous elements of food the ratio of about 7 to 1 instead of 3 to 1 as in the English dietaries [in the ration of the sepoy on foreign service, the proportion is 10 to 1, 26·70 oz. to 2·68 (page 3791)]; and as the absolute weight of food taken daily by natives and Europeans is probably about the same, it follows that the amount of nitrogen required by natives must be much less than that required by Europeans; and when the diets are examined this is found to be the case. The Madras sepoy, when ordered on foreign service, during which he may be, and often is called upon to undergo severe physical exertion, receives a full ration from Government. According to the theory he requires a minimum of 300 grains of nitrogen when performing ordinary duties, but when marching or undergoing severe labour, he needs 500 or 600 grains. As a matter of fact, he gets (page 379) only 178 grains, little more than half the minimum required, and only about a third of what is declared necessary to support him when called upon to do strenuous work. According to this theory, then, the Madras sepoy would be undergoing starvation at the hands of the Government which employs him. But, in fact, he is not so reduced physically, nor does he fail that Government when it calls on him for exertions compared to which the labour demanded from most of our relief labourers is as nothing. This case, I submit, makes very strongly against Dr. Cornish's theory, but a still stronger one yet remains behind.

12. The British soldier, to whom if to any one the theory should apply, requiring, like the sepoy, 300 to 600 grains under like circumstances, receives 242 grains of nitrogen in his full ration, that is, 25 per cent. less than the minimum required to keep him in health when in garrison, and less than half what he ought to have when marching or on service. But this is not all, for when his ordinary work is not demanded of him, as when he is in prison or at sea, he receives only a reduced ration, and singularly enough, though the details of the two rations are altogether different (Madras Manual, pages 364 and 369). The amount of nitrogen contained in each is identical, namely, 155 grains—about half of the amount declared to be the minimum necessary to maintain him in health—a quarter of what he should have when on service, and considerably less than the *least amount compatible with health* in a state of rest of mind and body, as laid down in the quotation from the Madras Manual already cited. According to this theory, we should have to imagine that the British soldier is half starved on boardship, or that he is landed in India in a reduced condition physically, or in a state of health which could hardly be restored by subsequent nutrition. The actual fact is, of course, the reverse.

13. This instance appears to be a crucial one. This *British* soldier is not reduced by a diet containing 155 grains of nitrogen. His average weight is probably a third greater than that of the average relief labourer, and it would seem to follow that the relief labourer could be maintained in health by the same proportion, *i. e.*, two-thirds of the absolute quantity of nitrogen required by the European soldier. But one pound of cholum contains, according to Dr. Cornish (paragraph 71, 100 grains of nitrogen, therefore, a pound of cholum should suffice to keep him in moderate condition when something in the way of condiments and nutritious substance is added.

14. I need not press the argument so far, however. The labourer's allowance is not a pound of cholum, but pound and of grain *plus* half an anna, or in practice 1½ annas, in cash. Taking grain at an anna a pound (it is 25 per cent. cheaper in many places), he can buy with this amount as much nitrogenous food as is allowed to the British soldier on boardship. According to the facts furnished by the Madras Manual (but not its theories), the above allowance would appear sufficient to keep him from starvation.

15. With regard to the carbonaceous element of food, the result is the same. The Manual lays down (page 98) that 3,500 grains of carbon are required in a state of rest, and that 5,000 "may be safely taken as a maximum under any circumstances of exertion." The dietaries show that the European soldier gets 4,307 grains in his full ration, and 2,986 when on boardship, while sepoys get 6 659 when on foreign service, and native prisoners 5,616, or rather less, according to the particular constituents of their diet. A pound of cholum contains 2,764 grains (page 376), so that on a pound a day the relief labourer gets much more in proportion to his weight than the soldier on boardship; and can purchase with the wages given him almost as much as the soldier gets in his full ration.

16. These statements and estimates of the chemical constituents of the military rations, both for European and Native troops, are not (be it remembered) made by me, but they have been furnished by the Madras Manual of Hygiene; they are put in the simplest possible form, and can be verified by any one though he may not be versed in the chemistry of food, or the data on which the calculations are made. And I submit that they prove conclusively that the theories enunciated by English authorities, however eminent, and apparently adopted without additional experiments by the Manual, do not apply to natives of this country; only, in fact, apply in the most general way to Englishmen themselves, and cannot be at all accepted as valid reasons why Government should desist from a trial suggested by experience, which, if successful, will conduce to saving the people on the one hand, and to preventing unnecessary expenditure on the other.

17. I should not have discussed this matter at all had not the scientific theory been propounded with so much precision and with so strongly-worded remonstrance against the disregard of it. But we see that the theory is not applicable and cannot be implicitly accepted. If, as stated in my Minute of the 6th current, it is found on a deliberate and dispassionate trial that the new scale *is* insufficient, and that the labourers do not maintain their health, it can, of course, be revised. I have sufficiently shown that this is a matter which may be left to careful observation of the condition of the people, and not deduced, *à priori*, from theoret-

18. Though constrained to demur to the manner in which the Sanitary Commissioner applies certain theories to the proposed practice in our relief operations, I am fully conscious of the benevolent and charitable motives by which Dr. Cornish is actuated, and of his meritorious labours for the welfare of the people in this Presidency.

RICHARD TEMPLE.

No. 136, dated Sholapur, 17th March 1877.

From—The Private Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

In continuation of my letter No. 95, dated 1st March 1877, I have the honour, by direction of Sir Richard Temple, to submit a Memorandum on the relief operations in the Alur and Tadpatri taluks. This Memorandum will take the place of the two notes which were withdrawn by my letter No. 95 of 1st instant.

Memorandum on the condition of the Alur and Tadpatri Taluks of the Bellary District in the latter part of February 1877.

About the middle of February, Sir Richard Temple was much struck with the excessively large numbers of relief labourers in the taluk of Alur in the Bellary District, in which 47,000 persons were receiving relief out of a total population of 95,000. He had a conversation with Mr. Glenny, the Sub-Collector, who stated that the number was apparently much too high, but that Mr. Maltby, the Relief Officer, and the Tahsildar, would endeavour to reduce the number, and to limit relief to those who really needed it. Sir Richard accordingly made enquiry from Mr. Maltby and the Mamlatdar, and ascertained the following facts.

Alur.

2. There had been no rainfall in the taluk since last July, only a few showers; many of the cattle were dying. There was plenty of grain throughout the taluk, and no need to import any in behalf of Government. There were stocks in the country, though the amount could not be stated. Every market-day some 50 cart-loads of rice and cholum are brought in. The price of cholum was 8 seers (of 80 tolas) the rupee; on market-day 9 seers. Rice was 7¼ seers the rupee; on market-day 7½ seers. The ordinary food of the people is cholum.

3. On the 10th February the then last returns showed 46,643 on the relief works out of a population of 94,995, *viz.*, 19,206 men, 20,277 women, and 7,160 children, distributed on six roads thus: (I) Alur-Bellary, 6,117; (II) Alur-Auspri, 8,264; (III) Alur-Goondakul, 14,212; (IV) Alur-Adoni, 4,509; (V) Alur-Siggoopa, 4,803; (VI) Adoni-Sirgoopa 8,048. The road from Auspri to Alur had lately been closed under orders from the Sub-Collector, who had directed that only two roads should be open in the taluk, *viz.*, (I) from Alur to Goondakul, and (II) from Alur to Sirgoopa (*viâ* Raveri on the Haggari river). About 1,500 relief labourers on the Auspri-Alur road had lately 'struck': they were inhabitants of neighbouring villages, and said that they could not go to the Goondakul road. On the Goondakul road there were at that time from 15,000 to 16,000 labourers, chiefly of the Chukla, Bhoya and Pariah castes, most of whom had been for three or four months on the works, and were said to have improved in appearance during that time. The daily wage had lately been reduced from 2 annas, 1 anna 6 pie and 9 pie, to 1 anna 6 pie, 1 anna, and 6 pie for a man, woman and child, respectively. The numbers were gradually diminishing on account of the closing of all but two roads. Orders had some time before been received in the taluka to turn off coolies who had got landed interests, ornaments or grain. Orders to admit no new labourers, except those who appeared to be really in need, had also reached the Tahsildar.

4. The numbers on relief works had risen from 20th to 27th January from 38,528 to 49,257 in consequence of the transfer from the Adoni Taluk of labourers on the Adoni-Sirgoopa road, which took place on the 15th January, but was then first brought into account.

5. The sum of Rs. 2,49,268 had been spent on relief works, and Rs. 347 on gratuitous relief up to date. Task-work was not exacted. Government tools were supplied, but apparently not in sufficient quantities.

6. For famine relief work the Tahsildar had under him one sheristadar, three famine inspectors, one revenue gomashta, five paymasters, and throughout the taluk 132 mistries (gangmen) at Rs. 8 a month and 1,015 kolkars at 4 annas a day. The coolies were paid twice a week, and did no work and received no pay on Sundays. They were supposed to work from 7 A. M. to 5 P. M., stopping for an hour during the day. They declined to bivouac out at night. Cases were known of people going 20 to 25 miles to work, and the refusal of the labourers on the Auspri-Alur road was recognised as a sign of their being in no great want. Two months before orders had been received to stop the small works, such as the small tanks and wells; also the orders to make the labourers bivouac near the roads had reached the Tahsildar.

7. No death from starvation had been heard of. One hospital assistant had been specially sent, and there was previously one hospital assistant. There was no cholera prevalent and very little small pox. There had only been eight cases of cholera since the 20th January.

There were altogether on gratuitous relief perhaps 150 persons, of whom some 75 were in Alur. The orders of Government to the effect that the village authorities were responsible for relieving any person found to be in a badly reduced condition had been received in the taluk two months before, and the reddies were said to be aware of their duties.

9. There had been no dacoities since last September, and crime hardly existed. The people were quiet, as the road-works were open: if they had not been opened, there would have been many crimes.

10. On the whole, looking at all the facts, Sir Richard Temple was of opinion that the numbers in this taluk were excessive, as compared with any standard of relief that had been allowed in the Madras Presidency; that the excess was calculated to demoralise the peasantry of the taluk; that the main causes were the non-exaction of anything like real task-work, and the employment of the people too near to their homes, they being employed on lines of road running through their own villages; that the judicious orders given by the Sub-Collector, Mr. Glenny, had not been carried out by the Tahsildar: and Mr. Maltby, though willing to do his best, was not sufficiently experienced to be able to keep the Tahsildar in order; that Mr. Glenny was himself aware of these defects, and would doubtless take the earliest opportunity of rectifying them after personal visitation.

11. At Tadputri Sir Richard Temple ascertained the following facts. The population of the Tadputri taluk is 115,000. About 12,000 persons were on the relief works, and 1,565 in receipt of gratuitous relief. On the 17th February there were 10,501 on relief works; on the 19th there were 11,600: the increase had taken place on the Yadaki and Bellary roads, under the orders of Mr. Sharkey, the Deputy Collector, and two Road Superintendents. On the Tahsildar's roads—those to Cuddapah and Anantipur—there had been no increase. Two months previous there were 13,000 persons on the works. On the 2nd February orders were received to turn off all respectable people, pattadars, those with ornaments, on which 2,000 had been rejected.

Tadputri.

12. On each of the Anantipur and Cuddapah roads there were about 2,500 relief labourers, for the most part engaged in stone-breaking, as they sat in gangs under the trees, while a number of them collected the stones from the fields. There was a Kolhar in charge of each gang. Since the 17th of February the men had been receiving 1 anna 6 pie, the women 1 anna, the children 6 pie, instead of the 2 annas, 1 anna and 6 pie, and 9 pie they obtained formerly. On the Cuddapah road there had been 4,000 labourers in January. The gangsmen had been directed to take on nobody without the Tahsildar's orders. No child was admitted to the works under seven years' old, nor to the poor-house if they had parents alive. Up to the 19th February Rs. 2,500 had been spent on gratuitous relief and Rs. 80,000 on works in the taluk. There were 351 recipients of gratuitous relief.

13. There was plenty of grain in the markets in the taluk. Jowari was at 9½ to 10 seers the rupee. In November it was at 7 seers (never less), and the owners were disposed to hold their stocks; but importations made them produce the grain, and the prices fell. There were no crops on the dry land, and not more than four annas on the wet. There were two inches of rain in August and one inch last September.

14. Under the Tahsildar there were four revenue inspectors and four paymasters in the taluk, one for each road, the four roads being (1) to Anantipur, (2) to Cuddapah, (3) to Bellary, (4) to Yadaker.

15. The Tahsildar was aware of the necessity of simultaneously enforcing their responsibility for the villages on the reddies, and he expressed himself as able to manage the people without difficulty.

16. On the whole, Sir Richard Temple was of opinion that the Tahsildar's proceedings were fairly satisfactory, but that Mr. Glenny might with advantage enquire why the number increased on Mr. Sharkey's road when there was no increase on the Tahsildar's road. This might have occurred through Mr. Sharkey's want of local experience.

C. E. BUCKLAND,
Private Secretary to Sir R. Temple.

No. 140, dated Sholapur, 17th March 1877.

From—The Secretary to Sir Richard Temple,

To—The Revenue Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honor to submit copy of a minute recorded by him, with annexure, regarding the Mysore grain supply. Sir Richard Temple has asked the special attention of Mr. Saunders to the suggestions offered in the last paragraph of his minute.

Minute by Sir Richard Temple, *dated Sholapur, 16th March 1877.*

When I was at Madras this week, His Excellency the Governor expressed anxiety as to the requirements of and the supply of grain to the province of Mysore. His Grace was apprehensive lest, if any accident should temporarily arrest the daily supply of railway-borne grain to Mysore, the demand of the Mysore population might cause sudden depletion and dearness in the bordering districts of the Madras Presidency. His Grace therefore asked me to let him know whether Mysore had any accumulation of imported grain and to review my calculation on the Mysore supply question, and to consider whether that calculation was ample, and whether

2. I have caused the appended memorandum to be drawn up, stating in detail how matters are, according to the latest available information, believed to stand. I do not think there is in Mysore any considerable accumulation of imported grain. Such grain as comes to the railway stations is either consumed or despatched into the interior. I estimate the outside Mysore requirement at about 570 tons of imported grain per diem; and I believe that the railways can maintain this supply together with sufficient supplies for the Madras districts, even after the western ports are closed, provided:—

(1.) That the Negapatam route is fully worked.

(2.) That six additional goods engines can be borrowed and placed upon the Madras Railway.

Regarding these two provisoes, I have recorded separate minutes, and I therefore need not dwell upon them again.

3. A copy of this minute will be laid before the Chief Commissioner of Mysore, with my recommendation that his Government should investigate the accuracy of the estimates offered in the enclosed memorandum; should watch the importations closely so as to take steps in case they decrease, and should urge very strongly on Bangalore dealers the need for employing the Negapatam route.

RICHARD TEMPLE.

Memorandum on the points raised by His Grace the Governor of Madras respecting Mysore grain supply.

According to the best computation that we can make, the Mysore country ought to get and actually requires * 500 tons of grain a day at stations on the Bangalore branch. This quantity will suffice for the wants of the Mysore districts of Bangalore, Kolar, Tumkur and part of Chitaldroog, containing about 2¼ millions of people. Part of the Chitaldroog district with a population of perhaps 350,000 persons will and now does draw its supplies of foreign grain from Bellary. But then, as a compensation the taluks of Pennekonda, Hindupore, and part of Madaksirra in the Bellary district now get, and will continue to get their supplies from Bangalore. The population of these two taluks and part of the third may be about 200,000 persons. The districts of Shimoga, Hassan and Kadur, with a population of 1½ millions, are said to be living on their own produce, eked out by food imported from the western coast. Shimoga and Hassan, with a population of 1,170,000 between them, had an 8-anna and 9-anna harvest. Kadur had only a four-anna harvest. When the monsoon closes the ports on the western coast, then these three last districts cannot draw supplies from the sea-board, and we do not know how far the stocks of Canara and Malabar can afford to contribute to the support of Western Mysore. Looking to the Board's returns of grain imports into the western ports and to the large railway despatches from Beypore, we cannot think that any very large quantity of grain from beyond the sea has hitherto regularly found its way into Western Mysore. Much of the import shewn in the margin goes to Coorg and the Mulnaad coffee districts. We should not put the demand of these districts for foreign grain at above 1,500 to 2,000 tons a month, or say about 50 tons a day. But of course this estimate is little else than a guess, and may be beyond the truth.

* *Note*.—Hitherto the daily deliveries have averaged about 440 tons during the last six weeks.

Rice importations into West Coast ports other than Beypore and Calicut—

September 1876	2,000 tons.
October „	3,800 „
November „	4,000 „
December „	2,800 „
January 1877	7,000 „

2. According to the estimate in the foregoing paragraph, the demand of Mysore may be summarised thus,—

Bangalore branch demand	500	tons of grain daily.
Western Mysore demand which, after the 15th May, may have to be drawn through Bangalore	50	ditto.
Chittaldroog demand on Bellary for 350,000 people, less the Bellary supply for 200,000 people now drawn from Bangalore	20	ditto.
Total ...	570	ditto

3. His Grace the Governor asks for an opinion whether there is in Mysore any accumulation of imported grain, sufficient to enable the province to tide over a short interruption of imports such as any accident might cause. To this question we can give no precise reply. But we note the following points as bearing upon the subject: the Bangalore traders told Sir Richard Temple early in February that their demands would continue constant until next crop came in; they told Captain Bisset that they now had to refuse grain orders from the interior, because they could not get enough grain from Madras; and they said they could take 100 tons a day more than they now receive, if only it could be carried to them from Madras by railway. On the other hand there are certainly considerable stocks in the country, which will begin to come out into the market as soon as the tanks fill and next season's crop is tolerably secure. The net result is that there is not, so far as we believe, any considerable accumulation of imported grain in the Mysore markets. And a daily supply nearly equal to the total given at paragraph 2 ought to be regularly carried into Mysore.

4. The question then arises whether this full supply of* 570 tons can or cannot be maintained. And the answer to this question involves the general question of the demand of, and supply to, all the Madras famine districts. We think that for the purposes of the present question we may reckon that the districts of Nellore, Chingleput,† South Arcot, Trichinopoly, Madura, part of Kurnool, and Tinnevelly will get what foreign grain they may require without throwing any work on the Madras Railway. There remain, then—

*500 tons from East coast
50 do. West do.
20 do. Bellary.

† *Note*—Parts of Chingleput may perhaps draw their supplies from the railway. But then parts of North Arcot may be supplied from the sea.

	Population.
Class A.	
Bellary	3,800,000
Cuddapah	
Kurnool (⅓th of)	
Class B.	
Coimbatore	5,500,000
Salem	
North Arcot	

According to the estimate made in the memorandum of the 27th January, the districts in class A will require :—

	Tons.
Imported food for two-thirds of their population, or per diem ...	1,040
While the districts in class B will require imported food for one-half their population, or per diem	1,100
Add the Mysore demand as previously worked out	570
	2,710

5. This total quantity is, so far as we are able to judge, the largest quantity which will be required, and we believe that this quantity can and will (if the grain comes forward) be carried by the railway. The subjoined table of Captain Bisset's explains this :—

	Number of wagons despatched daily.	
	Present working.	Probable or promised working.
From Madras to North-Western Line ...	73	90
to South-Western Line ...	68	90
From Raichore South-East ward	104	140
From Beypore	45	0
Negapatam and Erode	0	60
Total ...	290 wagons.	380 wagons.
or in tons a day ...	2,030 tons.	2,660 tons.

6. Thus the Madras Railway can, if it works well, send into the distressed districts daily the full amount of grain which they could according to our estimate require. But it is to be noted that the famine districts have as yet never received, and presumably have not absolutely required the full amount of grain shown in the estimate. The spring crops in irrigated lands of Kurnool, Cuddapah and North Arcot do, no doubt, to some extent supply the wants of their immediate neighbourhoods. And perhaps the full demand shewn in our estimate, may be required only for a very short time, if at all.

7. The statement in paragraph 5 (above) provides for working to their full power all the 18 borrowed engines, but does not reckon on the ten new engines ordered by the Madras Railway, coming into work before the 15th June. Also, it does not reckon on the Madras to Arconum length being doubled before the 15th June. The doubling of the line to Avady, 13 miles from Madras, may however be done by the 1st April, and will considerably facilitate the grain traffic on the Arconum section. Still if our estimate of the possible demand be accepted, then it seems necessary to have some reserve of engine power available. For this purpose it will be necessary either to borrow, or to have power to borrow, six heavy engines able to draw trains of 30 wagons each on the Arconum section.

C. BERNARD.

MADRAS,
14th March 1877.

W. S. S. BISSET.

P. S.—We have not discussed in detail the way in which the Negapatam and Erode route ought to take the place of the Beypore route when the monsoon breaks, because Captain Bisset's Negapatam Notes and Sir Richard Temple's Minute thereon go fully into that question.

No. 142, dated Sholápur, 15th March 1877.

From—C. E. BUCKLAND, Esq., *Private Secy. to* SIR RICHARD TEMPLE,

To—*The Additional Secy. to the Government of India.*

I AM directed to submit, for the information of the Government of India, a copy of the list of taluks and zemindaris visited by Sir Richard Temple in the districts of the Madras Presidency and in the Mysore State between the 14th January and the 14th March.

List of the taluks and zemindaris visited by SIR RICHARD TEMPLE *in the Districts of the Madras Presidency and of the Mysore State.*

Month.	From 14th January to 14th March 1877.	Condition of affairs at time of visit, as observed by Sir Richard Temple.
	In the Karnool District (8 taluks).	
January ...	Ramalkota Taluk ...	Relief works excessive and beyond control, but being brought under. Tehsildar and Deputy Collector moderate in ability.
February ...	Pattikonda „ ...	Relief works in fair order; Tehsildar of good ability.
	In the Bellary District (15 taluks, 1 zemindari).	
January ...	Gooty Taluk ...	Relief work not well in hand.
Ditto & February	Bellary „	Relief work open to objection during my first visit; better during my second visit.
February ...	Alur „ ...	Relief work not under control; great want of discrimination; Tehsildar indifferent.
Ditto ...	Adoni „ ...	Relief work excessive and uncontrolled; but reform being introduced by Mr. Glenny, C.S., and Captain Hamilton; Tehsildar pretty good.
Ditto ...	Hospett „ ...	Relief operations in fair order; Native Deputy Collector and Tehsildar good.
Ditto ...	Tadputri „ ...	Ditto ditto; Tehsildar good.
Ditto ...	Anantapur „ ...	Ditto ditto; Native Deputy Collector and Tehsildar good.
Ditto ...	Dharmaveram „ ...	No particular remarks.
Ditto ...	Pennekonda „ ...	Under Mr. Ross, C.S.; relief operations had been much out of control, but were improving.
Ditto ...	Hindupore „ ...	Relief operations not well in hand; Tehsildar very indifferent.
Ditto ...	Sundoor Zemindari ...	Under Mr. Macarthy; relief works fairly under control.

Month.	From 14th January to 14th March 1877.	Condition of affairs at time of visit, as observed by Sir Richard Temple.
	In the Cuddapah District (11 taluks).	
January ...	Cuddapah Taluk	Relief operations had been somewhat out of hand, but were improving.
March ...	Sedhout „	Relief works under control; Tehsildar good.
Ditto ...	Budnail „	Relief works appear to be in control.
February ...	Madnapalli „	Under Mr. Gribble, c.s.; relief operations had been out of hand, but were fast improving.
	In the Nellore District (9 taluks, 4 zemindaris).	
February ...	Nellore Taluk ...	Relief operations chiefly confined to East Coast Canal.
March ...	Atmakur „	Relief works fairly under control; Tehsildar good.
Ditto ...	Udayagiri „	Under Mr. Underwood, c.s.; signs of poverty; doubtful whether village relief sufficient.
February ...	Goodoor „	Tehsildar moderately good; doubt about sufficiency of village relief.
Ditto ...	Venkatagiri Zemindari ...	Relief apparently not sufficient; 3 zemindars not doing enough.
	In the North Arcot District (9 taluks and 13 zemindaris).	
February ...	Chandragiri Taluk ...	In good case, save one corner which was bad but under relief; Tehsildar good.
January ...	Chittore „	No particular remark.
Ditto ...	Palmanair „	No particular remark; Tehsildar good.
February ...	Gouriattam „	Not in bad case.
January ...	Wallajah „	No particular remark.
Ditto ...	Arcot „	Tehsildar good.
Ditto ...	Vellore „	Town relief in a doubtful condition.
Ditto ...	Poonganoor Zemindari ...	Relief operations well under control; zemindar good.
February ...	Carvátnagar „ ...	Western part pretty good; eastern part bad.
Ditto ...	Kalustri „ ...	One of the worst parts; relief insufficient, but further orders issued by Collector.
March ...	Arni „ ...	No particular remark.

Month.	From 14th January to 14th March 1877.	Condition of affairs at time of visit, as observed by Sir Richard Temple.
	In the Chingleput District (6 taluks.)	
January ...	Sydapet Taluk	Village relief apparently not adequate.
Ditto ...	Chingleput „	No particular remark.
Ditto ...	Conjeveram „	Ditto ditto.
	In the Trichinopoly District (5 taluks).	
January ...	Trichinopoly Taluk ...	No particular remark.
Ditto ...	Kullitalel „ ...	Ditto ditto.
	In the Madura District (6 taluks, 26 Zemindaris).	
January ...	Dindigul Taluk.	Drought; some relief operations.
Ditto ...	Madura „	Drought; relief kept down, as not yet needed.
Ditto ...	Tiroomungalum Taluk ...	Ditto ditto.
	In the Tinnevelly District (9 taluks, 22 zemindaris).	
January ...	Tinnevelly Taluk... ...	Drought; but relief very moderate.
Ditto ...	Ottapadaram „	Ditto ditto.
Ditto ...	Suttoor „	Ditto ditto.
	In the Coimbatore District (10 taluks).	
March ...	Perundoria Taluk ...	Relief work satisfactory good Tehsildar.
Ditto ...	Palladum „	Ditto ditto.
Ditto ...	Coimbatore „	Ditto ditto.
January ...	Kunoor „	No particular remark.

	Taluks.	Zemindaris.
In the ten districts named there are	88	66*
Sir Richard Temple has visited	42	6†

* Many of these are petty.
† The visited are all large and important.

Month.	From 14th January to 14th March 1877.	Condition of affairs at time of visit, as observed by Sir Richard Temple.
	IN THE MYSORE STATE.	
	In the Bangalore District.	
February ...	Bangalore Taluk	Relief works well under control; doubt only about village relief.
Ditto ...	Dooda Bullubpore Taluk ...	Ditto ditto.
	In the Kolar District.	
February ...	Chik Bullubpore Taluk ...	Ditto ditto.
Ditto ...	Baggapally Taluk ...	Ditto ditto.
	Grand total of 46 taluks ... } Visited by Sir Richard Temple.	
	„ 6 zemindaris }	

C. E. BUCKLAND,
Private Secretary.

No. 144, dated Sholapur, 17th March 1877.

From—The Secretary to Sir Richard Temple,
To—The Additional Secretary to the Government of India.

BY direction of Sir Richard Temple, I have the honour to submit copy of a Minute recorded by him recommending the necessity of borrowing six of the most powerful goods engines and placing them at the disposal of the Madras Railway Company. Captain Bisset's Memorandum referred to in the Minute is also submitted.

Minute by SIR RICHARD TEMPLE, *dated Madras, 14th March 1877.*

THE amount of sea-borne grain remaining in Madras is so great, and the existence of large surplus stocks of food-grains in the Berars and in Hindustan is so well known, that no anxiety exists about the sufficiency of the distant markets to provide the necessary supplies.

2. But while well-founded hopes exist that with an absolutely regular traffic the necessary amount of food may be carried to the people, it cannot be forgotten that both from variations in prices and from irregularities or mishaps on the railways themselves, this perfect regularity cannot be attained.

3. To provide against these irregularities, a reserve of power is absolutely necessary. And on the Madras Railway the condition of much of the engine stock is doubtful, and the number of engines, and particularly of goods engines, is small, so that even after receipt of the 18 borrowed engines there is no such reserve of power.

4. The accompanying Memorandum by Captain Bisset, which has been prepared under my instructions, embodies the result of his enquiries into the present state of the engine stock of the Madras Railway, and into the amount of grain which these engines, with the 18 already borrowed, can carry from all sources into the distressed districts.

5. A consideration of the facts and opinions recorded in this Memorandum leads me to recommend earnestly that arrangements be made by the Government of India for borrowing and placing at the disposal of the Madras Railway Company six of the most powerful goods engines which can be found in India.

6. Since recording the above remarks I have had the advantage of discussing the question of railway carriage with His Grace the Governor of Madras, and of ascertaining that the foregoing recommendation meets the views which His Grace had already taken of the further requirements of the Madras Railway.

RICHARD TEMPLE.

Memorandum on the present state of the engine stock of the Madras Railway, dated Madras, 13th March 1877.

I HAVE to-day learnt from the Consulting Engineer for Railways the following about the engine-drivers and the engines of the Madras Railway.

2. Ten engine-drivers have been engaged in England and are expected to reach Madras by the 29th March. Thirty-four engines now running are expected to require repairs during the year. Of these eleven must be taken off work in the course of the month of March, and the others at intervals which cannot be specified.

3. Of the engines now undergoing repairs, seven will be sent out in March, one in April, and two or three in the following months. Of those to be sent out in March one is a shunting engine.

4. Twelve of the borrowed engines have arrived, and are probably now at work, but the six engines got from the East Indian Railway Company are old and are expected to need frequent repairs.

5. Colonel Shaw-Stewart believes that an application has been made on behalf of the Great Indian Peninsula Railway Company for the use of the six State Railway engines which have yet to be received from Bombay.

6. On these points I would submit the following observations:—

There is already a clear gain of about seven engines, and it may reasonably be expected that when the remaining six engines arrive, the clear gain will remain at from ten to twelve engines.

7. As far as engine power is concerned, the estimate submitted with my note of the 7th March can be worked up to almost at once, and certainly after the arrival of the engine drivers on the 29th March.

Statement shewing in parallel columns the present working (week ending 3rd March), and that which is possible with the additional engines.

Despatched from		Present number of wagons a day.	Probable number of wagons a day.
Madras	to North-West line	73	90
	to South-West line	68	90
Raichore		104	140
Beypore		45	60
Erode			
Total		290	380
or total tons a day		2,030	2,660

8. With reference to the supposed proposal to divert the six engines from Madras for the use of the Great Indian Peninsula Railway, I have already represented that, while the engines of the Great Indian Peninsula Railway Company are worked very hard, the work on that railway is not, as on the Madras Railway, almost entirely grain traffic for the prevention of famine, and that even with the six engines there will be no more than sufficient power to carry the requisite amount of grain, even if the daily supply from all sources remains uniformly up to the full amount of the estimate.

9. It is true that ten powerful engines have been ordered by the Madras Railway Company from England, but these cannot be expected to be at work here till the end of June at the earliest.

And up to that time, to be really secure against the fluctuations in traffic which leave trains empty one week and crowd them in the next, it is necessary in my opinion to have six powerful goods engines in addition to those already arrived and the six daily expected.

And the explanation of the need for these is as follows:—

The heavy goods engines now on the line are nearly all fully occupied on the numerous severe gradients on the north-west and the south-west lines, and on the Bangalore branch. And there are but a few of them left to work the trains on the Madras to Arconum section. It is only in Madras that stocks of grain exist large enough and near enough to the affected districts to meet a sudden demand, and until the line from Madras to Arconum is doubled (which I cannot consider possible before the 15th of June), it is only by running heavier trains on this section that supplies to the famine country can be largely increased. There is not the same immediate necessity for additional wagon stock, but if the supplies of grain in through wagons at Raichore are not more fully maintained, it will not improbably be necessary hereafter to borrow wagons also.

W. S. S. BISSET.

No. 146, dated Sholrpur, 17th March 1877.

From—The Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

I AM directed to submit copy of a Minute recorded by Sir Richard Temple after his inspection of the Red Hills and Palaveram relief camps.

Minute by SIR RICHARD TEMPLE, *dated Madras, 14th March 1877.*

HAVING inspected the relief camps at the Red Hills at Yerroocancherry and at Palaveram I desire to record the following observations.

2. The improvement in the appearance and physical condition of the inmates of the Red Hills camp, since my first visit at the end of January, is very marked. On the day of my visit about 2,000 of these poor people were so far recovered as to be able to work, and were about to be drafted on the relief works in the neighbourhood.

3. Among the new arrivals I observed some from the north-east portions of the North Arcot district, especially the zemindaris of Kalustri and the eastern part of Karvátnagar, and from the Nellore district, especially the zemindari of Venkutgiri. This circumstance affords additional proof of the necessity of the increased precaution for ensuring house-to-house visitation, village to village, which necessity was mentioned in my Minutes of the 5th March and the 6th March regarding those districts, and which is, I believe, now practically recognized and acted upon by the district authorities themselves.

3. Though the same facilities for such visitation exist in the zemindaris as in the regular ryotwari tracts, yet my visit to those zemindaris compels me to report to the Madras Government that the zemindars are either not able or not prepared to do all that is needful, unless further pressure be put upon them. I have suggested that in such zemindaris the Collector should depute some trustworthy and experienced official, European or Native, to see that this visitation is so conducted that all persons in distress are really brought forward for relief. If this were done, then these wandering poor would not be straying away from their homes, and finding their weary way to the relief camps near Madras itself. So long as new arrivals at the Red Hills camp are people of the Chingleput district in which the camp is situate, there is no occasion for remark; but when they hail from North Arcot or from Nellore, then occasion arises for enquiring as to how and why they left their homes, and why they were not picked up near their own villages, or cared for in their own districts. The occurrence of such cases is calculated to throw doubt on the arrangements for charitable relief in those districts. I trust, however, that it will be found that recently these arrangements have been so far perfected in both these districts, that no more people will come from there, at least no appreciable numbers, to the relief camps near Madras.

4. At the Yerroocancherry camp I observed a system of housing and lodging different from that in the other relief camps. In those camps the people are accommodated in long barrack-like rows of huts, In this camp, however, there are separate huts for each group of two or three families. And there was an air of cheerfulness about the inmates, several hundreds of whom were paraded for my inspection, very different from the air which is generally to be perceived in those camps. Evidently this sort of camp is much more popular with the poorest classes than the other camps. And the cause appears to lie in the plan of having separate family huts. Inasmuch as the rendering the relief camp less distasteful than they now are to the poorest classes and to the destitute wanderers,— who still have some pride of caste remaining—is one of the problems in the organisation of charitable relief, I would commend the practice of the Yerroocancherry camp to the consideration of the Government of Madras.

5. The Palaveram camp appeared to me to be in very fair order, and the separation of those who have caste from those who are pariahs and below caste, was more complete than in some of the camps which have been visited, though even here the arrangements might in this respect be improved.

RICHARD TEMPLE.

No. 148, dated Sholapur, the 18th March 1877.

From—The Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honour to submit a Minute recorded by him containing his remarks on the labour test and the wage test.

Minute by Sir Richard Temple, *dated Sholapur, 18th March 1877.*

I desire to offer certain remarks on the labour test and the wage test, which remarks are suggested by my experience of two months spent amidst the thick of the relief operations in the Madras Presidency.

2. At the outset of the affair, that is, in the last week of December and the first week of January, there was an extraordinarily large number of persons of both sexes on relief works in the districts of Bellary, Kurnool and Cuddapah; about 950,000* persons out of a population of four millions, or about one-fourth of the whole people. No doubt the failure in 1876 of the south-east or later monsoon, following a failure of the south-west or earlier monsoon, did cause distress to come on with unusual rapidity, and, as it were, precipitated the outbreak of famine. Still, in reference to the early period of the season, to the length of time which had to run before the next coming rains of 1877, the accession of such great numbers was calculated to excite surprise and alarm. If these districts, it may be asked, shewed as many as 950,000 persons in the first or second week of January, what would they be showing in March, and still worse, what might they show in May?

* Bellary	...	420,000
Kurnool	...	320,000
Cuddapah	...	210,000
Total	...	950,000

3. At the beginning of January 1874, the relief works in the worst districts of Bengal-Behar—shewed hardly more than a few hundreds, or at the most but a very few thousands. The numbers remained low till the middle of March. They reached their culminating point hardly before the end of April. If then Bellary, Kurnool and Cuddapah had nearly a million by the middle of January, what, it was anxiously enquired, would be the enormous muster roll of April and May? No doubt there is a difference of at least one month of season between these districts and Bengal, which difference might bring on the outbreak of famine a month earlier in these districts than in Bengal. Still this would not fully account for the remarkable haste with which the famine seemed to be approaching in the Madras Presidency. There must have been something in the system, which had begun to be pursued, to encourage people to resort to the relief works.

As a matter of fact, the numbers on relief works in these three districts have fortunately not gone on rising and rising in the manner which was to have been feared: on the contrary, they have been falling and falling. The necessity of additional precautions was immediately represented to the Madras Government, who promptly took various measures accordingly. The execution of these measures has since been diligently watched. The total for the three districts is now under 500,000, thus—

Bellary	...	...	... 240,000
Kurnool	...	...	... 195,000
Cuddapah	...	...	... 58,000

And it may now be said (though with various qualifications), that the relief works in these three districts are on the whole supervised tolerably well; and that the numbers are reduced in a manner partly in some degree (though far from exactly) proportionate to the dimensions of actual distress. So far the Madras Government may be congratulated on the result. But the ideas in the minds of the people, which produced the original excess in numbers, are still existing, and would again burst into activity, if vigilance were to be relaxed even for a moment. It is therefore practically useful to consider what those causes were, and how they have been or are to be remedied.

5. The causes were—

offering of work close to the homes of the people;
rendering the work light and easy;
making the wages worth having irrespective of bare subsistence;
admitting all comers, without any question as to whether they were able to sustain themselves for a time;
allowing all applications for employment without exception.

These several concessions are deemed by the rural country-people to be considerable advantages.

6. The remedy has been, withholding these advantages, making the scene of work more distant from home, causing the labour to be more hard and irksome, rendering the wage less advantageous, and besides, rejecting all those who appeared able to support themselves for a time at least.

7. It was at the outset held in the Madras Presidency that the wage offered, though liberal enough in ordinary times, would be thought low in reference to the high prices of scarcity time, and that the rural and agricultural classes would not resort to the works under such circumstances unless really pressed by want. It was doubtless hoped that the works would be so distributed as not to be too near and handy to the relief labourers, and that task-work would by degrees be enforced. It was probably difficult under the pressure of last December to fulfil this hope. At all events, from one cause or other, it was not fulfilled: the works were easily accessible, and the task-work was nominal.

8. Then an important circumstance became observable, namely this, that rural classes who are not yet pressed by want, who are able to sustain themselves, and to live without Government aid, will largely resort to relief work so long as those works are close at home, as the labour is easy and the wage worth having, and in the rural classes, I include not only the menial servants in the villages, the beggars who subsist on village charity, the professional work-people, the field labourer, the feudal serfs; but also the "pattadar" ryots (technically so termed), that is, the peasant proprietors, ryots having a beneficiary interest in the soil under the ryotwari settlement, and paying land revenue to Government. In some populous tract it came to this, that relief road ran through the middle of the villages, and the peasantry living on either side of the line within sight of it sauntered leisurely on to the works.

9. On or about the 1st of January there were some persons in all these classes who, even at that early date, really needed relief, and would have submitted to much trouble in order to obtain it. There were, however, many who would gladly take relief if they could get it without trouble, but who would prefer to dispense with it rather than submit to such trouble. There were thousands and thousands of powerful men, representing what would be termed a fine peasantry, whose physical condition would be called splendid, who thus got State wages for some few weeks, under the name of relief, though to them it really was gain. This has been indeed checked. But that this should be the view taken by so many of the peasant proprietory (as it was actually taken by tens of thousands of them) is a circumstance to arouse reflection.

10. It was natural enough, indeed, that such a view should be taken by the rural classes. A man and his family are not in actual want: they are not prepared to interrupt their domestic arrangments or to undergo severe toil; they are not willing to encamp out, perhaps to bivouac, to be on the work all day in inclement weather; still the times are hard and may become harder, their ordinary work is slack, they have nothing in particular to do, they would be glad to make a little money, which would come in usefully, would replace dead cattle, would help to pay for deepening the well for irrigation, would reduce the debt to the village banker, and so on. And at that time (January) a man might have thus earned Rs. $3\frac{3}{4}$, his wife Rs. $2\frac{3}{4}$, and say his two elder children Rs. $3\frac{1}{2}$ more, in all Rs. 10 in a month: in four months (probable duration of distress) Rs. 40 would be obtained, which is really a consideration to a rustic family. If, then, the relief works suit this idea, they afford a temptation to tens, even to hundreds of thousands. Thus it is that resorting to relief works is *not* necessarily a test of distress. Thus it is that State charity becomes indiscriminate and superinduces a certain sort of demoralization. That some demoralization was beginning to creep into the rural community in these districts, I distinctly apprehended, though we may now trust it has been checked. And the State—however much it may be bound to save life and to prevent extreme distress—is not bound to allow this; on the contrary, is bound to set its face against everything of the sort.

11. When, therefore, the numbers on the relief works became so much reduced during February, the main causes were the distribution of the works so as to render them more distant from the homes of the work-people and the augmenting of the task. Instance after instance has occurred of gangs, some thousands strong, being told that the road on which they were engaged was sufficiently finished, and that they must march on to another road ten miles, even five miles off, and then melting away or never mustering again; or being told that they must do such and such a task, and rejoining that they did not like this as it would involve so many hours a day, and then ceasing to appear. This is not, of course, the demeanour of persons who are in real need. And yet it has been exactly the demeanour of a large part of the million of relief labourers in these three districts during January.

12. When, therefore, it is sometimes asked how such large numbers were turned off during February, the answer is that for the most part they turned themselves off, and that they chose to be at rest on finding that they could not get relief on their own terms.

13. A certain number no doubt were picked out to be discharged, under the rule that those were to be rejected who seemed able to sustain themselves for a time at least.

14. The reducing the wage, also, is calculated to keep people away from the works by diminishing the inducement, but it has not been long enough in operation to produce any marked effect.

15. As a remarkable example in a district adjoining these three districts, I may cite the case of the East Coast Canal, an excellent work under professional supervision. Labour is sorely needed for this work. The district all around it (Nellore) is much distressed and might well send, say 30,000 labourers to it (in addition to the few thousands already sent). But the rural poor of Nellore were at the outset comforted by convenient village works, and they refuse to leave these works to go to the Canal; if pressed to go they strike work and decline relief altogether on such terms. Similar efforts were made, under stringent orders of the Madras

Government, in Bellary, Kurnool and Cuddapah to induce relief labourers to go to the Canal, but with very little success.

16. I distinctly apprehend that thousands and thousands of stalwart relief labourers in these several districts will leave the little village works and refuse relief altogether sooner than go to the Canal to or any large public work under professional supervision, at any, even a moderate, distance from their homes. I should even fear that they will undergo some distress and privation before they will yield, if indeed they ever do yield. It is indeed manifest enough that people who thus behave cannot be in severe want, nevertheless, the test of going away from home ought to be persistently applied to able-bodied applicants for relief. This can be done by concentrating operations as much as possible on larger works which have been or may yet be suggested. In my Minute of the 14th February was said all that then occurred to me regarding these larger public works in the Madras Presidency.

17. I have never been insensible to the objection that these larger public works might cause extra expense in one particular way, namely this, that professional labourers might be engaged for them on account of their skill and efficiency, who might not be in absolute need, or who might have been able to obtain private employment,—for experience shows that even in the distressed districts the practised and efficient labourers can generally find work for themselves; it is rather the inferior labourers, and they are legion, who suffer. But when a work of this description is opened, not primarily for the sake of material improvement, but for the purpose of relief, it is easy and necessary to order that no person shall be employed who is believed to be in any way able to sustain himself, for a time at least, or who lives so near that his attendance only shows that he is making a convenience of the work in order to earn a little money. And when this is ordered, then the only objection, which exists to these works being undertaken for relief, is removed.

18. On the other hand, the advantages of these professionally-controlled public works for purposes of relief are absolute. These works being at some distance from the homes of the people, involving some hardship and exposure, requiring people to camp out or to bivouac, exacting labour under engineering supervision, which cannot be cheated or evaded, restricting remuneration to work done according to "task" or "piece" and "measured up" professionally—supply a labour test, which assays the character of the relief-seeking classes, just as money is assayed at a mint. Those who are really in need must submit to all this. Those who are not in such need, but who would be glad enough to avail themselves of relief, that is, of State charity, if easily and conveniently obtained, will not submit. In the Madras presidency the process of examining gangs of relief labourers, rejecting those who are well-to-do, and retaining those who are not, is described by an expressive phrase, "shroffing," in allusion to the manner by which a "shroff," or money-changer, tests the intrinsic value of the coins presented to him. The simple order to the able-bodied among the relief gang to proceed to one of the larger public works at a distance has immediately caused thousands of thousands to "shroff" themselves, that is, to take their discharge from the relief department altogether. And I apprehend that a similar order, if given even now, to many of the strongest gangs in Bellary, Kurnool and Cuddapah would cause tens of thousands more to do the same. If indiscriminate charity by the State is to be avoided, if the charity is to be truly discriminating, relieving only those who are in want, and doing that effectually, then these larger public works afford a self acting test.

19. The primary importance, therefore, of having large public works of this description ready beforehand for all districts where scarcity or famine is to be expected, becomes manifest. Even at this comparatively advanced season the plan may be still further worked with much effect in the Kurnool and Bellary districts especially.

20. It is to be remembered, of course, that there are many classes among the distressed poor who could not labour on these larger public works. For the employment of these people petty works must be provided close to their homes, and with but a very light task. But such works should be begun sparingly and as slowly and cautiously as possible,—they should not be scattered all over distressed tracts until the famine has pronounced itself and the season of trouble has advanced, and none should be admitted to them who could be reasonably expected to resort to the larger public works. The excess which occurred in Bellary, Kurnool and Cuddapah, and which in the middle of January threatened, if not checked, to be overwhelming, arose because easy works close at home were opened all over these districts at the very commencement of the scarcity, and because there were hardly any large public works ready to which the able-bodied applicants for relief could be sent, under penalty of being discharged from relief if they should refuse to go.

21. Besides the petty relief works in the villages, there is the charitable relief to be administered by searching out every distressed person (even those who may fail to complain) by a house-to-house visitation throughout the country. But this important topic need not be pursued here.

22. Most or all of the considerations set forth in this Minute are doubtless already known to the Government of India and to the Government of Madras. But the experience gained recently in the districts of Bellary, Kurnool and Cuddapah, affords such striking confirmation of the view, that I have deemed it my duty to record that experience while it is still fresh.

RICHARD TEMPLE.

No. 71, dated Camp Bellary, the 16th February 1877.

From—The Secretary to Sir Richard Temple,

To—The Additional Secretary to the Government of India.

By direction of Sir Richard Temple, I have the honour to submit copy of a Minute, in which he recommends the deputation of European and Native officers from the Madras Army for employment on relief operations.

Minute by Sir Richard Temple, *dated Camp Bellary, the 16th February 1877.*

The time has now come when the few civil officers and engineers in the interior of the country are unable properly to control and employ all the hundreds of thousands of relief labourers that are upon the hands of Government. Some few civil, military, and engineering officers have been sent from the Bengal Presidency by the Government of India to work under the Collector of the more distressed districts. I would now recommend that a certain number of European officers, Native officers, and selected privates from the Madras Army should, if His Excellency the Commander-in-Chief were pleased to spare them, be made available for controlling relief operations.

2. During the Bengal famine, by the kindness of the Commander-in-Chief, Lord Napier of Magdala, some scores of European officers, and some hundreds of Native officers, non-commissioned officers, and men of the Bengal Army were deputed to North Behar and North Bengal for relief work. It was found that the Native officers and men were, from their habits of discipline and order, specially fitted to control and to direct the employment of large numbers of relief labourers. Many of these Native officers and men gained for themselves honourable mention, which redounded to the credit of their service. The position of such officers in the Army makes them less likely to succumb to temptations, such as are sometimes too strong for the honesty of temporary Native officials on small salary. I trust that selected Native officers and men of the Madras Army would prove themselves as able and energetic as their brethern in Bengal. And I would recommend that His Excellency the Commander-in-Chief be asked temporarily to depute, for the assistance of the Civil Government in this time of sore need,—

20 European officers.
60 selected Native officers, commissioned and non-commissioned.
40 selected men.

These officers and men, if His Excellency the Commander-in-Chief were pleased to spare their services, might perhaps be allowed by His Grace the Governor to draw deputation allowances at the rates allowed to their brethren of the Bengal Army in the Behar famine of 1874.

RICHARD TEMPLE.

No. 766R., dated 14th March 1877.

Memo. from—The Under-Secretary to the Government of India, P. W. Dept.,

To—The Secretary to the Government of India.

The undersigned is directed to forward copy of a Note, dated 13th February 1877, by Lieutenant D. A. Scott, R.E., Officiating Deputy Consulting Engineer to the Government of India for Guaranteed Railways at Calcutta, on the accumulation of grain at stations on the East Indian Railway, together with copies of letters addressed to the Government of Bombay and to the Consulting Engineer to the Government of India for Guaranteed Railways at Calcutta on the subject, Nos. 727 and 728R. of the 13th March 1877.

Note by Lieutenant D. A. Scott, R.E., *Officiating Deputy Consulting Engineer to the Government of India for Guaranteed Railways, on the accumulation of grain at stations on the East Indian Railway.*

On the 25th January I visited the stations between Howrah and Sahibgunge.

I found the platforms of most of the stations between Burdwan and Sahibgunge covered with bags of rice waiting to be carried to Howrah.

At each of these stations a register is kept, in which the dates of the receipt and despatch of consignments are entered. The consignments are despatched strictly in accordance with the place they occupy on this register.

2. The following statement gives the quantity of grain waiting despatch at the principal stations on the Loop Line on the dates on which I visited them.

In column 2 of this statement is given an approximate estimate of the amount of rice stored in the adjacent bazars for export. This estimate can only be a very rough one; but it will serve to give one an idea of the enormous quantity of rice still remaining to be carried away by the railway from this district alone.

In the 3rd column will be found the number of maunds despatched to Howrah during the week previous to my visit, *viz.*, from the 18th to the 24th January inclusive.

Approximate quantity of grain for despatch at the principal stations and adjacent bazars on the Loop Line.

Names of Stations.	Grain for despatch		Quantity despatched from 18th to 24th January inclusive.	Remarks.
	At stations.	In bazars.		
	Mds.	Mds.	Mds	
Gooshkharah	8,000	19,000	4,159	(*a*) On the 25th January 1877.
Bhulpore	15,000	90,000	10,588	
Amoodpore	16,000	2,000	3,906	(*b*) On the 26th January 1877.
Cynthea	20,000	30,000	8,038	
Mullarpore	11,000	1,000	(*a*)4,747	
Rampore Haut	7,000	19,000	6,776	
Nalhati	53,000	21,000	10,456	
Mooraroee	50,000	30,000	5,364	
Pakour	12,000	38,000	4,300	
Sahibgunge ...	11,000	5,000	23,113	
Bhaugulpore	15,000	...	(*b*)8,164	A very lage quantity for export in the bazar, merchants despatching goods by boats.
Colgong	15,000	15,000	4,283	
Total ...	2,33,000	2,55,000	93,894	

3. Approximately, there were 5,00,000 maunds of rice at the stations and in the bazars waiting to be taken away, and the amount removed during the seven days given in the statement is a little short of 1,00,000 maunds. At this rate it would take five weeks to clear off the grain accumulated on this part of the line.

From a letter which I received from Mr. Hime, the Collector of the Beerbhoom District (see Appendix), it appears that no heavy export of rice need be expected after this rush, so that by the end of this month it may fairly be supposed that the Railway Company will have carried off nearly the whole of this large rice traffic.

The country about the stations on this district has been invaded by a number of foreign merchants from different parts of India, who have been attracted to these parts by the unusually good harvest and the high prices obtainable in Calcutta.

4. The most noticeable accumulations of grain were at Bhulpore and Nalhati.

At Bhulpore bags of rice were heaped up on both sides of the road leading to the station for about a quarter of a mile. There had been a fall of rain two or three days previous to my arrival, and some damage had been done to the rice, but the loss sustained by the merchants could not have exceeded one per cent.

At Nalhati, where the State Railway joins the East Indian Railway, great discontent prevailed amongst the merchants owing to the right of preference to through goods from the State Railway having been abolished. I learnt from Mr. Hoyle, out-door traffic Inspector of the Loop Line, who accompanied me over his district, that it was customary to give priority of despatch to through goods; but that owing to several merchants of Nalhati having booked their consignments to Azimgunge and then re-booked them through to Howrah, in order to reap the advantage of this preference, the traffic manager had put a stop to the arrangement. Through goods are now treated as local goods, and are registered accordingly.

Major Luard, who visited Nalhati on duty some few days after I was there, and who had more leisure to enquire into the actual circumstances of the case, has written a note on the subject, so that it is unnecessary for me to say more than this, that I think, before taking any decisive steps in the case, the matter should have been referred to the Agent for his consideration, and also that timely notice of the change should have been given to the Manager of the Nalhati line; for, however fair this action may have been to the majority of the local merchants of Nalhati, it was hardly fair on the State Railway, which is responsible for the through consignments lying at Nalhati Station.

At Burdwan, the whole station compound was filled with bags of rice. The actual amount registered on the 25th January was 58,000 maunds, and consignments were still being brought in. The total amount of rice carried away from the 18th to 24th January was 11,000 maunds; but the register was only cleared off as far back as the 4th December 1876.

5. On the 27th January I met Mr. Hudson, District Traffic Superintendent, at Dinapore. He informed me that in his district (which extends from Nawadi to Mogulserai) he was receiving no empty wagons, and he was able to work off the outwards traffic with the wagons which brought in the inwards traffic. There were no noticeable accumulations of grain in this district, but the station-masters at almost all the stations told me that merchants were not sending their goods to the stations because there was so much delay in procuring wagons.

6. Between Mogulserai and Allahabad the stations were pretty free from accumulations of grain. At Mirzapore, on the 29th January, there were 30 wagon loads of seeds, sugar, &c., waiting despatch. The seeds were for Howrah and Bombay for export, and the rice for Howrah. The station-master informed me that in former years the rice traffic had been inwards coming from Bengal, but this year, owing to the extraordinary demand in Howrah, merchants were exporting it. There was a large quantity of seeds for despatch in the bazar.

7. On the 30th January, at Cawnpore, I found an enormous accumulation of grain. There were on the ground 100,000 bags, or 2,50,000 maunds, of grain for the Great Indian Peninsula Railway alone, but only a small quantity for Howrah. The gates of the station-yard had been closed since the 15th of the month, but they were to be opened again on the 31st, when 100,000 bags of wheat and seeds for Howrah were actually registered for admission. No more consignments were being sent to the Great Indian Peninsula line on account of the block of loaded wagons at Jubbulpore; but as soon as this block was removed, through booking would be resumed.

8. From the 1st to the 29th January the total weight of grain sent from Cawnpore to the Great Indian Peninsula Railway was 2,66,750 maunds, and to the Main Line during the same time 2,73,400 maunds. The average number of loaded wagons despatched per day during these days was 89.

9. Mr. Carter, the Deputy Traffic Manager, informed me that here and at all stations in his district the strictest impartiality was observed in the despatch of consignments, and that preference was not even given to English firms, who brought some lakhs of rupees to the Company yearly.

10. The principal accumulations in the district, which extends from Cawnpore to Delhi were at Etawah and Delhi.

At Etawah station there were 6,000 maunds of grain, cotton and ghee for Howrah, and outside the station about 50 wagon-loads of wheat for Howrah, and other grains for the Great Indian Peninsula Railway.

At Delhi, there were in all 180 wagon-loads of goods lying inside the station-yard, 400 wagon loads outside the station-yard, in the serai, and a very large quantity in the bazar. From this district the number of loaded wagons sent to Howrah and stations below Cawnpore during January was 2,222, and to the Great Indian Peninsula Railway 568.

11. On the Jubbulpore line there were very large quantities of grain accumulated at the four stations next Jubbulpore, namely, at Kutnee, Sleemanabad, Sehora Road, and Deoree.

The following statement gives the quantity of goods registered at these stations, with an approximate estimate of goods stored in the bazar and outside the station compound for export.

Statement shewing quantity of outwards goods on hand at some of the stations on the Jubbulpore Line, 5th February 1877.

Name of Station.	Quantity of goods at station.	Description.	Where for.	Approximate quantity of goods in the bazar.	Number of wagons supplied in December 1876.	Number of wagons supplied in January. 1877.
Kutnee	5,000 mds.	Rice, wheat, seed, and mowha flower.	Great Indian Peninsula Railway.	40,000 bags, or about 110,000 maunds.	194	135
Sleemanabad	7,000 „	Grain, seeds, and mowha flower.	Ditto ...	8,000 mds.	53	45
Sehora Road	25,000 „	Rice, wheat, teel-seed and lin-seed.	Ditto ...	10,000 „	66	61
Deoree	42,000 „	Wheat, seeds, rice, &c.	Ditto ...	12,000 „	95	67

12. At Jubbulpore, on the 4th February, there were 26,000 bags or 65,000 maunds of grain, &c., waiting despatch. Goods registered so far back as the end of November last were only then being sent off. I was told that there were about 20,000 bags of grain for export in the bazar.

On this date (4th February) there were 227 loaded East Indian Railway wagons waiting to be taken away by the Great Indian Peninsula Railway. A statement is given in the appendix showing the number of East Indian Railway wagons on the Great Indian Peninsula Railway during January; also the number of East Indian Railway wagons detained at Jubbulpore daily, &c. From this statement it will be seen that—

the daily average number of East Indian Railway wagons on the Great Indian Peninsula Railway during January was			...	727	
Ditto	ditto	sent to the Great Indian Peninsula Railway	...	93	
Ditto	ditto	returned loaded	...	7	81
Ditto	ditto	ditto unloaded	...	74	
Ditto	ditto	detained at Jubbulpore	...	192	

13. Thus, during this great rush of down traffic, the East Indian Railway has lost the use of a large number of wagons, for which (I was informed by the Deputy Traffic Manager) they get no return from the Great Indian Peninsula Railway.

Considering that the stock of wagons on the East Indian Railway is insufficient to meet the present requirements of the traffic, this large withdrawal of wagons prevents the Company from working off the enormous accumulation of goods at some of their stations, which otherwise they might relieve to a very great extent.

14. The station-master at Jubbulpore informed me that lately the Great Indian Peninsula Railway had cut down their number of outwards trains from 10 to 6 on account of a deficiency of brake-vans. They had, however, borrowed some from the East Indian Railway.

He also said that in calculating the loads of their trains, the Great Indian Peninsula Railway took two of the East Indian Railway wagons as equivalent to three of their own; so that 20 wagons only were carried away by a Great Indian Peninsula train out of the usual East Indian Railway train load of 30 wagons. The reason of this is, that the carrying capacity of an East Indian Railway wagon is 10 tons, that of the Great Indian Peninsula wagon being only six tons.

15. Altogether it is clear that the inability of the Great Indian Peninsula Railway to work off the rush of traffic brought down upon them has caused great loss and inconvenience to the East Indian Railway.

Another matter was brought to my notice at Jubbulpore which deserves attention.

The wagon mileage rate on both lines is the same, the carrying capacity of the East Indian Railway wagons being 10 tons, whilst those of the Great Indian Peninsula Railway are most of them 6 tons.

16. On the 26th January I met the Traffic Manager at Jamalpore. He assured me that there had been no undue detention of East Indian Railway wagons on the Great Indian Peninsula Railway, and that they were all (with perhaps one or two exceptions) returned within the allotted time. This seems to me to be a very liberal allowance, since the average detention of each wagon is about 10 days.

The following figures give an idea of the present enormous down traffic on the E. I. R.:

Goods carried to Howrah during December 1876.

	Tons.
Rice	30,000
Wheat	16,000
Other grains	13,000
Pulses	500
TOTAL ...	59,500

To the G. I. P. Railway during the same month.

	Tons.
Wheat	7,370
Rice	7,120
Pulses	5,700
Other grains	1,470
TOTAL ...	21,660

The traffic to the Madras Line from the E. I. R. is merely nominal. Out of a daily average of nearly 800 tons of grain booked through on to the G. I. P. Railway during December, not more than 30 tons went on to the Madras Line.

The average number of miles run per day (including those run on foreign lines) by covered goods wagons, open-sided wagons, and goods brake-vans during November 1876, as compared with November 1875, is as follows:—

	November 1876. Miles.	November 1875. Miles.
Covered goods wagons	115¼	96¾
Open-side wagons	62¼	41¾
Goods brake-vans	118¼	102½
The average for the whole stock is	90¼	74

17. In conclusion, I may add that this heavy traffic on the E. I. R. is being conducted with regularity, and consignments are despatched with the strictest impartiality.

At each station a register of goods is kept, in which the dates of receipt and despatch of consignments are shown. This register is strictly adhered to. It is hardly necessary for me to say that the goods rolling-stock is inadequate to meet this heavy rush of traffic. At all the stations I visited (and I visited all the stations, except those on the Chord and some of the Branch lines), I do not think that there was a single station at which the station-master did not inform me that he was in want of wagons.

In the appendix will be found two letters from the Traffic Manager, E. I. R., to the Agent of the Company, concerning the traffic to the G. I P. Railway. It will be seen from the latter paragraph of his letter dated 22nd January 1877, that he repudiates the notion that more favour has been shown to the down traffic to Howrah than to the traffic to the G. I. P. Railway.

Indeed, it is evident from paragraphs 12 to 15 of this report, that the E. I. R. has not only given the G. I. P. Railway more traffic than it can deal with, but has also given it a large number of wagons, the use of which it could ill afford to lose.

DOUGLAS A. SCOTT, *Lieut., R. E.*,

The 13th February 1877. *Offg. Depy. Consg. Engr. to the Govt. of India*

APPENDIX.

No. 826, dated 9th February 1877.

From—The Collector of Beerbhoom,

To—The Deputy Consulting Engineer, Government of India.

REFERRING to your demi-official of 29th ultimo, I have the honour to state that there are, exclusive of about 80,000 maunds of rice awaiting despatch at the different railway stations of this district, about 80,000 maunds in depôt ready for export. I do not anticipate any heavy export after the amount on hand has been cleared; the principal block is at the Bulpore railway station, where there are about 50,000 maunds accumulated, and despatch has been suspended for some days owing to want of carriage.

2. Prices have been sensibly affected by the export having risen since 1st November last from 27 seers 5 chittacks, to 21 seers 12 chittacks the rupee.

No. 438, dated 22nd January 1877.

From—The Traffic Manager, Jumalpore,

To—The Agent, Calcutta.

BLOCK OF GOODS AT JUBBULPORE.

ON 20th instant there were 400 of our wagons laden with goods for and *viâ* G. I. P. standing at Jubbulpore for want of engine-power; the yard was blocked, and we had to stop wagons on the Jubbulpore line.

On hearing this, I at once (17-0 on 20th) wired the Deputy Traffic Manager and District Traffic Superintendent, Toondla, to stop booking through, and also advised the Traffic Manager, G. I. Peninsula and his Superintendent at Jubbulpore that our wagons detained at Jubbulpore must be unloaded and contents made over to that Company, if they could not be cleared.

Mr. Conder replies 21st, 9-0 A M.

"There are 330 of your wagons only under load for G. I. P. at Jubbulpore; these will be worked out by Monday; if you will delay sending more until then, stoppage of through booking from your line *viâ* Jubbulpore and unloaded there not necessary; please withdraw early."

I need hardly point out that this is very vague, indeed.

Mr. Conder promises to clear our wagons out if we send no more, and at the same time asks me to withdraw all restrictions on through booking.

At 18-30, on 21st, there were still 272 wagons on hand, and I see no prospect of the G. I. P. being able to push our wagons *on to destination* and return them in due time unless we give them breathing time, so I have left the restriction in force.

I wired the District Traffic Superintendent, Howrah, and Burn & Co. to-day to be prepared for a heavy rush into Howrah and included your name that you might have early advice.

If the G. I. P. Railway clear off to-day the wagons we tendered them on Saturday, they will have from 1,200 to 1,300 of our wagons on their line.

No. 441, dated 22nd January 1877.

From—The Traffic Manager, Jumalpore,
To—The Agent, Calcutta.

WAGONS SENT TO G. I. P.

IN reference to my No. 438 of date as to block of wagons at Jubbulpore, and the steps taken in consequence, it may be as well to give you a sample of what we have been doing for the traffic in that direction of late.

I take Cawnpore exports for a fortnight (*i. e.*, the 15 days from 6th to 20th of this month), and find that of 1,359 wagons despatched from that station under load, no less than 635 were sent to and *viâ* Great Indian Peninsula Railway, and that the daily average stood thus,—

To Great Indian Peninsula	42
To East Indian Railway	38
To all other stations	9
TOTAL ...	89

This is exclusive of through traffic from Oudh and Rohilkhund in their wagons, and it will serve as an illustration, and will show that we have not lost sight of the importance of the traffic to Western India at this crisis, even though the diversion of so many wagons has been a serious detriment to our own local traffic, delay to which is, and has been, causing most serious and well-grounded complaint, as you are aware.

Traffic Statement, Jubbulpore.

* Of this number, 226 were for goods transhipped, leaving 494 for the grains and seeds traffic; and of the 494, 174 were coaching vehicles carrying 3 tons of goods only a-piece.

No. 727R., dated 13th March 1877.

From—The Secretary to the Government of India, PUBLIC WORKS DEPARTMENT,

To—The Secretary to the Government of Bombay, Public Works Department (Railway).

REFERRING to your No. 121 of 29th January and telegrams of 2nd and 3rd February 1877, I am directed to forward, for the information of the Government of Bombay, copy of a note, dated 13th February 1877, on the accumulation of grain at stations on the East Indian Railway.

2. It is evident that up to the date of this report the East Indian Railway was tendering to the Great Indian Peninsula Railway at Jubbulpore more wagons than the latter could take away. So long as this continues to be the case, there can be no ground for intervention on behalf of the Great Indian Peninsula Company and its traffic in the manner desired by the Traffic authorities of that line. The East Indian Railway meantime finds full use for its stock in transporting grain to the sea-board for export, and there is no apparent ground for the idea that this traffic has been favoured at the sacrifice of that to the Great Indian Peninsula Railway. To lock up an indefinite number of wagons at Jubbulpore waiting on the Great Indian Peninsula Railway would reduce, in this emergency, the useful effect of the East Indian Railway, as a whole, very materially.

3. The Great Indian Peninsula Railway Company returns the East Indian wagons within the limit provided in the working agreement.

4. For the accumulation at Jubbulpore and the long delay in clearing that station (paragraph 12) the Great Indian Peninsula is responsible.

5. The Government of Bombay will observe that it is reported that the strictest impartiality was being exercised in the despatch of consignments for the several stations of the East Indian Railway.

No. 728R., dated 13th March 1877.

From—The Government of India, PUBLIC WORKS DEPARTMENT,

To—The Consg. Engr. to the Govt. of India for Guaranteed Railways.

I AM directed to acknowledge receipt of your No. 440 of 23rd February 1877, submitting a note on the accumulation of grain at stations on the East Indian Railway.

2. It is evident that up to the date of this report the East Indian Railway was tendering to the Great Indian Peninsula Railway at Jubbulpore more wagons than the latter could take away. So long as this continues to be the case, the Great Indian Peninsula Railway Company can have no just ground of complaint that its traffic is not fairly dealt with. The East Indian Railway meantime finds the fullest use for its stock in transporting grain to the sea-board for export, and there is no apparent ground for the idea that this traffic has been favored at the sacrifice of that to the Great Indian Peninsula Railways. To lock up an indefinite number of wagons at Jubbulpore waiting on the Great Indian Peninsula Railway would reduce, in this emergency, the useful effect of the East Indian Railway, as a whole, very materially.

3. The Great Indian Peninsula Railway Company returns the East Indian wagons within the limit provided in the working agreements, and it has been confirmed from Madras that very few East Indian wagons have passed on to the Madras Railways. On the 21st January it had 21.

4. The accumulation of grain at Cawnpore, both for the Great Indian Peninsula Railway and for Howrah, was very large. At Atawa and Delhi also there were large accumulations. Goods registered at Jubbulpore so far back as the end of November were being sent off on February 4th; and at Jubbulpore, as also at the four adjacent stations of the Jubbulpore line of the East Indian Railway, there were large accumulations. The Great Indian Peninsula Railway is apparently entirely responsible for the state of affairs at Jubbulpore.

5. It is reported that the heavy traffic on the East Indian Railway is being conducted with regularity, and that the strictest impartiality is being observed in the despatch of consignments from the several stations individually. This is satisfactory. It is presumed that the claims of all stations receive fair consideration in turn, even though, in the case of some, this may involve a very short lead.

6. The wagon mileage rate (paragraph 15) on the East Indian and Great Indian Peninsula lines is irrespective of the capacity of the wagons. This point was reserved for consideration at the Conference, but should probably receive earlier attention.

7. The accumulations on the loop line are considerable. The Nulhatti State Railway appears to have been subjected to summary, if not arbitrary, treatment in the matter of its through booked consignments.

No. 66, dated Hyderabad Residency, 13th March 1877.*

From—Colonel SIR R. J. MEADE, K. C. S. I., *the Resident at Hyderabad,*
To—*The Additional Secretary to the Government of India.*

I HAVE the honour to forward for submission to His Excellency the Viceroy and Governor-General in Council, a summary of information furnished to me by the Nizam's Government on the state of affairs in those portions of the Hyderabad territory which are more or less affected by scarcity, together with a memorandum embodying the same.

2. It will be seen from these papers that the want in His Highness' dominions has never risen to a condition of actual famine, and that the area within which it prevails is much more circumscribed than was thought to be the case when the apprehensions of Government and the public were first excited on the subject.

3. So far as I can judge from the information now submitted, and from that I have from time to time verbally received from the Minister, there appears to be every reason to believe that the measures adopted by His Highness' government for the relief of those needing assistance from the State are well adapted to the object in view, and will prove fairly efficacious.

4. His Excellency in Council will be gratified to learn from the enclosures that the condition of the rabi harvest, now in course of being gathered, is generally fairly favourable, though there is more or less failure of the spring crops in all the affected taluks, and that no further extension of the area in which distress has hitherto prevailed is apprehended.

5. The maximum number of persons for whom it is estimated that relief will be required from the State during the remaining period of the scarcity, is confidently limited to 43,000 per diem, and for that number the sanctioned relief works will probably provide ample employment.

6. The supplies of grain in the country are described as fully equal to all probable requirements for a lengthened period, and these will be largely supplemented by the outturn of the present harvest.

7. The water supply is already very short in many parts of the country to which the scarcity of food-grains has not extended, or in which its effects are only felt from the great rise in prices of food that has taken place more or less throughout Hyderabad, and there is a good deal of anxiety as to how it may be further affected by the coming hot season.

8. Lastly, while there is, no doubt, a great want of fodder for the cattle in the taluks in which the monsoon failed,-and it is deficient and high priced generally throughout the territory, the Government does not appear to entertain any serious apprehension as to the effect of this want or deficiency on the agricultural stock of the country.

9. It only remains for me to state for the information of His Excellency in Council, that the views and measures of His Highness' government in connection with the subject under report, so far as they have come to my knowledge, since the alarm of pending scarcity and famine was first raised, have been based on sound and liberal principles and have been directed with energy and judgment.

10. In all his proceedings on this occasion, the able Minister, Sir Salar Jung, has acted in accordance with the principles enunciated by the British Government, as those by which its own officers should be guided in times of scarcity, and though, fortunately, the calamity has only extended to the districts under his administration in a comparatively mild and mitigated form, His Excellency is, I venture to think, entitled to every credit for the measures that have been actually adopted, and for the manner in which His Highness' government was prepared to grapple with the difficulties of the case if they had assumed the serious character that was at one time anticipated.

11. It is but right that I should add that the Central Committee and the State officials employed in the affected districts appear to have carried out the duties entrusted to them with much zeal and energy, and to have laboured earnestly to give full effect to the Minister's wishes and instructions. I have every reason to believe that Sir Salar Jung is well pleased with their conduct generally in this respect.

Summary of information regarding famine and measures of relief adopted in the Nizam's territory as gathered from papers furnished by the Minister.

No.	Points noted by the Resident.	Information received from Minister.
1	A rough map showing the area affected by the failure of the crops, with information as to the degree of such failure, as total, 12 annas, 8 annas, 6 annas, 4 annas or 2 annas; and also the estimated population of each taluka or sub-taluka or other sub-division so affected.	A map showing the talukas in which anything like famine may be said to exist is annexed. The area and population of the talukas thus affected with an estimate of the failure of crops are given below—

No.	Name of taluk.	Name of zillah.	Area in square miles.	Population.	Estimated failure of crops.
					As.
1	Alampur	Raichur ...	252	26,152	2
2	Kustaghi	Lingsugur ...	771	99,980	10
3	Sindhnur ...	Do. ...	484	52,652	6
4	Indola	Shorapur ...	512	61,105	12
5	Dewa Kunda	Nalgunda ...	544	40,248	10
6	Parsinda	Do. ...	416	40,000	4
7	Ashti	Bheer ...	454	40,240	6
		TOTAL ..	3,433	360,256	Average. 7¼

Besides the above talukas, there are a few others in which the prices of grain run high, but there is no actual famine.

2	List of relief works started in each locality, with brief description of them, the amount sanctioned for them, and the number of people employed on them. Whether such works are carried out by task or not, and what the wage allowed is to men, women and children working on them.	The following statement affords the information required in an abstract form up to 30th Isfunder (6th February 1877)—

Name of district in which relief work is started.	Nature of work.	Amount sanctioned.	Number of people engaged. Average per day for week ending 6th February.	Number of people engaged. Total of people from commencement.

0	0	10	26

Of the sanctioned amount, Rs. 1,17,808 were spent up to the 6th February 1877 on works which are now being carried out by task; but some of those which were sanctioned in the latter part of 1876 and the commencement of 1877 were executed by contract. The wage allowed for a man is 9 (2¼ annas), for a woman 6 (1½ anna) and for a child 4 (1 anna) dubs.* The commencement of some of the famine works above detailed was premature as they were sanctioned on the spur of the first alarm caused by reports of scarcity and distress in districts where on further enquiry no actual famine appeared to exist.

The following statement gives the number of labourers employed, and the sum expended in each district for the week ending 6th February 1877.

Districts.	Total number of labourers on work up to week ending 6th February 1877.	Amount paid on labour.	Amount of contingencies including tools and establishment.	Grand total.	Number of labourers employed during the week ending 6th February 1877.	Amount of relief given during the week.

3 **Arrangements for transporting food to the affected localities, estimated quantity so supplied, and nature and condition of the general trade in grain.**

* **Equal to 11,02,905 mds. or nearly 40,000 tons.**

Government does not interfere with trade; grain dealers import grain and carry it to the stricken localities by the usual modes of transit, *viz.*, carts and Brinjara bullocks; there has been no complaint anywhere of any shortness of supply. The Secretary to the Central Relief Committee, after a tour of inspection along the line of Railway from Hyderabad to Gulburgah, and from Gulburgah to Raichur, reported that the crops in that direction were found to be of an average quality, and that there is no apprehension of famine there, while food grains are so abundant that from the Southern Railway stations alone, in His Highness' dominions, *viz.*, Gulburgah and Raichur, &c., no less than 367,635* pullahs of food grains were exported within five months, and there were still at the Gulburgah station a large quantity awaiting exportation.

No idea can be given of the quantity of grain thrown into each of the affected taluks. It may here be stated that during the four months from Aban to Bahman (12th September to 7th December 1876) the import and export of the country are thus contrasted with those of last year :—

Year.	Export. Pullahs 120 seers.	Import. Pullahs 120 seers.
1285 (1875) ...	640,803	251,785
1286 (1876) ...	14,38,450	473,028
Increase ...	7,97,647	2,21,243

No.	Points noted by the Resident.	Information received from Minister.
		It is worthy of remark that the exports are found for the most part to have been from the districts, while the imports found their way largely into the capital.
4	Quantity of food that can be procured for the wages allowed on the relief work.	An adult can purchase about a seer of jowari for the wages he gets for his day's labour.
5	Measures taken to relieve the helpless poor who cannot work.	Hitherto the "helpless poor" have been permitted to resort to the works and receive wages. Private efforts are also being made in some localities to relieve distress of a pressing nature, but these have no connection with Government. It is also in contemplation to establish poor houses on the part of Government, aided by private subscription, where the helpless poor will be fed and looked after, and light labour taken from them.
6	Steps taken to save the lives of the best of the agricultural cattle by sending them away to localities where there is forage.	No special action has been found to be called for hitherto with respect to the preservation of cattle. It is generally found that the people are able to take care of the best of their cattle, and efforts are being made to teach them the use of the prickly pear as forage. Whenever the cultivators are very hard pressed for forage, they drive their cattle to such of the adjoining districts as are better favoured in this respect.
7	Water-supply.	There is no specific information as to the state of the water-supply, but sadr talukdars and talukdars are empowered to sanction annually estimates, amounting to Rs. 7,500 and 4,000, respectively, for works including the clearing and sinking of wells and the repairing of tanks and canals (*vide* rules 12 and 13 of rules regarding famine relief works in His Highness the Nizam's territory). It is also enjoined that in each camp of work people employed on relief works, one or more wells should be dug and also along roads. The work to be considered as part of relief works, and the officer in charge to undertake the same at his discretion (*vide* supplement to above rules under wells).
8	Measures on the relief works with reference to disease and epidemics.	A few cases of cholera were reported from Lingasugur, and a medical man was deputed to look after the camp there. But no complaints have arrived since medical assistance was made available for the labourers on the works at Maslapur, Lingasugur, Anpur, and Bansgah, and the appointment of a dresser has been applied for for the relief of labourers engaged on the works between Gulburgah and Seram among whom small-pox is reported to have broken out. To provide for medical aid and sanitation in famine-striken districts, the following rules have been laid down:— "On every work employing 2,000 or more coolies, one dresser should reside, provided with a sufficient supply of medicines. It is proposed that two hakeems (in addition to the ordinary district doctor) be employed in each district where famine relief works are going on, specially to be in medical charge of such work. All details connected with the medical officers and their arrangements are left entirely to the Superintendent of the Medical School, Hyderabad; but beyond these, the dressers attached to the camps should act under the instructions of the officer in charge. "In case of the outbreak of an epidemic, a shed will be constructed for the reception of patients, with mud walls and a chupper-roof; the shed will be erected to leeward of the works and camp, at a distance of not less than 200 yards. "The medical officer will be allowed coolies to attend on the sick in the proportion of one coolie to every 2 patients when the number of sick exceeds three. These coolies will be placed at the disposal of the medical officer by the officer in charge of the works, and they will be paid double the pay of those employed upon the works; those on the sick list receiving half their ordinary day's pay and hospital diet. "Cholera medicines should be supplied to all supervisors and overseers with orders to administer them at once to persons attacked, in accordance with printed instructions furnished. "In case of deaths, the bodies are to be immediately interred at the cost of Government in graves 6½ feet long by 4½ feet deep at least, at a distance of not less than 100 yards from the works and camp. The clothes of persons who may have died of cholera must be burnt immediately. "A sufficient number of latrines will be provided in each camp, located as far as possible from the huts, and with due regard to the prevailing wind. The system will be that of trenches with soil heaped alongside, so that it may be thrown back into the trench when thought proper, and a fresh trench will then be dug. The walls to be of bamboo sticks and mats. Their construction will form part of the relief work, and sketches will be sent to district officers. "The Police should be instructed to take into custody any person found satisfying the calls of nature within a distance of 500 yards of any part of the camp or work elsewhere than in the latrines. The offender being handed over to the overseer to be fined ¼ day's pay."
9	Rules regarding the employment of the poor on the relief works.	The following rules are in force on this subject:— If found deserving of relief, the name of the applicant, father's name, village, age, and other particulars, will be entered in a book kept for that purpose. The applicant will be given a metal ticket with a number on it corresponding to the number against his or her name in the register abovementioned, and the applicant will be known upon the work by the number so given. Great discretion must be exercised by the revenue authorities in forwarding for employment only those who really require relief, as the funds sanctioned by Government for expenditure on relief work must be economised as much as possible, as they will have to extend over the whole period that the distress lasts. The revenue officer should, in forming his opinion as to whether applicants are deserving of relief, be guided by his personal knowledge of them or of the districts whence they come, their appearance, &c.; in the event of their being possessed of jewels, ornaments or superfluous property of any kind, they should not be admitted on to the relief works.

No. 10 — Emigration into and from British territory.

The latest return received gives the following figures:—

	Cultivators.	Labourers and others.	Total.
Number of men who left His Highness' for British territory up to 30th Isfunder (6th February 1877)	849	8,675	9,524
Number of men who left British for Nizam's territory up to 30th Isfunder (6th February 1877)...	6,669	22,059	28,728

The number of British subjects employed on relief works in His Highness' territory during the weeks ending 29th January and 6th February 1877, is thus shewn:—

Week ending 29th January 1877	... 1,663
Ditto 6th February 1877	... 11,149

No. 11 — Rates of food at the chief places in Hyderabad, as the Capital, Gulburgah, Aurungabad, Jalna and other towns, and the general results of harvest and supplies of food, forage and water in the unaffected talukas.

The rates of food in the several districts will be seen from the following statement, with the total rainfall in each district.

The imports of grain into Hyderabad on the 25th February 1877 (11th Safar 1294) were 1,171 pullahs, of which 552 were rice, 273 wheat, 276 jowari and 70 chenna (Bengal gram).

The prices in the city of Hyderabad, of—

Rice varied, 1st sort, from Rs. 26 to 24 per pullah.
2nd ditto „ 21 to 19½ ditto.
3rd ditto „ 19½ to 17 ditto.
Wheat varied, 1st ditto „ 17 to 15½ ditto.
2nd ditto „ 15½ to 13½ ditto.
3rd ditto „ 13½ to 12½ ditto.
Jowari, white ditto „ 12½ to 12½ ditto.
Ditto, yellow ditto „ 12 to 11½ ditto.

Outside the city.

Rice ... 1st sort, from Rs. 26 to 22 per pullah.
2nd ditto „ 21 to 18½ ditto.
3rd ditto „ 18½ to 16 ditto.
Wheat ... 1st ditto „ 17 to 16 ditto.
2nd ditto „ 14½ to 13 ditto.
Jowari, white, from Rs. 13 to 12 per pullah.
Ditto, yellow, „ „ 11½ to 10½ ditto.
Bajri Rs. 12 per pullah.

The appended statement (A) gives the general condition of the seasons and supplies of food, forage and water, in all the districts in the Nizam's territory.

It is remarked in conclusion, that the result of the enquiries conducted by the six officers selected for special duty from the Departments of Revenue and Public Works is, that the distress is neither so wide-spread, nor so alarming as was at first supposed, and that with the exception of the districts named in the first portion of this memorandum, famine does not exist in any part of His Highness the Nizam's Dominions.

NOTE.—The map referred to above is being copied in Public Works Office and will follow immediately.

HYDERABAD RESIDENCY,
The 13th March 1877.

C. B. EVAN SMITH,
First Assistant Resident.

A.

Statement shewing extent of Famine and Number of Famine-stricken persons in the Nizam's Territory.

Division.	District.	Area in square miles.	Population.	Estimate of famine-stricken persons requiring relief.	Remarks.
Southern Division	Gulburgah ...	3,456	198,023	...	There is no famine in this district. State of crops generally fair.
Ditto ...	Shorapur ...	2,112	272,345	6,000	Distress in this district is confined to the western portion of it.
Ditto ...	East Raichur ...	2,752	295,848	10,000	Famine exists only in the Alpur taluk prices high in other taluks.
Ditto ...	Western Lingsugur...	2,264	251,911	12,000	Crops scanty in taluks Sindnur and Kushtagi. Ryots and others suffering from famine.
Eastern Division	Khamam ...	7,808	270,250	...	Neither famine nor distress at present exists.
Ditto ...	Nulgunda ...	7,424	226,619	5,000	Crops scanty in taluk Nalgunda, cultivators suffering. Grass, either green or dry, for cattle scarcely to be had.
Ditto ...	Nagar Kurnool ...	5,184	157,184	...	In none of the taluks in this district is there distress from famine, but high prices of grain prevail.
Western Division	Beder	4,288	212,001	...	The rabi crops in good condition. The kharif crops above the average, and the cultivators considerably benefited.
Ditto ...	Nuldroog ...	3,420	267,180	10,000	In taluk Nelinga, the rabi season is good and the kharif also good, and according to expectations. In taluk Tuljapur, there is distress from scarcity of water, but no famine. In taluk Wasi, there is a scarcity of forage for cattle from want of rain. In taluk Nuldroog, season very favourable. In Dharasco, grain plentiful, but cattle suffering. In Parenda, owing to an almost total failure of rain, distress is felt from want of water, but there is sufficient supply of grain.
Northern Division	Nandair ...	3,456	347,612	...	No famine. State of rabi and kharif crops fair.
Ditto ...	Meduck ...	4,032	156,080	...	No famine. Season good.
Ditto ...	Indore	3,328	243,298	...	State of agriculture very satisfactory, but apprehension entertained of high prices from exportations of grain and possible occurrence of famine. The state of this district, however, is better than all others.
Ditto ...	Yelgundal ...	6,400	460,610	...	No cause of complaint whatever. Grain plentiful.
Ditto ...	Sirpur Tandore ...	Not given.	147,973	...	Crops flourishing.
North-Western Division.	Aurungabad ...	5,824	331,702	...	In some villages of taluks Baizapur and Kanhar, crops failed from drought, but on the whole, famine does not exist, though high prices of grain prevail.
Ditto ...	Beer	4,096	258,338	...	Famine does not exist in any of the taluks of this district; but in taluk Ashti, distress is apprehended from failure of crops. There is, however, a sufficient quantity of grain in this taluk.
Ditto ...	Parbhani ...	3,520	276,620	...	No cause of complaint whatever.
		69,364	4,373,594	43,000	

C. B. EVAN SMITH,

1st Assistant Resident, Hyderabad.

Memorandum concerning the scarcity in His Highness the Nizam's Territory.

His Highness the Nizam's territory is divided into seventeen districts (*vide* accompanying map*) of which a list is given in the margin.† The pressure of want has been felt in seven taluks only of the districts, number 1 to 5. In four very severely, namely,—

(1).—Alumpur in Raichur, south.
(2.)—Sindnur in Lingsugur, south.
(3).—Parainda in Nulgunda, east.
(4).—Ashti in Bheer, north-west.

And in three partially, namely,

(1).—Kustagi in Lingsugur, south.
(2).—Indola, in Shorapur, south.
(3).—Dewar Konda in Nulgunda, east.

In the first-named four taluks, the average crop was one of 4½ annas, while in Alumpur it was of 2 annas only. In the last-named three taluks the average crop was as high as 10¾ annas. Over the rest of the country the harvests for last year were fair, and though the partial failure of the monsoon may cause some distress during the ensuing hot season, there can be no doubt that, with the exception of the taluks above specified, no other part of His Highness' dominions has any cause to dread scarcity of a nature likely to cause serious distress.

* Will follow.

† 1 Raichur.
2 Lingsugur.
3 Shorapur.
4 Nulgunda.
5 Bheer.
} Affected districts.
6 Gulbu
7 Khanram.
8 Nagar Kurnool.
9 Beder.
10 Nuldrug.
11 Nandair.
12 Meduck.
13 Indore.
14 Elgundal.
15 Sirpur Tandur.
16 Aurungabad.
17 Parbani.

NOTE.—The relief works in progress are shewn on the map by red lines.

The total area of the districts affected by the scarcity may be roughly calculated at 3,400 square miles with a population of 360,000, or about 106 human beings to the square mile.

When the first reports of an approaching famine began to spread some six months ago, considerable alarm was manifested in the city and at the head-quarters of the Government, and relief measures were authorised, that have since, under the guidance of experience and a more intimate knowledge of the facts, been considerably modified. The whole of the relief proceedings are now entrusted to and directed by a central committee established at Hyderabad under the presidency of the Revenue Minister, Nawab Mukarrum-ud-Dowlah, nephew to Sir Salar Jung. This committee is composed of men of all classes, creeds, and professions. It receives periodical reports of what is going on in the famine districts, and takes measures and issues orders accordingly. Its proceedings up to the present time appear to have been conducted with prudence and judgment, and to have inspired a general feeling of confidence.

The measures which the committee has principally addressed itself to have been the institution of relief works and the necessary arrrangements for the supply, in connection therewith, of a sufficient quantity of grain to feed the distressed and suffering poor seeking employment on these works.

Of actual starvation, no case has been reported to the capital, and it may be hoped that, however distressing the suffering inevitable from the high price of grain, death from sheer want of food will be warded off.

The relief works have been divided into two main heads, *viz.*—

(1) The construction of roads and the repairing of tanks and canals, and
(2) the construction of new or the repair of old wells.

The total amount sanctioned for expenditure on relief works up to the 6th February 1877 was 4,22,021 H. S. Rupees. The central relief committee is, however, authorised to recommend that an increase should be made to this grant if found necessary.

Of the above sum, close on 1,20,000 H. S. Rupees had been spent up to the 6th February, the total number of persons relieved being 941,377. The Minister's report only gives the daily average number relieved for the one week ending 6th February 1877, when it amounted to 26,558.

The wage allotted at the relief work is as follows per diem—

	Rs.	A.	P.	Cts.	
A man 9 dubs = ...	0	1	8	55/100	Government Coin.
A woman 6 dubs = ...	0	1	3	39/100	,,
A child 4 ,, = ...	0	0	10	26/100	,,

A male adult can purchase at the works about 1 seer of jawari with his day's wage as above.

The Government has not up to the present interfered in any way with the grain trade, and it is not probable that it will be called upon to do so. The trade in all species of grain is particularly lively. From the Southern Railway Station, between Gulburga and Raichur, in His Highness' dominions, no less than 40,000 tons of grain were exported within the five months up to February 1877, and those and the other stations along the line are still crammed with grain waiting to be removed. During the four months immediately preceding the commencement of the present year, the grain exports were 4,79,483 maunds against 1,57,676 maunds imports, while for the preceding year the figures shew for the same period 2,15,601 maunds exports and 83,926 maunds imports, or less than half the quantities that have lately been transported under pressure of the existing partial scarcity. The grain, it may be mentioned, has up to the present time found its way into the affected districts by the ordinary modes of transit, carts and brinjarah bullocks. The only complaints that have been made have had reference to the delays that have unavoidably taken place on the railway, and these complaints the railway authorities have ever done their best to rectify.

The system of transport by brinjarah bullocks works well, and will doubtless continue to do so should the very scanty fall of rain in many parts of the country not render the main lines of communication impracticable to beasts of burden from want of water.

The Government has not considered it necessary to issue any special instructions with the object of endeavouring to save the best of the stock of agricultural cattle in the affected localities. It is found that precautionary measures are generally taken by the owners themselves in behalf of the more valuable animals, and that Government interference is not needed. The value of the prickly pear, as an article of fodder, has however been made known as widely as possible.

The state of the water supply in the various districts has not received the special attention of Government, beyond the issue of injunctions to the district officials to have wells dug and to improve the appliances at command for increasing the supply of water wherever feasible, and they have been authorised to spend money as required for this purpose at their discretion.

The measures taken for the preservation of health at the various relief works appear to be as satisfactory as circumstances will admit of; some few cases of cholera and small-pox have been reported, but there has been nothing like an epidemic, and the rules in force for the prevention of the spread of disease are satisfactory, and will doubtless prove effective if properly carried out.

Much care is now enjoined by the rules that have been laid down to obviate any individuals finding employment on the relief works who are not in actual want. The distribution of relief from private sources is as yet very limited, but may be expected to increase as the season advances.

His Highness' Government proposes, with the help of private aid, to establish generally throughout the affected districts poor-houses where relief may be distributed locally to such sufferers as are either unable to reach, or are not fit for employment on, the relief works, but from whom light labour will be taken, when found practicable.

On a rough estimate it is calculated that up to the 6th February 1877 the total number of the Nizam's subjects that had passed from Hyderabad territory into British limits aggregated about some 10,000 persons, and that this efflux was counterbalanced by an influx of no less than 29,000 emigrants from British territory, while it is also represented, that over 11,000 of the latter were employed on the relief works in His Highness' territory during the week ending 6th ultimo. The extraordinary rise in the number of this class of persons from 1663 in the week ending 29th January to 11,149 during that ending 6th February is worthy* of attention. It should, however, be added that it is acknowlodged by His Highness' officials that these figures cannot be depended on, and that nothing in the nature of a complaint regarding the advent of immigrants from the British Districts in search of employment has been made by His Highness' Government.

* *Note.* Enquiry has been made on this point.

In the parts of His Highness' territories most affected by the famine, the prospects of the crops now in the ground are generally good; and in some few places unusually so; and it may, indeed, be stated generally, that the grave apprehensions of famine in His Highness' dominions which so generally existed some months ago have not been realized, either as to the intensity or extent of the threatened severity. It has been ascertained beyond a doubt that there is far more than sufficient grain in the country to meet any want that the Government is now likely to have to deal with. The scarcity is in fact well in hand, and the Government entertains, it is believed, a well-founded confidence that the measures that have been organized will suffice to stand the strain that may be put upon them, and that these measures are meeting the difficulty in as efficacious a manner as could have been looked for. The estimate of the maximum number that may have to be provided for on the relief works during the coming hot season does not exceed a daily average of 43,000 persons, and His Highness' Government appears to be satisfied that that estimate may be accepted as reliable.

The accompanying abstract statements of information supplied by His Highness' Government give full information on the several points briefly touched on above. They also include a list of the various prices of grain ruling in the capital and the districts.

No. 276, dated 9th March 1877.

From—The Additional Secretary to the Government of India,
To—The Additional Secretary to the Government of Madras.

I AM directed by the Governor-General in Council to communicate the following remarks with reference to the stock of grain purchased by the Government of Madras, a considerable portion of which is retained as a reserve.

2. The Madras Government are doubtless aware of the distrust which is felt by members of the mercantile community both at Madras and at Calcutta, and it is believed also at Rangoon, in connection with the purchases of grain made by the Madras Government some time ago. This feeling has found expression from time to time in letters in the newspapers, and it is evident from information which has reached the Government of India from other quarters that there still exists an impression among persons interested in the grain trade that the relations between the Madras Government and the firm which it employed to make its purchases have not entirely ceased, and that there is a danger of other similar purchases being made and disarranging the calculations of the trade. Some colour has unfortunately been given to the impression in question by the delay which occurred in notifying to the district officials at Bellary and to the public generally the termination of the appointment of Messrs. Arbuthnot & Co. as Government brokers for the purchase of grain; and from proceedings of the Madras Government which have recently been received, it would appear that Messrs. Arbuthnot & Co. were employed a few weeks ago in issuing supplies of rice from the Government reserve and in replacing in the reserve an equal quantity, which, apparently, was supplied by them to the Government. In one of Sir Richard Temple's recent minutes the same firm are alluded to under the designation of the Government grain agents.

3. The Governor-General in Council is aware that the Madras Government have no intention of entering into further purchases of grain similar to those made by them in November last; but it is so important that there should be no grounds whatever for misapprehension, either as to the action or intentions of the Government, that His Excellency in Council deems it necessary to request that the Madras Government will lose no time in publicly notifying the quantity of grain now in its hands, both at Madras itself and in the distressed districts, and its resolution to make no further purchases of grain outside of the distressed districts, unless it is satisfied that the trade is unable to supply the wants of those districts, in which case the grounds of that conclusion, and the exact intentions of the Government, will be publicly made known before action is taken.

4. This resolution should apply not only to additions to the reserve of grain now stored at Madras, but also to purchases made with the view of supplying the place of issues made from the reserve. It should also be notified that even in the distressed districts the Government will abstain from making purchases except for the relief of localities which the trade is unable to reach, that all Government grain now in those districts will be removed to places at least sixty miles from the railway, and that no more Government grain will be sent to them from Madras so long as private trade is able to supply them. I am to request that these instructions may be carried out with as little delay as possible.

5. In regard to the reserve of Government grain now at Madras, which, according to the latest information furnished to the Government of India, amounted to 26,000 tons, I am to suggest, for the consideration of His Grace in Council, the expediency of disposing of this reserve by public sale to the trade. With reference to the large quantity of grain which appears to have accumulated at Madras, belonging to private traders, the retention of a Government reserve would seem to be unnecessary, and its existence is certainly calculated to keep alive the erroneous impressions which have taken possession of the public mind in regard to the probability of the Government again interfering with the grain market. What the Government of India would suggest is that the reserve should be sold to the highest bidders in specified lots of, say, 5,000 tons each, at intervals of a fortnight, previous notification being given of the quantities to be sold, and of the dates on which the sales will take place.

Telegram, dated 17th March 1877.

From—Madras, | *To—Calcutta,*
From—Revenue Addl. Secretary, | *To—Revenue Addl. Secretary.*

GOVERNMENT consider it imprudent to vary distribution of reserve grain at well-considered places. Suggested sale of grain now remaining in Madras would necessarily interfere with trade, and would be a breach of faith after public pledge that it was strictly held for emergencies. Government, therefore, cannot accept either of these suggestions, and have announced this decision, as publication of suggestion in *Gazette* has much unsettled trade. Your announcement of this decision to Calcutta and Burma will be useful to re-assure trade.

Telegram, dated 21st March 1877.

From—Calcutta, | *To—Madras,*
From—Revenue Additional Secretary. | *To—Revenue Additional Secretary.*

YOUR telegram regarding grain reserve. Have you made the public notification requested in paragraphs 3 and 4 of our letter of the 9th instant, except that relating to the removal of Government grain to places 60 miles from railway. If not, please explain why? With regard to distribution of reserve grain, we request you to inform us as soon as possible what are the places less than 60 miles from the railway where reserve of Government grain are stored; what is the quantity so stored in each such place; and what your reasons for retaining it in a locality which, *primâ facie*, ought to be easily reached by private trade. Telegraphic answer to these enquiries and early written reply to our letter of 9th instant are requested. The Government of India also request that all important announcements made, or decisions arrived at, by the Madras Government regarding the famine may be promptly telegraphed to Supreme Government. The public announcement, that the Government would hold the stock of grain at Madras in reserve, was not communicated to us at the time.

No. 309.—COPY by post.

No. 313, dated 23rd March 1877.

From—The Additional Secretary to the Government of India,
To—The Secretary to the Government of Madras.

I HAVE had the honour to receive your telegram of the 17th instant, in answer to my letter No. 276 of the 9th instant.

2. In reply, I am directed to state that before coming to a final decision on the subject of the 2nd, 3rd and 4th paragraphs of that letter, His Excellency the Governor-General in Council will await the result of the further reference which was made to the Government of Madras by telegraph yesterday.

3. The proposal in paragraph 5, that the reserve of grain now held by the Madras Government should be gradually sold off in small quantities at fixed intervals, was, I am to explain, intended to relieve the mercantile community from the standing menace which seemed to be involved in the existence of a stock of grain in the hands of the Government, liable to be despatched into the distressed districts, or to be thrown on the market at any time. From such enquiries as the Government of India have been able to make, it appears that at Calcutta there is considerable difference of opinion on the subject; although some of the leading merchants consider that the sales contemplated would tend to confirm the confidence of the mercantile community in our policy of non-interference with private trade, and that if conducted in the manner, and at the intervals, proposed, they would not be of sufficient importance to have any serious effect upon prices. As, however, the general opinion of the trade at Madras appears to be adverse to the measure, and as His Excellency the Governor in Council has given a public pledge that the grain shall be retained in reserve to meet future emergencies, the Government of India will not press its suggestion further. I am, however, to add that the reserve should not be moved or utilised in any way without the permission of the Government of India, which, in case of necessity, may be applied for by telegraph, with a full explanation of the necessity of the case.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

RELIEF REPORT FOR THE WEEK ENDING 10th MARCH 1877.

Extract from the Proceedings of the Board of Revenue, Madras, dated 16th March 1877.

The usual relief reports, with maps and statements for the week ending 10th March, will be submitted to Government. No report has been received from South Arcot, and telegrams only from Kurnool and Kistna. Maps showing the works in progress in North Arcot, Coimbatore, Salem, Cuddapah, Nellore, Bellary and Madura are herewith forwarded.

2. Prices of all grains shew a slight rise in Kistna, but a tendency to further fall in Kurnool; there is a somewhat sharp rise in Salem. In other districts, there is little change to notice. In Nellore, prices are more nearly equalized than before; there is a tendency to rise in the north of the district, but the inferior grains have become cheaper in the south. Ragi and cholum have fallen in Pullumpett and the northern Taluqs of Cuddapah, owing, no doubt, to harvest of crops under wells. In Bellary prices are nearly stationary, but there is extraordinary difference in the price of ragi at stations on the railway line and in the remoter taluqs, which points to extensive importation. While indigenous cholum is quoted at 8·76 seers, Raichore and Jubbulpur cholum are sold at Bellary at 9·27 and 10·3 seers respectively. The continued fall in Kurnool is attributed, as in last week, to importation and harvest of crops under the canal. Prices are almost stationary everywhere in Chingleput, North Arcot, Coimbatore, Trichinopoly, Madura and Tinnevelly. The rise of price in the Salem average already noticed results from a very great increase in the Dhorampuri taluq, which is the most distressed in the district. The quotations in this taluq for this and for last week are given in the margin. The attention of the Collector is called to the great enhancement of price, and he is requested to report to what it is to be ascribed.

	Seers.
Madaksira ...	7·28
Hurpunhulli ...	7·76
Bellary ...	10·19
Tadpatri ...	11·40
Adoni ...	11·88

	3rd March. Seers.	10th March. Seers.
Rice ...	7·03	5·35
Cholum ...	10·11	6·03
Ragi ...	8·97	5·98
Cumboo ...	9·19	5·80

3. *Rainfall.*—There was no rain during the week except in the Kadiri Taluq of Cuddapah, where one-tenth of an inch was registered.

4. *Grants, &c.*—The grants made for general relief purposes to the 10th March amounted to Rs. 1,00,49,763. The grant for the Nellore District has been exceeded, and further sums will be placed at the Collector's disposal. Against the grants, the outlay to date is approximately Rs. 84,70,935 upon works, and Rs. 2,81,738 on gratuitous relief. The following shows the distribution of the outlay on works in progress (statement 4), the districts of Kurnool and South Arcot being excepted :—

	In the week.	Up to the week.
Roads—	Rs.	Rs.
New Works	1,58,232	34,44,020
Repairs	45,046	6,78,883
TOTAL ...	2,03,278	41,22,903
Irrigation Works	23,073	3,32,199
Miscellaneous	35,864	4,29,168
TOTAL ...	2,62,215	48,84,270

The relief works in Malabar have not yet commenced. Distress has shewn itself among the hill tribes in parts of the Nilgiris, and a small grant has been sanctioned, but relief operations have not yet commenced.

5. *Numbers on relief works.*—The total numbers on the works in the several districts are compared below :—

	3rd March.	10th March.		Population.	Present No. of percentage of population
Kistna	2,932	2,755	— 177	308,1[illegible]*	·90
Nellore	48,289	54,546	+ 6,257	1,376,811	6·13‖
Cuddapah	58,207	57,231	— 976	1,351,194	4·23
Bellary	2,39,820	2,18,319	— 21,501	1,668,006	13·09
Kurnool	1,94,645	1,91,546	— 3,099	959,640	19·96
Chingleput ...	7,909	7,308	— 601	938,184	·78
North Arcot ...	17,896	15,109	— 2,787	2,015,278	·75
South „ ...	1,130	.....	— 1,130	640,519†	...
Trichinopoly ...	.....	.....	...	76,530‡	...
Madura	5,766	6,784	+ 1,018	2,266,615	·30
Tinnevelly ...	653	1,561	+ 908	990,288§	·16
Coimbatore ...	21,778	24,418	+ 2,640	1,763,274	2·30
Salem	43,022	45,346	+ 2,324	1,966,995	3·83
TOTAL ...	6,42,047	6,24,923	— 17,124	16,321,488	4·01
East Coast Canal ...	26,576	29,879	+ 3,303		
	6,68,623	6,54,802	— 13,821		

* Bunder Bapatla only.
† Tindivanam, Trinomalai and Villuperam.
‡ Trichinopoly town only.
§ Odapidaram, Sankaranainarkooil, Stivilliputteri, Satur Nangueri.
‖ Including those on East Coast Canal.

6. *Makellore.*—Notwithstanding the increase in the numbers on the canal and the general introduction of the new scale of wages, the numbers on district works have increased. The rise has occurred chiefly in Gudur and Kavali, and the Collector will report the cause in the latter taluk. The numbers there are excessive and demand enquiry.

	3rd March.	10th March.	
Gudur ...	1,132	2,555	+ 1,423
Kavali ...	10,862	15,587	+ 4,725

7. The numbers in *Cuddapah* are very nearly the same as in last week. They have fallen in Jammalamadagu and Madanapalli, but risen in Pallampett and Voilpad. They are nearly stationary in other taluks. The proportion of present numbers to populaton in each taluk is given in the margin.

	Per cent.
Jammalamadagu	2·01
Pulivendla	7·45
Proddatur	2·38
Cuddapah	2·85
Budwail	7·76
Sidhout	3·30
Pallampett	6·46
Kadiri	3·48
Royachoti	2·72
Madanapalli	5·05
Voilpad	3·65
	4·23

8. The Bellary figures compare by taluks as follows :—

	3rd March.	10th March.		Present number per cent. of population.
Adoni	56,737	51,776	— 4,961	28·5
Alur	31,952	21,914	— 10,038	22·3
Ghooty	15,522	13,513	— 2,009	9·4
Tadpatry	10,359	8,985	— 1,374	7·7
Anantapur	9,584	8,083	— 1,501	7·9
Dharmaveram	2,511	3,031	+ 520	2·5
Pennakonda	3,168	2,698	— 470	3·0
Hindupur	1,276	1,408	+ 132	1·6
Madaksera	13,463	7,880	— 5,583	9·9
Raidrug	7,476	8,721	+ 1,245	9·9
Bellary	43,936	47,116	+ 3,180	25·8
Hospett	13,779	13,513	— 266	18·1
Sundur	3,580	1,343	— 2,237	9·0
Kudlighi	10,875	10,856	— 19	11·7
Harpenhalli	6,382	11,298	+ 4,916	12·6
Hadgulli	9,220	6,184	— 3,036	7·8
TOTAL ...	239,820	218,319	— 21,501	13·1

There is a satisfactory further decrease in Alur and Adoni, owing to improved supervision. The other cases of decrease are attributed generally to the reduction of wages, weeding of gangs and in a few cases to outbreaks of cholera. The Board regret to notice a considerable increase in the Bellary taluk as to which no explanation is given. The numbers there were already excessive.

9. The small decrease in *Kurnool* is ascribed to improved supervision and weeding. The decrease in *Chingleput* is in the Saidapett Taluk, where the coolies on some of the works referred to accept the new wages. In *North Arcot* decrease is general, but it is most marked in Punganur. Works are stopped in *Trichinopoly* town, as the coolies refused the reduced rates. The increase in *Tinnevelly* is ascribed to returned emigrants seeking work, but it is more probably due to increase of wages under the new scale which will be noticed below. The increase in *Madura* is not explained. That in *Coimbatore* is partly nominal, the Dharapura taluk report having been wanting last week. It is said that persons from the Palni taluk are now seeking work in Udumulapettah, and the attention of the Collector of Madura is called to this. In *Salem* there is a great increase (from 3,996 to 6,798) in Dharampuri, and also increase in Namakul and Ahtur.

10. Rates of wages.—The scale of wages has not yet been revised in the sub-division of *Cuddapah* or in part of Budwail taluk. Grain and money are given in Prodatur. The new rates are paid in other taluks with reference to the lower scale of task work, and apparently also the price of rice. In *Nellore*, except in part of the Darsi division, the new scale is in force. It is on the higher scale of task on some works in Kanigiri, but elsewhere on the lower. Rice seems the regulating grain, but the adjustment to reported prices does not seem very close. Wages are reported for 12 taluks in *Bellary*. In Hindupur, Hadjalli and part of Kudligi the old scale is in force. In the remaining taluks wages have apparently been regulated, with reference to the price of rice in* Adoni, Alur, Dhurmavaram, Bellary, elsewhere with reference to that of inferior grain. The higher scale of task appears in Harpanhalli. The Collector of *Kurnool* telegraphs that the new scale is in force in Ramulacotta, Patticonda, Cumbum and Koilcuntla, and he believes in the others also. The old rates are in force in Madurantakum and part of Saidapet in the *Chingleput* district; the new scale in the rest of Saidapett, Trivellore, and Ponneri for half task and on the price of rice. Wages according to task work is said to be given in Conjevaram and Chingleput. There is evidently a misapprehension, and the Collector should explain to the Sub-Collector the orders on the subject. In *Salem*, half task rates, computed with reference to the average price of rice, are given. In *Coimbatore*, full task rates are given in Caroor, Pulladam, Oodoomulpettah and Dharapuram; half task rates elsewhere, except Erode, where the old scale seems in force, and in Pollachy, where there are only five skilled well-sinkers employed. In Satyamangalam cholum is the standard grain, elsewhere rice. In *Madura*, full task rates are paid in Melur and Palni with reference to the price of rice; but the old scale (which is however almost the same) is still paid in Tirumungalum and Madura taluqs. In *Tinnevelly*, the higher scale of task is exacted, and the rates in those of the four taluqs in which work is in progress are 2 annas, 1 anna 6 pie, and 1 anna, which correspond to 7½ seers of grain. Rice is the only grain obtainable in Otapidaram, but it is sold at 8½ seers. In the other taluqs, rice averages 8·1 seers and ragi 11¼. The latter grain might be taken, and an enhancement of wages, which seems to have led to an increase of numbers, need not be allowed. In Sattur wages have remained unchanged.

* Here they are for half task and 7¼ seers. Rice, however, is sold at 10¼ seers.

11. Very little information is given as to the effect of the new scale on the condition of the coolies; and what is given seems not very trustworthy. One Tahsildar says the coolies are becoming emaciated, but in the next taluq they are said to be in fair condition. The special reports on this point must be awaited.

12. *Gratuitous relief.*—The numbers compare by districts as follows:—

	3rd March.	10th March.	
Kistna	160	184	+ 24
Nellore	4,681	5,204	+ 523
Cuddapah...	1,634	1,256	— 378
Bellary	16,589	17,575	+ 986
Kurnool	3,651	11,233	+ 7,582
Chingleput	5,102	5,666	+ 564
North Arcot	835	1,398	+ 563
South Arcot	156	No report.	— 156
Madura	188	328	+ 140
Tinnevelly	192	272	+ 80
Coimbatore	1,309	1,093	— 216
Salem	3,563	3,740	+ 177
	28,060	47,949	+ 19,889

There is thus a very large increase, the greater part of which occurs in Kurnool. The Collector's telegram does not explain it, but the Board believe it to be due to the entry of the persons fed at a large relief house in Kurnool town, which was hitherto supported from private contributions, but which has now, on the exhaustion of the funds subscribed, been taken over by Government. A camp is to be formed for these persons in the neighbourhood. No special explanation is necessary for the fluctuations in other districts.

13. The outlay on relief works and gratuitous relief stands as follows :—

	In the week.	Up to the
	Rs.	Rs.
Relief works	3,85,801	84,70,935
Gratuitous relief	15,659	2,81,738
TOTAL ...	4,01,460	87,52,673

The grants sanctioned by the Board amount, as per enclosed memorandum, to Rs. 1,00,70,973.

14. The following statement shows the amount advanced for the construction of wells under the Land Improvement Act :—

	In the week.	Up to the week.
	Rs.	Rs.
Nellore	...	12,846
Cuddapah	1,930	19,760
Bellary	...	1,270
Tinnevelly	...	7,730
TOTAL ...	1,930	41,606

5. The special establishments employed are shown below, the entries for Bellary, Kurnool and Salem are taken from the report of last week; none have been received for the week under report :—

	Relief.		Wages.		Accounts.		Total.	
	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.
		Rs.		Rs.		Rs		Rs.

	2,084	58,959	422	5,314	336	4,715	2,742	68,988

16. The Commissioner of Police, Madras, has furnished to the Board a statement from which the following information is taken. The average daily number of resident paupers in six camps was 9,683, and 11,555 on the average received one meal as non-resident; 601 persons were in the camp hospitals on the last day of the week, and there were 16 deaths in camp and 8

outside it. The following statement shows the distribution of the resident paupers on the 10th March and the districts whence they came :—

	Men.	Women.	Children.	Total.
Chingleput	1,585	1,584	1,601	4,770
North Arcot	795	811	856	2,462
Nellore	745	677	988	2,410
South Arcot	6	5	7	18
Cuddapah	21	9	14	44
Salem	...	2	...	2

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

DEVELOPMENT OF THE EXPORT TRADE IN INDIAN WHEAT.

No. $\frac{1}{50\text{-}50}$.

Extract from the Proceedings of the Government of India in the Department of Revenue, Agriculture and Commerce, dated Calcutta, the 11th March 1876.

[AGRICULTURE AND HORTICULTURE.]

READ the following despatches from the Secretary of State:—

No. 130 (Statistics and Commerce), dated the 21st December 1876, forwarding an extract from a letter from a merchant in London, on the subject of the qualities of Indian wheat which are most appreciated in the English market, and of the means by which the prices given for them might be raised, and drawing attention to the importance of the adoption of measures with a view to encourage the improved cultivation, of this grain and to facilitate its transport to England in good condition.

No. 14 (Statistics and Commerce), dated the 18th January 1877, requesting that a compilation be prepared shewing the main features of the cultivation of wheat, its consumption and export, the selling prices, the probable cost of transport; and that samples of the chief local varieties of the grain carefully named and described may be made and sent to England.

Read also the following papers shewing the action taken by the Chief Commissioner of the Central Provinces, with a view to improving the quality of the wheat in those Provinces and preventing its admixture with other grains:—

Circular No. 11, dated the 5th May 1876.
Extract, paragraph 3, from a circular, No. 25, dated the 4th August 1876.
Circular letter No. 3433-162, dated the 9th September 1876, and enclosures.

RESOLUTION.

OBSERVATIONS.—The development of the export trade in Indian wheat has long occupied the attention of the Government of India. In January 1873, on the representation of the Bombay Chamber of Commerce, who urged that the weight of the export duty and the length of the sea voyage practically disabled Indian wheat from successfully competing with any country in the English market, except perhaps California and Australia, the Government of India freed Indian wheat from all duty on export.

2. Since then, aided by various other circumstances, particularly the shortened transit through the Suez Canal, and recently the state of exchange,

and perhaps to some extent the political condition of Eastern Europe, the increase in the trade has been very great, as will be seen from the figures appended showing the quantity and value of the wheat exported to foreign countries:...

	Cwt.	Rs.
1871-72	637,099	23,56,445
1872-73 ...	394,010	16,76,900
1873-74 ...	1,755,954	82,76
1874-75 ...	1,069,076	49,04,352
1875-76 ...	2,498,285	90,10,255
1876-77 (first ten months)	4,839,290	1,67,34,001

Seeing that the quality of Indian wheat has commended itself to English millers, it may be hoped that with the advantages she now possesses, India will be able to maintain this important trade at a high level. But it must not be forgotten that this country has active and eager competitors in the United States, Southern Russia, Austro-Hungary, and Egypt, and that some of these countries are naturally possessed of great advantages in the shipment of wheat to England. It is necessary, therefore, that the greatest care should be taken by every body interested in the trade, from the cultivator to the shipper, to prevent any cause for complaint regarding the quality of the grain exported.

3. It appears from the despatch No. 130, received from Her Majesty's Secretary of State, that complaints are now made of the dirty condition of Indian wheat received in England, as well as of its admixture with inferior grains. The Governor-General in Council desires that these papers may be circulated amongst district officers and published for general information. To some extent the complaints regarding the dirty condition of our wheat will diminish with the extended employment of the railways in its carriage to the port of shipment, in supersession of boats, and with the increased facilities of despatch from the port. A great deal may also be done by the trade in undertaking the cleansing and sorting of the grain before it is shipped. It would appear from a letter from the firm of Messrs. Scott, Finlay & Co., of Bombay, to the Chief Commissioner of the Central Provinces, that in the present state of the market it would hardly be profitable to incur much expense in such cleansing and sorting. But probably with an increased demand for cleaned and sorted wheat, it will prove remunerative to set up winnowing and sorting machines of the kind referred to in the communication from Her Majesty's Secretary of State at the great centres of shipment, *viz.*, Bombay, Kurrachee, and Calcutta. In view of the poverty and ignorance of the agricultural community of India, the Governor-General in Council does not consider that it would be expedient to suggest the employment in the rural districts of machines, the purchase of which would require capital which is probably not forthcoming, and the repair of which, when broken, could not be effected except at the Presidency towns. His Excellency in Council considers, however, that much may be done in the way of advice and instruction by district officers to impress upon the agriculturist the necessity of so treating his crop, after it has been reaped, as to keep it reasonably clean, and that such advice will be welcomed and acted upon by the cultivator in his own interest as soon as it is made clear to him that clean wheat will command a readier and better market than dirty grain.

4. The question of admixture of wheat with inferior grains, such as barley and gram, is a separate matter. It is not probable that the adulteration is altogether fraudulent. The truth is that the cultivating classes, who do not largely consume wheat themselves but the inferior grains, have hitherto been in the habit of sowing these inferior grains with their wheat in the same field, the object being to have some resource to fall back upon in the event either of failure in the wheat crop or of difficulty in selling it at a remunerative price. As long as circumstances operated against the development of a steady and sure trade in wheat, this practice of the cultivator could perhaps only be regarded as dictated by prudence. But circumstances have changed, and a practice which formerly was reasonable, has now no reason for continuance, and indeed its continuance will have an injurious effect on the cultivator. There seems little reason to doubt that the agricultural community will be

ready to modify this habit on becoming acquainted with the facts of the case, and that they may easily be persuaded either to cease to cultivate inferior grains in the same field with wheat, or to be careful in reaping to keep them apart. The local officers in each district should cause them to be properly instructed in this matter, and they should specially impress upon the cultivators the need for careful selection of their seed. Much good may result from judicious action in this direction, and the Governor-General in Council commends the matter to the particular attention of the local authorities. His Excellency in Council has noticed with much satisfaction the steps which have already been taken towards the attainment of the object desired by the Chief Commissioner of the Central Provinces.

5. The Secretary of State for India desires that a paper may be prepared, bringing together all the facts procurable regarding wheat cultivation in India. To assist in the preparation of such a paper, the Governor-General in Council requests that in each province a memorandum may be drawn up, shewing, as far as the information may be available,

(1) the names of the districts in which wheat is grown;
(2) the area (in acres) under wheat in each of the last five years to the end of 1876-77;
(3) the average outturn in pounds per acre;
(4) a brief account of the cultivation, in which should be stated the kind of land preferred, the quantity of seed sown per acre, the crop which wheat follows, the season of cultivation, and other useful particulars;
(5) the average wholesale price of wheat;
(6) average consumption per head of the population of the district;
(7) total consumption within the district;
(8) annual imports into the district for five years, and places whence imported;
(9) annual exports for the same period, places whither exported, and proportion carried by road, rail or river;
(10) estimated average cost of cartage to the railway station nearest the district;
(11) cost of transit to port of shipment (Calcutta, Bombay, or Kurrachee), by rail, by road, and by river;
(12) local names for the varieties of wheat cultivated, and their description in English; and
(13) a general summary for the province, shewing the total area under wheat, the average outturn per acre, the total outturn, and the details of the import and export trade.

6. It is also requested that no time may be lost in obtaining the samples of wheat required by the Secretary of State. It is desirable that these should be put up in bags containing two pounds each, properly labelled with the name of the district in which the wheat was grown and its distinctive name. These samples should be forwarded to this office as soon as possible, without waiting for the completion of the information asked for.

ORDER.—Ordered that a copy of this Resolution, with a copy of the papers read in the preamble, be forwarded to the with a request that the necessary measures may be taken without delay to carry into effect the suggestions and instructions contained in this Resolution. The Governor-General in Council will be glad to receive any suggestions which local Governments and Administrations may desire to make with a view to the further development and improvement of the trade.

(True Extract.)

G. H. M. BAITEN,
Offg. Secretary to the Government of India.

No. 130 (Statistics and Commerce), dated India Office, London, 21st December 1876.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

I transmit, for the information of Your Excellency, an extract of a letter from a merchant in London, on the subject of the qualities of Indian wheat which are most appreciated in the English market, and of the means by which the price given for them might be raised. Besides the points therein mentioned, it is desirable that attention should be drawn to the loss resulting

from the mixture of barley or gram with the wheat, and from the want of cleanliness in the granaries in which it is stored and in the boats in which it is carried to the port of shipment. Any means by which the importance of remedying these defects can be impressed on the people may have a very salutary effect on the trade.

2. I have applied for further information on the subject of a system of inspection said to be adopted in the United States and Canada, as described in the accompanying extract from a statement relating to the trade of Canada.

ENCLOSURES.

No. 1.

Extract of a letter from a London Merchant, dated December 1876.

With reference to the interview I had with you last month as to the growth and production of wheat in the Empire of India, I now beg to lay before you a short statement of the present position of the trade, to which I have paid close attention the last three or four years.

Calcutta.—The wheats that come from this port are fine, mellow, soft, white,—from Cawnpore, Meerut, and Delhi districts,—which bring the highest price in the market (except the finest Bombay, which, however, so far has not formed an article of import owing to inadequate prices obtained in London and Liverpool), and are very clean on the whole; they could, however, be improved by proper blowing and exhaust machines and sifting machines, and I should recommend this to be done so as to get rid of grain, tares, and barley as much as possible; if this cleaning process is enforced by the district officials, I have no doubt these fine wheats could be made worth 2*s.* to 4*s.* per quarter more money in the United Kingdom. As far as I can make out from merchants who have been in the North-West, the name these fine wheats go by is "Pegu" or "Pegoo." In our market, it goes by the name of "No. 1 Club."

I next come to a wheat, inferior to the above, which I understand goes generally by the name of "Doodiah" or "Doodeah," being called in our market "No. 2 Club." This is the quality we see most of, and it is very well liked, as in preparing for use it absorbs a great weight of water, which, of course, is very profitable for the miller in this country. The great drawback to it, however, is its foulness, caused by admixture with grain, tares, and barley. There is no reason, however, why, in two or three seasons, this fault should not be almost entirely remedied by your officers attending to properly cleaned seed being put into the ground.

I next come to a white-grey hard wheat, which appears to me to come from low ground, as it is almost as hard and flinty as rice; on the whole, it is a clear wheat, still it could be improved by the seed wheat being better attended to.

I next come to a soft red wheat, which appears to me to come from the same districts as the "No. 2 Club," as, except in colour, it seems to be the same style of grain; it is quite as foul as the "No. 2 Club," and, by properly cleaning it for seed, I have no doubt its value as an article of trade could be raised also 2*s.* to 4*s.* per quarter.

Another class of wheat we see largely from Calcutta is a rather large-berried wheat, classed between the No. 1 and No. 2, which we call in Mark Lane "Mountain Club," parties who have seen it grow telling me it comes from pretty high ground. This is a clean wheat, but can also be improved by the seed being more carefully attended to.

The last wheat I would name as coming from Calcutta is from the Central Provinces, and is called "Jubbulpore;" the district where it is produced lies about half-way between Bombay and Calcutta by rail, and most of it goes to the west coast for shipment, and I therefore treat this under the head of—

Bombay.—The wheats from this port seem to be all produced in Central India; at least all I have seen, whether soft or hard, show a long, bold grain just like the "Jubbulpore."

No. 1, "White Bombay," is the finest wheat I have ever seen from India, and it does not seem possible to improve upon it, when I state that it sells at close to the same price as Australian (the finest wheat imported).

No. 2, "Bombay White," is also a superior article, but its great drawback is the coarse large-grained brown wheat, and some pains ought to be taken to have this grain extracted. The same cleaning machines named elsewhere in this paper might be tried to get it out, but I doubt the success of this process, and suspect the only way to bring the No. 2 wheat up to the No. 1 is to hand-pick out the coarse brown grain and sow the wheats separate. In three or four seasons, by this mode, I feel sure the quantity of No. 1, "Bombay White," might be much increased, and No. 2 decreased in proportion.

The next wheat to be noticed as exported from Bombay is the long-berried coarse brown wheat, a good article, but not much known on this side, and does not bring within 5*s.* per quarter of No. 2 White.

From Bombay also is exported a very fine long-berried hard wheat, of which large quantities have gone the last two seasons to Marseilles and other Mediterranean ports; but it is not liked here, being too much of rice nature. So far as the Bombay wheat trade is concerned, the production of the fine wheats should be as much encouraged as possible for the United Kingdom consumption, and as regards cleaning, where necessary, the machines mentioned elsewhere are the best.

Madras.—So far as I know, no wheat has reached the United Kingdom from that presidency, but I have this season seen a sample of red wheat thence which would do well for use in our markets, being of a sound, strong red type.

Kurrachee.—The export of wheat from the Indus country through this port has been at times considerable, and there seems to me no reason why it should not rapidly increase; the quality of the wheat, white and red, is soft and mellow, but its great drawback is the large admixture of barley it contains, which ought to be got out. I have no hesitation in saying that, in four or five years, Kurrachee-shipped wheat would be improved 3*s.* to 5*s.* per quarter if due attention were paid to the cleaning of the seed wheat. The machines I allude to elsewhere are the very things for the purpose, and I have great confidence in the future of the Indus country as growing wheat, since the grain itself is mellow and easy for the miller to handle.

Machines.—I have taken a good deal of trouble in this matter, consulting Dell and Son of Mark Lane, who are clever, intelligent machine-inventors and makers, and most respectable people. I send you several copies of their last list, and Mr. Dell, Junior, has kindly noted a few remarks against the machine* he specially points to for seed wheat cleaning purposes; he is supplying D. Sassoon & Co. with machines for cleaning the wheat shipped now so freely at Bussorah on the Persian Gulf, and from experiments on foul wheats from India, Persia, and Syria, that I have seen, there is no doubt Messrs. Dell and Son understand their business in recommending the machines they do.

* Prospectus annexed.

Of course, I need hardly tell you that the cause of the sudden increase in the wheat trade with India is the opening up of the Suez Canal, thus enabling wheat to arrive in London and Liverpool in 42 to 48 days from Calcutta, from dates of bill of lading, in 35 to 38 days from Bombay, in 40 to 45 days from Kurrachee, by which means the ravages of the weevil are much checked; and altogether the trade is rapidly settling down to a regular one, the quality of wheat from India generally competing well with Russian, British, and American sorts. It appears to me that the grand thing to point to is to get the wheat as cheaply as possible to the ports, either by cheapening railway carriage, or improving the rivers, or increasing and extending canals,—probably you will say, by doing all.

Before ending these remarks, which I fear you may find wearisome, I should not like you to suppose that shipments are made by the Suez Canal alone, though they are so entirely from Kurrachee, and very much so from Bombay; from Calcutta, however, large quantities of wheat are shipped yearly by sailing vessels, and it is found the grain stands the voyage well by being stowed at the bottoms of the ships in bags, where no light or air can get to it, thus keeping the destructive weevil quiet and in a dormant state.

If you want any more information, I shall be glad to give it you, or obtain it for you if it is not within my personal knowledge.

As far as I can find out, the Calcutta people call the different wheats as follows:—

Soft red, "Jamajallee." }
Hard ,, "Gungajallee." } Gunga and Jumna—wheats of the Doab.
Soft white, "Doodeah." }
Soft ,, (fine, North-West), "Pegu," or "Pegoo."

Prospectus referred to in preceding letter.

BLOWING, WINNOWING, AND SCREENING MACHINES.

THE universal approval and many prizes accorded to this machine have given rise to many imitations. Every part of these machines is made to a standard gauge, thus ensuring an accuracy of fit, and facility of repair, unequalled in any other machine of this class. The care and attention which has been bestowed upon the production of these improved machines, together with the sound principles upon which they are constructed,—ensuring durability and efficiency to a high degree,—have already brought them into extensive use. They are made of the very best materials; are light, simple, pleasing in appearance, such as can only be obtained by first-class design and workmanship.

For separating and cleaning all kinds of grain and seeds for market, this machine has no equal. For export they are not to be surpassed, being durable and simple. They are capable of cleaning grain as fast as one man can fill the machine, being a complete blowing and dressing machine at one time, but can be used as a blower separately, if required. Having an eccentric motion, it can be thrown in and out of gear, making two complete implements in one. Large stock always on hand.

Prices.

No. 1.—Machine complete, with blowing apparatus riddles, 22 by 18 inches, £10. If of hard wood for hot climate, £1 extra.

This machine, with special sieves, will do 8 to 10 quarters per hour of the sample tried. If put through twice, a great improvement would be made on the first sample.

No. 2.—Same as No. 1, without blowing apparatus, £9.

No. 3.—Small size, without blowing apparatus riddles, 18 by 18 inches, £8.
Blowing apparatus to No. 3, 15*s.* extra.
Seed riddles, 10*s.* extra.

No. 4.—New size for small occupations, riddles, 16 by 16 inches, £6 10*s.*

For shipment machines can be made in sections, so that six machines will occupy the measurement of one when erected.

No. 2.

Extract from "Report on the Home and Foreign Trade of Canada for 1875."

Facilities for transferring grain, &c.

* * * * * * *

With all the facilities referred to at his command, the grain merchant in Montreal stands in a most important relation to the markets of Europe on the one hand, and the vast cornfields of the western world on the other. In response to orders by cable, he either forthwith buys Canada wheat on the spot or near at hand, or he directs the purchase of grain in Chicago or Milwaukee. Subjected, as it is, at these great centres, to the most perfect system of inspection in existence, it arrives at Kingston, and is there transferred to barges of similar capacity to the vessels from which it is delivered, and, passing through the cool waters of the river St. Lawrence, the cargo of wheat, corn, rye, or other grain, is placed alongside the ocean-going ship for transport across the Atlantic. All this is accomplished, as must be evident, without the possibility of the grain being changed, or mixed with an inferior quality, by the way (a result which cannot be relied upon by any other route), thus giving additional value to the inspection certificate which was issued for the cargo at the original port of shipment. Not the least important consideration is, that the northerly latitude of the Canadian transportation route relieves the grain from all danger as to *condition*, even in the summer months, when the risk by other channels is comparatively great.

No. 14 (Statistics and Commerce), dated India Office, London, 18th January 1877.

From—Her Majesty's Secretary of State for India,

To—The Government of India.

In my despatch of the 21st ultimo, No. 130, I drew Your Excellency's attention to the importance of measures adapted to encourage the improved cultivation of wheat, and to facilitate its transport to this country in good condition.

2. It seems very desirable that a compilation should be prepared, as has already been done with various Indian products, shewing the main features of its cultivation, consumption and export, the local selling prices for a series of years, and the probable cost of transport from the chief markets to the place of export. An attempt to prepare such a paper has been made in the Department of the Reporter on Products; but it was found that the information in this country was not sufficient for the purpose.

3. A selection should also be made of the chief local varieties of the grain, and samples should be sent to England carefully named and described, so that their place of production could be certainly distinguished, in order that the opinion of competent persons in this country may be obtained as to their market-value. This latter suggestion is one which might, in my opinion, be advantageously acted upon with the least practicable delay.

Circular No. 11, dated Nagpur, 5th May 1876.

From—The Offg. Secretary to the Chief Commissioner, Central Provinces,

To—All Commissioners and Deputy Commissioners, Central Provinces.

It has been represented to the Chief Commissioner that the value of the wheat which is exported from these provinces to England—and of late years a considerable quantity of wheat has found its way to England—is materially affected by its admixture with *lak*, *massur*, and similar pulses.

2. The Chief Commissioner is aware that it is a common practice in these provinces to sow these pulses with the wheat, but the practice is one which it is very desirable to discourage. It is said that, by machinery, stones, dirt and sand can be easily separated from the wheat, but not so this admixture of pulse, which on the wheat being ground, gives the flour a bad colour and materially reduces its market-value.

3. The Chief Commissioner desires that Deputy Commissioners will explain to malguzars and cultivators how injurious the present practice is, and will try to induce them to keep their wheat free from admixture. The price of agricultural produce has fallen so much of late years that farmers cannot afford to lose the excellent market for their wheat which England appears to be likely to become, and if they will only endeavour to suit the English market, it seems probable that Indian wheat will become an important export and may rival the other wheat-producing countries which supply England.

Extract, paragraph 3, from a Circular, No. 25, dated 4th August 1876, from the Officiating Assistant Secretary to the Chief Commissioner, to all Commissioners and Deputy Commissioners in the Central Provinces.

Para. 3.—In a late Circular, the Chief Commissioner commented upon the fact that the value of the wheat grown in these provinces and exported to England was materially affected by its admixture with the various pulses, and prizes for wheat free from such admixture would be practical, and direct encouragement to the people to keep their wheat free from admixture.

If a beginning is now made, and an annual show of some kind or other held in each district, it will be possible before long to arrange for an annual show in each tahsili, and so bring home to the bulk of the people that the Government encouragement is in furtherance of the people's own interests.

Circular No. 3433-162, dated Nagpur, 9th September 1876.

From—*The Offg. Secretary to the Chief Commissioner of the Central Provinces,*

To—*The Deputy Commissioner of Jubbulpore.*

" " " *of Saugor.*
" " " *of Narsinghpur.*
" " " *of Hoshangabad.*
" " " *of Raipur.*
" " " *of Bilaspur.*
" " " *of Seoni.*
" " " *of Danish.*
" " " *of Nagpur.*
" " " *of Wardha.*

I AM directed to send you copies of the marginally noted letters that have passed between this office and Messrs. Finlay, Scott and Company of Bombay. You will also receive, in a separate packet, separate samples of the various kinds and qualities of wheat, as described and classified by Messrs. Finlay, Scott and Company. A portion of each sample should be given to each of your Tahsildars, and the Chief Commissioner wishes that these samples should be shown to as many of the leading agriculturists, malguzars, and ryots as possible, and that the respective places which these kinds of wheat occupy in the market should be explained.

Messrs. Finlay, Scott and Company, Bombay, dated 11th July 1876, to Chief Commissioner, Central Provinces.

Secretary to Chief Commissioner, Central Provinces, in reply, No. 2744-125, dated 15th July 1876.

Messrs. Finlay, Scott and Company, dated 20th August 1876, to Chief Commissioner, Central Provinces.

2. The cultivators should be exhorted to pay attention to the cultivation of a wheat which is sure to fetch a good price; to bear in mind the importance of keeping the wheat in their fields free from any admixture of pulses; remember the necessity of having all the wheat they sell in bulk of the same kind and quality; and to try the effect of *selecting* the seed they put down in their fields. The result of sowing *selected* seed would very soon become visible.

3. These are all matters that can easily be made comprehensible to the native farmer, and the Chief Commissioner hopes that you and your Tahsildars will again and again impress on them the advantage of acting up to the advice given them.

4. This Office Circular, No. 25 of the 4th August, has suggested a way to strengthen your hands in the matter and to interest the cultivators themselves; and you will perceive from a notice in the *Gazette*, that the Nagpur District Fund Committee have made a beginning in the matter of improving of agricultural produce, by offering prizes for the best of large samples of grain exhibited at the Ramtek fair.

Dated Bombay, 11th July 1876.

From—*Messrs. Finlay, Scott & Co.,*

To—*The Chief Commissioner, Central Provinces.*

BY the mail to hand last week, we received from our Mr. R. V. Reid some very interesting information regarding the favour in which wheats grown in the districts of your Commission were now held in the Home market. The millers there are learning rapidly to appreciate the great advantage to be derived from mixing these grains with those grown in England, especially after a wet harvest with them, the reason being that the extreme dryness of the Indian grain serves to absorb much of the excess of moisture from the Home grain, and reduces the average of what is thus mixed to a proper condition of moisture.

2. Mr. Reid then remarks upon the injury done to the market of this wheat at Home by the large admixture of foreign grains. As this is a question in which we know you have particularly interested yourself, and as it is one of great importance to us, being, as we are, the largest exporters of the article from Bombay, we gladly lay before you our knowledge on the subject, and will be happy to provide you with any further information you may require with regard to it.

3. The quantity of pure wheat exported from Bombay is very small compared with that of the lower and adulterated qualities; but under present circumstances it does not pay as well to ship the former as the latter, the scarcity of the best wheat here making the margin of price between it and the lower kinds greater on this side than in the Home market. On an average, the cost of good wheat is 1 shilling per 100 lbs. dearer to ship than the other, and fetches only 6 pence to 9 pence more in Liverpool. We send you herewith two samples of *best* quality shipped by one of our neighbours, which obtained top prices on account of purity.

4. This pure wheat, called by the natives "Ek dana Pissie," comes mostly to the Seonee and Etarsi stations from the Bhopal State, and is found in Doleeria market; and its present value in England is from 10 shillings to 10 shillings 3 pence per cental (100 lbs.)

5. The wheat that comes from Nagpur is pretty free from admixture of foreign grains, but contains a large percentage of hard red wheat which prevents its getting as good a price as the pure white Pissie.

For shipment machines can be made in sections, so that six machines will occupy the measurement of one when erected.

Dated Bombay, 11th July 1876.

From—Messrs. Finlay, Scott & Co.,

To—The Chief Commissioner, Central Provinces.

BY the mail to hand last week, we received from our Mr. R. V. Reid some very interesting information regarding the favour in which wheats grown in the districts of your Commission were now held in the Home market. The millers there are learning rapidly to appreciate the great advantage to be derived from mixing these grains with those grown in England, especially after a wet harvest with them, the reason being that the extreme dryness of the Indian grain serves to absorb much of the excess of moisture from the Home grain, and reduces the average of what is thus mixed to a proper condition of moisture.

2. Mr. Reid then remarks upon the injury done to the market of this wheat at Home by the large admixture of foreign grains. As this is a question in which we know you have particularly interested yourself, and as it is one of great importance to us, being, as we are, the largest exporters of the article from Bombay, we gladly lay before you our knowledge on the subject, and will be happy to provide you with any further information you may require with regard to it.

3. The quantity of pure wheat exported from Bombay is very small compared with that of the lower and adulterated qualities; but under present circumstances it does not pay as well to ship the former as the latter, the scarcity of the best wheat here making the margin of price between it and the lower kinds greater on this side than in the Home market. On an average, the cost of good wheat is 1 shilling per 100 lbs. dearer to ship than the other, and fetches only 6 pence to 9 pence more in Liverpool. We send you herewith two samples of *best* quality shipped by one of our neighbours, which obtained top prices on account of purity.

4. This pure wheat, called by the natives "Ek dana Pissie," comes mostly to the Seonee and Etarsi stations from the Bhopal State, and is found in Doleeria market; and its present value in England is from 10 shillings to 10 shillings 3 pence per cental (100 lbs.)

5. The wheat that comes from Nagpur is pretty free from admixture of foreign grains, but contains a large percentage of hard red wheat which prevents its getting as good a price as the pure white Pissie.

6. The largest export from Bombay is of the Mundie Pissie, which comes from the neighbourhood of Jubbulpore—from Sehora Road, Chhindwara, and adjacent stations; this in itself is a very pretty grain, but much depreciated owing to heavy mixtures of foreign seeds. Mr. Reid writes in this connection :—

"Fearful are the complaints of *dhall* and gram in it, principally the *wild* dhall, *which discolours the flour.*

7. There can be no doubt that this injurious result is brought about by carelessness and want of method in sowing, and we think that a great improvement would very [illegible]th-coming if by any means the ryot could be persuaded to be more careful in sowing an unmixed grain.

8. The wheat trade with India is now becoming more important every day, and it is, of course, for the interests of all concerned that the character of the article should suffer as little as possible from the primitive and ignorant way in which the ryot is content to farm. Notwithstanding the advanced period of the season, we propose to send you at our first leisure samples showing the various descriptions of grain as they come to this market in their order of merit.

No. 2741-125, dated 15th July 1876.

From—The Offg. Secretary to the Chief Commissioner, Central Provinces,

To—Messrs. Finlay, Scott & Co., Bombay.

I AM directed by the Chief Commissioner to acknowledge the receipt of your letter of the 11th instant, and am to say that the subject of improving the quality of the wheat produced in these provinces and preventing its admixture with inferior grains has already been under the Chief Commissioner's consideration. I enclose copy of a circular addressed to district officers, and also copy of a letter to the Chamber of Commerce, asking to be supplied with samples of the best kinds of wheat. If you would, either yourselves or in concert with the Chamber of Commerce, supply samples showing the best kinds of grain, and the order in which they come, the Chief Commissioner will be much obliged, and will do what lies in his power to impress on the ryots the advantage of clean sowing, and of preserving their wheat from admixture with inferior grains. No doubt, improvement will be gradual; but the Chief Commissioner is confident that, in time, the ryots will desist from sowing various kinds of grain in the same field when they find that by doing so they spoil their market, and the better kinds of wheat will be cultivated if it is known that they fetch a higher price.

There are some ten districts in these provinces whence wheat is procured, and these are divided each into three or four sub-divisions; and it is desirable that every sub-divisional officer should have small samples of the wheats in their order of merit, so that the Chief Commissioner hopes you will be able to send samples large enough to supply a small sample to each, say not less than two lbs. of each kind of wheat.

The Chief Commissioner will, at all times, be glad to receive hints or information from you which may enable him to enlarge the market for any of the staples of these provinces.

Dated Bombay, 28th August 1876.

From—Messrs. Finlay, Scott & Co.,

To—The Chief Commissioner, Central Provinces.

REFERRING to our letter of 11th July on the subject of the sowing of wheat, we now beg to enclose railway receipt for two bags sent to your address, containing standard samples of the descriptions of grain grown in the districts of your Commission, and known in the Home markets.

These we have divided into five small bags containing one half-hundredweight each.

No. 1.—White (Ek Danna), despatched to this market from Seonee and Etarsi stations.

„ 2.—White Pissie from districts near Nagpur.

„ 3.—Mundie Pissie „ „ Jubbulpore. (These three descriptions we described in our letter of 11th July).

„ 4.—Red Pissie from districts near Simree.

„ 5.—Akola Pissie.

These descriptions of red wheat are daily coming into greater favour in the French market, a good business having taken place with Marseilles at favourable prices. The Simree has only a small percentage of hard grains, this admixture being on a larger scale in the lower quality from Akola; in the latter description, the hard Kuthia grain is found as much as ten per cent., and its presence serves considerably to diminish the value of the bulk.

We may mention that the cause of our being unable to send you these samples earlier is due to the great difficulty that always exists, at the close of the season, in procuring reliable samples to represent the fair quality of the crop.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE AND COMMERCE.

NOTICE AS TO REGISTRATION OF TRADE MARKS FOR COTTON GOODS.

ous marks used in the cotton trade at the date of the passing of the Trade Marks Registration Acts (38 & 39 Vict. c. 91., and 39 & 40 Vict. c. 33.), are, by reason of their common usage, excluded from the scope of that Act, the following rules have been made for the guidance of persons desirous of registering trade marks for cotton goods :—

" 57. For the purpose of facilitating the granting of trade marks in respect of cotton goods in Classes 23, 24, and 25, there shall be established by the Commissioners of Patents, and subject to their control, an office at Manchester for the exhibition of all devices, marks, headings, labels, tickets, letters, words, or figures, or combinations of letters, words, or figures, used in the cotton trade, and in these rules included under the expression 'cotton marks.'

Establishment of office for exhibition of cotton trade marks at Manchester.

" 58. Every person who at the date of the passing of the Act (August 13, 1875), used any cotton mark shall, on or before the first day of December one thousand eight hundred and seventy-six, send to the Manchester office three representations of such cotton mark, in such form and with such a description as may be from time to time required by the Commissioners of Patents.

Representations of cotton marks to be sent to Manchester office on or before December 1st, 1876.

" 59. A committee of persons versed in the usages of the cotton trade shall be appointed by the Commissioners of Patents, consisting of such number of persons as may from time to time be determined by them, and it shall be the duty of such committee, on or before a time to be named by the Commissioners of Patents, to divide the cotton marks, representations of which have been so sent in to the Manchester office, into two classes, the first class consisting of such of the said cotton marks as are, in the opinion of the committee, trade marks within the meaning of the Act, and the second class consisting of such of the said cotton marks as are not, in the opinion of the committee, trade marks within the meaning of the Act.

Committee of experts to be appointed and to divide cotton marks into two classes.

" 60. The said committee shall form a list of the cotton marks sent to the Manchester office in each of the aforesaid classes, and shall transmit such lists to the Commissioners of Patents, accompanied by two representations of each of the marks specified in the second class in such list.

Committee to form list of marks sent in to Manchester office.

" The third representation of each of the marks in the second class in such list shall be retained for reference in the Manchester office.

" 61. The Commissioners of Patents may from time to time add to the aforesaid list any cotton marks as they may think just, and such addition shall be deemed to be part of the original list.

Marks may be added to list.

" 62. Any proprietor of a cotton mark not specified in the second class in such list may apply to be registered as proprietor of such cotton mark in manner and subject to the conditions in which he may apply to be registered as proprietor of any other trade mark, but it shall not be lawful for the Registrar to register any person as proprietor of any cotton mark in the second class of the aforesaid list except in pursuance of an order of the Court.

Any person claiming to be the proprietor of a cotton mark in Class 1 may apply to be registered.

" 63. A cotton mark shall not be registered except in manner and subject to the conditions prescribed by these rules with respect to the registry of cotton marks."

Cotton mark not to be registered except in manner herein prescribed.

An office, as provided by Rule 57, will be opened at 48, Royal Exchange, Manchester, on the 24th of October 1876.

The following gentlemen have been appointed by the Commissioners of Patents to form the Committee of Experts under Rule 59 :—

Edmund Ashworth, Esq., President of the Chamber of Commerce, Manchester.
John Cheetham, Esq., Vice-President of the Chamber of Commerce, Manchester.
B. Davies, Esq.
S. A. Fulda, Esq.
P. Goldschmidt, Esq.
A. J. Hunter, Esq.
H. J. Leppoc, Esq.
G. Lord, Esq.
E. Crompton Potter, Esq.
E. Reiss, Esq.
H. M. Steinthal, Esq.
E. H. Sykes, Esq.

Mr. Joseph Fry has been appointed by the Commissioners of Patents as keeper of the Manchester office.

Each representation required to be furnished by Rule 58 should be attached to a separate half-sheet of foolscap paper, on which should be written,—*a*, the name and address of the applicant; *b*, the number of the class in which registration is desired; and *c*, the length of time the mark has been in use. If it be desired to register a mark in more than one class, three representations in each class must be furnished. No fee will be required, nor will any formal declaration or statement be necessary.

In the case of a combined stamp the applicant should state whether it is desired to protect the whole combination or only a part of it; in which case a line should be drawn round the part which it is desired to protect.

Representations of marks considered by the owners as private should be marked with the letter "P."

When application has been already made to the Principal Registry in London, the Registrar's number must be quoted in the Manchester application.

Owners of marks placed upon the second class specified in Rule 59, although not entitled to registration except by an order of the Court, may obtain from the Registrar a certificate of refusal to register, as provided by section 2 of 39 & 40 Vict. c. 33.

It is intended that all marks for cotton goods made in the piece should be claimed in Class 24.

These regulations do not apply in the case of marks not used prior to the 13th of August 1875. Application to register such marks must be made in the usual way to the Trade Marks Registry in London.

Trade Marks Registry Office,
Quality Court,
Chancery Lane,
London, W. C.

H. READER LACK,
Registrar.

November 21st, 1876.

Railway is held to have been taken over by the Public Works Department.
finally and formally taken up.

G. J. MELLIS,

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY.

SYSTEM OF WORKING TRAINS ON INDIAN RAILWAYS.

Nos. 893—99 R., dated Fort William, March 26, 1877.

Read—

Remarks by Major H. Mallock, Officiating Deputy Director General of Telegraphs, on papers from the Madras Railway Company received with Madras Government Proceedings Nos. 434—6 of 19th October 1874, and papers from the South Indian Railway received with Proceedings No. 487 of 19th April 1875.

The former discuss the—

Line clear / Block and Time Table } systems.

The latter principally bear on the subject of whether "Line clear" signals are to be trusted when sent on a "Through wire."

If the former questions be considered first, the latter will be easily understood.

It must first be decided what a "Block system" is.

Mr. Winter in the first section of his paper states—

"It has been the custom recently among Telegraph Engineers to define the block system as that system by which trains are kept apart upon the same line of rails by certain and invariable intervals of space instead of by uncertain and variable intervals of time;" and then he proceeds to define it himself as "one in which there are certain permanent signals which indicate the condition of the line between any two stations with regard to its being either clear or blocked by trains running upon it."

As he bases his following arguments on this latter definition, they and the consequent arguments of the Traffic Manager, Agent, and Consulting Engineer, are rather liable to confuse the subject in the minds of others who have accepted the terms.

"Block system" to mean intervals of space.

"Permissive Block system" to mean intervals of time.

To prove that these are the general interpretations, and also to explain thoroughly the difference between the two systems, I cannot do better than quote freely extracts from the evidence given before the Select Committee of the House of Lords in 1873.

Colonel Yolland, R. E., Inspector of Railways.

Question 5.—Would you shortly explain to the Committee what is meant by the term "the block system?"

"The block system" is intended to provide that no two Railway trains, nor a train and an engine shall be on the length between any two stations or any two block stations, at one and the same time on the same line of rails.

Question 6.—Are the Committee to understand "that the object of the block system is to secure *intervals of space* between trains or between a train and engine?"

Exactly so, to *preserve intervals* "*of space*, in order that no collision between following trains, or a train standing upon one line and another coming up to it shall take place."

Question 7.—You refer to trains all going on the same line?

Yes.

Question 8.—How is that effected?

That is effected with the "assistance of the electric telegraph: the Signalman at b telegraphs to the box in advance where the train is going to ascertain whether the li clear up to that box, and if he receives in answer to his telegram the signal that the li clear, he then gives to the train that is waiting or coming up to his box at that time pe sion to proceed; and at the same time or generally a little in advance of it he telegrapl the Signalman at the box B in advance that the train is coming, which is indicated by ' on line.'"

Captain W. Tyler, Inspector of Railways.

Question 236.—What is the exact meaning of a "permissive block?"

The permissive system ought not "to be called a block at all; it is more properly a permissive system; instead of keeping the trains apart from one another, under the permissive system, they are allowed to follow one another at certain *intervals of time* that are kept between the trains, but those intervals may be lost after the trains have passed the block station."

* * * * * *

Question 237.—Then the permissive block is, in "fact, hardly any security?"

It is really *no block at all*; but "it does act in this way that it gives a caution at certain times and places to the Engine Drivers."

* * * * * *

Also on the South Eastern Railway, except on the new Suburban Sections where the Board of Trade Inspectors enforced the use of visible signals, nothing is used but single stroke bells and the indespensable Train Book; and the following extract from evidence before the same Committee will show that the original Block system was worked by these only.

Mr. C. Eborall, General Manager, South Eastern Railway.

Question 1089.—"Have you got the Block system on any part of your line?"

"Yes; we adopted the block system in 1851; we are in fact the authors of the block system."

Question 1091.—"Having had so much experience of it, are you in favour of the block system?"

"I am very strongly in favour of the block system; in fact I would not be without it. I should consider it would be unsafe to work the South Eastern Railway without the block system."

There is indeed but one block system, but there are various means of working it; and as the signals necessary to work it have to be sent over distances varying from ½ mile to 10 miles, it is more convenient to employ electricity either to work needle indices or semaphores, or to tell a man to raise his large semaphore, than it is to employ ropes ten miles long to pull up distant signals; and the block system can be worked either by verbal messages, by bell calls, or by miniature distant signals.

I think then we shall be less liable to a confusion of meaning if we adhere to the following definitions, *viz.*:—

I.—Block system means intervals of space.

II.—Permissive block system means intervals of time.

III.—Electric index or semaphore system means (what Mr. Winter describes as the block system) far distant signals worked by electricity and used in conjunction with the block system.

A perusal of Part V of Mr. Winter's report, and a little consideration will show that what he terms the "Line Clear System" as ordered by Government, in Rule 2 of the General Regulations issued under Act XVIII of 1854, is neither more nor less than the block system pure and simple; but there is ample evidence to show that, on nearly all, if not all, the Guaranteed Railways in India, it is habitually neglected in favour of the "Permissive Block" or "Time Interval System."

The following questions now present themselves for consideration, *viz.*:—

I.—Is it possible to work the absolute block system on a single line?

II.—Can it be worked without extra establishment?

III.—What are the causes of the faults pointed out in Mr. Winter's Sections VI, VII and VIII of the present system of working adopted on all Indian lines except those in Madras?

IV.—What is the result of the "Time-table system?"

The answers are—

I.

Between the years 1869 and 1872, the block system was introduced on the following single lines in the United Kingdom, *viz.*:—

Cambrian.
Caledonian.
North British.
Bristol and Exeter.

II.

See Proceedings of House of Lords Committee.

Mr. H. Cattle, Traffic Manager, Cambrian Railway.

Question 641.—"How do you arrange your signal boxes on the Cambrian Railway?"

"We utilize the Station Masters themselves. We have some block stations where we have only two men employed, and some where we have only one man."

Question 642.—"Under the block and interlocking systems on the Cambrian Railway some of the instruments are in the stations, and some in the signal boxes, are they not?"

"Yes, that is so."

Question 643.

This question and answer, which is too long to quote, go on to describe how the block instruments cannot show a reverse signal without the use of a key kept in charge of the man on duty.

III.

In para. 3 of the Consulting Engineer's letter No. 565, paras. 4 and 5 of the Agent's letter No. 822, and Sections VI, VII and VIII of Mr. Winter's paper, there appears a general condemnation of the "Line Clear" system as adopted by the Railways in Bombay and Northern India.

That is, not the "Line Clear" or "Block System" distinctly ordered by Government, but the means (invented first I believe on the East Indian Railway, and used universally on the others) for carrying out the permissive block.

That is, "is Line Clear for No. *X* goods" asked for in an ordinary telegram? The line may not be really clear, as No. *Y* passenger may be still on the Section, but No. *X* goods is told to come on, and gets what is called a "Caution Line Clear." No. *Y* passenger arrives, and it depends to a great extent on the Station Master's memory whether No. *X* goods arrives before he sends No. *Z* extra to meet it.

The dangers of this "Memory" system are as shown in both the papers now under discussion objected to by both the Railways in the Madras Presidency, but this system has nothing to do with the "Absolute Block" or "Permissive Block," it is merely a means of working either one or the other.

It may and must be complicated* by the use of a "Through wire," to which I will refer further on, but the real remedy to the difficulties Mr. Winter points out, and Messrs. Elwin and Church and Colonel Shaw-Stewart agree in, is the "Train Register" book.

There is no reason why, if verbose telegrams be still insisted on, the train register book should not be used in addition to them, but this book (never used in India except when it was employed on the famine line in Tirhoot) is the foundation of the whole English block system, and whether Line Clear be asked for and given by bells alone, by code calls on Morse sounders, or actual messages, it tells any one looking at it the state of the section on each side of him at a glance.

It was by means of the train register books and single stroke bell that the block system was first started on the London and South-Eastern Railway in 1851, and what can be done by it and bells alone is shown by the fact that on one occasion six years ago Spa Road Station worked 892 trains in 18 hours. On the other hand a reference to the various reports on English Railway accidents will show that those as per margin were attributed by the Inspecting Officers to the want of train books.

Accident at Bricklayers Arms Goods Station of the Great Eastern Railway, on the 20th November 1863.
Ditto on the Bolton Branch of the L and N W R on 21st January 1865.
Collision near Dalston Junction of the North London Railway on 6th November 1867.
Collision at Brick Lane Siding Junction, G E R, on 2nd November 1868.
Collision on the Stour Valley Line on 16th August 1871.

IV.

As to the result of the time-table system.

In Section III of Mr. Winter's remarks, his first paragraph really bears more on the advantages of a "Station to Station" instead of a "Through wire" than on the use of Electric Semaphores, but in para. 2 of his Section II he points out that the time-table system depends on its being worked by men of "long experience" "intimately acquainted with the section of the line under their charge," whilst in para. 2 of his Section III he describes the responsibility thrown on these men. Again, Mr. Church referring to Mr. Winter's remarks shows in his para. 4 that this system depends entirely on a man understanding his work, knowing the time-table of his Section by heart, and remembering it.

That is, although the responsibility of remembering where the trains are is lifted from the shoulders of Native Station Masters on to those of District Traffic Superintendents, the time-table system of the Madras Railway depends as much on memory as the train message system originated on the East Indian Railway.†

On the other hand, we have the experiment on the Tirhoot line in 1874, where with more than double the Madras Railway Traffic a train register book enabled the Government Telegraph Signallers, none of whom had been employed on a Railway before, to commence working with no Traffic Superintendent, no time-table, and only one experienced Station Master to 7 or 8 stations.

* See para. 2 of Mr. Winter's Section VII.

† Indeed the accident that occurred at the end of last month on the Madras line was due to the Engine-driver forgetting to stop at an unusual station.

We now come to the subject of working trains on the "through wire" system.

To render this clear I give in the margin a diagram of the telegraph connections now in use on the Indian State Railways. The upper line shows the "through," the lower the Station-to-Station or train wire and their respective instruments and batteries.

On the through wire half the battery is at either end of the line; the current is permanently on, and any station breaking the circuit by pressing down its key causes every instrument in the circuit to work.* Hence if A call H, both C and F hear what is going on, and neither can communicate until A and H have stopped.

If A call F, F only knows that he is wanted by hearing his own name given (either in full or abbreviated), and until he answers, he does not know who called him. Hence on this line a Signaller who can read the code calls must be present.

On the train wire there is a battery and two instruments at each station, and the circuit is completed at each. On this line, if D hear his left hand instrument call, he knows that it can only be C calling him; and *vice versâ* C knows that no one else but D can call him on his right hand instrument.

Except on the Cawnpoor and Lucknow Section of the Oudh and Rohilkhund Railway this scheme has not yet been perfected up to its original design, *viz.*, that at each Station there should be an electric bell† worked automatically by the signalling sounders.

That is, it is intended to place a bell between the two instruments, say at C. When the Station Master has other business to attend to, he will put the bell into circuit; either of his instruments being worked from B or D will then ring his bell; when he returns to his desk, he will throw his bell out of circuit, receive and send signals as usual, and then on again leaving re-adjust the bell circuit.

This plan works into the train book system. That is, each Station should have a train book of which the right hand page belongs to his right hand instrument and right hand section, and similarly the left hand instrument and left hand page belong to his left hand station.

On looking at the connections it will be seen that, if F ask E for "Line Clear," C or D cannot possibly hear the call and give Line clear to the wrong section.

If A wants to send a message to D or G, on which there is no communication on the through wire, C or F receive the message, and repeat it on the train wire sections C D or F G.

Now omitting all question of train safety, and considering message traffic only, it is evident that, as on the through wire no two stations can talk at the same time, the fewer stations there are the better.

It is found in practice that about five or six stations can be connected on the through wire; this will cover therefore about 150 miles without repetition, say 300 miles with one, and 450 with two repetitions. For distances over that, a third wire may be required.

When we attempt to use a through wire for train working, it is necessary to ensure an immediate reply, that at every station a signaller must constantly be on the watch. By using a station to station wire for the trains, whether bells be used or no, any one may watch the instrument, and as, when his instrument works, he must know his station is called, he can then call the signaller, who, when he is Station Master also, can, when not absolutely wanted at the instrument, attend to his other duties.

It may be assumed that the "through wire" goes into the more important stations (it must never miss more than two smaller stations) where there are more men to attend to the call, but even if they do not attend, inattention to an ordinary message must be of infinitely less importance than inattention to the train instrument.

In designing this method it has been considered that the object of a Railway Telegraph is not that of a Telegraph Department proper. The latter has to cover the longest distances in the shortest possible time, and its local is unimportant in comparison with its through traffic.

The object of a Railway telegraph has been conceived to be the safety of trains and passengers, and the absence of any delay to trains.

When, however, in order that the speed of a Telegraph Department proper may be imitated for through messages, one of the Railway wires is used to cover long distances, and the second is used as a subsidiary message wire on the through circuit system, it becomes nearly useless for train messages.

The Madras Railway telegraph is always in good order, and yet from Mr. Winter's Report, Part III, we see the result of a through wire. The "through wire" plan was in imitation of other Indian Railways tried on the Delhi Section of the Rajpootana State Railway when it first opened, and on one occasion where say F asked E for Line Clear, C thought D asked and gave it, although E had just sent off a train towards F, consequently two trains met; but they were luckily stopped without a collision.

If from the foregoing we allow that a station-to-station wire is the correct means of working trains, it would appear reasonable that this should be the first wire to be thought of in scheming a set of telegraph connections for any Railway. It may be worked by—

I.—Needle instruments, as on the East Indian Railway line.

II.—Morse sounders alone, as on the State Railway lines.

III.—Morse sounders and a bell, as on the Cawnpore and Lucknow Section of the Oudh and Rohilkund line.

IV.—Bell alone, as on the London and South-Eastern Line, or by

V.—Bells and electric semaphores, as on most of the English lines.

Having laid down this wire, the number of wires for messages much depend on their number, and also to a great extent on whether it is considered that a Railway telegraph be designed for the use of the Railway in the first instance, and for private messages when these can be carried without interfering with Railway work, or whether it be designed in the first instances to carry private messages, and to consider the revenue derived from them of more importance than a slow but sure service for the use of trains.

In conclusion, I would summarise that—

I.—The line clear system ordered in the Regulations issued under Act XVIII of 1854 is the "Block System."

II.—This is in India generally neglected for the permissive block.

III.—The block system is used on single lines in Great Britain, and therefore can be used.

IV.—The block system does not depend on electric semaphores, which are but one of the methods of working it.

V.—A train register book is the original basis of the English block system; has worked on the South-Eastern Railway for 26 years, and is so simple that men utterly ignorant of train working have in India brought it into use at a moment's notice.

VI.—The time-table system (which would never be allowed by the Board of Trade) is a system dependent on the memory and local experience of Traffic Superintendents.

VII.—The first essential of Railway telegraphy is a station-to-station wire.

P. S.—As it may be of use, I annex a Newspaper cutting of the report of the House

THE PREVENTION OF RAILWAY ACCIDENTS.

The Select Committee appointed to consider the Regulation of Railways (Prevention of Accidents) Bill have agreed to the following Report :—

"1. The Bill proposes to enforce upon all Railway Companies the obligation of securing an interval of space between trains following each other on the same line of rails, which is now generally effected by what is called the block system, and it also proposes to enforce the interlocking system.

"2. These systems are explained in the evidence by the railway inspectors and by other witnesses whom the Committee have examined.

"3. For the purpose of working the block system, there must be frequent signal stations provided with means of communication, so that a clear course for every train may be secured.

"4. The arrangements necessary to effect this object must vary according to the circumstances of the line, and the peculiarities of the traffic.

"5. There is a general concurrence of opinion among the witnesses in favour of the block system on all important railways which carry passengers.

"6. Experience has proved that this system is compatible with the highest rates of speed.

"7. On some railways, where the block system exists on their entire lines, the speed is stated, in the case of certain trains, to be between 50 and 60 miles an hour.

"8. There are many single lines where the block system has been found indispensable for the safety of the traffic.

"9. The system called permissive block does not afford the security of the block system and cannot be recommended.

"10. The interlocking system has been devised to prevent divergence between the points and signals at stations and junctions.

"11. The Committee had the advantage of seeing a model that supplied information which cannot easily be obtained from the evidence.

"12. This system was first introduced in the year 1856. It has been adopted on the most important lines of railway throughout the country, and the witnesses concur in recommending it on lines where there are numerous junctions and frequent trains. It is now enforced by the Board of Trade at all new junctions.

"13. The block system and the interlocking system are not necessarily connected, but the union of the two systems is strongly recommended on all important lines of railway.

"14. It is admitted that some lines could not be efficiently and safely worked without a combination of the two systems.

"15. In the case of the following railways, the evidence shows the mileage over which the block and interlocking systems have been already adopted, and the progress now being made in the further extensions of these improvements.

"16. The South Eastern and the Bristol and Exeter Companies have adopted the block system on their entire lines, and are gradually extending the interlocking system at all principal stations and junctions.

"17. The Midland Railway Company have adopted the block system on a large portion of their main lines, and are extending the interlocking system.

"18. The Lancashire and Yorkshire Company are extending the block system, and have a contract for the expenditure of a large sum during the current half-year in providing the apparatus for the interlocking system.

"19. The Metropolitan Railway is worked throughout on the block and interlocking systems.

"20. The Great Northern have the block system over the main line, and the interlocking system is also being largely introduced.

"21. The Caledonian Railway Company have as yet made little progress in introducing these improvements; they expect, however, in a few months to open 100 miles under the block system, and are going on faster with the interlocking than with the blocking.

"22. The North Eastern Company have the block system in operation on the larger portion of their main line, and are introducing it over the whole of their lines where there is much traffic, as fast as the labour market will allow. They are also extending the interlocking system over the whole of their lines, except the mineral lines.

"23. The Great Eastern have the block system on part of their line, and have for many years partially adopted the interlocking system.

"24. The London and North Western have the block system in operation or in course of construction over a large portion of their main line. They have during the last five years expended, and are still expending, large sums on the interlocking system.

"25. The London and South Western have the block system in operation over a large portion of their main line, and are at this moment extending it, and have introduced the interlocking system at all their junctions and principal stations.

"26. The Great Western are fast introducing both systems, and have established workshops to expedite the construction of interlocking apparatus.

"27. The North British have some miles under the block system, and are gradually extending the interlocking system, under the direction of the Board of Trade.

"28. The Highland Railway have the block system over the whole of their line, and they have the interlocking system at their junction stations.

"29. It may be confidently stated that the general safety of railway travelling would be increased by the more extensive employment of the block and of the interlocking systems.

"30. Some witnesses stated that these precautionary arrangements and mechanical appliances tend to lessen the sense of responsibility in the engine-drivers. Such an effect may have been produced, but nevertheless the advantages resulting from the introduction of these systems are practically admitted by all the witnesses, and, in the judgment of the Committee, decidedly preponderate.

"31. The policy of enforcing these systems upon all Railway Companies by severe penalties for default requires, however, to be further considered.

"32. A perfect system of interlocking requires many complicated arrangements, such as refuge sidings, alteration of signal stations, and other changes, which, especially where the junction unites two lines under the management of different Companies, involve matters of difficult adjustment. The evidence will explain more fully the cost and complex character of these arrangements.

"33. Railway Companies have, during the last five years, paid 2,348,000*l.* in compensation for injury to passengers and goods, and therefore have a direct pecuniary interest in rendering their lines safe.

"34. There are many lines of railway, some used solely for conveyance of minerals, and some small branch lines, where few trains run in the course of the day, which could not reasonably be required to incur the expense of these appliances.

"35. This matter is important inasmuch as many short branch lines have been projected in different districts, which might be left without railway accommodation, if additional expenses were imposed on the construction and working of such lines.

"36. It is right also to notice that the adoption of these systems, if it were indiscriminately required in all cases, would involve a large expenditure, which would bear with great severity upon the lines where the traffic is scanty and the risk of collision very small.

"37. The evidence taken by the Committee proves that Railway Companies are now making increased exertions to introduce both the block system and the system of interlocking.

"38. The Bill provides that these systems shall be universally adopted on all railways within five years from the present time.

"39. The arrangements indispensable for the efficient working of these systems throughout all the important lines of the country could not, it is said, be completed within that period. In many cases an entire remodelling of the stations will be required, and as this would have to be accomplished without suspending the traffic, the change, if compulsorily enforced, might be attended with much inconvenience and some danger.

"40. A clause might be introduced into the Bill giving the Board of Trade power to prolong the time named in the Act for the completion of these systems.

"41. This course would impose on the Board of Trade a grave responsibility during the interval of time conceded to the Railway Company, and if an accident from collision should occur during the intermediate period, the Board of Trade would be blamed for not having used the power with which Parliament had invested the department.

"42. The inspectors of the Board of Trade, in their annual reports, have called attention to many other measures for the prevention of accidents, besides the two which are mentioned in this Bill. If these two systems were made compulsory, Railway Companies might rest content with fulfilling the requirements of the law, and be less inclined to expend money on other improvements, which, though not enforced by law, may be conducive to public safety.

"43. It is desirable, as stated in the report of 1870, that improvements should be introduced by those who are intrusted with the management of railways, especially in cases where success depends upon care in construction, maintenance and daily discipline.

"44. Relying on the great exertions recently and very generally made by different railway companies to extend the block and interlocking systems, and the improvements now in progress, the Committee recommend that the Bill should not be proceeded with during the present Session. They recommend, however, that the Board of Trade should call for such information as may enable the inspectors in their annual reports to state especially the progress made in their adoption on all passenger lines. Parliament will then be in a condition to decide whether or not it would be right to require the further and more prompt extension of these systems on the lines where they are necessary.

"45. And the Committee have directed the minutes of evidence, together with an appendix, to be laid before your Lordships."

OBSERVATIONS.—The memorandum drawn up by Major Mallock concerning the aid in working afforded to Railways by the electric telegraph is a paper

that will be of the utmost practical value generally to the Railway Administrations in India. The different systems for working in use have been well described and well defined.

RESOLUTION.—His Excellency the Governor General in Council records with pleasure his sense of the value of the paper and the soundness of the conclusions it illustrates.

ORDER.—Ordered, that this Resolution be communicated to the Governments of Madras and Bombay, the Director of State Railways, and the Consulting Engineers to the Government of India for Guaranteed Railways at Calcutta, Lahore and Lucknow, for information.

Ordered also, that a copy be forwarded to the Home Department for publication in the Supplement to the *Gazette of India*.

W. A. CROMMELIN, Major-Genl., R. E.,
Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

SCARCITY IN THE DECCAN AND SOUTHERN MAHRATTA COUNTRY.

Statement No. XIX regarding the Scarcity in the Deccan and Southern Mahratta Country together with a Summary of Government Orders issued during the week ending 23rd March 1877.

Districts.	Area in square miles.	Affected area in square miles.	Population of district.	Affected population.	Collectors' reports by telegram, dated 20th and 21st March 1877.	Works in progress.	Number of people employed: During the past week.	Number of people employed: During the present week.	Number of people employed: Percentage of labourers to population of district.	Grants, including the large works authorised in Government Resolution No. 6152 of 27th October 1876.	Expenditure up to latest known date.	Prices of staple grain in lbs. per rupee: Ordinary prices.	Prices of staple grain in lbs. per rupee: During the past week.	Prices of staple grain in lbs. per rupee: During the present week.	Average rainfall, i.e., the average of all the talukas for five years.	Average rainfall during the past season of all the talukas.
										Rs.	Rs

Dharwar ...	4,564	3,000	988,037	630,000	Importation of grain decreasing. Migration continues. 172 deaths from cholera.	Ditto	28,245	31,239	3·16	8,49,004	3,35,892	Jowari 43	17¼	17¾	26·39	13·81
	54,955	34,199	7,969,927	5,018,992			223,763	217,163	2·72	65,74,413	34,34,955					

A little rain has fallen in Sholapur.

2. A slight increase in the cost of grain is observable in Satara and Káladgi, and a slight decrease in Dharwar.

3. The number of people upon relief works in the nine affected districts is 217,163 against 223,763 last week; and there are also 3,051 hill-men and immigrants employed in Ratnagiri and Kanara.

4. Tables (A) and (B) are appended as before. It will be noticed that, on the 10th March, the number of people upon works under Civil agency had decreased to 29,526 as compared with 37,060 in the former week, while during the week ending March the 17th, the people upon Civil works had decreased to 18,765, the number upon works under Public Works Department agency being 193,223.

During the week in question there were, therefore, upon works under Civil agency, only about one-eleventh of the total number of labourers. The accounts received of the physical condition of the people on both classes of works continue to be satisfactory, and, except that in the Southern Mahratta Country, there are a few wandering bands of immigrants whose condition is somewhat low, the general condition of the population who are not upon relief works is understood to be, on the whole, good.

5. It may be interesting to notice the distribution of the people among the larger relief works which have been opened in the nine affected districts, and the following table gives the particulars for each Collectorate as regards all works employing 2,000 people, or more. It will be seen that three-fourths of the relief labourers are now employed upon the large works enumerated:—

Districts.	Works.	Number of labourers.	Total.	Remarks.
Khandesh.

* Return from the Executive Engineer for irrigation not received.

† Collector's returns not received.

The attention of Collectors has recently been again drawn to the necessity for searching out very carefully all isolated cases calling for charitable relief, and of freely using their discretionary grants in respect to such cases. This grant, it may be observed, is mainly for the purpose of charitably providing food for poor persons unable to work, but it is also used for the purchase of blankets for people urgently requiring them, and for other similar purposes.

8. A table is appended, showing the condition of the affected Native States.

9. With regard to the movements of food-grains, 5,258 tons were exported from Bombay to the Southern Mahratta ports during the week ending 15th March, and during the same week 3,092 tons were carried by the Great Indian Peninsula Railway to stations upon the Poona-Sholapur and Násik-Bhusawal lines, making a total of 8,350 tons for the week. The table below shows the quantities of grain sent by sea and rail from October till the 15th of March to the Southern Mahratta ports and the Railway stations in the distressed districts. It will be seen that the total amount delivered up to the 15th of March was 203,282 tons:—

Food-grains sent to	In October 1876.	In November 1876.	In December 1876.	In January 1877.	In February 1877.	In March (upto15th.)	Total.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
Southern Mahratta Ports ...	7,675	19,228	17,312	13,459	16,075	8,959	82,708
South-Eastern line, from Poona to Sholapur ...	11,683	30,014	25,498	15,471	12,477	6,711	101,854
North-Eastern line, from Násik to Buhsawul ...	4,447	4,776	3,606	1,615	2,622	1,654	18,720
Total ...	23,805	54,018	46,416	30,545	31,174	17,324	203,282

10. On the whole, the grain supply continues abundant, and the transference of the relief labourers to the Public Works Department works is making very satisfactory progress.

M. K. KENNEDY, *Major-General, R. E.,*

Secretary to Government.

NOTE.—The totals are not invariably the sum of the men, women and children, as in a few returns these particulars have not been given, the total number of labourers alone having been entered.
These figures are for the nine distressed districts only. The people upon relief works in Ratnagiri and Kanara are shown in Table A.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE, AGRICULTURE, AND COMMERCE.

RELIEF REPORTS FOR THE WEEK ENDING 17th MARCH 1877.

Proceedings of the Board of Revenue, dated 23rd March 1877.

The Board submit to Government the relief reports for the week ending 17th March. Statements and maps as noted marginally accompany. No report has been received from South Arcot, and telegrams only from Kurnool and Kistna as usual.

1. District Average prices.
2. „ Relief return.
3. Taluq „
4. Classification of outlay

Maps—Madura, Chingleput, Nellore, Bellary, Salem, Coimbatore, Cuddapah.

2. *Prices.*—There is scarcely any change, and prices may be said to be stationary. Rice has fallen slightly in Madura, probably owing to importation, and rice and cholum are cheaper in Salem. The very high prices noted last week in the Darampury taluq in the latter district continue. They are attributed to short imports. Prices in Kurnool have again stiffened.

3. *Rainfall.*—Rain, which has been most welcome, has fallen in every district from which report has been received, except Chingleput. The rain appears to have come from the westward, and fell in the three southern taluqs of Bellary (from ·8 to 1·5 inch), and slightly in Anantapur; in the north-western parts of North Arcot; in all the taluqs of the Cuddapah District; in Kurnool and Kistna; and in those taluqs of the Nellore District which lie under the hills; but the rain did not reach the coast. It was heaviest in Punganoor (2 inches) and Palmanair (1 inch) of North Arcot; and in the Cuddapah District, in Kadiri (3·75), Pulivendala (2·15), and along the Pennair Valley in Cuddapah and Sidhout. The Pennair had a good fresh, and was 2 feet over the annicut at Nellore for some hours.

4. There was a separate belt of rainfall in the southern districts. In Tinnevelly there was a general fall of about 2 inches; in Madura rain fell in all taluqs except Ramnad, but was heaviest in Melur (1·35), Palin (2·0), and Periyakolam (2·2), and the Board have been informed that 9 inches were registered on the Palni hills, which drain into the two last-mentioned taluqs, where many tanks have been filled. The line of rainfall passed from Madura, through the two western taluqs of Trichinopoly, into the south and east of the Salem District (Namkul ·9, Salem 2·25, Trichengode 4 inches); but the rain did not enter the Salem Subdivision, turning west again into the Bhowany (2·4 inches), and Collegal (1·0) taluqs of Coimbatore. There was from ¼ to ½ an inch over the southern and central taluqs of Coimbatore, and a good fall on the Nilgiris.

5. This rainfall cannot much affect cultivation, except, perhaps, the hot-weather well crops in the south, or prices; but must do much to mitigate anxiety as to water-supply, and will start some herbage, especially on the hills, for the cattle to feed on for a time.

6. *Grants and Outlay.*—The grants to the 17th March for works and gratuitous relief were Rs. 1,00,60,283; against this have been spent Rs. 91,75,156. The following is the usual summary of Statement No. 4:—

Classification of outlay on works in progress.

ROADS—	In the week.	To the end of the week.
	Rs.	Rs.
New works	1,13,622	28,43,565
Repairs	61,868	7,52,671
	1,75,490	35,96,236
Irrigation works	30,777	4,17,720
Miscellaneous	38,473	4,39,421
	2,44,740	44,53,377

The increasing proportion of outlay on irrigation works and repairs rather than construction of roads is satisfactory.

7. *Numbers on relief works.*—The district totals compare as follow with last week:—

	10th March.	17th March.		
Kistna	2,755	3,439	+	684
Nellore	54,546	39,720	—	14,826
Cuddapah	57,231	56,276	—	955
Bellary	2,18,319	2,30,713	+	12,394
Kurnool	1,91,546	1,92,028	+	482
Chingleput	7,308	6,092	—	1,216
North Arcot	15,109	15,374	+	265
South Arcot	616	...	—	616
Trichinopoly	...	...		...
Madura	6,784	6,274	—	510
Tinnevelly	1,561	1,144	—	417
Coimbatore	24,418	23,476	—	942
Salem	45,346	42,801	—	2,545
	6,25,539	6,17,337	—	8,202
	29,879	30,860	+	981
	655,418	648,197	—	7,221

8. The points for notice are the great decrease in Nellore, notwithstanding that the numbers on the East Coast Canal are nearly stationary and the increase in Bellary. On the former point no explanation is given in the Nellore report. The taluq details are compared in the margin, and it will be seen that though there is a general decline, the decrease is accounted for by a falling off in the taluqs of Kavali and Kanigiri. The Collector will report the cause.

	10th March.	17th March.	
Gudur ...	2,555	1,494	— 1,061
Rapur ...	491	564	+ 73
Nellore ...	1,281	1,562	+ 281
Atmakur ...	5,593	4,626	— 967
Kavali ...	15,587	8,930	— 6,657
Udayagiri ..	10,138	11,095	+ 957
Kandakur ...	7,884	6,350	— 1,534
Kanigiri ...	6,142	1,677	— 4,465
Ongole ...	1,064	760	— 304
Darsi and Podili ...	2,494	1,557	— 937
Venkatagiri ...	1,317	1,105	— 212
	54,546	39,720	— 14,826

9. *Bellary.*—The taluq figures for this district are as follows :—

	10th March.	17th March.	
Adoni	51,776	50,016	— 1,760
Alur	21,914	23,112	+ 1,198
Ghooty	13,513	13,832	+ 319
Tadpatri	8,985	9,470	+ 485
Anantapur	8,083	10,378	+ 2,295
Dharmavaram	3,031	7,247	+ 4,216
Penkenda	2,698	2,777	+ 79
Hindupur	1,408	894	— 514
Madaksira	7,880	6,974	— 906
Raidrug	8,721	8,696	— 25
Bellary	47,116	48,279	+ 1,163
Hospett	3,513	12,867	— 646
Sundoor	1,343	1,362	+ 19
Kudlighi	10,856	10,162	— 694
Harpanhalli	11,298	13,125	+ 1,827
Hadgalli	6,184	11,522	+ 5,338
TOTAL ...	2,18,319	230,713	+ 12,394

there is thus a general tendency to increase in the district, but the increase is very great in Hadgalli, Dharmavaram, and Anantapur. The cause cannot be gathered from the reports. The fall in Madaksira and Hindupur seems attributable to cholera chiefly. The Collector is requested to report why the numbers in Hindupur taluq are so extraordinary low. From remarks in the detailed report it is gathered that the children under seven years of age, who are allowed 3 pies a head, are entered amongst the coolies on some of the works. This is of course wrong; they ought to be entered under gratuitous relief, and the Collector will be instructed accordingly. The fact may explain the increase in numbers in some taluqs.

10. The Cuddapah, details show decrease in Budwail and increase in Voilpaud, but in other taluqs no change of importance. The fall in Chingleput is in the Madurantakun taluq, and seems due to completion of works. In North Arcot and Coimbatore there is nothing particular to note. In Salem the decline occurs in Salem and Trichengode taluqs, and is probably due to the rainfall, which gives hopes of some cultivation under wells.

11. *Rates of wages.*—The scale of wages prescribed in G. O., 31st January, is now reported to be in force everywhere except in the sub-division of Cuddapah, where the old rates of 2 annas, 1 anna 4 pie, and 10 pie are still paid. The Acting Collector will call upon the Sub-Collector to explain at once why the orders of Government have not been carried out.

12. *Gratuitous Relief.*—The numbers in receipt of this form of relief have greatly increased as shown below :—

	10th March.	17th March.	
Kistna	184	397	+ 213
Nellore	5,204	5,595	+ 391
Cuddapah	1,256	2,600	+ 1,344
Bellary	17,575	25,853	+ 8,278
Kurnool	11,233	31,577	+ 20,344
Chingleput	5,666	6,006	+ 340
North Arcot	1,398	1,712	+ 314
Madura	328	537	+ 209
Tinnevelly	272	260	— 12
Coimbatore	1,093	1,759	+ 666
Salem	3,740	5,594	+ 1,854
TOTAL ...	47,949	81,890	+ 33,941

13. The increase is almost entirely due to the inclusion of children under seven, whose parents are on the works. That in Kurnool is very great; and 28,000 of the total in the district are due to this cause. This is 15 per cent. of the number on the works; and as, according to the census, children under six in that district are 20 per cent. of the population, considerable further increase is to be anticipated. Some portion of the increased numbers is due to the operation of the orders of Government regarding village inspection and relief.

14. The details of total outlay are as follows :—

	In the week.	Up to the week.
Relief works	3,92,129	88,74,011
Gratuitous relief	20,093	3,01,145
	4,12,222	91,75,156

The grants sanctioned by the Board to date amount to Rs. 1,02,41,493.

15. The following statement shows advances made under the Land Improvement Act :—

	In the week.	Up to the week.
Nellore	...	12,846
Cuddapah	2,249	22,009
Bellary	...	1,270
Tinnevelly	6,445	14,175
Salem	50	50
	8,744	50,350

16. The Special Establishments entertained for relief purposes are as follows according to the most recent returns :—

	Relief.		Wages.		Accounts.		Total.		Superior Officers included.	
	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.	Number.	Monthly pay.
		Rs.		Rs.		Rs.		Rs.		Rs.
Cuddapah ...	247	10,578	68	723	100	1,138	415	12,439	15	7,971

Total ...	2,059	60,602	396	4,947	422	5,408	2,877	70,957	55	27,290

17. In Madras Town there were 9,454 resident and 12,362 non-resident paupers on the average relieved daily. There were 628 in hospital on the 17th, and 142 died in the week, of whom 125 were in hospital. The outlay by the Commissioner of Police was in the week Rs. 21,933, and up to the week Rs. 2,78,159.

GOVERNM

DEPARTMENT OF REVEN

STATEMENT REGARDING THE CONDITION OF THE PROVI

DIVISIONS AND DISTRICTS.	Area in square miles.	Affected area in square miles.	Population.	Population of the affected area.	Condition of Districts as reported.	No. and description works in progress Revenue Office: Roads.	Tanks.	Miscellaneous works.
1	2	3	4	5	6	7		
Nundydroog. Bangalore	2,914	1,914	828,351	384,968	*Bangalore District.*—Markets moderately supplied, except in the Kankanhalli and Anekal taluks, where importation is slack, owing possibly to prevalence of cholera, and prices have slightly risen in some localities. Javari and Bengal gram sown in beds of tanks, sugarcane, irrigated ragi and potatoes are in tolerably good condition. Paddy is doing well in Hoskote and Davanhalli. No rain, except in the Dodballapur and Nelamangala taluks, where 40 and 50 cents were ganged respectively. Emigrants are returning in gangs and flocking into the large towns. Cholera prevails throughout the district, as also smallpox, fever and dysentery in some parts. Scarcity of water is severely felt almost everywhere. Murrain continues to prevail among cattle.	66	66	183
Kolar ...	2,577	2,577	618,954	618,954	*Kolar District.*—Markets fairly supplied, except in the Gudibanda and Gummayakanpalya taluks. Importation by rail at Kolar station has fallen off. No rain, except a slight drizzle at Chikballapur. Cholera is more or less prevalent in all the taluks, and fever and dysentery at Chikballapur; an insufficient supply of water is procured from wells with much difficulty; cattle suffer from want of fodder. Bengal gram, javari, sugarcane and ragi are thriving, and in some places the crops are being harvested. Price of ragi has slightly fallen.	37	189	86
Túmkúr ...	3,606	3,606	632,239	632,239	*Túmkúr District.*—Markets sufficiently supplied, except in the Maddagiri taluk; slight drizzling rain fell in the Koratagere and Kunigal taluks, but the scarcity of water is felt everywhere, more particularly so in the Chiknayakanhalli taluk. Cholera prevails in all the taluks, except Tumkúr, Sira and Kunigal; small-pox also in Kadaba. Emigrants are returning. The mortality among the poorer kind of cattle has been great. Javari and Bengal gram are thriving in the Tumkúr and Maddagiri taluks, but they are withering in Kadaba. The wheat crop in Maddagiri promises fairly. Sugarcane mills are at work in the Kunigal taluk. The cocoanut and arecanut gardens in the Chiknayakanhalli taluk are suffering much from want of moisture.	66	221	38
Astagram. Mysore ...	4,127	1,470	913,187	118,432	*Mysore District.*—Markets fairly supplied. Slight drizzle at Mysore, and in parts of the Periyapatna, Yedatore, Heggaddevankote and Gundlupet taluks, about 80 cents of rain fell in and about Nanjangúd. Those subsisting on bamboo rice are reported to be suffering from a dysenteric affection, and others who obtain a bare subsistence on unwholesome food also suffer in this way. The condition of the district remains much as it was as per last return.	22	17	2
Hassan ...	3,291	2,151	668,117	190,873	*Hassan District.*—Markets sufficiently supplied, except in Manjarabad, Arkulgúd, Channarayapatna and Nagamangala. This is probably due to the prevalence of cholera there. More than 1 inch of rain fell in some villages of the Arkalgúd taluk; 35 cents at Saklespur, and 5 cents at Hassan. There was a slight drizzle, too, in the Belur and Channarayapatna taluks. Sugarcane and Bengal gram in the taluk of Hassan, and paddy in Manjarabad, are drooping, as are also the areca and cocoanut palms in Harnhálli. Sugarcane in Attikuppa is in fair condition. In the Harnhalli and Hassan taluks there was a slight fall in prices. Cholera more or less throughout the district.	20	37	
Nagar. Shimoga...	3,797	388	498,976	47,431	*Shimoga District.*—Markets moderately supplied. There was a slight drizzle in the Channagiri taluk; rabi paddy in fair condition; cholera is still prevalent in some localities.	10	12	
Kadur ...	2,294	691	333,925	100,444	*Kadur District.*—Markets fairly supplied; 15 cents of rain fell at Chikmagalur, and 20 cents in the Tarikere taluk. Sugarcane and Bengal gram are being harvested, but in Tarikere taluk the crops are in a very drooping condition. Murrain among cattle continues, and they suffer much from want of fodder. Cholera, fever and small-pox prevail. Scarcity of water is much felt.	16	24	
Chitaldroog	4,471	4,238	531,360	511,201	*Chitaldroog District.*—Markets generally fairly supplied, but in some taluks the imports fell off. With the exception of parts of the Chitaldroog, Doddéri and Hosdurga taluks, the crops that it has been found possible to cultivate are in fair condition. There was a slight drizzle in some villages of the Kankuppa taluk: with this exception there has been no rain. Cholera prevails in all the taluks; small-pox also at Chitaldroog. The great want is water.	25	67

GENERAL REMARKS.

The condition of the province remains nearly the same as in the preceding report, but there are reasonable grounds for hope that some slight amelioration may be expected. Should the partial rains that have fallen during the current week be followed by a heavier general downfall, of which there is some indication, the numbers that it was originally estimated would have to be relieved in May and July may be considerably reduced. In the Nundydroog Division there has been drizzling rain and a few good showers in several taluks of each of the three districts, and in one some slight storage of water. Colonel Pearse writes somewhat hopefully of the prospect, and states, "Slight rain has fallen in several taluks, and I am in great hopes of a good downpour; if it comes, I feel certain, it will put the people in heart, and reduce our expenditure most materially."

From the Ashtagram Division a similar report has been received. In the two taluks of Periapatna and Yedatore, which, with Mandya and Harnhalli, were reported by Colonel Hay to be more severely famine-stricken than the rest, there have been showers, and heavier rain in Nanjangúd, Manjarabad, Belur and Arsikalgúd. In the Nagar Division the rain apparently has been lighter and more partial; the expectancy of rain on the part of the agricultural population still confidently continues, and the preparations to meet the expected change are being most assiduously carried on. A noticeable feature in the collection of manure for their fields is, that the silt from the dry beds of the tanks is being largely made use of to supplement the ordinary kinds. Buchanan, in his "Journey through Mysore," calls attention to the careful way in which they collect and apply manure, and his observations are strongly corroborated in the present crisis. No rain was registered at the Observatory at Bangalore, but there has been much atmospheric disturbance, and, for the season of the year, unusual variableness in the direction of the wind, together with other signs indicative of a welcome change in the weather. Cholera still continues with scarcely abated intensity, but it is believed that the next week's returns will show that it is on the decline. On the cessation of the visitation, a chart will be drawn up for submission to Government, showing its rise, progress, culmination and decline, and a comparison with the outbreak that occurred in 1866 under somewhat similar conditions. The number of deaths for the week ending 8th March 1877 was 3,247, as below :—
